AAS/Q1301: Aerospace Composite Technician

Brief Job Description

Aerospace Composite Technician is responsible for performing composite operation on aerospace parts and understanding the part drawings and its process sheets, and understanding the safety points and precautions for manufacturing composite parts.

Personal Attributes

The individual should have basic communication ability and should be responsible in order to maintain procedures. He should understand work instructions, possess knowledge of layup of composite parts and vacuum bagging, and possess knowledge on the safety and handling of composite materials and parts.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [AAS/N1305: Understand different types of composite materials](#)
2. [AAS/N1301: Understand the composite parts fabrication process for aircraft components/structures](#)
3. [AAS/N1302: Perform manual fabrication process of the composites for aircraft components/structures](#)
4. [AAS/N1303: Perform automatic fabrication process of the composites for aircraft components/structures](#)
5. [ASC/N0021: Maintain 5S at the work premises](#)
6. [DGT/VSQ/N0102: Employability Skills \(60 Hours\)](#)

AAS/N1305: Understand different types of composite materials

Description

This module introduces learners to the types, structures, and applications of composite materials used in the aerospace industry. It covers fiber types, matrix materials, lay-up techniques, and the benefits and limitations of composites in aircraft structures.

Scope

The scope covers the following :

- Understand the types, properties, and structures of composite materials used in aerospace.
- Learn manufacturing methods and processing techniques such as lay-up, curing, and defect identification.
- Identify applications, benefits, and limitations of composites in aerospace components and structures.

Elements and Performance Criteria

Identify Types and Characteristics of Composite Materials

To be competent, the user/individual on the job must be able to:

- PC1.** Define composite materials and understand their role in aerospace engineering.
- PC2.** Identify different types of fibers (e.g., carbon, glass, aramid) used in aerospace composites.
- PC3.** Describe various resin/matrix materials (e.g., epoxy, polyester, phenolic) used in composite structures.
- PC4.** Distinguish between thermoset and thermoplastic composites and their applications.
- PC5.** Understand the concept of fiber orientation and lay-up patterns.

Understand Manufacturing and Processing Methods

To be competent, the user/individual on the job must be able to:

- PC6.** Identify common manufacturing methods (e.g., hand lay-up, vacuum bagging, RTM, filament winding).
- PC7.** Understand the curing process and the importance of temperature, pressure, and time control.
- PC8.** Recognize defects in composite manufacturing such as delamination, porosity, or fiber misalignment.

Know Applications and Limitations of Composites

To be competent, the user/individual on the job must be able to:

- PC9.** Identify key aerospace components made from composite materials (e.g., fuselage panels, fairings, control surfaces).
- PC10.** Understand the advantages of composites (e.g., high strength-to-weight ratio, corrosion resistance).
- PC11.** Understand the limitations and challenges, including repair complexity and material sensitivity.

Qualification Pack

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Definition and classification of composite materials.
- KU2.** Properties and applications of carbon fiber, glass fiber, and aramid fiber.
- KU3.** Types of resin systems and their characteristics.
- KU4.** Differences between thermoset and thermoplastic matrices.
- KU5.** Basics of composite lay-up, fiber orientation, and structural integrity.
- KU6.** Composite part manufacturing methods and curing techniques.
- KU7.** Quality concerns and defect types in composite fabrication.
- KU8.** Applications and design considerations in aerospace structures.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Read and interpret material specifications and data sheets.
- GS2.** Document material usage and quality control parameters.
- GS3.** Communicate clearly with supervisors and quality assurance personnel.
- GS4.** Follow safety and handling procedures for chemicals and fiber materials.
- GS5.** Apply basic mathematical and measurement skills for lay-up and part design.
- GS6.** Identify and report common material handling or process errors.
- GS7.** Work effectively in a team-based manufacturing or maintenance environment.

AAS/N1301: Understand the composite parts fabrication process for aircraft components/structures

Description

This unit is about hand layup and bagging of composite parts

Scope

The scope covers the following :

- Understand and interpret composite part drawings and fabrication tolerances.
- Plan and execute the lay-up process, ensuring all tools, materials, and safety measures are in place.
- Coordinate with supervisors/designers to finalize manufacturing processes and ensure compliance with procedures and safety standards.

