ASC/Q8320: Manufacturing Team Challenge

Brief Job Description

A Manufacturing Team Challenge is responsible for designing, manufacturing, fitting, assembling, testing and commissioning components by following the standards of the organization.

Personal Attributes

The person should be result oriented with good technical and analytical skills, should have Excellent Interpersonal Skills, communication and presentation skills and a good team player. They should have ability to manage projects, prioritizing of work and mentoring the budding engineers.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [ASC/N9826: Work organization and management \(Manufacturing Team Challenge\)](#)
2. [ASC/N9827: Communication and interpersonal skills \(Manufacturing Team Challenge\)](#)
3. [ASC/N8362: Design and realization](#)
4. [ASC/N8363: Drawing](#)
5. [ASC/N8364: Component manufacture using workshop machinery and equipment](#)
6. [ASC/N8365: Fitting and assembly](#)
7. [ASC/N8366: Testing and commissioning](#)
8. [ASC/N8367: Additive Manufacturing](#)

Qualification Pack

ASC/N9826: Work organization and management (Manufacturing Team Challenge)

Description

This NOS unit is about implementing safety, planning work, adopting sustainable practices for optimising the use of resources.

Scope

The scope covers the following :

- Manage work and resources

Elements and Performance Criteria

Manage work and resources

To be competent, the user/individual on the job must be able to:

- PC1.** prepare and maintain a safe, tidy, and efficient work area
- PC2.** prepare self for the tasks in hand, including full regard to health and safety
- PC3.** schedule work to maximize efficiency and minimize disruption
- PC4.** select and use all equipment and materials safely and in compliance with manufacturers' instructions
- PC5.** apply or exceed the health and safety standards applying to the environment, equipment, and materials
- PC6.** restore the work area to an appropriate state and condition
- PC7.** contribute to team performance both broadly and specifically
- PC8.** give and take feedback and support
- PC9.** manufacture components and assembly to meet cost constraints and record manufacturing costs and budgets
- PC10.** maximize material utilization in order to reduce waste

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** The purposes, uses, care, and maintenance of all equipment and materials, together with their safety implications
- KU2.** Environmental and safety principles and their application to good housekeeping in the work environment
- KU3.** Principles of team working and their applications
- KU4.** Personal skills, strengths and needs relative the roles, responsibilities, and duties of others individually and collectively
- KU5.** The parameters within which activities need to be scheduled

Qualification Pack

Assessment Criteria

ASC/N9827: Communication and interpersonal skills (Manufacturing Team Challenge)

Description

This unit is about communicating with team members, superior and others.

Scope

The scope covers the following :

- Communicate effectively with others

Elements and Performance Criteria

Communicate effectively with others

To be competent, the user/individual on the job must be able to:

- PC1.** read, interpret, and extract technical data and instructions from documentation in any available format
- PC2.** communicate by oral, written and electronic means to ensure clarity, effectiveness, and efficiency
- PC3.** use a standard range of communication technologies
- PC4.** explain complex technical principles and applications to non-experts
- PC5.** complete reports and respond to issues and questions arising
- PC6.** respond to clients' needs face to face and indirectly
- PC7.** arrange to gather information and prepare documentation as required by the client

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** The range and purposes of documentation in both paper based and electronic forms
- KU2.** The technical language associated with the skill and technology
- KU3.** The standards required for routine and exception reporting in oral, written, and electronic form
- KU4.** The required standards for communicating with clients, team members and others
- KU5.** The purposes and techniques for maintaining and presenting records, including financial records

ASC/N8362: Design and realization

Description

This NOS is about planning and preparing design for vehicle manufacturing.

Scope

The scope covers the following :

- Planning and preparing design

Elements and Performance Criteria

Planning and preparing design

To be competent, the user/individual on the job must be able to:

- PC1.** read and interrogate briefs or specifications for manufactured items
- PC2.** identify and resolve areas of uncertainty within the briefs or specifications
- PC3.** generate designs for the manufacture of a functioning item within given timescales
- PC4.** generate innovative solutions to design challenges
- PC5.** prepare and implement documentation for work management and control
- PC6.** complete the design stage within the required limits of cost and time
- PC7.** use of engineering measurement tools including rules, verniers, micrometres and digital measuring tools

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** The principles and applications of project design
- KU2.** The nature and formats of project specifications
- KU3.** The bases on which the manufactured item will be appraised
- KU4.** Design parameters including: Options appraisal, Selection of materials and work processes, Prototype development, Manufacture, Refinement, Commissioning.
- KU5.** Principles and methods for work organization, control, and management

ASC/N8363: Drawing

Description

This NOS is about creating drawings of the vehicle/parts.

Scope

The scope covers the following :

- Creating drawing of vehicle/parts

Elements and Performance Criteria

Creating drawing of vehicle/parts

To be competent, the user/individual on the job must be able to:

- PC1.** create drawings to ISO standards
- PC2.** create and modify 2D and 3D models
- PC3.** interpret, construct, and modify engineering CAD drawings to work with 3D modelling and to convert both to CAM
- PC4.** complete drawing activities within the planned timetable and to suit the project's overall requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** How to interpret drawings that conform to ISO standards
- KU2.** How to create drawings that conform to ISO standards
- KU3.** The principles and uses of 2D and 3D modelling software

Qualification Pack

Assessment Criteria

Qualification Pack

ASC/N8364: Component manufacture using workshop machinery and equipment

Description

This NOS unit is about manufacturing vehicle components by using machinery and equipment.

