## Qualification Pack

### AAS/Q0604: Airline Flight Load Controller

#### Brief Job Description

The Load controller undertakes load distribution and calculation to ensure intended flight operates with the safety envelope as prescribed in the organizations operations manual

#### Personal Attributes

The individual on job should have good communication skills, both written and spoken, be able to work under pressure and to deadlines, have decision making skills, have good mathematical ability, and must be able to work well in a team

#### Applicable National Occupational Standards (NOS)

##### Compulsory NOS:

1. [AAS/N0502: Follow safety and security procedures](#)
2. [AAS/N0602: Pre-departure planning](#)
3. [AAS/N0607: Post departure flight closure](#)
4. [DGT/VSQ/N0102: Employability Skills \(60 Hours\)](#)

## Qualification Pack

### AAS/N0502: Follow safety and security procedures

#### Description

This unit is about following awareness of safety and security procedures as defined by organisational policies and regulatory guidelines

#### Elements and Performance Criteria

##### *Comprehending the safety and security procedures for conduct of operations*

To be competent, the user/individual on the job must be able to:

- PC1.** comply with the organisations safety and security policies and procedures
- PC2.** comply with the regulatory guidelines on safe conduct of operations and maintenance of conditions to thwart any acts of unlawful interference
- PC3.** report any identified breaches of safety, and security policies and procedures to the designated person
- PC4.** coordinate with other resources at the workplace (within and outside the organisation) to achieve safe and secure environment
- PC5.** identify and mitigate any safety and security hazards like illness, accidents, fires or acts of unlawful interference if it falls within the limits of individuals authority
- PC6.** report any hazards outside the individuals authority to the relevant person in line with organisational procedures and regulatory guidelines
- PC7.** follow organisations emergency procedures for accidents, fires or acts of unlawful interference
- PC8.** identify and recommend opportunities for improving health, safety, and security to the designated person
- PC9.** complete all health and safety records are updates and procedures well defined

#### Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** hazard identification and risk management as defined within the organisational policy and procedures
- KU2.** regulatory requirements and organisations procedures for maintenance of safety and security standards and individuals role and responsibilities in relation to this
- KU3.** how and when to report hazards
- KU4.** the limits of responsibility for dealing with hazards
- KU5.** the organisations emergency procedures for different emergency situations and the importance of following these
- KU6.** importance of maintaining high standards of safety and security
- KU7.** implications that any non-compliance with safety and security may have on individuals and the organisation
- KU8.** different types of breaches of safety and security and how and when to report these
- KU9.** evacuation procedures for workers and passengers

## Qualification Pack

- KU10.** how to summon medical assistance and the emergency services, where necessary  
**KU11.** how to use the health, safety and accident reporting procedures and the importance of these  
**KU12.** regulatory guidelines on dealing with safety and security emergencies

## Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** complete accurately a well written report in English language detailing the situations of emergency with attention to detail  
**GS2.** read instructions/guidelines/procedures/rules  
**GS3.** listen to and orally communicate information with all concerned  
**GS4.** make decisions on a suitable course of action or response if permitted by the authority matrix  
**GS5.** monitor efficient functioning of all activities  
**GS6.** plan and organize work to achieve targets and deadlines  
**GS7.** communicate with passengers and other stakeholders in a courteous manner  
**GS8.** maintain cordial work relationship  
**GS9.** identify trends/common causes for errors and suggest possible solutions to the supervisor / management  
**GS10.** identify and correct errors  
**GS11.** analyse best possible solutions (cost, time, effort, etc.) suited for operations  
**GS12.** concentrate on task at hand and complete it without error  
**GS13.** apply balanced judgments to different situations

## Qualification Pack

### Assessment Criteria

| Assessment Criteria for Outcomes                                                                                                                                                         | Theory Marks | Practical Marks | Project Marks | Viva Marks |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|-----------------|---------------|------------|

## Qualification Pack

### AAS/N0602: Pre-departure planning

#### Description

This unit covers the pre-departure planning responsibilities of a load controller. It includes gathering flight and aircraft data, calculating weight and balance, issuing loading instructions, and ensuring the aircraft operates within safe weight and trim limits. The unit ensures all load and trim documentation is accurate and compliant with organizational and regulatory guidelines to support safe flight operations.

