AAS/Q4201: Airport Safety Officer

Brief Job Description

The Airport Safety Officer is responsible for maintaining a safe and secure environment within the airport premises, including airside and landside areas. Their duties involve regular inspections, hazard identification, monitoring compliance with safety procedures, and responding to emergencies such as accidents, spills, fires, or security breaches. They ensure that airport operations comply with aviation safety regulations, organizational protocols, and environmental standards. The crew coordinates ground handling teams, air traffic control, emergency response units, and maintenance personnel to proactively manage risks and uphold operational safety standards.

Personal Attributes

An Airport Safety Officer member should be observant, physically fit, and quick to respond to hazards. They must have strong communication skills, integrity, and the ability to work well in a team. A calm attitude under pressure and knowledge of safety procedures are essential for maintaining a secure airport environment.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [AAS/N4202: Ensure Airside Operations Safety through Inspections and Hazard Reporting](#)
2. [AAS/N4203: Implementation and Maintenance of Safety Management System](#)
3. [AAS/N4204: Manage Risks, and Conduct Compliance Audits](#)
4. [DGT/VSQ/N0101: Employability Skills \(30 Hours\)](#)

AAS/N4202: Ensure Airside Operations Safety through Inspections and Hazard Reporting

Description

This unit is about performing regular inspections, identifying and reporting safety hazards, and ensuring the safe functioning of airside operations.

Scope

The scope covers the following :

- Conduct routine inspections of airside infrastructure and operational areas
- Identify and report safety hazards like FOD, surface damage, or non-compliant markings
- Ensure compliance of personnel, vehicles, and ongoing works with airside safety protocols
- Maintain accurate documentation and promptly escalate safety concerns
- Participate in safety briefings and support emergency response and hazard mitigation efforts

Elements and Performance Criteria

Conducting Airside Inspections

To be competent, the user/individual on the job must be able to:

- PC1.** conduct regular inspections of airside areas including runways, taxiways, aprons, signage, lighting, and markings
- PC2.** identify foreign object debris (FOD), surface damage, and other hazards that could affect aircraft and vehicular safety
- PC3.** ensure all safety equipment and markings are present, functional, and compliant with regulatory standards
- PC4.** verify that airside construction or maintenance works are cordoned off and compliant with safety protocols
- PC5.** ensure safety procedures are followed by all personnel and vehicles operating in airside areas

Reporting and Hazard Mitigation

To be competent, the user/individual on the job must be able to:

- PC6.** accurately document inspection findings in accordance with organizational protocols
- PC7.** report hazards or breaches in safety protocols to relevant authorities promptly.
- PC8.** follow up on reported issues to ensure timely rectification and closure.
- PC9.** participate in safety meetings and briefings, and share updates related to airside safety.
- PC10.** support emergency response procedures in case of safety-related incidents.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** airport layout and classification of airside operational areas.

Qualification Pack

- KU2.** safety standards and regulatory guidelines for airside operations (e.g., DGCA, ICAO regulations) .
- KU3.** types of common airside hazards such as FOD, surface irregularities, and equipment failure.
- KU4.** procedures for routine and special inspections.
- KU5.** hazard identification, risk assessment, and reporting procedures.
- KU6.** formats and protocols for inspection documentation and reporting.
- KU7.** communication channels and escalation matrix for hazard reporting.
- KU8.** procedures for responding to safety incidents and emergencies.
- KU9.** roles and responsibilities of personnel involved in airside operations.
- KU10.** importance of coordination with ATC, ground staff, and maintenance crews.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** prepare clear, accurate written reports in English for inspection and incident reporting.
- GS2.** read and interpret safety manuals, inspection checklists, and regulatory documentation.
- GS3.** effectively communicate inspection results and safety concerns to team members and supervisors.
- GS4.** make sound decisions in the event of identifying safety hazards.
- GS5.** coordinate with multiple teams to plan and carry out inspections efficiently.
- GS6.** manage time effectively and prioritize tasks to meet inspection schedules.
- GS7.** handle customer and stakeholder interactions professionally and respectfully.
- GS8.** identify recurring safety issues and suggest improvements to processes.
- GS9.** assess potential hazards and determine appropriate control measures.
- GS10.** stay alert, focused, and meticulous during inspections and in hazard-prone situations.
- GS11.** apply logical reasoning to assess risks and implement solutions.
- GS12.** remain composed and exercise sound judgment during emergencies to different situations.

