AAS/N0501: Take action to deal with incidents, accidents and emergencies in the aviation security environment

Description

This unit is about ensuring health and safety in work environment and dealing with incidents and emergencies. Identifying hazards, assessing and managing risks to limit the danger to ones self and others and damage to property

Scope

The scope covers the following :

- Recognizing and evaluating potential hazards and emergency situations such as fires, electrical failures, chemical spills, or medical emergencies.
- Following organizational procedures and legal regulations to respond to incidents, accidents, and emergencies.
- Implementing preventive and protective measures to reduce the likelihood or severity of harm.
- Coordinating with internal teams and external emergency services as needed.
- Communicating clearly and responsibly with all stakeholders during and after incidents.
- Keeping accurate records of actions taken to ensure compliance and support continuous improvement in safety protocols.

Elements and Performance Criteria

Take action to deal with incidents, accidents and emergencies

To be competent, the user/individual on the job must be able to:

- PC1.** assess the probability and severity of emergency situations
- PC2.** take action to deal with emergencies, incidents or accidents in line with its organisations procedures and regulatory guidelines
- PC3.** make sure the action planned does not increase the risk or threat to oneself and others
- PC4.** consider the needs of others when taking action
- PC5.** keep all the relevant and appropriate person(s) informed on action taken in line with organisations procedures
- PC6.** get help from the appropriate sources in situation that are outside your own authority or ability
- PC7.** document all actions taken to mitigate risks/ emergencies in line with organisation procedures and regulatory guidelines

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** organisations procedures for dealing with and reporting emergencies, incidents or accidents
- KU2.** legal responsibilities when dealing with emergencies, incidents or accidents

Qualification Pack

- KU3.** the possible emergencies, incidents or accidents an individual may have to deal with or advise colleagues on how to deal with for evacuation, passenger behaviour, illness or death, stolen property, suspect or unclaimed baggage, suspicious items, natural disasters, fires and security alerts including terrorist threats
- KU4.** action that can be taken and the authority matrix
- KU5.** how to take actions to deal with emergencies, incidents or accidents
- KU6.** how to reduce as far as possible any possible risks in typical travel related emergencies, incidents or accidents
- KU7.** effect on customer service and goodwill in emergencies, incidents or accidents

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write in English language a brief and concise report on the emergency and its handling
- GS2.** read and understand the organisations policies & procedures
- GS3.** communicate clearly with supervisors and peers
- GS4.** communicate with passengers in a courteous manner
- GS5.** regularly communicate with all employees in the chain of activities to ensure activities are running smoothly
- GS6.** share best practices with peers and subordinates
- GS7.** initiate action to mitigate an emergent risk/ emergency situation
- GS8.** monitor efficient functioning of all activities
- GS9.** plan and organise work to achieve targets and deadlines
- GS10.** communicate with passengers and other stakeholders in a courteous manner
- GS11.** maintain cordial work relationship
- GS12.** identify trends/common causes for errors and suggest possible solutions to the supervisor / management
- GS13.** identify and correct errors
- GS14.** analyse best possible solutions (cost, time, effort, etc.) suited for
- GS15.** concentrate on task at hand and complete it without errors
- GS16.** apply balanced judgments to different situations

AAS/N0604: Secure the entry to aircraft when aircraft is on ground

Description

This unit is about securing the entry of man and material to the aircraft when the aircraft is on ground

Scope

The scope covers the following :

- Control access to allow only authorized individuals.
- Frisk personnel to prevent restricted items movement.
- Verify credentials to avoid unlawful interference

Elements and Performance Criteria

Secure the aircraft

To be competent, the user/individual on the job must be able to:

- PC1.** perform visual check of the aircraft cabin before passenger boarding to ensure that there are no restricted items left unattended inside the aircraft.
- PC2.** perform visual check of the aircraft post deplaning of the passengers to ensure no items have been left behind by any passengers inside the aircraft
- PC3.** perform visual check of the aircraft post cleaning to ensure that no restricted item or unclaimed items are on board the aircraft post the disembarkation of cleaners.
- PC4.** receive and check the catering documents provided by the catering service provider
- PC5.** perform check to verify that the catering is as per documents submitted by the catering supplier and no tampering has occurred with the catering units by comparing the catering seal(s).
- PC6.** perform visual check of the boarding cards of the passengers on board the aircraft (for transit flights) to ensure that the passenger is a bonafide passenger to undertake the next leg of the journey on the aircraft.
- PC7.** perform visual reconciliation of on-board cabin baggage by identification of the owner of the baggage (for a transit flight) to ensure that on-board cabin baggage is owned by a bonafide passenger on the aircraft.
- PC8.** ensure identified on-board bag(s) have been marked in compliance with regulatory and organisation procedures.

