AMH/Q1231: Fashion Technology(IndiaSkills / WorldSkills)

Brief Job Description

The Fashion Technician is a highly skilled professional with extensive knowledge of fashion design, garment construction, and industry trends. They specialize in creating a diverse range of clothing using various materials and techniques. Employing a combination of technical expertise and creative flair, fashion technician produces garments through processes such as pattern making, sewing, and innovative fabric manipulation. Fashion technician also demonstrate artistic proficiency in creating visually appealing and trend-setting displays, showcasing their understanding of design principles and consumer preferences.

Personal Attributes

This job requires the individual to be artistic, creative and innovative to visualize and create the design by hand or using illustration software (Corel Draw, Illustrator, Photoshop etc.). A designer should be up to date with emerging fashion trends, as well as general trends relating to fabrics, colours and shapes. He/she should also have good communication skills, good sense of aesthetics, sound knowledge of sewing and pattern making. He/ She must be aware of the target market and its current trends

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [AMH/N1231: Work organization and management \(Fashion Technology\)](#)
2. [AMH/N1236: Communications and Interpersonal Skills](#)
3. [AMH/N1237: Problem Solving, Innovation, and Creativity \(Fashion Technology\)](#)
4. [AMH/N1232: Fashion Design](#)
5. [AMH/N1233: Technical Drawing](#)
6. [AMH/N1234: Pattern Construction and Draping](#)
7. [AMH/N1235: Cutting, Sewing, and Finishing Techniques](#)

Qualification Pack

AMH/N1231: Work organization and management (Fashion Technology)

Description

This unit covers the ways to organize and manage work place, tools and equipment.

Scope

The scope covers the following :

- Organize and manage workplace, tools and equipment

Elements and Performance Criteria

Organize and manage workplace, tools and equipment

To be competent, the user/individual on the job must be able to:

- PC1.** Proactively develop own knowledge and skills
- PC2.** Demonstrate an awareness of current trends and fashions in clothing design, accessories, colours, fabrics, etc
- PC3.** Take account of the properties of different fabrics including the limitations of certain fabrics/fibres
- PC4.** Fully comply with and promote health and safety practices in the workplace to maintain a safe and healthy working environment
- PC5.** Use all equipment safely and according to manufacturers' instructions
- PC6.** Use and care for all specialist tools and equipment used in the fashion industry
- PC7.** Select the correct tool or piece of equipment for each task and design
- PC8.** Plan and prioritize work to maximize efficiency in the workplace and to meet deadlines
- PC9.** Work cleanly and safely in all work areas so as to protect materials and finished products throughout
- PC10.** Keep all work areas clean to facilitate efficiency and protect materials and tools
- PC11.** Source support for business development
- PC12.** Purchase materials and fabrics cost effectively, ethically, and applying principles of sustainability, including, for example, production methods, zero waste and recycling
- PC13.** Amend any areas of the process or product that do not meet quality control standards

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Materials/fabrics, their characteristics, properties, and uses
- KU2.** The fashion industry processes across the world
- KU3.** Processes for mass produced, small collection, bespoke, and couture fashion
- KU4.** Industry jargon and terminology

Qualification Pack

- KU5.** That specialist areas and sectors exist within the industry including knitwear, menswear, children, and infants' clothing
- KU6.** The need for marketing and good business practice
- KU7.** The importance of continuous professional development
- KU8.** Health and safety regulations and best practice
- KU9.** The importance of maintaining a clean and organized workplace
- KU10.** The importance of effective work-planning, organization, and deadlines
- KU11.** The importance of accuracy and care when preparing fabrics for production
- KU12.** The range, uses and care of specialist tools and equipment used in the fashion industry
- KU13.** Issues regarding ethics and sustainability regarding the purchase, production, and sale of fashion items
- KU14.** How to assess for quality assurance at all stages of production

