## Qualification Pack

### AAS/N0625: Introduction to Airport Operations

#### Description

This Unit provides a foundational understanding of airport operations, infrastructure, and the roles of various stakeholders. It covers key aspects such as terminal layout, regulatory compliance, and passenger services. This unit equips learners with essential knowledge for entry-level roles in airport operations and management

#### Scope

The scope covers the following :

- Understanding Airport Operations and Infrastructure
- Role of Stakeholders and Compliance
- Customer Service and Technology

#### Elements and Performance Criteria

*Understanding Airport Operations and Infrastructure ,Role of Stakeholders and Compliance, Customer Service and Technology.*

To be competent, the user/individual on the job must be able to:

- PC1.** PC1. Understand the roles of runways, taxiways, aprons, terminals, and cargo facilities in airport operations.
- PC2.** PC2. Distinguish between airside and landside operations and their respective functionalities.
- PC3.** • PC3. Understand the responsibilities of airlines, ground handlers, airport operators, and regulatory authorities in airport  
• management.
- PC4.** PC4. Follow safety guidelines and security measures as per regulatory standards like ICAO and DGCA.
- PC5.** PC5. Address passenger inquiries, resolve complaints, and ensure service excellence while maintaining professionalism
- PC6.** PC6. Demonstrate knowledge of key regulatory guidelines governing airport operations and compliance requirements
- PC7.** • PC7. Explain the role of self-service kiosks, baggage handling systems, and automated security screening in enhancing  
• efficiency
- PC8.** PC8. Ensure smooth coordination between stakeholders to optimize operations and passenger satisfaction.
- PC9.** • PC9. Respond appropriately to emergency scenarios, including evacuation procedures and crisis management Update flight  
• information and recording systems.
- PC10.** PC10. Support sustainable practices and compliance with environmental regulations in airport operations.

#### Knowledge and Understanding (KU)

## Qualification Pack

The individual on the job needs to know and understand:

- KU1.** Understanding the structure and layout of terminals, runways, taxiways, aprons, and other facilities.
- KU2.** Knowledge of the functions and activities within airside (restricted zones) and landside (public areas) of an airport
- KU3.** Familiarity with the roles of airlines, airport operators, ground handlers, regulators, and service providers
- KU4.** Awareness of aviation regulatory bodies like ICAO and DGCA and their standards for safety, security, and environment Airside Driving
- KU5.** Aviation Vocabulary, Codes, Terminologies
- KU6.** Principles of airport communications and dispatch.
- KU7.** Gate management software systems

## Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Fill any forms related to documentation
- GS2.** Prepare required reports for management as required
- GS3.** Communicate clearly with supervisors, passengers, and peers
- GS4.** Identify trends/common causes for errors and suggest possible solutions to the supervisor / management
- GS5.** Concentrate on task at hand and complete it without errors
- GS6.** Check compliance for escalation
- GS7.** Monitor efficient functioning of all activities
- GS8.** Prioritize and execute tasks in within the scheduled time limits
- GS9.** Understand types of faults occurring and how to deal with it
- GS10.** Communicate effectively both orally and in writing.
- GS11.** Keep routine records. File/maintain records and reports ensuring completeness and accuracy.
- GS12.** Operate a personal computer/tablet and compatible standard office software.
- GS13.** Analyse situations carefully and apply effective remedy.
- GS14.** Work under deadlines and coordinate several concurrent assignments

## Qualification Pack

# AAS/N0635: Supervise Daily Operations , Provide Security and Safety Oversight

## Description

This unit describes the actions to be performed with reference to supervision of daily operations and provide an oversight of the security & safety functions in accordance with organisational and regulatory procedures

## Scope

The scope covers the following :

- Supervision of daily operations
- Provide security and safety oversight

## Elements and Performance Criteria

### *Supervise daily operations*

To be competent, the user/individual on the job must be able to:

- PC1.** Plan the manpower and resources that are required for the shift
- PC2.** Plan and coordinate the activities of the terminal including landside, and parking operations.
- PC3.** Plan and coordinate the activities of the airside
- PC4.** Direct supervision of all shift personnel
- PC5.** Act on escalations from executives on the non-availability of resources such as check-in counters, parking bays, baggage belts or any resource that hampers operations
- PC6.** Cross check the completion of any pending repairs/breakdowns of systems as reported to ensure a seamless operational environment
- PC7.** Obtain an action taken report on the lost and found items during the shift. This should include decision on assistance after hours, intake/release of items and resolution of inquiries.
- PC8.** Complete and review all reports, forms and logs pertaining to operational activities during assigned shifts for accuracy and completeness

### *Provide security and safety oversight*

To be competent, the user/individual on the job must be able to:

- PC9.** Oversee and supervise daily operations to ensure safe work environment.
- PC10.** Identify, prevent, and respond to any reports from the field staff on hazards on the airside such as FOD, Wildlife incursions, unauthorized vehicles and pedestrian entry, and disabled aircraft.
- PC11.** Monitor maintenance and/or construction projects and programs, which could create any potential security or safety hazards
- PC12.** Monitor and manage terminal Safety Management Systems
- PC13.** Manage compliance of the airport tenants with the security policy as established and outlined.

## Qualification Pack

- PC14.** Inspect and record all airside areas such as pavement, markings, lighting, fuelling practices etc.
- PC15.** Identify and to extent possible resolve any hazard to airport operations.
- PC16.** Coordinate construction and maintenance on or near the airport to ensure minimum interference with the airport operations.
- PC17.** Inspect the adequacy along with the Security Team, protective security measures such as perimeter fencing to prevent unauthorized entry to the airside/restricted areas of the terminal.

## Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Aviation / Airport regulatory frame line (i.e. ICAO, IATA, DGCA, BCAS etc.)
- KU2.** ICAO Annex 14 - Aerodromes
- KU3.** ICAO Annex 17 - Security
- KU4.** ICAO Annex 19 - Safety Management Systems
- KU5.** Airport operations - industry best practices ethics, standards, values
- KU6.** Monitor, Control & Coordination principles and practices
- KU7.** Resource planning and scheduling
- KU8.** Airport Collaborative Decision-Making (ACDM)
- KU9.** Airside driving
- KU10.** Technology governing terminal and airside operations
- KU11.** Hazard and risk control and policy management
- KU12.** Wildlife hazard management

## Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Fill any forms related to documentation of safety and security incidents
- GS2.** Generate required reports for management as required
- GS3.** Communicate with managers, passengers and peers
- GS4.** Identify trends/common causes for errors and suggest possible solutions to the management
- GS5.** Identify and correct errors
- GS6.** Ensure completion of tasks with minimum errors
- GS7.** Ability to take control, accept responsibility and operate calmly in high pressure situations
- GS8.** Demonstrate initiative, self-motivation and a desire to achieve success
- GS9.** Excellent organisational, time, task, and priority management
- GS10.** Articulate and discuss ideas and persuade others to achieve common outcomes
- GS11.** Make decisions in a complex setting to achieve intended goals using a structured process and multiple sources of available information

## Qualification Pack

- GS12.** Deepen insights into the planning, allocation, and deployment of resources to anticipate needs
- GS13.** Plan the allocation and deployment of resources efficiently and effectively

## Qualification Pack

### Assessment Criteria

| Assessment Criteria for Outcomes                                                                                                                                                                               | Theory Marks | Practical Marks | Project Marks | Viva Marks |

## Qualification Pack

# AAS/N0634: Supervise handling of incidents, contingencies , emergency situations and drive customer experience through process improvements

## Description

This unit describes the actions to be performed with reference to supervision of incidents, contingency situations as well as drive enhancement of customer experience through process improvements in accordance with organisational and regulatory procedures.