Elements and Performance Criteria

Understanding composite parts for fabrication process

To be competent, the user/individual on the job must be able to:

- PC1.** study and understand the component drawings for fabricating the composite parts mentioned in the drawings.
- PC2.** ensure availability of route book and plan lay-up sequence, procedure to manufacture a part
- PC3.** ensure understanding of required fabrication tolerances mentioned in the drawings
- PC4.** ensure process is finalised and required accessories are available to cut the material
- PC5.** check with shop supervisor/ designer to finalise the manufacturing process for open mould and closed mould composite parts
- PC6.** ensure that the forming tool is calibrated before start of tool cleaning; refer to the calibration sticker attached to the tool for the calibration date check
- PC7.** clean the tool layup surface using right cleaning agent as mentioned in the work instructions/ route book
- PC8.** ensure appropriate safety factors have been considered and precautions taken to avoid accidents
- PC9.** follow the various safety instructions mentioned in the work instructions/ safety sign boards / process sheets

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** relevant standards & procedures followed in the company
- KU2.** different types of products manufactured by the company
- KU3.** different bagging process for different parts
- KU4.** process flow/ routing of various components in the composite shop/ organisation
- KU5.** aerospace manufacturing standard and procedures such as ISO 9001, AS9100, etc

Qualification Pack

- KU6.** composite raw materials resin, fibre, pre-preg and consumables for processing such as release film, peel ply , bagging film etc.,
- KU7.** different types of composite manufacturing/ curing processes for parts
- KU8.** tool manufacturing procedures by wet lay-up process
- KU9.** different types of tools used in the fabrication of composite parts and their identification
- KU10.** use various jigs and fixtures and shop tools to orient parts into pre-defined positions for part fabrication and assembly.
- KU11.** basic fundamental of hand layup, pre-preg layup & bagging operations
- KU12.** how to read process sheets and drawings
- KU13.** interpretation of orientations of layers as per the layup sequence
- KU14.** composite material properties/shelf life
- KU15.** basic principles of handling the vacuum bagged components
- KU16.** loading of components in to the autoclaves
- KU17.** all safety features to be used during layup and bagging
- KU18.** quality checks after bagging
- KU19.** release of cured parts from tool , trimming of cured parts

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write notes and observations on job cards, logs and record
- GS2.** draw basic level drawings and charts
- GS3.** read & comprehend documents and notes
- GS4.** interpret/ comprehend the information given in the document monitoring tools
- GS5.** read & interpret symbols given on equipment and work area.
- GS6.** read program and interpret
- GS7.** discuss task lists and job requirements with co-workers
- GS8.** effectively communicate information to team members
- GS9.** interact with supervisor and understand the nature of problem
- GS10.** listen with full attention and comprehend the information given by the speaker
- GS11.** persuade team members to wear the personal protective equipments as per the requirement
- GS12.** ensure that the team understands the importance of using various machines/ equipment without creating any risk to human/machine
- GS13.** analyse, evaluate and apply information gathered from observation, experience, reasoning or communication to act efficiently
- GS14.** recognise a work place problem or a potential problem and take action
- GS15.** determine problems needing priority action
- GS16.** gather information and provide assistance as required to solve problems
- GS17.** refer problems outside area of responsibility to appropriate person
- GS18.** make decisions in emergency conditions in case supervisor is not available
- GS19.** analyse best possible solutions (cost, time, effort, etc.) suited for operations

Qualification Pack

GS20. concentrate on task at hand and complete it without errors

GS21. apply balanced judgments to different situations

Qualification Pack

AAS/N1302: Perform manual fabrication process of the composites for aircraft components/structures

Description

This unit is about Hand Layup and bagging of composite parts

Scope

The scope covers the following :

- Prepare tools and materials as per work instructions and ensure calibration and cleanliness of lay-up tools.
- Carry out hand layup and bagging of composite parts following drawings, lay-up sequences, and process sheets.
- Ensure correct material handling, vacuum bagging, leak checks, and safe trimming of parts, maintaining a clean and compliant work environment.

