ASP/LSC/Q0101: Supply Chain and Logistics Analyst

Brief Job Description

This course prepares individuals to efficiently manage logistics operations, focusing on inventory control, transportation, and distribution. It covers essential concepts like supply chain workflows, performance metrics, and compliance requirements, combining theoretical and practical knowledge. Learners will acquire mid-level skills, including problem-solving, process optimization, and use of technology in logistics. The program aligns with NSQF Level 5, enabling participants to pursue careers in warehousing, procurement, and distribution management.

Personal Attributes

The course requires learners to have strong analytical ability, effective communication skills, problem-solving mindset, attention to detail, teamwork capability, adaptability, and a proactive approach to handling operational challenges.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [ASP/LSC/N0101: Foundations of Digital Supply Chain Operations](#)
2. [ASP/LSC/N0102: Integrated Storage Solutions and Inventory Dynamics](#)
3. [ASP/LSC/N0103: Optimized Transport Networks and Delivery Systems](#)
4. [ASP/LSC/N0104: Advanced Demand Planning and Supply Chain Analytics](#)
5. [ASP/LSC/N0105: Strategic Procurement and Supplier Management](#)
6. [ASP/LSC/N0106: Logistics client relations and service excellence](#)
7. [ASP/LSC/N0107: Smart Delivery Systems and ECommerce Distribution](#)
8. [ASP/LSC/N0108: Eco-Logistics and Sustainable Practices](#)
9. [DGT/VSQ/N0102: Employability Skills \(60 Hours\)](#)

ASP/LSC/N0101: Foundations of Digital Supply Chain Operations

Description

Introduces learners to the fundamental principles of logistics and supply chain management, emphasizing their critical role in global trade and economic development. Participants will explore key components of the supply chain, including sourcing, production, warehousing, distribution, and customer delivery, gaining a comprehensive understanding of how each element contributes to supply chain efficiency.

Scope

The scope covers the following :

- Learners will be able to describe the foundational concepts of logistics and supply chains, including their significance and role in supporting global trade and economic development.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Ability to describe key logistics and supply chain concepts.
- PC2.** • Proficiency in identifying supply chain components and their interdependencies.
- PC3.** • Demonstration of material, information, and financial flow within supply chains.
- PC4.** • Application of supply chain models (lean, agile, hybrid) to scenarios.
- PC5.** • Calculation of KPIs like lead time, order accuracy, and inventory turnover

ASP/LSC/N0102: Integrated Storage Solutions and Inventory Dynamics

Description

Warehouse management and logistics define the key competencies required for efficient warehouse operations, inventory control, and material handling.

Scope

The scope covers the following :

- These standards cover warehouse layout design, inventory categorization (ABC analysis, FIFO, LIFO, JIT), and the use of Warehouse Management Systems (WMS) for real-time inventory tracking. Additionally, NOS includes advanced material handling techniques involving forklifts, conveyors, and automation tools like RFID and IoT. Cold chain logistics is also addressed, ensuring compliance with temperature-controlled storage and transportation protocols for perishable goods.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

PC1. Design and layout optimization for warehouses.

PC2. Application of inventory control techniques (ABC analysis, JIT, FIFO, LIFO).

PC3. Operation and maintenance of material handling equipment.

PC4. Proficiency in using Warehouse Management Systems (WMS) for tracking and inventory updates

Qualification Pack

ASP/LSC/N0103: Optimized Transport Networks and Delivery Systems

Description

A Digital Supply Chain and Logistics Analyst ensures the efficient movement of goods by selecting optimal transportation modes, designing effective distribution networks, optimizing last-mile delivery, ensuring compliance with global trade regulations, and leveraging digital technologies for real-time logistics management. The role requires expertise in supply chain analytics, cost optimization, and regulatory adherence while integrating advanced digital tools to improve logistics operations.

