AAS/Q0602: Airline Ramp Executive

Brief Job Description

Airline Ramp Executive coordinates information and turnaround of an aircraft (arrival and departure).

Personal Attributes

The individual on the job should have the ability to think logically, good listening and questioning skills and attention to detail and ability to prioritise workload.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [AAS/N0702: Operate a vehicle airside](#)
2. [AAS/N0601: Prepare for aircraft arrival](#)

AAS/N0702: Operate a vehicle airside

Description

This unit is about driving safely on the airfield in a controlled manner, following airside signage/ markings and driving regulations

Elements and Performance Criteria

Prepare a vehicle for airside use

To be competent, the user/individual on the job must be able to:

- PC1.** make sure that airside driving authorisation/ license is appropriate to the vehicle
- PC2.** confirm that the vehicle is lit and marked according to airside driving requirements
- PC3.** complete documents relating to using the vehicle in line with the organisation procedures

Manoeuvre a vehicle airside

To be competent, the user/individual on the job must be able to:

- PC4.** manoeuvre the vehicle in a controlled manner in all conditions
- PC5.** park the vehicle safely in appropriate areas in line with organisation procedures
- PC6.** follow airside signage/ markings
- PC7.** give priority to moving aircraft at all times
- PC8.** maintain a safe distance between the vehicle and aircraft at all time as defined by regulatory guidelines
- PC9.** make sure that all doors and shutters (where relevant) are closed while driving the vehicle
- PC10.** reverse the vehicle according to organisational and regulatory guidelines
- PC11.** be constantly vigilant when driving

Maintain procedures and practices which contribute to safety of airside traffic and apron operations

To be competent, the user/individual on the job must be able to:

- PC12.** wear appropriate Personal Protective Equipment (PPE) while driving
- PC13.** secure vehicle loads in line with the organisation procedures
- PC14.** carry an airside driving pass or license in line with the organisation procedures and regulatory guidelines
- PC15.** take appropriate remedial action when foreign object debris (FOD) or spillage is seen on the airfield/apron
- PC16.** report dangerous or unsafe practices to appropriate authority
- PC17.** get rid of all waste products in line with the organisation procedures and regulatory guidelines
- PC18.** provide unhindered access for emergency services at all times

Comply with airside accident, hazard and emergency procedures

To be competent, the user/individual on the job must be able to:

- PC19.** report all airside accidents and emergencies in line with organisation procedures and regulatory guidelines
- PC20.** respond to airside accidents and emergencies in line with organisation procedures and regulatory guidelines

Qualification Pack

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** organisation safety policy and procedures; basic compliance to technical requirements and standards; safety and hazards
- KU2.** organisation structure
- KU3.** escalation procedure
- KU4.** organisation and regulatory procedures as they may apply to airside operations.
- KU5.** airside safety instruction
- KU6.** airside safety areas (roads, manoeuvring areas, stands) in relation to license categories
- KU7.** airside signs and markings
- KU8.** aircraft crossing points
- KU9.** airport and stand layout
- KU10.** speed limits
- KU11.** airside parking regulations
- KU12.** regulations concerning reversing
- KU13.** low visibility notification and operating procedures
- KU14.** the effect that poor weather conditions including snow and ice, high winds, rain/surface water, lightning and heat on driving airside

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** complete documents related to use of vehicle
- GS2.** interpret airport and stand layout
- GS3.** read airside safety instructions
- GS4.** read airside parking regulations
- GS5.** communicate clearly with supervisors and peers
- GS6.** regularly communicate with all employees in the chain of activities to ensure efficient operations
- GS7.** share best practices with peers and subordinates
- GS8.** understand types of faults occurring and how to deal with it
- GS9.** monitor efficient functioning of all activities
- GS10.** prioritize and execute tasks in within the scheduled time limits
- GS11.** identify trends/common causes for errors and suggest possible solutions to the supervisor / management
- GS12.** identify and correct errors
- GS13.** take the most appropriate remedial action when hazards are identified on the airfield
- GS14.** concentrate on the task at hand and complete it without errors

Qualification Pack

AAS/N0601: Prepare for aircraft arrival

Description

This unit covers the essential tasks involved in preparing for the arrival of an aircraft at the airport. It includes gathering flight and operational details, conducting safety checks, ensuring required equipment and manpower are in place, and coordinating with various stakeholders to enable a smooth and safe aircraft turnaround process.