## Scope

The scope covers the following :

- Supervise Handling of Incidents, Contingencies & Emergency Situations
- Drive Customer Experience through process improvements

## Elements and Performance Criteria

### *Supervise handling of incidents, contingencies & emergency situations*

To be competent, the user/individual on the job must be able to:

- PC1.** Support the emergency management and incident command centre during an aircraft accident
- PC2.** Co-ordinate the activities mandated as a part of the emergency response during aircraft accidents/incidents
- PC3.** Coordinate public safety response to emergencies including Police, Fire and Emergency Medical Services during emergency situations
- PC4.** Respond to all terminal emergencies and incidents as reported by the executive level staff
- PC5.** Coordinate and plan with the support of AOCC, the redrawing of check-in counters, parking bays, baggage belts availability & allocation where a major disruption is anticipated
- PC6.** Plan and advise the strategy to be adopted due to major disruption to the ground handlers, airlines, and other stakeholders
- PC7.** Participate in briefing, debriefing sessions post an accident, incident, emergency irrespective of it being real or simulated

### *Drive customer experience through process improvements*

To be competent, the user/individual on the job must be able to:

- PC8.** Actively review the key operational & customer processes with the management and suggest corrections where necessary
- PC9.** Evaluate the Terminal's operation to improve customer service, productivity, and efficiency through benchmarking of similar airports in the region/country
- PC10.** Organise and participate in quality audits to measure the efficacy of the processes against benchmarked KPI
- PC11.** Prepare initial reports on deviations from the KPI and submit them to the management
- PC12.** Conduct review of audit findings and effectiveness of corrective measures implemented
- PC13.** Conduct inspection of terminal facilities, floors, restrooms, garbage bins and windows to ensure a clean and professional airport facility.

## Qualification Pack

- PC14.** Respond to customer concerns and complaints on any aspect of the airport facility and provide immediate resolution where possible and authorized
- PC15.** Drive cost control measures where possible in collaboration with stakeholders and as instructed by the Senior Manager
- PC16.** Participate in technology interventions that may be trialled to enhance customer experience

## Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Aviation / Airport regulatory frame line (i.e. ICAO, IATA, DGCA, BCAS etc.)
- KU2.** ICAO Annex 14 - Aerodromes
- KU3.** Basics of ICAO Annex 13 - Aircraft Accident & Investigation
- KU4.** Elements of Operational Environment (sequential processes and chain of services)
- KU5.** Airport Operations -Industry best practices Ethics. Standards. Values.
- KU6.** Airport Emergency Plan & Responses to Accidents, Emergencies
- KU7.** Airside, Terminal & Landside Operations
- KU8.** Human Factors, Stress & Fatigue Management
- KU9.** Airport Audit and Compliance
- KU10.** Airport Collaborative Decision-Making (ACDM)
- KU11.** Customer Experience Philosophy
- KU12.** Process Improvement and Optimisation
- KU13.** Airport Service Quality & Branding
- KU14.** Airside Driving
- KU15.** Crisis Communication and Media Management
- KU16.** Flight Disruptions and Irregular Operations Management
- KU17.** Innovation Management
- KU18.** Project Management / Management of Works

## Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Fill any forms related to documentation during emergency situations
- GS2.** Generate required reports for management as required
- GS3.** Communicate with managers, passengers, and peers
- GS4.** Identify trends/common causes for errors and suggest possible solutions to the management
- GS5.** Identify and correct errors
- GS6.** Ensure completion of tasks with minimum errors
- GS7.** Ability to take control, accept responsibility and operate calmly in high pressure situations
- GS8.** Demonstrate initiative, self-motivation and a desire to achieve success
- GS9.** Excellent organisational, time, task, and priority management

## Qualification Pack

- GS10.** Articulate and discuss ideas and persuade others to achieve common outcomes
- GS11.** Make decisions in a complex setting to achieve intended goals using a structured process and multiple sources of available information
- GS12.** Deepen insights into the planning, allocation, and deployment of resources to anticipate needs
- GS13.** Plan the allocation and deployment of resources efficiently and effectively
- GS14.** Connect or combine ideas or information from unrelated fields or applications to generate multiple ideas to bring about a specific outcome
- GS15.** Use available software features to create and edit documents, customise templates and reports and evaluate online information
- GS16.** Anticipate customer needs and expectations and elicit feedback from customers to improve service
- GS17.** Build relationships with customers to create and sustain customer loyalty