AAS/N4203: Implementation and Maintenance of Safety Management System

Description

This module provides foundational knowledge and practical skills for implementing, maintaining, and evaluating a Safety Management System (SMS) within the aviation environment. It covers core components, regulatory compliance, risk management processes, and continuous improvement practices.

Scope

The scope covers the following :

- Understand the purpose, structure, and regulatory framework of SMS in aviation
- Assist in implementing SMS components, including safety policies, risk management, and reporting systems
- Participate in monitoring, documenting, and evaluating safety performance
- Support internal audits, training, and continuous improvement of SMS processes
- Contribute to building and sustaining a positive safety culture within the organization

Elements and Performance Criteria

Understand the Safety Management System (SMS)

To be competent, the user/individual on the job must be able to:

- PC1.** Comprehend the purpose and importance of SMS in aviation.
- PC2.** Understand the four components of an SMS: Safety Policy, Safety Risk Management, Safety Assurance, and Safety Promotion.
- PC3.** Identify the regulatory requirements related to SMS (e.g., ICAO, DGCA).
- PC4.** Recognize the roles and responsibilities of personnel in maintaining SMS.
- PC5.** Understand the integration of SMS with organizational functions.

Implement and operate the SMS

To be competent, the user/individual on the job must be able to:

- PC6.** Assist in developing safety policies and objectives.
- PC7.** Participate in hazard identification and risk assessment activities.
- PC8.** Help establish safety reporting systems and encourage safety reporting culture.
- PC9.** Monitor safety performance indicators.
- PC10.** Maintain documentation and records related to SMS implementation.

Maintain and Improve SMS

To be competent, the user/individual on the job must be able to:

- PC11.** Support internal safety audits and inspections.
- PC12.** Identify areas for improvement in SMS processes.
- PC13.** Participate in safety training and communication initiatives.
- PC14.** Assist in updating SMS procedures in response to operational changes or audit findings.

Qualification Pack

PC15. Contribute to fostering a positive safety culture.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Objectives and benefits of a Safety Management System.
- KU2.** The four pillars/components of SMS and their interrelation.
- KU3.** National and international regulations governing SMS in aviation.
- KU4.** Principles of hazard identification and risk management.
- KU5.** Tools and methods used in safety data collection and analysis.
- KU6.** Audit and inspection procedures in the aviation industry.
- KU7.** Techniques for promoting safety awareness and reporting.
- KU8.** Importance of documentation and recordkeeping in SMS.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Read and interpret SMS manuals, policies, and regulations.
- GS2.** Prepare accurate safety reports and documentation.
- GS3.** Communicate effectively with team members and management.
- GS4.** Observe and identify potential safety risks in the work environment.
- GS5.** Maintain attention to detail in recording safety data.
- GS6.** Use basic software tools for data entry and report generation.
- GS7.** Collaborate with cross-functional teams to implement safety initiatives.

AAS/N4204: Manage Risks, and Conduct Compliance Audits

Description

This module equips individuals with the knowledge and skills required to identify, evaluate, and manage operational and safety risks in aviation settings, along with planning and conducting compliance audits in alignment with industry regulations and organizational standards.

Scope

The scope covers the following :

- Identify and assess various types of risks in aviation operations
- Implement and monitor risk control and mitigation strategies
- Plan, prepare, and conduct aviation compliance audits as per regulations and standards
- Report audit findings and support corrective and preventive actions (CAPA)
- Promote continuous improvement and organizational learning through audit processes

Elements and Performance Criteria

Identify and Manage Risks

To be competent, the user/individual on the job must be able to:

- PC1.** Understand types of risks in aviation operations (safety, operational, financial, legal).
- PC2.** Identify potential hazards using systematic methods.
- PC3.** Conduct risk assessments and evaluate consequences and likelihood.
- PC4.** Implement appropriate risk control measures.
- PC5.** Monitor and review the effectiveness of risk mitigation actions.
- PC6.** Document and report risk-related findings in compliance with organizational procedures.