Scope

The scope covers the following :

- This NOS defines the knowledge and skills required for professionals managing modern supply chain logistics. It covers transportation planning, distribution network design, last-mile and reverse logistics, regulatory compliance, quick commerce, and emerging technologies like AI, IoT, and blockchain to enhance efficiency and transparency.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Selection of appropriate transportation modes based on cost and demand.
- PC2.** Route optimization and planning using software tools.
- PC3.** Design of efficient distribution networks and last-mile delivery strategies.
- PC4.** Compliance with transportation regulations and logistics standards

ASP/LSC/N0104: Advanced Demand Planning and Supply Chain Analytics

Description

This qualification standard covers the essential competencies in supply chain analytics, demand forecasting, data management, risk mitigation, and financial planning to enhance decision-making and operational efficiency.

Scope

The scope covers the following :

- The scope includes applying analytics for demand forecasting, optimizing supply chain processes, ensuring data integrity, leveraging analytics tools, managing risks, and integrating financial strategies to drive efficiency, cost-effectiveness, and resilience in supply chain operations.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

PC1. Use of analytics tools for demand forecasting and supply chain optimization.

PC2. Data collection, cleaning, and analysis.

PC3. Application of forecasting techniques to improve inventory and demand alignment.

PC4. Risk assessment and management in supply chain scenarios

ASP/LSC/N0105: Strategic Procurement and Supplier Management

Description

This NOS focuses on procurement, vendor evaluation, negotiation, supplier relationship management, cost analysis, and compliance to enhance supply chain efficiency and value creation.

Scope

The scope covers the following :

- It covers sourcing strategies, supplier assessment, contract negotiation, relationship management, cost optimization, and ethical procurement practices aligned with industry standards and regulations.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

PC1. Evaluation and selection of vendors based on business criteria.

PC2. Application of negotiation strategies to supplier agreements.

PC3. Management of supplier relationships and compliance with procurement ethics.

ASP/LSC/N0106: Logistics client relations and service excellence

Description

This NOS focuses on equipping professionals with CRM competencies tailored for logistics operations. It provides insights into customer engagement, expectation alignment, and service delivery improvements using CRM tools. Learners will develop skills in handling customer interactions, analyzing feedback, and leveraging CRM software to track service performance. Additionally, it covers retention strategies and loyalty programs to strengthen customer relationships and drive business success in logistics.

Scope

The scope covers the following :

- This NOS covers the principles and application of Customer Relationship Management (CRM) in logistics, emphasizing customer satisfaction, expectation management, CRM software tools, and customer retention strategies. It includes foundational CRM concepts, the use of technology in customer interactions, service quality measurement, and designing loyalty programs to enhance long-term business growth.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

PC1. Understanding and managing CRM tools.

PC2. Ensuring customer satisfaction through efficient problemsolving and conflict resolution

PC3. Implementation of customer retention and loyalty programs.

PC4. Data management and analytics in CRM to improve service quality

ASP/LSC/N0107: Smart Delivery Systems and ECommerce Distribution

Description

This NOS equips professionals with the skills and knowledge necessary to manage e-commerce logistics efficiently while implementing sustainable logistics practices. It covers key topics such as fulfillment strategies, last-mile delivery optimization, customer satisfaction, and the role of technology in streamlining logistics operations. Learners will develop expertise in leveraging route optimization tools, warehouse management systems, and real-time tracking technologies to enhance service quality. Additionally, they will explore green logistics initiatives, including carbon footprint reduction, eco-friendly transportation, and sustainable packaging solutions, to align logistics operations with environmental sustainability goals.

Scope

The scope covers the following :

- This NOS focuses on the specialized logistics functions required for e-commerce and sustainable logistics practices. It covers order fulfillment, last-mile delivery strategies, customer experience management, and the integration of technology in logistics operations. Additionally, it emphasizes the principles of green logistics, ensuring environmentally responsible and efficient supply chain management

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Execution of e-commerce logistics processes, including order fulfillment and last-mile delivery.
- PC2.** Use of technology in logistics, such as drones and autonomous vehicles.
- PC3.** Development of strategies for managing customer experience in e-commerce

ASP/LSC/N0108: Eco-Logistics and Sustainable Practices

Description

This NOS equips professionals with the knowledge and skills required to implement sustainable logistics and supply chain practices. It covers key areas such as circular economy principles, waste reduction strategies, ethical sourcing, and green transportation initiatives. Learners will gain expertise in using sustainability metrics, optimizing warehouse energy efficiency, and complying with environmental regulations like ISO 14001. Through practical applications, including carbon footprint analysis, route optimization, and sustainable packaging solutions, this NOS enables logistics professionals to drive environmental responsibility while maintaining cost-effectiveness and service quality in supply chain operations.