Scope

The scope covers the following :

- Gather aircraft arrival details, special requirements, and load information.
- Conduct FOD checks to ensure a debris-free and safe parking bay.
- Confirm docking system (VDGS) alignment with aircraft type.
- Ensure all required personnel and equipment are available and ready

Elements and Performance Criteria

Prepare for aircraft arrival

To be competent, the user/individual on the job must be able to:

- PC1.** gather information about incoming aircraft from various stakeholders encompassing information of parking bay assigned, any special requirements such as ambulift or wheelchairs, the incoming load of passengers and cargo and mail on the flight
- PC2.** perform a visual FOD (Foreign Object Debris) check of the proposed parking bay for the aircraft to ensure the parking area of the aircraft is free from any debris or loose object or an obstacle which can damage the aircraft
- PC3.** ensure that the aircraft type selected in the VDGS matches the aircraft type incoming on the parking bay in case of visual docking guidance system (VDGS)
- PC4.** ensure that all equipment and manpower including engineering technicians, loaders, cleaners, drivers are available at the parking bay of the aircraft as per the operational standards set by the organisation
- PC5.** coordinate as a single point of contact for various stakeholders during aircraft turnaround to provide status and information as requested by each stakeholder
- PC6.** comply with all relevant departmental policies, processes, standard operating procedures and instructions so that work is carried out in a controlled and consistent manner
- PC7.** comply with relevant safety, quality and environmental management policies, SOPs and controls to ensure a healthy and safe work environment
- PC8.** discuss safety concerns openly and report them to the relevant supervisor

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** communication systems, channels and procedures

Qualification Pack

- KU2.** policies and procedures relating to aircraft arrival
- KU3.** baggage, load and mail unloading procedures
- KU4.** procedures for preparing the stand/gate
- KU5.** passenger de-boarding and boarding procedures
- KU6.** procedures for identifying, allocating and communicating departure delays
- KU7.** knowledge/understanding of the basics of theory of flight and the limitations that apply
- KU8.** aviation terminology and airport codes
- KU9.** standard ground times and minimum ground times, airline precision time schedules, standard turnaround plan for airline/aircraft
- KU10.** standard movement messages to include movement, load messages and passenger service messages; and how to interpret them
- KU11.** Ground Service Equipment (GSE) requirements for the aircraft
- KU12.** safe working practices on the ramp
- KU13.** personal protective equipment required when working on the ramp
- KU14.** time management
- KU15.** airline or airport procedures to adopt whilst fuelling is taking place
- KU16.** knowledge of the impact of adverse weather (high winds, icing conditions, lightning etc.) and actions to take for safe working and departure
- KU17.** procedures for loading bulk and containers and the potential effects of incorrect loading
- KU18.** procedures for checking the aircraft mass and balance documents to ensure that the aircraft limitations are not exceeded
- KU19.** procedures for checking the packing and loading of dangerous goods, restricted articles and special cargo; including passenger mobility aids and live animals
- KU20.** procedures for reporting incident/accidents/unsafe acts/near misses/breaches of security and Mandatory Occurrence Reports

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** fill any forms related to aircraft arrival
- GS2.** complete all relevant documents in line with organisation requirements
- GS3.** read and understand organisation procedure and policies
- GS4.** read and understand loading instructions
- GS5.** communicate clearly with supervisors and peers
- GS6.** regularly communicate with all employees in the chain of activities to ensure activities are running smoothly
- GS7.** share best practices with peers and subordinates
- GS8.** coordinate information and prepare for aircraft arrival, turnaround of aircraft on stand
- GS9.** check compliance with organisation procedures
- GS10.** monitor efficient functioning of all activities
- GS11.** prioritise and execute tasks within the scheduled time limits

Qualification Pack

- GS12.** identify trends/common causes for errors and suggest possible solutions to the supervisor / management
- GS13.** identify and correct errors
- GS14.** analyse on best possible solutions (cost, time, effort, etc.) suited for operational requirement
- GS15.** concentrate on task at hand and complete it without errors

AAS/N0605: Manage turnaround of aircraft at ramp

Description

This unit focuses on the complete coordination and management of aircraft turnaround operations at the ramp. It includes preparing for arrival, coordinating services on the ground, managing communication between stakeholders, verifying loading and documentation, and ensuring safe and timely departure.