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Create a positive and inclusive workplace atmosphere without any kind of bias/discrimination towards any employee
- GS2.** Document and report any health and safety related incidents/ accidents to the authorized personnel
- GS3.** Read all organizational and equipment related health and safety manuals and documents
- GS4.** Read instructions, guidelines/procedures/rules related to the worksite and machine operations
- GS5.** Keep abreast with the latest developments for innovative safety services and tools by reading brochures, pamphlets, magazines etc
- GS6.** Discuss the latest approach for safety and security with the team
- GS7.** Evaluate and use correct PPE kit and other safety gear while at the workplace
- GS8.** Work with supervisors/ team mates to carry out work related tasks as per schedule
- GS9.** Keep work area free from potential hazards
- GS10.** Follow organizational procedures pertaining to health and safety
- GS11.** Take appropriate actions during emergencies, accidents or fire at the workplace
- GS12.** Resolve issues pertaining to malfunctions in machineries and report if required
- GS13.** Identify emergency situations; their cause & effect relationship and suggest probable solutions
- GS14.** Create a positive and inclusive workplace atmosphere without any kind of bias/discrimination towards any employee
- GS15.** Write the instructions in English or local language as per requirement
- GS16.** Communicate the with co-workers in local language wherever applicable
- GS17.** Take appropriate decisions regarding to responsibilities
- GS18.** Make conscious and sustainable decisions that help reduce, rescue, and recycle the company resources
- GS19.** Identify and replace processes that create unnecessary waste

AMH/N1236: Communications and Interpersonal Skills

Description

This unit is about developing communication and interpersonal skills

Scope

The scope covers the following :

- Develop good communication skills and interpersonal to handle clients and other stakeholders

Elements and Performance Criteria

Develop good communication skills and interpersonal to handle clients and other stakeholders

To be competent, the user/individual on the job must be able to:

- PC1.** Communicate effectively with both internal and external clients and show a good understanding of technical and industry specific terms
- PC2.** Communicate clearly with clients to understand their specific needs and design requirements
- PC3.** Act with confidentiality, discretion, and tact when working with clients
- PC4.** Measure or fit a client for garments with care and tact working with them to make sure client needs and expectations are met
- PC5.** Provide expert advice and guidance to clients to enable them to make informed decisions about purchases or production requirements
- PC6.** Seek expert advice and guidance from other industry professionals to enable informed decisions about purchases or production requirements
- PC7.** Provide expert and tactful guidance on styles, colours, and fabrics that will suit the need of the client and be appropriate for specific designs
- PC8.** Provide appropriate advice and guidance to a client on the after care of the garment
- PC9.** Present ideas, designs, vision, and production solutions to both internal and external clients

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** The importance of tact, discretion, diplomacy, and confidentiality when meeting with clients
- KU2.** How to communicate effectively with clients to understand requirements, including design briefs
- KU3.** How to communicate effectively with other industry professionals including design team members, ordering materials, sub-contracting work or dealing with suppliers
- KU4.** How to appropriately handle a client in a measuring or fitting situation
- KU5.** How to communicate effectively including presentation and sales skills

Generic Skills (GS)

Qualification Pack

User/individual on the job needs to know how to:

- GS1.** Present ideas with clarity using physical or digital media
- GS2.** Read and understand different communication and interpersonal theories and models
- GS3.** Manage emotions in oneself and others
- GS4.** Motivate through effective communication and interpersonal skills
- GS5.** Manage group dynamics and foster positive relationships
- GS6.** Identify and solve problems
- GS7.** Communicate effectively
- GS8.** Analyze information and situations
- GS9.** Prioritize tasks and manage time effectively
- GS10.** Respect cultural differences

AMH/N1237: Problem Solving, Innovation, and Creativity (Fashion Technology)

Description

This unit is about problem solving, innovation and creativity skills

Scope

The scope covers the following :

- Develop problem solving and creativity skills to innovate in design

Elements and Performance Criteria

Develop problem solving and creativity skills to innovate in design

To be competent, the user/individual on the job must be able to:

- PC1.** Demonstrate innovation and creativity in design
- PC2.** Think creatively to devise innovative solutions
- PC3.** Use creative solutions to resolve design and/or production challenges
- PC4.** Alter garments to provide a better or custom fit, to update or to make garments more appropriate
- PC5.** Anticipate design or construction issues relating to fabric properties including the properties of speciality fabrics and seek to use appropriate cutting and construction techniques (including pressing)
- PC6.** Resolve production issues in cutting and construction relating to availability of materials (or quantities), design, and/or construction techniques and cost
- PC7.** Critically judge the quality of the garment and finish and proactively seek resolutions to any imperfections both during and after the production process
- PC8.** Resolve basic machine issues such as broken needles