Scope

The scope covers the following :

- This NOS focuses on integrating sustainability into supply chain and logistics operations by adopting eco-friendly practices, regulatory compliance, and technological advancements. It covers sustainable supply chain management, green warehousing, eco-friendly transportation, and measurement of sustainability metrics to minimize environmental impact while enhancing operational efficiency.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Implementation of green logistics and sustainable supply chain practices.
- PC2.** Management of eco-friendly warehouses and transportation initiatives.
- PC3.** Adherence to regulatory and environmental compliance standards.

DGT/VSQ/N0102: Employability Skills (60 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Career Development & Goal Setting
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

- PC1.** identify employability skills required for jobs in various industries
- PC2.** identify and explore learning and employability portals

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

- PC3.** recognize the significance of constitutional values, including civic rights and duties, citizenship, responsibility towards society etc. and personal values and ethics such as honesty, integrity, caring and respecting others, etc.
- PC4.** follow environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

- PC5.** recognize the significance of 21st Century Skills for employment
- PC6.** practice the 21st Century Skills such as Self-Awareness, Behaviour Skills, time management, critical and adaptive thinking, problem-solving, creative thinking, social and cultural awareness, emotional awareness, learning to learn for continuous learning etc. in personal and professional life

Basic English Skills

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC7.** use basic English for everyday conversation in different contexts, in person and over the telephone
- PC8.** read and understand routine information, notes, instructions, mails, letters etc. written in English
- PC9.** write short messages, notes, letters, e-mails etc. in English

Career Development & Goal Setting

To be competent, the user/individual on the job must be able to:

- PC10.** understand the difference between job and career
- PC11.** prepare a career development plan with short- and long-term goals, based on aptitude

Communication Skills

To be competent, the user/individual on the job must be able to:

- PC12.** follow verbal and non-verbal communication etiquette and active listening techniques in various settings
- PC13.** work collaboratively with others in a team

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

- PC14.** communicate and behave appropriately with all genders and PwD
- PC15.** escalate any issues related to sexual harassment at workplace according to POSH Act

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

- PC16.** select financial institutions, products and services as per requirement
- PC17.** carry out offline and online financial transactions, safely and securely
- PC18.** identify common components of salary and compute income, expenses, taxes, investments etc
- PC19.** identify relevant rights and laws and use legal aids to fight against legal exploitation

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

- PC20.** operate digital devices and carry out basic internet operations securely and safely
- PC21.** use e- mail and social media platforms and virtual collaboration tools to work effectively
- PC22.** use basic features of word processor, spreadsheets, and presentations

Entrepreneurship

To be competent, the user/individual on the job must be able to:

- PC23.** identify different types of Entrepreneurship and Enterprises and assess opportunities for potential business through research
- PC24.** develop a business plan and a work model, considering the 4Ps of Marketing Product, Price, Place and Promotion
- PC25.** identify sources of funding, anticipate, and mitigate any financial/ legal hurdles for the potential business opportunity

Customer Service

To be competent, the user/individual on the job must be able to:

- PC26.** identify different types of customers
- PC27.** identify and respond to customer requests and needs in a professional manner.

Qualification Pack

PC28. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC29. create a professional Curriculum vitae (Résumé)

PC30. search for suitable jobs using reliable offline and online sources such as Employment exchange, recruitment agencies, newspapers etc. and job portals, respectively

PC31. apply to identified job openings using offline /online methods as per requirement

PC32. answer questions politely, with clarity and confidence, during recruitment and selection

PC33. identify apprenticeship opportunities and register for it as per guidelines and requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills and different learning and employability related portals

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use English language for effective verbal (face to face and telephonic) and written communication in formal and informal set up

KU6. importance of career development and setting long- and short-term goals

KU7. about effective communication

KU8. POSH Act

KU9. Gender sensitivity and inclusivity

KU10. different types of financial institutes, products, and services

KU11. how to compute income and expenditure

KU12. importance of maintaining safety and security in offline and online financial transactions

KU13. different legal rights and laws

KU14. different types of digital devices and the procedure to operate them safely and securely

KU15. how to create and operate an e- mail account and use applications such as word processors, spreadsheets etc.