#### Scope

The scope covers the following :

- Gather and verify aircraft, load, and fuel data to plan safe flight operations.
- Calculate total load and trim to ensure aircraft remains within safety limits.
- Prepare and issue loading plans and instructions to relevant teams.
- Make last-minute load adjustments or offloading decisions if safety is compromised.
- Ensure accurate and complete documentation of all load and trim data for regulatory compliance.

#### Elements and Performance Criteria

##### *Plan the loading of aircraft*

To be competent, the user/individual on the job must be able to:

- PC1.** gather all information related to the aircraft and specific flight and ascertain a zero fuel weight figure for the aircraft and flight.
- PC2.** confirm operating parameters such as Dry Operating Weight (DOW), are in accordance to the operations manual.
- PC3.** perform trials on the estimated loads of the aircraft to check if the aircraft will operate within the safe trim limits during its intended flight
- PC4.** plan the distribution of passenger load and cargo load to achieve safe operations of the intended flight
- PC5.** issue the loading plan to the loading areas of baggage and cargo
- PC6.** accept and document a special load using relevant documents (e.g. NOTOC) in line with organisations procedures ensuring that the aircraft structural limitations are not exceeded
- PC7.** issue the loading instruction report (LIR) to the loading supervisor detailed the distribution of load on the aircraft in accordance with organisation and regulatory guidelines,
- PC8.** gather the fuel uplift weight from the relevant stakeholder
- PC9.** calculate the total load for an aircraft
- PC10.** checks with total load on aircraft on ensure the aircraft is in safe operating limits during its intended flight
- PC11.** complete documentation relating to the load and trim as per organisation and regulatory guidelines

##### *Ensure the aircraft is within the prescribed safety limits*

To be competent, the user/individual on the job must be able to:

- PC12.** trials to ascertain the trim of the aircraft during its intended flight with zero fuel weight

## Qualification Pack

- PC13.** trials to ascertain the trim of the aircraft during its intended flight with total load including fuel
- PC14.** necessary adjustments to loads when the aircraft is out of trim for its intended flight
- PC15.** confirm the aircraft is able to meet the requirement of Maximum Take Off Weight and Maximum Landing Weight for the intended flight.
- PC16.** perform necessary last minute adjustments within the acceptable norms as per organisation and regulatory policies.
- PC17.** take decisions on last minute offloading of load in case of threat to safety of the aircraft.
- PC18.** ensure all required documents pertaining to load and trim are available in the prescribed format on the aircraft for its intended flight.

## Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** organisation policies and procedures defining the license requirements of load controller
- KU2.** regulatory requirements of functions of load controller
- KU3.** regulatory and organisations defined operations safety standards
- KU4.** the significance of aircraft mass and balance for the safety of the aircraft
- KU5.** legal requirements in relation to aircraft mass and balance
- KU6.** terminology, airport codes and documents related to the aircraft and load including mass and balance, type of load, aircraft areas, pallets, unit load devices and special loads
- KU7.** the significance of aircraft mass and balance limits and where to find such information for relevant aircraft
- KU8.** the significance of aircraft structural loading limitations and where to find such information for relevant aircraft
- KU9.** potential effects of unbalanced loading
- KU10.** potential effects of an unsecured load
- KU11.** designators and locations of aircraft compartments
- KU12.** codes for loads requiring special attention and where to find the information
- KU13.** the use of actual or standard weights for passengers and baggage
- KU14.** types of dangerous goods, restricted articles and special loads
- KU15.** organisation procedures for when load volumes exceed the space available
- KU16.** the source of load information to include aircraft weights, fuel load and usage, passengers, baggage, cargo and other loads
- KU17.** reference sources for load planning
- KU18.** loading and separation requirements for dangerous goods, restricted articles and special loads
- KU19.** organisation systems for mass and balance calculations and the method of producing a load sheet and an accompanying balance chart
- KU20.** how to calculate an allowed traffic load
- KU21.** how to allocate load to aircraft compartments and maintain the required centre of gravity
- KU22.** sequence of en-route stations, if relevant, and the effects on load planning

## Qualification Pack

**KU23.** loading procedures to account for sector requirements, priority loads, separation, restraint and special load requirements to minimize load handling and the requirement for load restraints