Scope

The scope covers the following :

- Coordinate all ramp activities to ensure safe and on-time aircraft departure.
- Monitor, record, and manage revised ETDs and ground time delays.
- Communicate and coordinate with crew, ramp staff, and service providers.
- Verify load, passenger boarding, and all departure documentation.

Elements and Performance Criteria

Co-ordinate the turnaround of the aircraft on stand

To be competent, the user/individual on the job must be able to:

- PC1.** calculate any revised Estimated Time of Departure (ETD)/Targeted Off Blocks Time (TOBT) using airline ground times when an aircraft is operating off schedule as per your organisation airline procedures
- PC2.** check for problems that could affect the revised ETD as per your organisation procedures
- PC3.** interpret a standard movement message, decode and record on appropriate paperwork in line with organisation procedures for arriving aircraft
- PC4.** collect any special requests from aircraft crew and ensure that these have been passed to the relevant departments as per the organisation procedures
- PC5.** coordinate the progress of all service providers to ensure the scheduled departure time is met safely and efficiently
- PC6.** record deficiencies in the departure process in line with organisation procedures and airline procedures
- PC7.** complete a departure briefing with ramp and passenger staff in line with organisation procedures
- PC8.** complete a departure briefing with aircraft operating flight deck and cabin crew in line with the organisation procedures
- PC9.** complete all relevant documents accurately in line with the organisation procedures and timelines
- PC10.** check and verify the loading and security of load in line with the organisation procedures
- PC11.** check and verify the passengers boarded in line with the organisation procedures
- PC12.** check and verify all relevant aircraft departure documents in line with the organisation procedures and regulatory guidelines
- PC13.** update information relating to the final aircraft load to all necessary stakeholders in line with the organisation procedures

Qualification Pack

- PC14.** confirm and communicate that the aircraft is ready for departure in line with the organisation procedures
- PC15.** record aircraft departure time and communicate to all necessary stakeholders in line with organisation procedures
- PC16.** analyse any departure delay and allocate/recommend responsibility in line with the organisation procedures
- PC17.** process all relevant documents in line with the organisation procedures
- PC18.** act on and report unsafe practices on the ramp in line with organisation procedures
- PC19.** act on and report breaches or potential breaches of security and security access points

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** communication systems, channels and procedures
- KU2.** policies and procedures relating to aircraft arrival
- KU3.** policies and procedures for airline baggage, load and mail unloading and loading
- KU4.** procedures for preparing the stand/gate
- KU5.** passenger boarding procedures
- KU6.** procedures for maintaining communication with other service providers
- KU7.** procedures for identifying, allocating and communicating departure delays
- KU8.** knowledge/understanding of the basics of theory of flight and the limitations that apply
- KU9.** aviation terminology used in daily operations
- KU10.** standard ground times and minimum ground times, airline precision time schedules, standard turnaround plan for airline/aircraft
- KU11.** standard movement messages to include movement, load messages and passenger service messages; and how to interpret them
- KU12.** ground Service Equipment (GSE) requirements of the aircraft
- KU13.** how to interpret and communicate information relating to an
- KU14.** the critical time pathway relating to the departments and organisation involved in the turnaround of aircraft
- KU15.** time management
- KU16.** knowledge of the impact of adverse weather (high winds, icing conditions, lightning etc.) and actions to take for safe working and departure
- KU17.** procedures for checking the packing and loading of dangerous goods, restricted articles and special cargo; including passenger mobility aids and live domestic animals
- KU18.** procedures for reporting incident / accidents / unsafe acts / near misses / breaches of security, Mandatory Occurrence Reports