## Qualification Pack

### AAS/N0633: Manage people and stakeholder

#### Description

This unit describes the actions that need to be performed to manage people and their performance as well manage the relationship with internal and external stakeholders in accordance with organisational procedures and regulations

#### Scope

The scope covers the following :

- Manage people & stakeholders

#### Elements and Performance Criteria

##### *Manage people & stakeholders*

To be competent, the user/individual on the job must be able to:

- PC1.** Identify resource requirement for terminal and airside operations and communicate the same to Manager & HR
- PC2.** Participate in new employee hiring
- PC3.** Plan the formal training of new employees along with the L&D team
- PC4.** Oversee the conduct of on-the-job trainings in line with established organisational procedures
- PC5.** Mentor, Coach new/existing employees to help them identify areas of improvement and scale up
- PC6.** Appraise the direct reports on a half yearly/yearly basis for their performance and submit the evaluation to Manager & HR
- PC7.** Foster a culture of teamwork amongst the team
- PC8.** Conduct initial enquiry in disciplinary matters involving misconduct of employees
- PC9.** Plan and conduct operational briefing with major stakeholders where required
- PC10.** Propose solutions to airlines, tenants, concessionaires, and the general public
- PC11.** Coordinate construction or renovation projects with in-house service providers or third-party contractors and vendors
- PC12.** Facilitate the access of vendors, service providers where necessary for critical work
- PC13.** Participate in AOC meetings to understand perspective of respective stakeholders
- PC14.** Monitor the performance of airlines, tenants, concessionaires, and others to ensure their adherence to airport policies and programs, rules and regulations, processes, and procedures

#### Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Aviation / Airport regulatory frame line (i.e. ICAO, IATA, DGCA, etc.)

## Qualification Pack

- KU2.** ICAO Annex 14 - Aerodromes
- KU3.** Elements of Operational Environment (sequential processes and chain of services)
- KU4.** Industry best practices Standards, Values
- KU5.** Quality, Efficiency & Productivity elements
- KU6.** Ethical Conduct & Professionalism
- KU7.** Monitor, Control & Coordination principles, and practices
- KU8.** Team building & Human Resource management and Control
- KU9.** Airport Collaborative Decision-Making (ACDM)
- KU10.** Stakeholder Management
- KU11.** Change Management
- KU12.** Standard Operating Procedures Development
- KU13.** Technology Applications governing Human Capital Performance

## Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Fill any forms related to documentation
- GS2.** Generate required reports for management as required
- GS3.** Communicate with managers, passengers, and peers
- GS4.** Regularly communicate with all peers in the chain of activities to ensure activities are running smoothly
- GS5.** Identify trends/common causes for errors and suggest possible solutions to the management
- GS6.** Ensure completion of tasks with minimum errors
- GS7.** Ability to take control, accept responsibility and operate calmly in high pressure situations
- GS8.** Demonstrate initiative, self-motivation and a desire to achieve success
- GS9.** Excellent organisational, time, task, and priority management
- GS10.** Articulate and discuss ideas and persuade others to achieve common outcomes
- GS11.** Deepen insights into the planning, allocation, and deployment of resources to anticipate needs
- GS12.** Facilitate work team activities, provide assistance and support needed by team members and promote ownership and commitment among team members to work goals to improve team performance
- GS13.** Provide coaching to others to develop their skills and knowledge on their jobs to enhance performance
- GS14.** Build relationships with people from diverse backgrounds by embracing inclusive work practices to create a positive and harmonious work environment

### AAS/N0629: Digital and AI initiatives at Airport

#### Description

Digital and AI initiatives at airports focus on enhancing passenger experience, operational efficiency, and security through advanced technologies. These include AI-powered facial recognition for seamless check-ins, predictive analytics for flight and baggage handling, and smart infrastructure for real-time decision-making.