Secure the entry of passengers into the aircraft

To be competent, the user/individual on the job must be able to:

- PC9.** perform a physical check of the boarding pass of each passenger to verify that the passenger is holding a valid boarding pass to enter the aircraft
- PC10.** perform a visual check of the hand baggage tags affixed on the handbags of a passenger to verify that the hand baggage has been tagged appropriately
- PC11.** take decisions to withhold any passenger(s) and or his hand baggage in case of any suspicion of a possible act of unlawful interference

Secure the entry of bonafide employees into the aircraft

Qualification Pack

To be competent, the user/individual on the job must be able to:

- PC12.** guard the entry into the aircraft at the points of boarding and loading
- PC13.** verify the bonafide credentials of the employee seeking entry into the aircraft
- PC14.** update the security log book as per organisational and regulatory policies with details of every person entering the aircraft along with the signature of personnel
- PC15.** frisk the employee entering the aircraft through the passenger door to ensure that the employee is not carrying any restricted items on himself/herself.
- PC16.** frisk the employee entering the aircraft through the baggage or cargo loading doors of the aircraft to ensure that the employee is not carrying any restricted items on himself/herself
- PC17.** frisk every employee exiting the aircraft through the passenger door to ensure that the employee has not taken any restricted property from the aircraft
- PC18.** frisk every employee exiting the aircraft through the baggage or cargo loading doors of the aircraft to ensure that the employee has not taken any restricted property from the aircraft.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** organisation security policies and procedures
- KU2.** organisation turnaround procedures
- KU3.** aircraft design and access doors of an aircraft
- KU4.** information on boarding cards to identify bonafide passenger
- KU5.** regulatory security policies and procedures
- KU6.** frisking procedure
- KU7.** additional security measures to be implemented during emergency situations as defined by regulatory guidelines
- KU8.** performance of anti-sabotage check

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** effect log book entries and anti-sabotage check sheet
- GS2.** write any report required by management
- GS3.** read and understand the organisation policies & procedures
- GS4.** communicate clearly with supervisors, peers and passengers
- GS5.** regularly communicate with all employees in the chain of activities to ensure activities are running smoothly
- GS6.** share best practices with peers and subordinates
- GS7.** identify prohibited/suspect items and take action in line with organisation procedure
- GS8.** identify suspect passengers and take action in line with organisation procedure
- GS9.** monitor efficient functioning of all activities
- GS10.** plan and organise work to achieve targets and deadlines

Qualification Pack

- GS11.** communicate with passengers in a clear and concise manner
- GS12.** identify trends/common causes for errors and suggest possible solutions to the supervisor / management
- GS13.** identify and correct errors
- GS14.** analyse best possible solutions
- GS15.** concentrate on task at hand and complete it without errors
- GS16.** apply balanced judgments to different situations

AAS/N0643: Ensure Effective Threat Assessment and Response Capability

Description

This unit addresses the advanced competencies required to conduct comprehensive threat assessments and implement timely, effective responses. It focuses on identifying potential risks, assessing their impact, coordinating resources for mitigation, and maintaining operational security in alignment with aviation standards and best practices.

Scope

The scope covers the following :

- Identify and assess threats
- Develop and implement mitigation strategies
- Respond effectively to security incidents
- Ensure compliance

Elements and Performance Criteria

Conduct Threat Identification and Assessment

To be competent, the user/individual on the job must be able to:

- PC1.** Regularly evaluate potential threats to the airport environment, including physical, operational, and cyber risks.
- PC2.** Analyze intelligence from internal and external sources to identify emerging threats.
- PC3.** Classify and prioritize risks based on their severity, likelihood, and impact on operations.
- PC4.** Document and update threat profiles to ensure comprehensive situational awareness.