Elements and Performance Criteria

Tools and materials preparation

To be competent, the user/individual on the job must be able to:

- PC1.** ensure the right tool are available for the part layup, refer work instructions and the route book/ process sheet for the tool number and the part number
- PC2.** ensure the tool is calibrated before start of tool cleaning; refer to the calibration sticker attached to the tool for the calibration date check
- PC3.** clean the tool layup surface using right cleaning agent as mentioned in the work instructions/ route book

Hand layup of composite parts and bagging

To be competent, the user/individual on the job must be able to:

- PC4.** interpret and gather components drawings, route book, lay up sequence/ sketch for establishing the process control and development controls
- PC5.** ensure the prepreg material should be kept for the required hours at room temperature before use
- PC6.** ensure availability of required materials like prepreps, adhesives, cores, sheet metal details etc. required to start part/assembly fabrication
- PC7.** ensure start lay-up of part as per the layup sequence/ sketch, refer to drawings where required and ensures correctness of material and orientation. Lay-up of travel coupon panels (TC panels) as required and the route book
- PC8.** lay-up (monolithic or sandwich) as per approved drawings/ process sheet
- PC9.** place the thermocouple between the tool surface after completion of lay-up, and lay-up to monitor the temperature during curing
- PC10.** ensure the right bagging film, release film, breather and the sealant are used for bagging; check the shelf life of these materials with the supervisor
- PC11.** prepare vacuum bag and seal the lay-up with vacuum bag, provide the vacuum valves

Qualification Pack

- PC12.** carry out vacuum leak check, vacuum leak shall be within permissible limits
- PC13.** trim the parts and de-burr as per the drawings.
- PC14.** maintain a clean and safe working environment near the trimming place to avoid contaminated oil/ moisture absorption.
- PC15.** prepare test specimens to the correct dimensions as per the standards/ work instructions.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** relevant standards & procedures followed in the company
- KU2.** different types of products manufactured by the company
- KU3.** different bagging process for different parts
- KU4.** process flow/ routing of various components in the composite shop/ organisation
- KU5.** aerospace manufacturing standard and procedures such as ISO 9001, AS9100, etc
- KU6.** different types of composite manufacturing/ curing processes
- KU7.** different types of tools used in the fabrication of composite parts and their identification
- KU8.** basic fundamental of hand layup & bagging operations
- KU9.** how to read process sheets and drawings
- KU10.** knowledge of all safety features to be used during layup and bagging
- KU11.** knowledge in the interpretation of orientations of layers as per the layup sequence
- KU12.** knowledge of loading of components in to the autoclave
- KU13.** knowledge in quality checks after bagging
- KU14.** knowledge of composite material properties/shelf life
- KU15.** basic principles of handling the vacuum bagged components

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write notes and observations on job cards, logs and record
- GS2.** draw basic level drawings and charts
- GS3.** read & comprehend documents, notes
- GS4.** interpret/ comprehend the information given in the document monitoring tools
- GS5.** read & interpret symbols given on equipment and work area
- GS6.** read program and interpret

AAS/N1303: Perform automatic fabrication process of the composites for aircraft components/structures

Description

This unit is about the knowledge, understanding and skills required of an individual to carry out composite fabrication using automatic laying up machine

Scope

The scope covers the following :

- Understand and follow layup sequences and process instructions for automated composite fabrication.
- Prepare tools, materials, and machine settings to carry out precise and continuous layup operations.
- Perform trimming, edge finishing, and test specimen preparation while ensuring cleanliness and quality compliance.

