AAS/Q2002: Aircraft Avionics Technician

Brief Job Description

Aircraft Avionics Technician is responsible for repairing and overhauling of aircraft/ helicopter avionics system

Personal Attributes

Aircraft Avionics Technician would include good communication skills, excellent written communication skills, and good interpersonal skills with a keen eye for details

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [AAS/N0502: Follow safety and security procedures](#)
2. [AAS/N0503: Work Effectively in a Team](#)
3. [AAS/N2018: Understand the process and procedures of avionics systems components removal/installation](#)
4. [AAS/N2019: Perform Avionics Systems components removal/installation](#)
5. [AAS/N2020: Perform Avionics systems inspections & servicing](#)
6. [DGT/VSQ/N0102: Employability Skills \(60 Hours\)](#)

Qualification Pack

AAS/N0502: Follow safety and security procedures

Description

This unit is about following awareness of safety and security procedures as defined by organisational policies and regulatory guidelines

Elements and Performance Criteria

Comprehending the safety and security procedures for conduct of operations

To be competent, the user/individual on the job must be able to:

- PC1.** comply with the organisations safety and security policies and procedures
- PC2.** comply with the regulatory guidelines on safe conduct of operations and maintenance of conditions to thwart any acts of unlawful interference
- PC3.** report any identified breaches of safety, and security policies and procedures to the designated person
- PC4.** coordinate with other resources at the workplace (within and outside the organisation) to achieve safe and secure environment
- PC5.** identify and mitigate any safety and security hazards like illness, accidents, fires or acts of unlawful interference if it falls within the limits of individuals authority
- PC6.** report any hazards outside the individuals authority to the relevant person in line with organisational procedures and regulatory guidelines
- PC7.** follow organisations emergency procedures for accidents, fires or acts of unlawful interference
- PC8.** identify and recommend opportunities for improving health, safety, and security to the designated person
- PC9.** complete all health and safety records are updates and procedures well defined

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** hazard identification and risk management as defined within the organisational policy and procedures
- KU2.** regulatory requirements and organisations procedures for maintenance of safety and security standards and individuals role and responsibilities in relation to this
- KU3.** how and when to report hazards
- KU4.** the limits of responsibility for dealing with hazards
- KU5.** the organisations emergency procedures for different emergency situations and the importance of following these
- KU6.** importance of maintaining high standards of safety and security
- KU7.** implications that any non-compliance with safety and security may have on individuals and the organisation
- KU8.** different types of breaches of safety and security and how and when to report these
- KU9.** evacuation procedures for workers and passengers

Qualification Pack

- KU10.** how to summon medical assistance and the emergency services, where necessary
KU11. how to use the health, safety and accident reporting procedures and the importance of these
KU12. regulatory guidelines on dealing with safety and security emergencies

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** complete accurately a well written report in English language detailing the situations of emergency with attention to detail
GS2. read instructions/guidelines/procedures/rules
GS3. listen to and orally communicate information with all concerned
GS4. make decisions on a suitable course of action or response if permitted by the authority matrix
GS5. monitor efficient functioning of all activities
GS6. plan and organize work to achieve targets and deadlines
GS7. communicate with passengers and other stakeholders in a courteous manner
GS8. maintain cordial work relationship
GS9. identify trends/common causes for errors and suggest possible solutions to the supervisor / management
GS10. identify and correct errors
GS11. analyse best possible solutions (cost, time, effort, etc.) suited for operations
GS12. concentrate on task at hand and complete it without error
GS13. apply balanced judgments to different situations

Qualification Pack

AAS/N0503: Work Effectively in a Team

Description

This OS describes the skills and knowledge required to work effectively within and with teams.