**KU24.** loading procedures for dangerous goods and special loads

## Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** fill any forms related to loading of the aircraft
- GS2.** prepare reports regarding the load planning efficiency
- GS3.** interpret the safety standards
- GS4.** read and understand the organisations procedures & policies
- GS5.** communicate clearly with supervisors and peers
- GS6.** regularly communicate with all employees in the chain of activities to ensure activities are running smoothly
- GS7.** share best practices with peers and subordinates
- GS8.** make a judgment on the loading of the cargo & space utilization keeping the safety of aircraft in mind
- GS9.** plan for efficient space utilization
- GS10.** monitor smooth functioning of all activities
- GS11.** prioritise and execute tasks in within the scheduled time limits
- GS12.** communicate with stakeholders with etiquettes and share all relevant information
- GS13.** maintain cordial work relationship
- GS14.** identify trends/common causes for errors and suggest possible solutions to the supervisor / management
- GS15.** identify and correct errors
- GS16.** analyse on best possible solutions (cost, time, effort, etc.) suited for customer requirement & aircraft safety
- GS17.** concentrate on task at hand and complete it without errors

## Qualification Pack

### Assessment Criteria

| Assessment Criteria for Outcomes                                                                                                                                                              | Theory Marks | Practical Marks | Project Marks | Viva Marks |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|-----------------|---------------|------------|
| <i>Plan the loading of aircraft</i>                                                                                                                                                           | <b>25.5</b>  | <b>32.5</b>     | -             | -          |
| <b>PC1.</b> gather all information related to the aircraft and specific flight and ascertain a zero fuel weight figure for the aircraft and flight.                                           | 2.5          | 2.5             | -             | -          |
| <b>PC2.</b> confirm operating parameters such as Dry Operating Weight (DOW), are in accordance to the operations manual.                                                                      | 1.5          | 1.5             | -             | -          |
| <b>PC3.</b> perform trials on the estimated loads of the aircraft to check if the aircraft will operate within the safe trim limits during its intended flight                                | 2.5          | 2.5             | -             | -          |
| <b>PC4.</b> plan the distribution of passenger load and cargo load to achieve safe operations of the intended flight                                                                          | 1.5          | 1.5             | -             | -          |
| <b>PC5.</b> issue the loading plan to the loading areas of baggage and cargo                                                                                                                  | 2.5          | 3.5             | -             | -          |
| <b>PC6.</b> accept and document a special load using relevant documents (e.g. NOTOC) in line with organisations procedures ensuring that the aircraft structural limitations are not exceeded | 2.5          | 3.5             | -             | -          |
| <b>PC7.</b> issue the loading instruction report (LIR) to the loading supervisor detailed the distribution of load on the aircraft in accordance with organisation and regulatory guidelines, | 2.5          | 3.5             | -             | -          |
| <b>PC8.</b> gather the fuel uplift weight from the relevant stakeholder                                                                                                                       | 2.5          | 3.5             | -             | -          |
| <b>PC9.</b> calculate the total load for an aircraft                                                                                                                                          | 2.5          | 3.5             | -             | -          |
| <b>PC10.</b> checks with total load on aircraft on ensure the aircraft is in safe operating limits during its intended flight                                                                 | 2.5          | 3.5             | -             | -          |
| <b>PC11.</b> complete documentation relating to the load and trim as per organisation and regulatory guidelines                                                                               | 2.5          | 3.5             | -             | -          |
| <i>Ensure the aircraft is within the prescribed safety limits</i>                                                                                                                             | <b>17.5</b>  | <b>24.5</b>     | -             | -          |

### Qualification Pack

| Assessment Criteria for Outcomes                                                                                                                       | Theory Marks | Practical Marks | Project Marks | Viva Marks |
|--------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|-----------------|---------------|------------|
| <b>PC12.</b> trials to ascertain the trim of the aircraft during its intended flight with zero fuel weight                                             | 2.5          | 3.5             | -             | -          |
| <b>PC13.</b> trials to ascertain the trim of the aircraft during its intended flight with total load including fuel                                    | 2.5          | 3.5             | -             | -          |
| <b>PC14.</b> necessary adjustments to loads when the aircraft is out of trim for its intended flight                                                   | 2.5          | 3.5             | -             | -          |
| <b>PC15.</b> confirm the aircraft is able to meet the requirement of Maximum Take Off Weight and Maximum Landing Weight for the intended flight.       | 2.5          | 3.5             | -             | -          |
| <b>PC16.</b> perform necessary last minute adjustments within the acceptable norms as per organisation and regulatory policies.                        | 2.5          | 3.5             | -             | -          |
| <b>PC17.</b> take decisions on last minute offloading of load in case of threat to safety of the aircraft.                                             | 2.5          | 3.5             | -             | -          |
| <b>PC18.</b> ensure all required documents pertaining to load and trim are available in the prescribed format on the aircraft for its intended flight. | 2.5          | 3.5             | -             | -          |