Elements and Performance Criteria

Tools and material preparation

To be competent, the user/individual on the job must be able to:

- PC1.** interpret and understand the layup sequence mentioned in the drawing/ route card/ process sheet
- PC2.** collect all the required tools from stores
- PC3.** fill up required mixture of composite fibres and resins as mentioned in the process sheet in the hooper.
- PC4.** prepare the prepregs material for moulding and store in the laying up machine

Layup using machine

To be competent, the user/individual on the job must be able to:

- PC5.** ensure that the layup sequence is adhered as per drawings/ process sheet
- PC6.** maintain the required gap between layup rollers and the bench
- PC7.** roll the rollers such that there is continuity in laying up the prepreg material or fix up the ends of the fibre on the machine and fix up on the surface. Ensure procedure/ laying instructions as per the laying up machine are followed
- PC8.** apply adhesives or appropriate bonding on the surface using another sets of roller on the machine
- PC9.** ensure sufficient thickness is been achieved on the surface as per given process sheet/ work instruction
- PC10.** trim the excess material using the cutters on the machine
- PC11.** finish the edges as per procedures provided in the drawing
- PC12.** maintain a clean and safe working environment near the machine to avoid contaminated oil/ moisture absorption

Specimen preparations

Qualification Pack

To be competent, the user/individual on the job must be able to:

PC13. prepare the test specimens to the correct dimensions as per the standards/ work instructions

PC14. offer parts and specimen to Quality department for inspection

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. relevant standards & procedures followed in the company

KU2. different types of products manufactured by the company

KU3. different types of curing processes/tool available

KU4. process flow/ routing of various components in the composite shop/ organisation

KU5. aerospace manufacturing standard and procedures such as ISO 9001, AS9100, etc

KU6. different types of composite manufacturing/ curing processes

KU7. different types of tools used in the fabrication of composite parts and their identification

KU8. basic fundamentals of trimming & its operations

KU9. how to read process cure cycle drawings and curing the part to get cured components as defined in the process

KU10. all safety features, preliminary checking of specimen dimensions

KU11. specimen cutting and its standards

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. write basic level notes and observations

GS2. draw basic level drawing and charts

GS3. read & comprehend documents and notes, process documentation & control plan

GS4. interpret/ comprehend the information given in the document & notes

GS5. read & interpret symbols given on equipment and work area.

GS6. read engineering drawings, sketches, etc

GS7. discuss task lists and job requirements with co-workers

GS8. effectively communicate information to team members

GS9. question operator/ supervisor in order to understand the nature of the problem

GS10. attentively listen with full attention and comprehend the information given by the speaker

GS11. make decision on a suitable course of action or response

GS12. monitor smooth functioning of all activities

GS13. plan and organise work

GS14. communicate with internal customers with etiquette and share all relevant information

GS15. take decisions favoring customers and make them satisfied

GS16. maintain effective relationship with the peers

Qualification Pack

- GS17.** identify trends/ common causes for error and suggest possible solutions to the supervisor/ management
- GS18.** identify and correct error
- GS19.** analyse on best possible solutions (cost, time, effort, etc) suited for customer requirement
- GS20.** concentrate on task at hand and complete it without errors
- GS21.** apply balanced judgments to different situations

Qualification Pack

ASC/N0021: Maintain 5S at the work premises

Description

This NOS is about ensuring all 5 S activities both at the shop floor and the office area to facilitate increase in work productivity

Elements and Performance Criteria

Ensure sorting

To be competent, the user/individual on the job must be able to:

- PC1..** follow the sorting process and check that the tools, fixtures & jigs that are lying on workstations are the ones in use and unnecessary items are not cluttering the workbenches or work surfaces.
- PC2..** ensure segregation of waste in hazardous/ non hazardous waste as per the sorting work instructions
- PC3..** follow the technique of waste disposal and waste storage in the proper bins as per sop
- PC4..** segregate the items which are labelled as red tag items for the process area and keep them in the correct places
- PC5.** sort the tools/ equipment/ fasteners/ spare parts as per specifications/ utility into proper trays, cabinets, lockers as mentioned in the 5s guidelines/ work instructions
- PC6. .** ensure that areas of material storage areas are not overflowing
- PC7.** properly stack the various types of boxes and containers as per the size/ utility to avoid any fall of items/ breakage and also enable easy sorting when required
- PC8.** return the extra material and tools to the designated sections and make sure that no additional material/ tool is lying near the work area
- PC9.** follow the floor markings/ area markings used for demarcating the various sections in the plant as per the prescribed instructions and standards
- PC10.** follow the proper labeling mechanism of instruments/ boxes/ containers and maintaining reference files/ documents with the codes and the lists