Scope

The scope covers the following :

- Support the work team

Elements and Performance Criteria

Support the work team

To be competent, the user/individual on the job must be able to:

- PC1.** display courteous and helpful behaviour at all times.
- PC2.** take opportunities to enhance the level of assistance offered to colleagues.
- PC3.** meet all reasonable requests for assistance within acceptable workplace timeframes.
- PC4.** complete allocated tasks as required.
- PC5.** seek assistance when difficulties arise.
- PC6.** use questioning techniques to clarify instructions or responsibilities.
- PC7.** identify and display a non discriminatory attitude in all contacts with customers and other staff members.
- PC8.** observe appropriate dress code and presentation as required by the workplace, job role and level of customer contact.
- PC9.** follow personal hygiene procedures according to organisational policy and relevant legislation
- PC10.** interpret, confirm and act on workplace information, instructions and procedures relevant to the particular task.
- PC11.** interpret, confirm and act on legal requirements in regard to anti- discrimination, sexual harassment and bullying.
- PC12.** ask questions to seek and clarify workplace information.
- PC13.** plan and organise daily work routine within the scope of the job role.
- PC14.** prioritise and complete tasks according to required timeframes.
- PC15.** identify work and personal priorities and achieve a balance between competing priorities

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** ask questions to identify and confirm requirements.
- KU2.** follow routine instructions through clear and direct communication
- KU3.** use language and concepts appropriate to cultural differences

Qualification Pack

- KU4.** use and interpret non-verbal communication.
- KU5.** the scope of information or materials required within the parameters of the job role.
- KU6.** consequences of poor team participation on job outcomes.
- KU7.** work health and safety requirements.
- KU8.** The policies and procedures relating to the job role.
- KU9.** The value system of the organisation.
- KU10.** Employee rights and obligations.
- KU11.** The reporting hierarchy and escalation matrix.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** complete documentation accurately
- GS2.** write simple reports when required.
- GS3.** read information accurately.
- GS4.** read and interpret data sheets.
- GS5.** listen to and orally communicate information with all concerned
- GS6.** make appropriate decisions regarding the responsibilities of the job role.
- GS7.** monitor efficient functioning of all activities
- GS8.** plan and organise work to achieve targets and deadlines
- GS9.** communicate with passengers and other stakeholders in a courteous manner
- GS10.** maintain effective work relationship
- GS11.** identify trends/common causes for errors and suggest possible solutions to the supervisor / management
- GS12.** identify and correct errors
- GS13.** analyse best possible solutions (cost, time, effort, etc.) suited for operations
- GS14.** concentrate on task at hand and complete it without errors
- GS15.** apply balanced judgments to different situations

AAS/N2018: Understand the process and procedures of avionics systems components removal/installation

Description

This unit is about understanding the process, procedures, and precautions of Avionics systems components removal/installation

Scope

The scope covers the following :

- This NOS falls under the Maintenance Repair and Overhauls category/sub-sector of Aviation. Its scope includes understanding the processes, procedures, and SOPs of the removal/installation of avionics systems components.

Elements and Performance Criteria

Comprehending process and procedures of avionics systems components removal/installation

To be competent, the user/individual on the job must be able to:

- PC1.** understand all types of drawings, system schematics sketches and work instructions as per AMM / Procedure sheets at the beginning of the component removal/installation
- PC2.** understand of limits, tolerances & geometric dimensions
- PC3.** understand the usage of gauges, standard tools, torque wrenches, instruments, equipment etc
- PC4.** understand the basics of avionics systems and its components.
- PC5.** understand the various materials, parts and consumables used during components removal/installation process
- PC6.** understand the criticality of sub-assemblies of an Avionics system
- PC7.** understand the right removal/installation methodology and various process parameters like torque application, fitting tolerances, bolting and fastening as mentioned in the work instruction/organization /Aircraft Maintenance Manuals
- PC8.** understand safety related to the work area
- PC9.** ensure that the observed problems are highlighted to concerned supervisor while understanding the technical literature, drawings and sketches, he/she must
- PC10.** understand the changes which may happen from time to time in removal/installation process based on the aircraft configuration
- PC11.** red flagging of the deviations during the removal/installation process of Avionics system components and raising it to concerned supervisor/Quality inspectors

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** relevant standards and procedures followed in the organization

Qualification Pack

- KU2.** different types of Avionics systems
- KU3.** different types of manuals containing work related information
- KU4.** how to read avionics technical literature, drawings, sketches, process sheet, Aircraft Maintenance manual etc.
- KU5.** geometrical dimensioning and tolerance limits
- KU6.** use of standard tools like torque wrenches, spanners, sockets, multimeter etc.
- KU7.** use of standard measuring instruments etc.
- KU8.** different types of assembling processes like fitting, bolting, torquing, tightening, safety, locking, & electrical wiring standard procedures, etc.
- KU9.** basic computer knowledge for referring technical literature, schematics, parts, etc.
- KU10.** basic knowledge regarding quality management