Develop Threat Mitigation Strategies

To be competent, the user/individual on the job must be able to:

- PC5.** Design and implement countermeasures to address identified threats effectively.
- PC6.** Coordinate with relevant stakeholders to align mitigation strategies with operational objectives.
- PC7.** Ensure security personnel are trained in recognizing and responding to specific threat scenarios.
- PC8.** Test and refine mitigation plans through regular drills and simulations.

Respond to Threats and Incidents

To be competent, the user/individual on the job must be able to:

- PC9.** Activate appropriate response protocols upon identification of a credible threat.
- PC10.** Communicate threat details promptly to relevant personnel and stakeholders.
- PC11.** Minimize operational disruptions while ensuring passenger and staff safety during threat response.
- PC12.** Evaluate the effectiveness of the response and incorporate lessons learned into future planning

Monitor and Update Risk Management Practices

Qualification Pack

To be competent, the user/individual on the job must be able to:

PC13. Continuously monitor changes in the threat landscape to identify new vulnerabilities.

PC14. Update risk management policies to reflect technological advancements and evolving threats.

PC15. Conduct periodic reviews and audits to ensure alignment with regulatory standards and organizational goals.

Maintain Stakeholder Coordination and Communication

To be competent, the user/individual on the job must be able to:

PC16. Foster collaborative relationships with law enforcement, regulatory bodies, and intelligence agencies.

PC17. Provide clear and timely updates on threat assessments and response actions to senior management.

PC18. Address passenger concerns related to potential threats in a professional manner.

Ensure Compliance and Preparedness

To be competent, the user/individual on the job must be able to:

PC19. Stay informed about international and national security guidelines (e.g., ICAO, TSA, BCAS).

PC20. Ensure threat assessment and response activities comply with applicable laws and standards.

PC21. Maintain readiness through periodic training and readiness exercises.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. Principles and techniques of risk assessment and management.

KU2. Methods for evaluating physical, operational, and cyber threats

KU3. Understanding of airport-specific vulnerabilities and threat dynamics.

KU4. Awareness of aviation security guidelines, such as ICAO Annex 17 and TSA regulations.

KU5. Familiarity with organizational policies related to threat management and reporting.

KU6. Procedures for engaging in law enforcement and emergency services.

KU7. Best practices for minimizing disruptions during threat responses.

KU8. Strategies for post-incident evaluation and protocol updates.

KU9. Use of advanced surveillance systems, threat detection tools, and data analysis software

KU10. Cybersecurity measures to protect against data breaches and digital threats

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. Analyze threat intelligence and identify critical patterns

GS2. Make informed decisions under pressure to ensure effective threat response.

GS3. Deliver clear instructions and updates to stakeholders during critical situations.

GS4. Foster teamwork and maintain alignment among security personnel

Qualification Pack

- GS5.** Develop and implement effective threat mitigation strategies.
- GS6.** Resolve security challenges with innovative solutions.
- GS7.** Monitor security systems to identify vulnerabilities proactively.
- GS8.** Lead teams during incident responses, ensuring swift and effective action.
- GS9.** Conduct regular audits to ensure adherence to security protocols.
- GS10.** Update threat assessment practices based on emerging trends and feedback.

AAS/N0644: Oversee Security Operations at Airport

Description

This unit addresses the advanced competencies required to Assist the airport security operations. It focuses on the implementation of robust security measures, the efficient management of resources, incident handling, compliance with international and local aviation security standards, and ensuring a secure environment for passengers, staff, and property.

Scope

The scope covers the following :

- Supervise day-to-day airport security functions
- Handle security breaches and coordinate incident response
- Ensure regulatory compliance
- Conduct risk assessments and maintain contingency plans

Elements and Performance Criteria

Supervise Airport Security Systems and Operations

To be competent, the user/individual on the job must be able to:

- PC1.** Oversee the daily functioning of airport security systems and checkpoints, ensuring smooth and effective operations.
- PC2.** Regularly inspect and verify that all security measures, including surveillance, baggage checks, and access controls, meet organizational and regulatory requirements.
- PC3.** Identify vulnerabilities in security protocols and implement necessary corrective measures.
- PC4.** Ensure proper deployment and functioning of security equipment, such as X-ray machines, biometric scanners, and CCTV.