Plan and Conduct Compliance Audits

To be competent, the user/individual on the job must be able to:

- PC7.** Understand the objectives and scope of aviation compliance audits.
- PC8.** Prepare audit checklists and plans based on relevant regulations and internal policies.
- PC9.** Conduct compliance audits in an organized and impartial manner.
- PC10.** Collect and verify audit evidence through observations, interviews, and document review.
- PC11.** Identify non-conformities and assess their impact on operations.
- PC12.** Prepare audit reports with findings, root causes, and recommendations.

Ensuring Follow-up and Continuous Improvement

To be competent, the user/individual on the job must be able to:

- PC13.** Support the development of corrective and preventive action plans (CAPA).
- PC14.** Monitor implementation of corrective actions and validate closure.
- PC15.** Contribute to organizational learning and continuous improvement through audit feedback.

Knowledge and Understanding (KU)

Qualification Pack

The individual on the job needs to know and understand:

- KU1.** Key types of risks associated with aviation operations.
- KU2.** Risk assessment tools and methodologies (e.g., risk matrix, FMEA).
- KU3.** Regulatory frameworks relevant to compliance audits (e.g., ICAO, DGCA, IATA).
- KU4.** Components and phases of a compliance audit.
- KU5.** Techniques for evidence collection and analysis.
- KU6.** Root cause analysis and corrective action planning.
- KU7.** Documentation and reporting standards for audits.
- KU8.** Principles of continuous improvement and safety culture enhancement.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Prepare clear and structured risk and audit reports.
- GS2.** Read and interpret regulatory documents and audit protocols.
- GS3.** Communicate audit findings and risk issues effectively to relevant stakeholders.
- GS4.** Use critical thinking to identify gaps and propose improvements.
- GS5.** Plan, schedule, and conduct audits efficiently.
- GS6.** Maintain confidentiality and impartiality during audits.
- GS7.** Apply time management and organizational skills in multi-tasking audit and risk activities.

DGT/VSQ/N0101: Employability Skills (30 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

PC1. understand the significance of employability skills in meeting the job requirements

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

PC2. identify constitutional values, civic rights, duties, personal values and ethics and environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

PC3. explain 21st Century Skills such as Self-Awareness, Behavior Skills, Positive attitude, self-motivation, problem-solving, creative thinking, time management, social and cultural awareness, emotional awareness, continuous learning mindset etc.

Basic English Skills

To be competent, the user/individual on the job must be able to:

PC4. speak with others using some basic English phrases or sentences

Communication Skills

To be competent, the user/individual on the job must be able to:

PC5. follow good manners while communicating with others

PC6. work with others in a team

Qualification Pack

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

PC7. communicate and behave appropriately with all genders and PwD

PC8. report any issues related to sexual harassment

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

PC9. use various financial products and services safely and securely

PC10. calculate income, expenses, savings etc.

PC11. approach the concerned authorities for any exploitation as per legal rights and laws

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

PC12. operate digital devices and use its features and applications securely and safely

PC13. use internet and social media platforms securely and safely

Entrepreneurship

To be competent, the user/individual on the job must be able to:

PC14. identify and assess opportunities for potential business

PC15. identify sources for arranging money and associated financial and legal challenges

Customer Service

To be competent, the user/individual on the job must be able to:

PC16. identify different types of customers

PC17. identify customer needs and address them appropriately

PC18. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC19. create a basic biodata

PC20. search for suitable jobs and apply

PC21. identify and register apprenticeship opportunities as per requirement

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use basic spoken English language

KU6. Do and dont of effective communication

KU7. inclusivity and its importance

KU8. different types of disabilities and appropriate communication and behaviour towards PwD

KU9. different types of financial products and services

Qualification Pack

- KU10.** how to compute income and expenses
- KU11.** importance of maintaining safety and security in financial transactions
- KU12.** different legal rights and laws
- KU13.** how to operate digital devices and applications safely and securely
- KU14.** ways to identify business opportunities
- KU15.** types of customers and their needs
- KU16.** how to apply for a job and prepare for an interview
- KU17.** apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate effectively using appropriate language
- GS2.** behave politely and appropriately with all
- GS3.** perform basic calculations
- GS4.** solve problems effectively
- GS5.** be careful and attentive at work
- GS6.** use time effectively
- GS7.** maintain hygiene and sanitisation to avoid infection

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Qualification Pack

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