Generic Skills (GS)

User/individual on the job needs to know how to:

Qualification Pack

- GS1.** fill any forms related to aircraft turnaround
- GS2.** complete all relevant documents in line with organisation requirements
- GS3.** read and understand organisation procedure and policies

AAS/N0501: Take action to deal with incidents, accidents and emergencies in the aviation security environment

Description

This unit is about ensuring health and safety in work environment and dealing with incidents and emergencies. Identifying hazards, assessing and managing risks to limit the danger to ones self and others and damage to property

Scope

The scope covers the following :

- Recognizing and evaluating potential hazards and emergency situations such as fires, electrical failures, chemical spills, or medical emergencies.
- Following organizational procedures and legal regulations to respond to incidents, accidents, and emergencies.
- Implementing preventive and protective measures to reduce the likelihood or severity of harm.
- Coordinating with internal teams and external emergency services as needed.
- Communicating clearly and responsibly with all stakeholders during and after incidents.
- Keeping accurate records of actions taken to ensure compliance and support continuous improvement in safety protocols.

Elements and Performance Criteria

Take action to deal with incidents, accidents and emergencies

To be competent, the user/individual on the job must be able to:

- PC1.** assess the probability and severity of emergency situations
- PC2.** take action to deal with emergencies, incidents or accidents in line with its organisations procedures and regulatory guidelines
- PC3.** make sure the action planned does not increase the risk or threat to oneself and others
- PC4.** consider the needs of others when taking action
- PC5.** keep all the relevant and appropriate person(s) informed on action taken in line with organisations procedures
- PC6.** get help from the appropriate sources in situation that are outside your own authority or ability
- PC7.** document all actions taken to mitigate risks/ emergencies in line with organisation procedures and regulatory guidelines

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** organisations procedures for dealing with and reporting emergencies, incidents or accidents
- KU2.** legal responsibilities when dealing with emergencies, incidents or accidents

Qualification Pack

- KU3.** the possible emergencies, incidents or accidents an individual may have to deal with or advise colleagues on how to deal with for evacuation, passenger behaviour, illness or death, stolen property, suspect or unclaimed baggage, suspicious items, natural disasters, fires and security alerts including terrorist threats
- KU4.** action that can be taken and the authority matrix
- KU5.** how to take actions to deal with emergencies, incidents or accidents
- KU6.** how to reduce as far as possible any possible risks in typical travel related emergencies, incidents or accidents
- KU7.** effect on customer service and goodwill in emergencies, incidents or accidents

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write in English language a brief and concise report on the emergency and its handling
- GS2.** read and understand the organisations policies & procedures
- GS3.** communicate clearly with supervisors and peers
- GS4.** communicate with passengers in a courteous manner
- GS5.** regularly communicate with all employees in the chain of activities to ensure activities are running smoothly
- GS6.** share best practices with peers and subordinates
- GS7.** initiate action to mitigate an emergent risk/ emergency situation
- GS8.** monitor efficient functioning of all activities
- GS9.** plan and organise work to achieve targets and deadlines
- GS10.** communicate with passengers and other stakeholders in a courteous manner
- GS11.** maintain cordial work relationship
- GS12.** identify trends/common causes for errors and suggest possible solutions to the supervisor / management
- GS13.** identify and correct errors
- GS14.** analyse best possible solutions (cost, time, effort, etc.) suited for
- GS15.** concentrate on task at hand and complete it without errors
- GS16.** apply balanced judgments to different situations

AAS/N0646: Overseeing Ramp Baggage and Cargo Operations

Description

This unit focuses on managing and supervising ramp baggage and cargo operations to ensure accurate, secure, and timely loading, unloading, and transportation. It emphasizes coordination with service providers, compliance with safety and regulatory standards, and effective communication across departments to support smooth aircraft turnaround.

Scope

The scope covers the following :

- Oversee accurate and safe loading/unloading of baggage and cargo.
- Coordinate with service providers and ensure use of proper equipment.
- Ensure tagging, tracking, and delivery of baggage/cargo to correct destinations.
- Handle documentation, report irregularities, and comply with safety regulations.