Manage Security Personnel

To be competent, the user/individual on the job must be able to:

- PC5.** Assign duties and responsibilities to security personnel based on operational needs.
- PC6.** Provide training and mentoring to team members to ensure they are well-prepared to handle security challenges.
- PC7.** Monitor the performance of staff and enforce adherence to organizational security policies.
- PC8.** Monitor the performance of staff and enforce adherence to organizational security policies.

Handle Security Breaches and Incidents

To be competent, the user/individual on the job must be able to:

- PC9.** Respond promptly to any breaches or threats, ensuring minimal disruption to airport operations.
- PC10.** Coordinate with internal and external stakeholders, including law enforcement, customs, and emergency services, during incidents.
- PC11.** Evaluate the effectiveness of the response to incidents and update protocols as needed.
- PC12.** Maintain a thorough record of incidents, actions taken, and outcomes for future reference and compliance audits.

Qualification Pack

Ensure Compliance with Regulations

To be competent, the user/individual on the job must be able to:

- PC13.** Stay updated on international, national, and local aviation security guidelines (e.g., ICAO, TSA, BCAS).
- PC14.** Conduct routine audits and inspections to ensure compliance with all applicable regulations.
- PC15.** Implement recommendations from regulatory bodies and update security protocols accordingly.

Maintain Communication and Stakeholder Engagement

To be competent, the user/individual on the job must be able to:

- PC16.** Communicate effectively with airline representatives, ground staff, and regulatory authorities regarding security operations.
- PC17.** Address passenger concerns regarding security measures in a professional and courteous manner.
- PC18.** Provide regular updates to senior management on security operations and performance metrics.

Risk Mitigation and Contingency Planning

To be competent, the user/individual on the job must be able to:

- PC19.** Conduct risk assessments to identify potential threats and vulnerabilities at the airport.
- PC20.** Develop and implement contingency plans to address emergencies such as security alerts, natural disasters, or system failures.
- PC21.** Regularly review and update contingency plans based on emerging risks and feedback from drills and audits.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Knowledge of national and international aviation security regulations (e.g., ICAO Annex 17, TSA guidelines, BCAS).
- KU2.** Organizational policies related to security operations, incident reporting, and emergency response
- KU3.** Familiarity with airport security zones, restricted areas, and access control measures.
- KU4.** Understanding of advanced security technologies, such as AI-based surveillance systems and explosive detection equipment.
- KU5.** Best practices for passenger and baggage screening, access control, and perimeter security.
- KU6.** Cybersecurity protocols to protect sensitive airport and passenger data.
- KU7.** Techniques for identifying and mitigating threats to airport security.
- KU8.** Procedures for coordinating with law enforcement and emergency services during crises.
- KU9.** Methods for conducting post-incident analyses to improve future responses
- KU10.** Balancing security measures with customer service to maintain passenger goodwill.
- KU11.** Effective communication strategies for engaging with stakeholders during routine and critical operations

Generic Skills (GS)

Qualification Pack

User/individual on the job needs to know how to:

- GS1.** Analyze complex scenarios and devise strategic solutions for operational challenges.
- GS2.** Prioritize tasks and allocate resources to achieve operational efficiency.
- GS3.** Deliver clear instructions and updates to staff and stakeholders.
- GS4.** Build and maintain strong relationships with airline representatives, regulatory bodies, and passengers.
- GS5.** Train and mentor staff to align their performance with organizational goals.
- GS6.** Identify trends and potential security risks, and proactively implement preventive measures.
- GS7.** Apply critical thinking to resolve issues effectively under time constraints.
- GS8.** Monitor the functionality of all security systems and ensure quick resolution of technical faults
- GS9.** Conduct routine reviews to enhance operational efficiency and ensure alignment with evolving security needs.
- GS10.** Stay calm and decisive under pressure to lead teams during critical incidents.
- GS11.** Implement emergency response protocols efficiently and assess their outcomes for improvement.

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Qualification Pack

Minimum Aggregate Passing % at QP Level : 60

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Assessment Weightage

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