Scope

The scope covers the following :

- Manufacturing vehicle components

Elements and Performance Criteria

manufacturing vehicle components

To be competent, the user/individual on the job must be able to:

- PC1.** safely operate workshop equipment such as lathes, mills, drill presses, sheet metal working equipment, welding equipment and welding holding equipment, pipe bending equipment and electronics bench equipment, such as a soldering iron and PSU
- PC2.** apply safe working practices to all workshop equipment and processes
- PC3.** address the issues caused by temperature during machining, including the use of coolants
- PC4.** manufacture components to industry finishes and tolerances and adjust manufacturing process to meet specifications
- PC5.** bend and cut sheet metal components in accordance with drawings
- PC6.** fit sheet metal components to an assembly
- PC7.** weld a variety of materials
- PC8.** use a range of welding types
- PC9.** assemble and commission electronics from drawings
- PC10.** design control circuits

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** The specific safety principles and practices to be used with a range of workshop machinery/equipment and materials
- KU2.** The principles and applications of machining
- KU3.** The use of general machining equipment used in activities such as centre lathing and manual milling
- KU4.** The relationship between drawings and machining, including modifying the machining to meet specifications
- KU5.** The characteristics of metals and the potential impact on them of cutting tools and processes

Qualification Pack

- KU6.** The applications of machining to a range of metals and materials
- KU7.** The principles and applications of working with sheet metal
- KU8.** The processes required for bending and cutting sheet metal
- KU9.** The principles and applications of a range of welding types, including TIG (for steel and aluminium) and MAG (for steel)
- KU10.** The principles and applications for working with electronics and related equipment
- KU11.** The principles and uses of PCBs
- KU12.** The principles and applications of electronic programming software
- KU13.** The principles and applications of robotics and mechatronics
- KU14.** The principles of manual pipe bending

Qualification Pack

ASC/N8365: Fitting and assembly

Description

This NSO is about fitting and assembly of vehicle components.

Scope

The scope covers the following :

- Fitting and assembly of components

Elements and Performance Criteria

Fitting and assembly of components

To be competent, the user/individual on the job must be able to:

- PC1.** Design a range of jigs, fixtures, and accessories
- PC2.** Manufacture jigs, fixtures, and accessories in accordance with drawings and specifications
- PC3.** Assemble and commission items in accordance with drawings and specifications
- PC4.** Assemble items using fasteners such as glues, screws, bolts, etc.
- PC5.** Complete the fitting activity within the planned timetable and to suit the project's overall requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Principles and methods for manufacturing parts such as jigs, fixtures, adaptors and process attachments
- KU2.** Principles and methods for assembly and fastening of manufactured parts such as jigs, fixtures, adaptors, and process attachments

Qualification Pack

ASC/N8366: Testing and commissioning

Description

This NOS is about testing and commissioning of the completed vehicle.

Scope

The scope covers the following :

- Testing and commissioning

Elements and Performance Criteria

Testing and commissioning

To be competent, the user/individual on the job must be able to:

- PC1.** test run the assembled item
- PC2.** review each part of the manufacturing and assembly process against established criteria, including quality, functionality, time, and cost
- PC3.** modify, test, and appraise each part of the process, including:, design, tool paths, assembly procedures, jigs, fixtures, machining
- PC4.** undertake a final test run to commission the item
- PC5.** present the item to the client with explanations and responses to questions
- PC6.** generate and present a portfolio including all essential documentation such as: 2D mechanical drawings, electronic solid models, electrical drawings, manufacturing plans, design calculations ,manufacturing costs
- PC7.** generate support documents such as: the operating manual, the maintenance manual

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** The criteria and methods for operating test runs
- KU2.** The scope and limits of the technologies and methods employed
- KU3.** Strategies for thinking creatively and generating innovation
- KU4.** The possibilities and options for making incremental and/or radical changes

Qualification Pack

ASC/N8367: Additive Manufacturing

Description

This NOS is about performing 3D printing and scanning process.

Scope

The scope covers the following :

- Applying additive manufacturing methodology

Elements and Performance Criteria

Applying additive manufacturing methodology

To be competent, the user/individual on the job must be able to:

- PC1.** design parts in the special software (www.autodesk.com/solutions/generative-design)
- PC2.** calculate the variety of materials used
- PC3.** postprocess jobs of 3D printers
- PC4.** start and control the process
- PC5.** operate a 3D printer
- PC6.** adjust and set up parameters for 3D printing; interpret drawings
- PC7.** respond to engineering problems with a rapid prototype design
- PC8.** design solutions given a variety of parameters; size, weight, durability, function and finish
- PC9.** design assemblies for parts larger than the print area of the given machine, or for interconnecting, moving, interlocking or interacting pieces

Qualification Pack

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Performance Criteria (PC) (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training centre (as per assessment criteria below).
4. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training centre based on these criteria.
5. In case of successfully passing only certain number of NOSs, the trainee is eligible to take subsequent assessment on the balance NOS's to pass the Qualification Pack.

Qualification Pack

6. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Assessment Weightage

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