#### Scope

The scope covers the following :

- AI Enabled Robots
- Contactless service at the airport
- Digi Yatra

#### Elements and Performance Criteria

##### *AI Enabled Robots*

To be competent, the user/individual on the job must be able to:

- PC1.** Oversee the effective flow of passengers into, out of and throughout the terminal building through AI Robot facilities
- PC2.** Monitor and report deficiencies if any in the Robot
- PC3.** Plan and coordinate the activities of AI Robots
- PC4.** Keeping a check on Robot functioning
- PC5.** Act for escalations of problems faced in or by the robots
- PC6.** Check on the performance of Robot (how many passengers is a robot able to handle in a day, what is the idle time for the robot)
- PC7.** Find the areas of requirement for robots to be installed where it can increase passenger flow by guiding the passengers

##### *Contactless service at the airport*

To be competent, the user/individual on the job must be able to:

- PC8.** Knowledge of implementing the service at various locations at airport
- PC9.** Error handling if any issues in the process or execution of service
- PC10.** Follow all official rules and regulations to implement the process
- PC11.** Check the usage of the service by the passenger
- PC12.** Check its deployment and functionality at various locations
- PC13.** Prepare reports on the usage and implementation of the service and submit to top management
- PC14.** Ensure awareness about the passenger handling using the service

##### *Digi Yatra*

To be competent, the user/individual on the job must be able to:

- PC15.** Manage passenger flow with the inclusion of Digi Yatra

## Qualification Pack

- PC16.** Monitor and report deficiencies if any in the Digi Yatra
- PC17.** Follow appropriate procedure using guidelines
- PC18.** Monitor the usage by the passengers
- PC19.** Check its deployment and functionality at various locations
- PC20.** Prepare reports on performance and submit to top management
- PC21.** Check if the official rules and regulations are followed

## Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Knowledge of how AI robots assist with passenger flow, navigation, and interaction at the airport.
- KU2.** Ability to track and assess robot efficiency, including metrics like idle time and passengers handled per day.
- KU3.** Knowledge of how to identify deficiencies in AI robots and report issues promptly for resolution.
- KU4.** Awareness of the steps to take when robots face issues that require attention beyond regular troubleshooting.
- KU5.** Knowledge of where to deploy robots in the terminal to ensure maximum efficiency and smooth passenger flow.
- KU6.** Understanding how to deploy and manage contactless services( Eg. Mobile check in, Biometrics) across the airport
- KU7.** Ability to troubleshoot and resolve issues in real-time to minimize disruptions to passenger experience.
- KU8.** Knowledge of legal, privacy, and airport-specific regulations that apply to AI systems and contactless services.
- KU9.** ability to track and analyze how passengers are using contactless services to gauge effectiveness and adoption.
- KU10.** Ensuring all deployed systems (robots and contactless services) are working correctly across airport locations.
- KU11.** Ability to compile and submit detailed reports on the performance, usage, and challenges of AI robots and contactless services.
- KU12.** Knowledge of strategies to educate passengers on how to use contactless services and robots for an enhanced experience.
- KU13.** Familiarity with the biometric-based passenger processing system (Digi Yatra) and its integration within the airport infrastructure.
- KU14.** Knowledge of data protection laws and security protocols to ensure passenger privacy and secure handling of biometric data.

## Generic Skills (GS)

User/individual on the job needs to know how to:

## Qualification Pack

- GS1.** Ability to troubleshoot issues and find solutions quickly, especially with malfunctioning robots or contactless services.
- GS2.** Monitoring systems closely to ensure they are functioning correctly. Identify deficiencies or areas for improvement
- GS3.** Understanding and working with technology such as AI robots, biometric systems, and contactless services.
- GS4.** Analyzing performance metrics, passenger flow data, and system usage to assess effectiveness and identify areas of improvement.
- GS5.** Planning, coordinating, and overseeing the deployment and maintenance of robots and technology systems across the airport.
- GS6.** Clear and effective communication for reporting issues, providing updates, and collaborating with teams for troubleshooting and escalation.
- GS7.** Making informed decisions on the placement of robots, deployment of technology, and management of passenger flow.
- GS8.** Ensuring that all technology systems enhance the passenger experience by providing efficient and smooth service.
- GS9.** Working effectively with other departments and staff to ensure the seamless operation of technology systems.
- GS10.** Adjusting plans and actions based on changing circumstances, whether it's robot malfunction or shifts in passenger traffic patterns
- GS11.** Efficiently managing the deployment of robots and technology systems to minimize downtime and optimize passenger handling.
- GS12.** Ensuring that all processes, from contactless services to biometric systems, adhere to legal, security, and privacy regulations.
- GS13.** Ability to generate detailed reports on system performance, passenger usage, and other relevant metrics for management review.
- GS14.** Ability to train airport staff and passengers on how to use robots and contactless services effectively.
- GS15.** Evaluating the performance of technology systems and making adjustments or recommendations for improvements based on data and feedback.

## Qualification Pack

### Assessment Criteria

## Qualification Pack

### AAS/N0502: Follow safety and security procedures

#### Description

This unit is about following awareness of safety and security procedures as defined by organisational policies and regulatory guidelines

#### Elements and Performance Criteria

##### *Comprehending the safety and security procedures for conduct of operations*

To be competent, the user/individual on the job must be able to:

- PC1.** comply with the organisations safety and security policies and procedures
- PC2.** comply with the regulatory guidelines on safe conduct of operations and maintenance of conditions to thwart any acts of unlawful interference
- PC3.** report any identified breaches of safety, and security policies and procedures to the designated person
- PC4.** coordinate with other resources at the workplace (within and outside the organisation) to achieve safe and secure environment
- PC5.** identify and mitigate any safety and security hazards like illness, accidents, fires or acts of unlawful interference if it falls within the limits of individuals authority
- PC6.** report any hazards outside the individuals authority to the relevant person in line with organisational procedures and regulatory guidelines
- PC7.** follow organisations emergency procedures for accidents, fires or acts of unlawful interference
- PC8.** identify and recommend opportunities for improving health, safety, and security to the designated person
- PC9.** complete all health and safety records are updates and procedures well defined

#### Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** hazard identification and risk management as defined within the organisational policy and procedures
- KU2.** regulatory requirements and organisations procedures for maintenance of safety and security standards and individuals role and responsibilities in relation to this
- KU3.** how and when to report hazards
- KU4.** the limits of responsibility for dealing with hazards
- KU5.** the organisations emergency procedures for different emergency situations and the importance of following these
- KU6.** importance of maintaining high standards of safety and security
- KU7.** implications that any non-compliance with safety and security may have on individuals and the organisation
- KU8.** different types of breaches of safety and security and how and when to report these
- KU9.** evacuation procedures for workers and passengers

## Qualification Pack

- KU10.** how to summon medical assistance and the emergency services, where necessary  
**KU11.** how to use the health, safety and accident reporting procedures and the importance of these  
**KU12.** regulatory guidelines on dealing with safety and security emergencies

## Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** complete accurately a well written report in English language detailing the situations of emergency with attention to detail  
**GS2.** read instructions/guidelines/procedures/rules  
**GS3.** listen to and orally communicate information with all concerned  
**GS4.** make decisions on a suitable course of action or response if permitted by the authority matrix  
**GS5.** monitor efficient functioning of all activities  
**GS6.** plan and organize work to achieve targets and deadlines  
**GS7.** communicate with passengers and other stakeholders in a courteous manner  
**GS8.** maintain cordial work relationship  
**GS9.** identify trends/common causes for errors and suggest possible solutions to the supervisor / management  
**GS10.** identify and correct errors  
**GS11.** analyse best possible solutions (cost, time, effort, etc.) suited for operations  
**GS12.** concentrate on task at hand and complete it without error  
**GS13.** apply balanced judgments to different situations

## Qualification Pack

### Assessment Criteria

| Assessment Criteria for Outcomes                                                                                                                                                         | Theory Marks | Practical Marks | Project Marks | Viva Marks |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|-----------------|---------------|------------|
| <i>Comprehending the safety and security procedures for conduct of operations</i>                                                                                                        | <b>52</b>    | <b>48</b>       | -             | -          |