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** document the available information
- GS2.** note down observations in the given format
- GS3.** write information documents to concerned departments/teams under guidance of supervisor
- GS4.** enter the information in Inspection record sheets, relevant registers etc
- GS5.** read and interpret Avionics drawings, schematics, and symbols used
- GS6.** read the organization/manufacture manuals and process documents
- GS7.** effectively discuss and communicate regarding targets, activities, processes etc with supervisor and co-workers
- GS8.** question supervisor in order to understand the nature of problem
- GS9.** make decisions on a suitable course of action or response if permitted by the authority matrix
- GS10.** plan, organise and prioritise the job received from the shift In charge
- GS11.** validate all the process/equipment manuals so that the final process selection is correct
- GS12.** support the supervisor in scheduling tasks for timely completion of the job
- GS13.** communicate with stakeholders in a courteous manner
- GS14.** maintain cordial working relationship
- GS15.** recognize a work place problem or a potential problem and take action
- GS16.** determine problems needing priority action
- GS17.** gather information and provide assistance as required to solve problems

AAS/N2019: Perform Avionics Systems components removal/installation

Description

This NOS unit is about the activities of Avionics Systems components removal/installation undertaken by a technician.

Scope

The scope covers the following :

- This NOS falls under the Maintenance Repair and Overhauls category/sub-sector of Aviation. Its scope includes performing the removal/installation of avionics systems components.

Elements and Performance Criteria

Avionics Systems components removal/installation

To be competent, the user/individual on the job must be able to:

- PC1.** receive the components on the aircraft and perform visual inspection of the components to identify defects
- PC2.** receive the documentation received with the components to ensure that all relevant details are filled in the documents as per regulatory/organizational policies and procedures
- PC3.** install the components on the aircraft and perform applicable operational/functional/BITE of the aircraft systems
- PC4.** visually inspect the Avionics, aircraft systems and record the defects observed & to ascertain if the defects are within acceptable limits to certify airworthiness of the aircraft
- PC5.** tag the parts with the appropriate tags and ensure all relevant information is filled as per regulatory/organization policy and procedures
- PC6.** perform wiring checks as per electrical wiring standard maintenance practices for troubleshooting purposes
- PC7.** dispatch the aircraft after performing applicable scheduled line maintenance inspections as per approved maintenance program & snag rectifications

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** relevant standards and procedures followed in the organization
- KU2.** different types of avionics systems
- KU3.** different types of manuals containing work related information
- KU4.** safety norms practiced in the organization
- KU5.** how to read avionics technical literature, drawings, sketches, process sheet, Aircraft Maintenance manual etc
- KU6.** geometrical dimensioning and tolerance limits
- KU7.** use of standard tools like torque wrenches, spanners, sockets, multimeter etc.

Qualification Pack

- KU8.** use of standard measuring instruments etc
- KU9.** different types of assembling processes like fitting, bolting, torquing, tightening, safety, locking, & electrical wiring standard procedures, etc.
- KU10.** basic computer knowledge for referring technical literature, schematics, parts etc.
- KU11.** basic knowledge regarding quality management

Generic Skills (GS)

AAS/N2020: Perform Avionics systems inspections & servicing

Description

This unit is about carrying out various maintenance inspection activities/ repair of Avionics systems, for all types of aircraft.

Scope

The scope covers the following :

- This NOS falls under the Maintenance Repair and Overhauls category/sub-sector of Aviation. The scope includes the safety standards to be followed for inspection and performing aircraft inspections/operational tests/BITE etc.

Elements and Performance Criteria

Safety to be considered before aircraft inspections

To be competent, the user/individual on the job must be able to:

- PC1.** comply with organizations Occupational Health & Safety (OHS) standards
- PC2.** ensure that work area around the aircraft are clean as mentioned in the work instruction/ Standard Operating Procedure (SOP) of organization
- PC3.** check for the correctness of Ground Support Equipment.
- PC4.** escalate any queries to the supervisor

Performing aircraft inspections/operational test/BITE etc.