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** The importance of both individuality and conformity to all areas of the fashion industry
- KU2.** Basic machine care, fault finding, and resolution
- KU3.** Creativity and its relevance and importance to the fashion industry
- KU4.** All technical aspects of the production process
- KU5.** Fabric properties and characteristics
- KU6.** The purposes, properties, and characteristics of specialty fabrics
- KU7.** The limitations of the design and production process, and how to anticipate and address technical problems which may arise

Qualification Pack

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Read and interpret instructions, procedures, information regarding services/offerings
- GS2.** Use various analytical tools effectively at each stage of Design
- GS3.** Organise data and findings in such a way that facilitates their ease of processing for prototyping and testing
- GS4.** Empathize with internal and external customers
- GS5.** Follow appropriate etiquette with all the stakeholders at workplace
- GS6.** Be patient and courteous with co-workers and clients under all circumstances and situations
- GS7.** Apply problem solving skills to complete the design thinking processes
- GS8.** Discuss the matters promptly with the relevant authority in case of conflicts or grievances from clients that cannot be redressed by self
- GS9.** Breakdown relevant work process into its constituent activities for ease of analysis

AMH/N1232: Fashion Design

Description

This unit is about overview of fashion design and fashion industry

Scope

The scope covers the following :

- Demonstrate fashion design concepts and updates in a fashion industry

Elements and Performance Criteria

Demonstrate fashion design concepts and updates in a fashion industry

To be competent, the user/individual on the job must be able to:

- PC1.** Research fashion trends and apply these appropriately to designs
- PC2.** Direct the design to the target market or individual when designing fashion items
- PC3.** Create designs following themes or design briefs
- PC4.** Illustrate garment designs showing technical details
- PC5.** Create theme/trend boards and illustrations to communicate ideas, concepts, and visions
- PC6.** Provide professional and tactful guidance on styles, colours, and fabrics that will suit the need of the client
- PC7.** Identify different types of fabric and select suitable fabrics for particular uses
- PC8.** Take account of the properties of selected specialty fabrics within the design, development, and production process
- PC9.** Select appropriate fabrics to different fashion designs
- PC10.** Select and use different notions such as zips, buttons, shoulder pads as well as trims like lace, beads, and ribbons
- PC11.** Apply different embellishments and accessories to designs
- PC12.** Co-ordinate colours, styles, materials/fabrics, and accessories to produce high quality designs
- PC13.** Use basic cuts and styles to inform designs without restricting creativity and innovation
- PC14.** Modify ready-made garments to create new designs
- PC15.** Alter and adapt designs to meet clients' needs while keeping to given briefs
- PC16.** Design a range of garments for many target markets, using artistry, creativity, and innovation

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** The range of fabrics and materials available to the fashion designer, their characteristics, uses and care

Qualification Pack

- KU2.** Developments in new and speciality fabrics, and their implications for fashion and clothing
- KU3.** Current fashions, trends and themes relating to materials and fabrics, colour and style
- KU4.** The impact of culture and tradition in fashion design
- KU5.** The range and type of materials that can be used as part of a fashion garment design (both outside and inside the garment)
- KU6.** The co-ordination of colours, styles, materials/fabrics, accessories and themes
- KU7.** The range of styles and cuts that are common in garment making, the associated terminology and how they are represented in sketches or on prototype designs
- KU8.** The impact of body shape and size on the fit and appearance of a fashion garment
- KU9.** Global influences on fashion design and how traditions and national characteristics impact design
- KU10.** The bearing of the production process, and its costs, on opportunities and constraints for design
- KU11.** How to communicate design concepts and ideas to potential clients or industry professionals
- KU12.** The technical elements of garment construction and how they impact production in reference to materials, function, wearability, and costing