Ensure proper documentation and storage (organizing , streamlining)

To be competent, the user/individual on the job must be able to:

- PC11.** check that the items in the respective areas have been identified as broken or damaged
- PC12.** follow the given instructions and check for labelling of fluids, oils. lubricants, solvents, chemicals etc. and proper storage of the same to avoid spillage, leakage, fire etc
- PC13.** make sure that all material and tools are stored in the designated places and in the manner indicated in the 5s instructions

Ensure cleaning of self and the work place

To be competent, the user/individual on the job must be able to:

- PC14.** check whether safety glasses are clean and in good condition
- PC15.** keep all outside surfaces of recycling containers are clean
- PC16..** ensure that the area has floors swept, machinery clean and generally clean. in case of cleaning, ensure that proper displays are maintained on the floor which indicate potential safety hazards

Qualification Pack

- PC17..** check whether all hoses, cabling & wires are clean, in good condition and clamped to avoid any mishap or mix up
- PC18..** ensure workbenches and work surfaces are clean and in good condition
- PC19.** follow the cleaning schedule for the lighting system to ensure proper illumination
- PC20.** store the cleaning material and equipment in the correct location and in good condition
- PC21.** ensure self-cleanliness - clean uniform, clean shoes, clean gloves, clean helmets, personal hygiene

Ensure sustenance

To be competent, the user/individual on the job must be able to:

- PC22.** follow the daily cleaning standards and schedules to create a clean working environment
- PC23.** attend all training programs for employees on 5 s
- PC24.** support the team during the audit of 5 s
- PC25.** participate actively in employee work groups on 5s and encourage team members for active participation
- PC26.** follow the guidelines for what to do and what not to do to build sustainability in 5s as mentioned in the 5s check lists/ work instructions

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** relevant standards, procedures and policies related to 5S followed in the company
- KU2.** have basic knowledge of 5S procedures
- KU3.** know various types 5s practices followed in various areas
- KU4.** understand the 5S checklists provided in the department/ team
- KU5.** have skills to identify useful & non useful items
- KU6.** have knowledge of labels , signs & colours used as indicators
- KU7.** knowledge on how to sort and store various types of tools, equipment, material etc.
- KU8.** know , how to identify various types of waste products
- KU9.** understand the impact of waste/ dirt/ dust/unwanted substances on the process/ environment/ machinery/ human body
- KU10.** have knowledge of best ways of cleaning & waste disposal
- KU11.** understand the importance of standardization in processes
- KU12.** understand the importance of sustainability in 5S
- KU13.** have knowledge of TQM process
- KU14.** have knowledge of various materials and storage norms
- KU15.** understand visual controls, symbols, graphs etc.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write basic level notes and observations

Qualification Pack

- GS2.** note down observations (if any) related to the process
- GS3.** read 5S instructions put up across the plant premises
- GS4.** effectively communicate information to team members inform employees in the plant and concerned functions about 5S
- GS5.** question the process head in order to understand the 5S related issues
- GS6.** attentively listen with full attention and comprehend the information given by the speaker during 5S training programs
- GS7.** use common sense and make judgments during day to day basis
- GS8.** use reasoning skills to identify and resolve basic problems using 5S
- GS9.** persuade co team members to follow 5 S
- GS10.** ensure that the co team members understand the importance of using 5 S tool
- GS11.** use innovative skills to perform and manage 5 S activities at the work desk and the shop floor
- GS12.** exhibit inquisitive behaviour to seek feedback and question on the existing set patterns of work
- GS13.** do what is right, not what is a popular practices
- GS14.** follow shop floor rules& regulations and avoid deviations; make 5S an integral way of life
- GS15.** ensure self-cleanliness on a daily basis
- GS16.** demonstrate the will to keep the work area in a clean and orderly manner

Qualification Pack

DGT/VSQ/N0102: Employability Skills (60 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Career Development & Goal Setting
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

- PC1.** identify employability skills required for jobs in various industries
- PC2.** identify and explore learning and employability portals