Elements and Performance Criteria

Oversee Baggage and Cargo Handling Operations

To be competent, the user/individual on the job must be able to:

- PC1.** Ensure that all baggage and cargo is correctly loaded and unloaded in line with company policies and procedures.
- PC2.** Coordinate with the ground service providers to ensure the timely and efficient movement of baggage and cargo
- PC3.** Verify that all baggage is correctly tagged and loaded onto the correct flight.
- PC4.** Confirm that cargo is properly secured and complies with safety and regulatory guidelines.
- PC5.** Check that baggage and cargo are handled in a manner that minimizes the risk of damage.
- PC6.** Coordinate with relevant authorities to clear any special cargo and dangerous goods in compliance with regulations.
- PC7.** Monitor and manage the use of ground support equipment (GSE) for baggage and cargo loading and unloading.
- PC8.** Ensure that all cargo and baggage are delivered to the correct destination or warehouse after offloading.
- PC9.** Document any issues or irregularities in baggage or cargo handling and escalate as needed.
- PC10.** Ensure that communication with other departments is maintained to track baggage and cargo movements.

Manage Delays and Irregularities in Baggage and Cargo Handling

To be competent, the user/individual on the job must be able to:

- PC11.** Identify and address any issues causing delays in baggage or cargo handling operations
- PC12.** Coordinate with relevant parties to resolve baggage/cargo discrepancies or delays.
- PC13.** Communicate any delays or issues to flight operations, ground staff, and relevant stakeholders.
- PC14.** Maintain accurate records of baggage or cargo irregularities, delays, and resolutions

Qualification Pack

PC15. Implement corrective actions to avoid future baggage and cargo handling issues.

Ensure Compliance with Safety and Security Regulations

To be competent, the user/individual on the job must be able to:

PC16. Oversee the implementation of safety measures in baggage and cargo handling to prevent accidents or injuries.

PC17. Ensure that all security checks are performed as per regulations for baggage and cargo.

PC18. Report any security breaches or unsafe practices in baggage and cargo operations to the appropriate authorities.

PC19. Ensure that dangerous goods, restricted items, and special cargo are handled according to the regulatory requirements.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. Procedures and regulations for baggage and cargo handling, including dangerous goods and restricted articles.

KU2. Handling requirements for different types of cargo and baggage (e.g., perishable goods, live animals, fragile items).

KU3. The use and maintenance of Ground Service Equipment (GSE) for baggage and cargo operations.

KU4. Procedures for identifying, securing, and storing dangerous goods and special cargo.

KU5. Safety procedures and measures for baggage and cargo operations.

KU6. The importance of accurate documentation for baggage and cargo handling.

KU7. The role of baggage and cargo operations within the overall aircraft turnaround process.

KU8. Communication systems and procedures for coordinating baggage and cargo operations.

KU9. Regulatory requirements for baggage handling, cargo loading, and special cargo transportation.

KU10. Standard and minimum handling times for baggage and cargo to ensure timely operations.

KU11. Procedures for the timely resolution of baggage and cargo discrepancies or delays.

KU12. Handling of unclaimed baggage or misdirected cargo.

KU13. Procedures for the loading and unloading of aircraft, including weight distribution for cargo.

KU14. Weather-related challenges and how they impact baggage and cargo handling.

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. Effectively fill out all forms related to baggage and cargo operations.

GS2. Maintain accurate and timely records for all baggage and cargo operations.

GS3. Understand and implement company policies and procedures related to baggage and cargo handling.

GS4. Communicate clearly and effectively with supervisors, colleagues, and external stakeholders.