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Identify materials/fabrics, their characteristics, properties, and uses
- GS2.** Analyze the fashion industry processes across the world
- GS3.** Explore processes for mass produced, small collection, bespoke, and couture fashion
Industry jargon and terminology
- GS4.** Explore specialist areas and sectors exist within the industry including knitwear, menswear, children, and infants' clothing
- GS5.** Explore need for marketing and good business practice
- GS6.** Stay updated on industry trends, consumer preferences, and technological advancements to contribute to informed design and production decisions
- GS7.** Stay abreast of evolving technologies and industry best practices to continuously improve skills
- GS8.** Complete accurate well written work with attention to detail
- GS9.** Follow guidelines/procedures/rules and service level agreements
- GS10.** Listen effectively and orally communicate information accurately
- GS11.** Ask for clarification and advice from others in the team and heads
- GS12.** Follow rule-based decision-making processes
- GS13.** Make decisions on a suitable course of action or response
- GS14.** Plan and organize your work to achieve targets and deadlines
- GS15.** Apply problem-solving approaches in different situations
- GS16.** Refer anomalies to the design head
- GS17.** Seek clarification on problems from others
- GS18.** Analyze the design and techpack making process

Qualification Pack

- GS19.** Analyze needs, requirements, and dependencies to meet your work requirements
- GS20.** Provide opinions on work in a detailed and constructive way to the merchandiser and if necessary, to the sampling tailor and pattern master
- GS21.** Apply balance judgments to different situations

AMH/N1233: Technical Drawing

Description

This unit is about technical drawing of the garment design

Scope

The scope covers the following :

- Demonstrate technical drawing skills to create various garment

Elements and Performance Criteria

Demonstrate technical drawing skills to create various garment

To be competent, the user/individual on the job must be able to:

- PC1.** Communicate effectively with clients
- PC2.** Present ideas, designs, vision, and production solutions to clients
- PC3.** Take account of specific requirements when working with internal and external clients
- PC4.** Create specialist technical drawings using industry recognized terminology and symbols that effectively convey necessary design details and vision
- PC5.** Interpret both technical drawings and fashion drawings or photos
- PC6.** Prepare accurate line/flat drawings by hand, showing technical design elements
- PC7.** Prepare clear, logical, sequential, and accurate written and diagrammatical instructions that convey all necessary information in readiness for production assembly and the manufacturing process (e.g. specification sheets)
- PC8.** Use computers and specialist software to create CAD 2D and 3D images
- PC9.** Provide professional advice and guidance to internal and external clients to enable them to make informed decisions about fabrics, design, production, and costings
- PC10.** Clearly label drawings and images

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** How to both interpret and create specialist technical drawings
- KU2.** Specialist industry-related terminology and symbols
- KU3.** The use of IT and specialist software to produce images and designs

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Analyze materials/fabrics, their characteristics, properties, and uses
- GS2.** Explore the fashion industry processes across the world

Qualification Pack

- GS3.** Explore the processes for mass produced, small collection, bespoke, and couture fashion Industry jargon and terminology
- GS4.** Stay updated on industry trends, consumer preferences, and technological advancements to contribute to informed design and production decisions
- GS5.** Stay abreast of evolving technologies and industry best practices to continuously improve skills
- GS6.** Document records related to customer/buyer requirements, product designs and their requirements as per the fabrics, trims and accessories to be used
- GS7.** Maintain a record of all the designs that have been made and developed for future references
- GS8.** Maintain relevant documentation for inter departmental requirements
- GS9.** Read and comprehend written instructions describing new design details from clients and also from external forums such as websites and blogs
- GS10.** Seek information from customers/buyers and other sources in order to understand trend and customer requirements
- GS11.** Communicate well with concerned departments and give a detailed description of the requirements
- GS12.** Follow organization rule-based decision-making process while creating garment designs
- GS13.** Plan and organize the design collections with respect to customer requirements and the forecast
- GS14.** Plan and organize the fabrics, trims and accessories swatches according to the design created
- GS15.** Plan and organize the collection designed on the basis of practical deadlines
- GS16.** Develop designs which meet customer requirements as well as some elements from the forecast
- GS17.** Seek clarification in evaluating the forecast from the concerned supervisors style

AMH/N1234: Pattern Construction and Draping

Description

This unit is about constructing pattern of a garment and draping techniques

Scope

The scope covers the following :

- Construct garment pattern
- Demonstrate draping techniques

Elements and Performance Criteria

Construct garment pattern

To be competent, the user/individual on the job must be able to:

- PC1.** Create/develop or alter patterns for various types of garments, such as tailored jackets, dresses, skirts, or trousers
- PC2.** Select the best method of construction appropriate to different fabrics, designs and markets
- PC3.** Prepare calico/muslin or toile garments or parts of garments to prototype/test patterns
- PC4.** Measure and mark accurately
- PC5.** Choose appropriate linings and fusings for fabric and design requirements and develop patterns accordingly
- PC6.** Fit garments to specified sizes
- PC7.** Prepare patterns for cutting with appropriate seam allowances and grainlines, darts etc
- PC8.** Label patterns with clear information regarding size, style, cutting, etc

Demonstrate draping techniques

To be competent, the user/individual on the job must be able to:

- PC9.** Drape on dress forms for various types of garments, such as tops, dresses, skirts, or trousers
- PC10.** Transfer draped 3D patterns to paper or pattern board

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** The construction of garments using 2D flat patterns or 3D draping
- KU2.** The process to create 2D patterns for various garments using blocks or slopers or drafting from measurements
- KU3.** How to use specialist patternmaking equipment
- KU4.** The use of IT specialist software to produce patterns
- KU5.** Basic grading of patterns to other sizes
- KU6.** The use of dress forms in constructing garments or testing patterns

Qualification Pack

- KU7.** The requirements of different designs and how to use the most appropriate cut or patternmaking principle
- KU8.** How various fabrics react to different styles or production techniques
- KU9.** How to mark fabrics and the importance of accuracy
- KU10.** How various styles function with regard to fit and easing
- KU11.** How to utilize patternmaking

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Document records related to customer enquiries, product designs, pattern size etc
- GS2.** Write letters, memos, etc. in clear, comprehensible and unequivocal English
- GS3.** Read and comprehend written instructions describing pattern details
- GS4.** Keep abreast with latest trend by reading brochures, pamphlets, magazines and product information sheets
- GS5.** Seek information from customers and other sources in order to understand trend and customer requirements
- GS6.** Communicate with all relevant information in logical sequence
- GS7.** Follow organization rule-based decision-making process when making patterns as per customer requirements
- GS8.** Take decision with systematic course of actions and/or response
- GS9.** Planning and organization of work to meet deadlines
- GS10.** Plan and organize the tools and equipment for pattern making to have a smooth workflow
- GS11.** Build customer relationships and win confidence with customer centric approach
- GS12.** Seek and comprehend design related inputs as relevant to pattern development for clarification from superior
- GS13.** Assess/evaluate pattern making processes
- GS14.** Apply domain information about product, processes and technical specifications
- GS15.** Critically evaluate design inputs in relation to the pattern intended
- GS16.** Develop holistic and comprehensive profile of products based on segregated discrete information available

Qualification Pack

Assessment Criteria

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
<i>Construct garment pattern</i>	24	64	-	8
PC1. Create/develop or alter patterns for various types of garments, such as tailored jackets, dresses, skirts, or trousers	3	8	-	1
PC2. Select the best method of construction appropriate to different fabrics, designs and markets	3	24	-	1
PC3. Prepare calico/muslin or toile garments or parts of garments to prototype/test patterns	3	8	-	1
PC4. Measure and mark accurately	3	8	-	1
PC5. Choose appropriate linings and fusings for fabric and design requirements and develop patterns accordingly	3	2	-	1
PC6. Fit garments to specified sizes	3	2	-	1
PC7. Prepare patterns for cutting with appropriate seam allowances and grainlines, darts etc	3	4	-	1
PC8. Label patterns with clear information regarding size, style, cutting, etc	3	8	-	1
<i>Demonstrate draping techniques</i>	6	16	-	2
PC9. Drape on dress forms for various types of garments, such as tops, dresses, skirts, or trousers	3	8	-	1
PC10. Transfer draped 3D patterns to paper or pattern board	3	8	-	1

Qualification Pack

AMH/N1235: Cutting, Sewing, and Finishing Techniques

Description

This unit is about Cutting, sewing and finishing of a garment

Scope

The scope covers the following :

- Cut the fabric according to the laid pattern to make a garment
- Sewing the cut pieces to make garment components and a final garment
- Perform finishing process of the stitched garment according to the design specification

Elements and Performance Criteria

Cut the fabric according to the laid pattern to make a garment

To be competent, the user/individual on the job must be able to:

- PC1.** Accurately measure fabrics according to the pattern
- PC2.** Correctly prepare and mark a layout to optimize fabric utilization and follow pattern instructions
- PC3.** Cut fabrics accurately using the most appropriate tool or equipment

Sewing the cut pieces to make garment components and a final garment

To be competent, the user/individual on the job must be able to:

- PC4.** Use various types of industrial equipment used in the fashion industry, such as sewing machines, overlocking machines, irons, and a fusing press
- PC5.** Select the appropriate tool or equipment for the task
- PC6.** Use all machinery safely and in accordance with the manufacturer's instructions
- PC7.** Conduct trials to ensure that the machine settings are appropriate for fabrics being used and the application
- PC8.** Apply fusing appropriately and effectively to different parts of the design
- PC9.** Construct and apply facings, interfacing, interlining, and lining appropriately
- PC10.** Handle and care for fabrics to ensure that they are not damaged and remain in good condition
- PC11.** Sew accurately by machine various types of garments or parts of garments
- PC12.** Use a variety of different stitches and finishes on garments or parts of garments according to the specification sheet, technical drawing, or pattern

Perform finishing process of the stitched garment according to the design specification

To be competent, the user/individual on the job must be able to:

- PC13.** Finish fashion garments professionally
- PC14.** Finish parts of garments with hand sewing
- PC15.** Proficiently execute specialist sewing skills and techniques
- PC16.** Press garments effectively both during and at the end of production
- PC17.** Present finished garments professionally

Qualification Pack

PC18. Resolve any issues of quality control to ensure a quality product

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** The importance of accuracy when cutting fabrics to minimize wastage and to optimize the finished garment
- KU2.** Pattern preparation and correct layout and marking of patterns on fabric
- KU3.** The use of cutting tools both manual and electric
- KU4.** The machinery and tools used for garment production
- KU5.** The maintenance and use of industrial machines
- KU6.** Garment construction processes/techniques
- KU7.** The industry terms for different techniques and finishes
- KU8.** Different types of stitching and finishing and their appropriate applications
- KU9.** Various notions/trims and their uses such as threads, zips, piping, fastenings, etc
- KU10.** The properties of different fabrics and how to handle them including when cutting, sewing, and pressing

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Complete accurate work with attention to detail
- GS2.** Read instructions, guidelines, procedures, rules and service level agreements
- GS3.** Ask for clarification and advice from line managers
- GS4.** Communicate orally with colleagues
- GS5.** Document records at relevant stages and specification related to product development
- GS6.** Record the specifications of the product sample of each style being developed
- GS7.** Record all the modifications being done in the garment samples for reference while evaluating it
- GS8.** Understand the specifications mentioned in the garment specification sheet and act accordingly
- GS9.** Understand the modifications done by the client/buyer and incorporate them while developing the garment samples
- GS10.** Seek information from supervisors/seniors of designing and other departments in case of any doubt
- GS11.** Communicate all relevant information related to developing garment with co-workers and supervisors in a logical sequence
- GS12.** Speak in vernacular with the workers in the sampling department to smoothen the garment development process
- GS13.** Take appropriate decision by keeping the customers/buyers requirements in mind
- GS14.** Plan and organize to get the sample developed

Qualification Pack

- GS15.** Communicate with customers/buyer with intent on satisfying its requirements/queries related to product quality and product delivery
- GS16.** Develop garment samples keeping the customer requirements as main priority and specified timelines
- GS17.** Identify innovative solution to develop product design which facilitates manufacturing
- GS18.** Assess evaluate the garment samples development processes
- GS19.** Communicate effectively with the help of soft skill tools and techniques
- GS20.** Analyze garment samples with respect to the techpack developed and forecast and market research conducted
- GS21.** Critically evaluate design inputs in relation to the product intended
- GS22.** Critically evaluate the garment sample with respect to its functional and aesthetic behaviour
- GS23.** Critically evaluate the modifications done while developing garment samples and maintain the record of the same to be used during its evaluation

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each PC
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS. examination/training center (as per assessment criteria below)
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each.
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/training center based on this criteria.
6. To pass the Qualification Pack, every trainee should score a minimum of 70% aggregate in QP.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Qualification Pack

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Assessment Weightage

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