### AAS/N0607: Post departure flight closure

#### Description

This unit focuses on the post-departure responsibilities of a load controller, including proper documentation, system closure, and recordkeeping. It ensures that all flight-related information is verified, transmitted, and archived in accordance with organizational and regulatory requirements for accountability and future reference.

#### Scope

The scope covers the following :

- Collect and verify all flight-related documents for accuracy and completeness.
- Close the flight in the departure control system without errors.
- Compile and file trip documents as per organizational and regulatory standards.
- Maintain accurate records for traceability and future audits.

#### Elements and Performance Criteria

##### *Post departure documentation and flight closure*

To be competent, the user/individual on the job must be able to:

- PC1.** Assimilate all required documents (e.g., load sheet, LIR, NOTOC, fuel uplift, passenger manifest, baggage/cargo list) to prepare the trip file in line with organisational and regulatory policies.
- PC2.** Verify each document for accuracy, completeness, and ensure they all relate to the same aircraft and flight.
- PC3.** Identify and resolve any discrepancies found in post-departure documentation before finalising closure.
- PC4.** Close the flight in the Departure Control System (DCS), ensuring that flight data is accurately entered and the system reflects correct flight status.
- PC5.** Record actual off-block and airborne times and update in the system as per operational requirements.
- PC6.** Communicate final departure details and flight closure status to stakeholders like airline operations, ATC, and ground handlers
- PC7.** File all required documents in the trip file, ensuring secure storage and adherence to archiving norms set by the organisation and regulators.
- PC8.** Ensure all documentation complies with DGCA/ICAO/IATA and airline-specific regulatory guidelines.
- PC9.** Report any issues, errors, or irregularities in documentation to the relevant authority or supervisor.
- PC10.** Maintain logs or records of closed flights and submitted trip files for future audits or inspections.
- PC11.** Assist during internal or external audits by retrieving and presenting closed trip files and documents.

## Qualification Pack

**PC12.** Ensure data privacy and protection practices are followed while handling sensitive flight documentation.

### Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Organisational procedures for compiling and storing post-departure documentation.
- KU2.** Types of documents required in a trip file (e.g., load sheet, NOTOC, LIR, fuel records, passenger and cargo manifests).
- KU3.** Procedures for closing a flight in the Departure Control System (DCS).
- KU4.** Common errors or discrepancies in post-departure documentation and how to identify and resolve them.
- KU5.** Regulatory requirements for documentation and recordkeeping set by DGCA, ICAO, IATA, and other authorities.
- KU6.** Importance of accurate documentation for flight safety, operational traceability, and audit readiness.
- KU7.** Communication protocols with internal departments (e.g., flight operations, cargo, baggage handling) post departure.
- KU8.** Standards for document storage-physical and digital-including duration, security, and access control.
- KU9.** Data protection principles and the handling of sensitive or confidential flight data.
- KU10.** Procedures to escalate documentation errors or unresolved issues to supervisors or designated authorities.
- KU11.** Use of software tools and systems related to flight closure, document filing, and communication (e.g., DCS, airline ERP systems).
- KU12.** Importance of maintaining logs or records of closed flights for reference and compliance audits.

### Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** fill any forms related to loading of the aircraft
- GS2.** prepare reports regarding the load planning efficiency
- GS3.** interpret the safety standards
- GS4.** read and understand the organisation policy and procedures
- GS5.** communicate clearly with supervisors and peers
- GS6.** regularly communicate with all employees in the chain of activities to ensure efficient operations
- GS7.** share best practices with peers and subordinates
- GS8.** monitor efficient functioning of all activities
- GS9.** prioritize and execute tasks in within the scheduled time limits

## Qualification Pack

- GS10.** identify trends/common causes for errors and suggest possible solutions to the supervisor / management
- GS11.** identify and correct errors
- GS12.** analyse on best possible solutions (cost, time, effort, etc.) suited for aircraft safety
- GS13.** concentrate on task at hand and complete it without errors

## Qualification Pack

### Assessment Criteria

| Assessment Criteria for Outcomes                                                                                                                                                                                | Theory Marks | Practical Marks | Project Marks | Viva Marks |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|-----------------|---------------|------------|
| <i>Post departure documentation and flight closure</i>                                                                                                                                                          | <b>40</b>    | <b>60</b>       | -             | -          |

## Assessment Guidelines and Assessment Weightage

### Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

## Qualification Pack

**Minimum Aggregate Passing % at QP Level : 70**

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

## Assessment Weightage

Compulsory NOS

|----------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Sector</b>                                | Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.                                                                      |
| <b>Sub-sector</b>                            | Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.                                                                                                                                                                                     |
| <b>Occupation</b>                            | Occupation is a set of job roles, which perform similar/ related set of functions in an industry.                                                                                                                                                                                                |
| <b>Job role</b>                              | Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.                                                                                                                                                                                |
| <b>Occupational Standards (OS)</b>           | OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts. |
| <b>Performance Criteria (PC)</b>             | Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.                                                                                                                                                                    |
| <b>National Occupational Standards (NOS)</b> | NOS are occupational standards which apply uniquely in the Indian context.                                                                                                                                                                                                                       |
| <b>Qualifications Pack (QP)</b>              | QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.                                                                                                                       |
| <b>Unit Code</b>                             | Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'                                                                                                                                                                                                        |
| <b>Unit Title</b>                            | Unit title gives a clear overall statement about what the incumbent should be able to do.                                                                                                                                                                                                        |
| <b>Description</b>                           | Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.                                                                                                                   |
| <b>Scope</b>                                 | Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.                                                                                            |

## Qualification Pack

|                                         |                                                                                                                                                                                                                                                                                                                                                                        |
|-----------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Knowledge and Understanding (KU)</b> | Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.                                                                                                                                               |
| <b>Organisational Context</b>           | Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.                                                                                                                                                                       |
| <b>Technical Knowledge</b>              | Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.                                                                                                                                                                                                                                                               |
| <b>Core Skills/ Generic Skills (GS)</b> | Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles. |
| <b>Electives</b>                        | Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.                                                                            |
| <b>Options</b>                          | Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.                                                                                                                                                          |
| <b>Sector</b>                           | Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.                                                                                                                                            |
| <b>Sub-sector</b>                       | Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.                                                                                                                                                                                                                                                           |
| <b>Occupation</b>                       | Occupation is a set of job roles, which perform similar/ related set of functions in an industry.                                                                                                                                                                                                                                                                      |
| <b>Job role</b>                         | Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.                                                                                                                                                                                                                                                      |
| <b>Occupational Standards</b>           | OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.                                                                       |
| <b>Performance Criteria</b>             | Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.                                                                                                                                                                                                                                          |

## Qualification Pack

|                                      |                                                                                                                                                                                                                                                                                             |
|--------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>National Occupational Standar</b> | NOS are occupational standards which apply uniquely in the Indian context.                                                                                                                                                                                                                  |
| <b>Qualification Pack</b>            | QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique Qualification pack code.                                                                                                                   |
| <b>Unit code</b>                     | Unit code is a unique identifier for an occupational standard, which is denoted by 'N'.                                                                                                                                                                                                     |
| <b>Unit title</b>                    | Unit title gives a clear overall statement about what the incumbent should be able to do.                                                                                                                                                                                                   |
| <b>Description</b>                   | Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.                                                                                                              |
| <b>Scope</b>                         | Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.                                                                                       |
| <b>Knowledge and Understanding</b>   | Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.                                                                    |
| <b>Organisational Context</b>        | Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.                                                                                            |
| <b>Technical knowledge</b>           | Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.                                                                                                                                                                                    |
| <b>Core Skills/ Generic Skills</b>   | Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment In the context of the OS, these include communication related skills that are applicable to most job roles.   |
| <b>Electives</b>                     | Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives. |
| <b>Options</b>                       | Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.                                                                               |