Qualification Pack

- GS5.** Coordinate with various departments to ensure smooth baggage and cargo operations.
- GS6.** Monitor the operational efficiency of baggage and cargo handling processes.
- GS7.** Identify trends or common issues in baggage or cargo handling and suggest improvements.
- GS8.** Supervise the correct use of Ground Service Equipment (GSE) and other tools during baggage and cargo operations.
- GS9.** Prioritize tasks to ensure all baggage and cargo are handled within the scheduled timeframe.
- GS10.** Report and correct any discrepancies or irregularities in baggage or cargo handling.
- GS11.** Analyze and solve problems related to baggage and cargo operations (e.g., delays, damage).
- GS12.** Ensure compliance with safety and security protocols during baggage and cargo handling.
- GS13.** Respond to and report safety or security incidents promptly.
- GS14.** Perform risk assessments related to baggage and cargo handling and ensure safe practices are followed.
- GS15.** Remain focused and detail-oriented, ensuring no errors during baggage and cargo operations.

AAS/N0645: Managing and Maintaining Ramp Service Equipment

Description

This unit focuses on the management, maintenance, and operation of ramp service equipment (RSE) used in baggage and cargo handling, aircraft servicing, and other ramp operations. It ensures the proper functioning, safety, and efficiency of equipment while minimizing downtime and operational disruptions.

Scope

The scope covers the following :

- Operation and coordination of RSE for baggage, cargo, and aircraft handling
- Timely maintenance and repair to reduce downtime
- Adherence to safety protocols and regulatory standards
- Documentation, inventory tracking, and reporting of RSE activities

Elements and Performance Criteria

Oversee Ramp Service Equipment Operations

To be competent, the user/individual on the job must be able to:

- PC1.** Ensure all ramp service equipment (RSE) is operated and maintained according to company procedures and safety standards.
- PC2.** Coordinate with ground service providers to ensure the timely availability and use of RSE for ramp operations.
- PC3.** Monitor the performance of RSE to ensure efficient and safe operation.
- PC4.** Ensure RSE is used appropriately for its intended tasks (e.g., pushback tractors, conveyor belts, aircraft tugs).
- PC5.** Inspect equipment regularly for signs of wear or malfunction.
- PC6.** Ensure that RSE is properly cleaned and maintained to ensure longevity and minimize operational failures.
- PC7.** Verify that all required maintenance checks and repairs are performed in a timely manner.
- PC8.** Ensure that all equipment meets regulatory standards and safety guidelines.
- PC9.** Maintain an accurate inventory of RSE and ensure proper allocation for specific tasks.
- PC10.** Track and document RSE usage and maintenance activities for operational records.

Manage Equipment Downtime and Irregularities

To be competent, the user/individual on the job must be able to:

- PC11.** Identify and address any issues causing equipment downtime or malfunction.
- PC12.** Coordinate with maintenance teams to resolve RSE malfunctions and minimize disruption to ramp operations.
- PC13.** Communicate any delays or equipment issues to flight operations, ground staff, and relevant stakeholders.
- PC14.** Maintain accurate records of RSE malfunctions, repairs, and maintenance schedules.

Qualification Pack

PC15. Implement corrective actions to reduce the likelihood of future equipment failures or downtime.

Ensure Compliance with Safety and Security Regulations

To be competent, the user/individual on the job must be able to:

PC16. Oversee the implementation of safety measures for the operation and maintenance of ramp service equipment to prevent accidents or injuries.

PC17. Ensure that RSE operations comply with safety protocols, including the use of personal protective equipment (PPE) by ground crew.

PC18. Report any safety breaches or unsafe practices involving ramp service equipment to the appropriate authorities.

PC19. Ensure all equipment used on the ramp meets required security and regulatory standards.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. Procedures for the operation, maintenance, and repair of ramp service equipment (RSE).

KU2. The importance of regular maintenance schedules to minimize equipment breakdowns and ensure safety.

KU3. The types of ramp service equipment used in aircraft handling, baggage, and cargo operations, including pushback tractors, tugs, and conveyor systems.

KU4. Procedures for troubleshooting and diagnosing common equipment malfunctions or issues.

KU5. Safety measures and protocols for using and maintaining RSE on the ramp.

KU6. The regulatory requirements governing the operation and maintenance of ramp service equipment.

KU7. The relationship between RSE maintenance and overall ramp operations efficiency.

KU8. The importance of ensuring that equipment is maintained to prevent delays and safety incidents.

KU9. Inventory management techniques for tracking and allocating ramp service equipment.

KU10. Proper documentation procedures for RSE maintenance, inspections, and usage.