KU16. how to identify business opportunities

KU17. types and needs of customers

KU18. how to apply for a job and prepare for an interview

KU19. apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. read and write different types of documents/instructions/correspondence

GS2. communicate effectively using appropriate language in formal and informal settings

Logo
Not
Available

Qualification Pack

- GS3.** behave politely and appropriately with all
- GS4.** how to work in a virtual mode
- GS5.** perform calculations efficiently
- GS6.** solve problems effectively
- GS7.** pay attention to details
- GS8.** manage time efficiently
- GS9.** maintain hygiene and sanitization to avoid infection

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

This section describes the processes used to identify, gather and interpret information to evaluate learners on the required competencies of the program. The assessment strategy ensures that all assessments are valid, reliable, fair, and aligned with the NSQF.

Assessment Framework

ASAP follows a structured assessment framework with the following components:

Attendance

Assignments

Internal/Continuous Assessments

Project Work

Final Assessment

Qualification Pack

Attendance and internal assessments fall under Continuous and Comprehensive Evaluation (CCE). All assessment scores together determine the final grade issued on the certificate.

Attendance Criteria

Skill-based sessions require active participation; missed classes cannot be compensated. Attendance is marked daily.

Attendance Marks

Attendance % Marks

Above 90% 10

86-90% 9

80-85% 8

70-80% 7

Below 70% 0

Learners with below 70% attendance are not eligible for the final assessment or course certificate.

Assessment Type Marks

Assignment 1 35

Internal Assessment 1 50

Assignment 2 35

Internal Assessment 2 50

Final Assessment 100

Attendance 30

Total 300

Assignments

Qualification Pack

Two assignments are conducted:

Assignment 1 after 25% syllabus coverage

Assignment 2 after 75% syllabus coverage

Students may refer to any study materials. Trainers evaluate the assignments and enter scores into the student profile after each stage.

Internal/Continuous Assessments

Two internal tests are conducted:

Test 1: After 50% syllabus (1 hour)

Test 2: After full syllabus (3 hours)

Each test includes:

60% objective questions

40% descriptive/application questions

Scores are entered twice into the student profile.

Final/End Assessment

The Final Assessment conducted by ASAP Kerala includes:

Practical/Skill Test

Project Presentation & Viva Voce

Final Exam (MCQ + Descriptive)

Role of Assessment Division

Conducts final assessments

Generates question papers using the approved Question Bank

Coordinates with Cluster, Training, and Curriculum Divisions

Oversees assessors and assessment platform

Qualification Pack

Ensures expert evaluation and submits final scores to the Certification Division

Question Bank

Prepared during course creation by Subject Matter Experts

Contains 6x the required number of questions

20% questions replaced annually

Question papers generated randomly based on blueprint (QP/NOS, difficulty, application)

Trainers receive timed access only during assessment

Grading Scheme

Score (%) Grade Description

90-100 A+ Excellent

80-89 A Very Good

70-79 B Good

60-69 C Above Average

50-59 P Pass

Below 50 F Fail

Assessment System Overview

Assessments are conducted by the ASAP Kerala Assessment Division.

Question Bank is prepared in advance.

Exams take place at CSPs, Accredited Centres, Colleges, or via AI-proctored platforms.

Testing Environment

Conducted offline at centres/colleges or online using AI-proctored assessment systems.

Minimum Aggregate Passing % at QP Level : 50

Qualification Pack

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
National Occupational Standard	NOS define the measurable performance outcomes required from an individual engaged in a particular task. They list down what an individual performing that task should know and also do.
Qualification	A formal outcome of an assessment and validation process which is obtained when a competent body determines that an individual has achieved learning outcomes to given standards
Qualification File	A Qualification File is a template designed to capture necessary information of a Qualification from the perspective of NSQF compliance. The Qualification File will be normally submitted by the awarding body for the qualification.
Sector	A grouping of professional activities on the basis of their main economic function, product, service or technology.
Long Term Training	Long-term skilling means any vocational training program undertaken for a year and above