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

- PC3.** recognize the significance of constitutional values, including civic rights and duties, citizenship, responsibility towards society etc. and personal values and ethics such as honesty, integrity, caring and respecting others, etc.
- PC4.** follow environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

- PC5.** recognize the significance of 21st Century Skills for employment
- PC6.** practice the 21st Century Skills such as Self-Awareness, Behaviour Skills, time management, critical and adaptive thinking, problem-solving, creative thinking, social and cultural awareness, emotional awareness, learning to learn for continuous learning etc. in personal and professional life

Basic English Skills

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC7.** use basic English for everyday conversation in different contexts, in person and over the telephone
- PC8.** read and understand routine information, notes, instructions, mails, letters etc. written in English
- PC9.** write short messages, notes, letters, e-mails etc. in English

Career Development & Goal Setting

To be competent, the user/individual on the job must be able to:

- PC10.** understand the difference between job and career
- PC11.** prepare a career development plan with short- and long-term goals, based on aptitude

Communication Skills

To be competent, the user/individual on the job must be able to:

- PC12.** follow verbal and non-verbal communication etiquette and active listening techniques in various settings
- PC13.** work collaboratively with others in a team

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

- PC14.** communicate and behave appropriately with all genders and PwD
- PC15.** escalate any issues related to sexual harassment at workplace according to POSH Act

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

- PC16.** select financial institutions, products and services as per requirement
- PC17.** carry out offline and online financial transactions, safely and securely
- PC18.** identify common components of salary and compute income, expenses, taxes, investments etc
- PC19.** identify relevant rights and laws and use legal aids to fight against legal exploitation

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

- PC20.** operate digital devices and carry out basic internet operations securely and safely
- PC21.** use e- mail and social media platforms and virtual collaboration tools to work effectively
- PC22.** use basic features of word processor, spreadsheets, and presentations

Entrepreneurship

To be competent, the user/individual on the job must be able to:

- PC23.** identify different types of Entrepreneurship and Enterprises and assess opportunities for potential business through research
- PC24.** develop a business plan and a work model, considering the 4Ps of Marketing Product, Price, Place and Promotion
- PC25.** identify sources of funding, anticipate, and mitigate any financial/ legal hurdles for the potential business opportunity

Customer Service

To be competent, the user/individual on the job must be able to:

- PC26.** identify different types of customers
- PC27.** identify and respond to customer requests and needs in a professional manner.

Qualification Pack

PC28. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC29. create a professional Curriculum vitae (Résumé)

PC30. search for suitable jobs using reliable offline and online sources such as Employment exchange, recruitment agencies, newspapers etc. and job portals, respectively

PC31. apply to identified job openings using offline /online methods as per requirement

PC32. answer questions politely, with clarity and confidence, during recruitment and selection

PC33. identify apprenticeship opportunities and register for it as per guidelines and requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills and different learning and employability related portals

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use English language for effective verbal (face to face and telephonic) and written communication in formal and informal set up

KU6. importance of career development and setting long- and short-term goals

KU7. about effective communication

KU8. POSH Act

KU9. Gender sensitivity and inclusivity

KU10. different types of financial institutes, products, and services

KU11. how to compute income and expenditure

KU12. importance of maintaining safety and security in offline and online financial transactions

KU13. different legal rights and laws

KU14. different types of digital devices and the procedure to operate them safely and securely

KU15. how to create and operate an e- mail account and use applications such as word processors, spreadsheets etc.

KU16. how to identify business opportunities

KU17. types and needs of customers

KU18. how to apply for a job and prepare for an interview

KU19. apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. read and write different types of documents/instructions/correspondence

GS2. communicate effectively using appropriate language in formal and informal settings

Qualification Pack

- GS3.** behave politely and appropriately with all
- GS4.** how to work in a virtual mode
- GS5.** perform calculations efficiently
- GS6.** solve problems effectively
- GS7.** pay attention to details
- GS8.** manage time efficiently
- GS9.** maintain hygiene and sanitization to avoid infection

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Qualification Pack

Minimum Aggregate Passing % at QP Level : 60

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