## Assessment Guidelines and Assessment Weightage

### Assessment Guidelines

- 1.Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
- 2.The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
- 3.Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
- 4.Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
- 5.Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
- 6.To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.
- 7.In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack

## Qualification Pack

**Minimum Aggregate Passing % at QP Level : 70**

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

## Assessment Weightage

### Glossary

|                                              |                                                                                                                                                                                                                                                                                                  |
|----------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Sector</b>                                | Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.                                                                      |
| <b>Sub-sector</b>                            | Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.                                                                                                                                                                                     |
| <b>Occupation</b>                            | Occupation is a set of job roles, which perform similar/ related set of functions in an industry.                                                                                                                                                                                                |
| <b>Job role</b>                              | Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.                                                                                                                                                                                |
| <b>Occupational Standards (OS)</b>           | OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts. |
| <b>Performance Criteria (PC)</b>             | Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.                                                                                                                                                                    |
| <b>National Occupational Standards (NOS)</b> | NOS are occupational standards which apply uniquely in the Indian context.                                                                                                                                                                                                                       |
| <b>Qualifications Pack (QP)</b>              | QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.                                                                                                                       |
| <b>Unit Code</b>                             | Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'                                                                                                                                                                                                        |
| <b>Unit Title</b>                            | Unit title gives a clear overall statement about what the incumbent should be able to do.                                                                                                                                                                                                        |
| <b>Description</b>                           | Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.                                                                                                                   |

## Qualification Pack

|                                         |                                                                                                                                                                                                                                                                                                                                                                        |
|-----------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Scope</b>                            | Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.                                                                                                                                                                  |
| <b>Knowledge and Understanding (KU)</b> | Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.                                                                                                                                               |
| <b>Organisational Context</b>           | Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.                                                                                                                                                                       |
| <b>Technical Knowledge</b>              | Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.                                                                                                                                                                                                                                                               |
| <b>Core Skills/ Generic Skills (GS)</b> | Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles. |
| <b>Electives</b>                        | Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.                                                                            |
| <b>Options</b>                          | Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.                                                                                                                                                          |
| <b>Sector</b>                           | Sector is a Conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests                                                                                                                                             |
| <b>Sub - Sector</b>                     | Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.                                                                                                                                                                                                                                                           |
| <b>Occupation</b>                       | Occupation is a set of job roles, which perform a similar/ related set of functions in an industry.                                                                                                                                                                                                                                                                    |

## Qualification Pack

|                                        |                                                                                                                                                                                                                                                                                                 |
|----------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Job role</b>                        | Job role defines a unique set of functions that together form a unique employment opportunity in an organization                                                                                                                                                                                |
| <b>Occupational Standards (OS)</b>     | OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts |
| <b>Performance Criteria (PC)</b>       | Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.                                                                                                                                                                   |
| <b>National Occupational Standards</b> | NOS are occupational standards which apply uniquely in the Indian context.                                                                                                                                                                                                                      |
| <b>Qualifications Pack</b>             | QP comprises the set of NOS,                                                                                                                                                                                                                                                                    |
| <b>Unit code</b>                       | Unit code is a unique identifier for an occupational standard, which is denoted by 'N'.                                                                                                                                                                                                         |
| <b>Unit title</b>                      | Unit title gives a clear overall statement about what the incumbent should be able to do.                                                                                                                                                                                                       |
| <b>Description</b>                     | Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.                                                                                                                  |
| <b>Scope</b>                           | Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.                                                                                           |
| <b>Knowledge and Understanding (K)</b> | Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.                                                                        |
| <b>Organisational context</b>          | Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.                                                                                                |
| <b>Technical knowledge</b>             | Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.                                                                                                                                                                                        |

## Qualification Pack

|                                      |                                                                                                                                                                                                                                                                                             |
|--------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Core skills or Generic Skills</b> | Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.  |
| <b>Electives</b>                     | Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives. |
| <b>Options</b>                       | Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.                                                                               |