KU11. The impact of weather conditions on RSE operation and maintenance.

KU12. Procedures for reporting and managing equipment failures or irregularities.

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. Effectively fill out maintenance logs and forms related to ramp service equipment.

GS2. Maintain accurate and timely records of equipment usage, maintenance, and repairs.

GS3. Understand and implement company policies and procedures related to ramp service equipment operation and maintenance.

GS4. Communicate clearly and effectively with supervisors, colleagues, and external stakeholders about equipment availability, issues, or needs.

Qualification Pack

- GS5.** Coordinate with maintenance teams to ensure the timely repair and servicing of ramp service equipment.
- GS6.** Monitor the operational efficiency of ramp service equipment and ensure tasks are completed within scheduled timeframes.
- GS7.** Identify trends or common issues in equipment performance and suggest improvements.
- GS8.** Supervise the use of ramp service equipment to ensure safe and proper handling.
- GS9.** Prioritize tasks to ensure all required equipment is available and functioning for ramp operations.
- GS10.** Report and address discrepancies, failures, or irregularities in the use of ramp service equipment.
- GS11.** Analyse and solve problems related to RSE maintenance or malfunctions to minimize disruptions.
- GS12.** Ensure compliance with safety and security protocols when operating and maintaining RSE.
- GS13.** Respond to and report safety or security incidents related to ramp service equipment promptly.
- GS14.** Perform risk assessments on ramp service equipment usage and ensure safe operating practices are followed.
- GS15.** Remain focused and detail-oriented, ensuring no errors in the operation or maintenance of ramp service equipment.

Qualification Pack

DGT/VSQ/N0101: Employability Skills (30 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

- PC1.** understand the significance of employability skills in meeting the job requirements

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

- PC2.** identify constitutional values, civic rights, duties, personal values and ethics and environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

- PC3.** explain 21st Century Skills such as Self-Awareness, Behavior Skills, Positive attitude, self-motivation, problem-solving, creative thinking, time management, social and cultural awareness, emotional awareness, continuous learning mindset etc.

Basic English Skills

To be competent, the user/individual on the job must be able to:

- PC4.** speak with others using some basic English phrases or sentences

Communication Skills

To be competent, the user/individual on the job must be able to:

- PC5.** follow good manners while communicating with others
PC6. work with others in a team

Qualification Pack

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

PC7. communicate and behave appropriately with all genders and PwD

PC8. report any issues related to sexual harassment

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

PC9. use various financial products and services safely and securely

PC10. calculate income, expenses, savings etc.

PC11. approach the concerned authorities for any exploitation as per legal rights and laws

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

PC12. operate digital devices and use its features and applications securely and safely

PC13. use internet and social media platforms securely and safely

Entrepreneurship

To be competent, the user/individual on the job must be able to:

PC14. identify and assess opportunities for potential business

PC15. identify sources for arranging money and associated financial and legal challenges

Customer Service

To be competent, the user/individual on the job must be able to:

PC16. identify different types of customers

PC17. identify customer needs and address them appropriately

PC18. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC19. create a basic biodata

PC20. search for suitable jobs and apply

PC21. identify and register apprenticeship opportunities as per requirement

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use basic spoken English language

KU6. Do and dont of effective communication

KU7. inclusivity and its importance

KU8. different types of disabilities and appropriate communication and behaviour towards PwD

KU9. different types of financial products and services

Qualification Pack

- KU10.** how to compute income and expenses
- KU11.** importance of maintaining safety and security in financial transactions
- KU12.** different legal rights and laws
- KU13.** how to operate digital devices and applications safely and securely
- KU14.** ways to identify business opportunities
- KU15.** types of customers and their needs
- KU16.** how to apply for a job and prepare for an interview
- KU17.** apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate effectively using appropriate language
- GS2.** behave politely and appropriately with all
- GS3.** perform basic calculations
- GS4.** solve problems effectively
- GS5.** be careful and attentive at work
- GS6.** use time effectively
- GS7.** maintain hygiene and sanitisation to avoid infection

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Qualification Pack

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