To be competent, the user/individual on the job must be able to:

- PC5.** select appropriate AMM/TSM task, inspection schedule applicable
- PC6.** select appropriate component part number from IPC
- PC7.** perform the required maintenance task, inspection schedule as per AMM & standard maintenance practices
- PC8.** assist supervisor in closure of maintenance task & normalizing the aircraft.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** relevant standards and procedures followed in the organization
- KU2.** functional processes like procurement, store management, inventory management, quality management and key contact points for query resolution
- KU3.** hazard and risk management as defined by organization
- KU4.** compliance requirement for the roles and responsibility
- KU5.** organizations safety and security requirements
- KU6.** how to read and interpret system schematics, avionics technical literature, drawings and symbols used in technical literatures

Qualification Pack

- KU7.** routine information written on job instruction
- KU8.** basic principle of safety in the line maintenance

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** document information from the system schematics, avionics technical literature
- GS2.** note down observation (if any) related to the aircraft inspection
- GS3.** read and interpret system schematics, avionics technical literature
- GS4.** read and interpret symbols and measurement used in the aircraft technical literatures
- GS5.** discuss task lists, schedules and activities with the supervisor
- GS6.** effectively communicate with the team members

DGT/VSQ/N0102: Employability Skills (60 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Career Development & Goal Setting
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

- PC1.** identify employability skills required for jobs in various industries
- PC2.** identify and explore learning and employability portals

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

- PC3.** recognize the significance of constitutional values, including civic rights and duties, citizenship, responsibility towards society etc. and personal values and ethics such as honesty, integrity, caring and respecting others, etc.
- PC4.** follow environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

- PC5.** recognize the significance of 21st Century Skills for employment
- PC6.** practice the 21st Century Skills such as Self-Awareness, Behaviour Skills, time management, critical and adaptive thinking, problem-solving, creative thinking, social and cultural awareness, emotional awareness, learning to learn for continuous learning etc. in personal and professional life

Basic English Skills

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC7.** use basic English for everyday conversation in different contexts, in person and over the telephone
- PC8.** read and understand routine information, notes, instructions, mails, letters etc. written in English
- PC9.** write short messages, notes, letters, e-mails etc. in English

Career Development & Goal Setting

To be competent, the user/individual on the job must be able to:

- PC10.** understand the difference between job and career
- PC11.** prepare a career development plan with short- and long-term goals, based on aptitude

Communication Skills

To be competent, the user/individual on the job must be able to:

- PC12.** follow verbal and non-verbal communication etiquette and active listening techniques in various settings
- PC13.** work collaboratively with others in a team

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

- PC14.** communicate and behave appropriately with all genders and PwD
- PC15.** escalate any issues related to sexual harassment at workplace according to POSH Act

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

- PC16.** select financial institutions, products and services as per requirement
- PC17.** carry out offline and online financial transactions, safely and securely
- PC18.** identify common components of salary and compute income, expenses, taxes, investments etc
- PC19.** identify relevant rights and laws and use legal aids to fight against legal exploitation

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

- PC20.** operate digital devices and carry out basic internet operations securely and safely
- PC21.** use e- mail and social media platforms and virtual collaboration tools to work effectively
- PC22.** use basic features of word processor, spreadsheets, and presentations

Entrepreneurship

To be competent, the user/individual on the job must be able to:

- PC23.** identify different types of Entrepreneurship and Enterprises and assess opportunities for potential business through research
- PC24.** develop a business plan and a work model, considering the 4Ps of Marketing Product, Price, Place and Promotion
- PC25.** identify sources of funding, anticipate, and mitigate any financial/ legal hurdles for the potential business opportunity

Customer Service

To be competent, the user/individual on the job must be able to:

- PC26.** identify different types of customers
- PC27.** identify and respond to customer requests and needs in a professional manner.

Qualification Pack

PC28. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC29. create a professional Curriculum vitae (Résumé)

PC30. search for suitable jobs using reliable offline and online sources such as Employment exchange, recruitment agencies, newspapers etc. and job portals, respectively

PC31. apply to identified job openings using offline /online methods as per requirement

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Qualification Pack

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
