Qualification Pack

CON/Q4103: Plastering and Drywall Systems (WorldSkills)

Brief Job Description

The skilled plasterer may work on both internal and external plastering and rendering work. Much modern internal work is completed using drywall systems which involve the plasterer creating metal frames and installing plasterboard before the application on the final surface. These constructions can be complex and include curves and openings for doors and windows. Traditional plastering involves the preparation of the background prior to application of the plaster surface. The plasterer will prepare materials for use and be fully aware of legislation and official guidance relating to the preparation and use of materials. In addition to plastering flat surfaces, the skilled plasterer will create and install decorative mouldings. Plasterers will also be required to make repairs.

Personal Attributes

The person should be physically fit to work in varying locations and conditions. The person should be organized, diligent, methodical, safety-conscious, and a prompt decision-maker. In addition to being a team player, the individual should have good communication skills.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [CON/N4101: Work Organization, Management and Communication](#)
2. [CON/N4103: Interpretation of Drawings](#)
3. [CON/N4108: Construction of Test Project \(Plastering and Drywall Systems\)](#)
4. [CON/N4105: Quality Check and Handover](#)

Remarks:

i) There is no specified minimum job entry age for the skill competitions, however, the competitor(s) must not be older than 22 years in the year of the competition as per WorldSkills Standards. ii) The validity of these qualifications shall be only for two years or as per the WorldSkills competition cycle, whichever is earlier". (Please refer clause 4.1.(d) of NCVET Order No. 32001/06/2023/NCVET, dated 26.01.2024)

Qualification Pack

CON/N4101: Work Organization, Management and Communication

Description

This NOS deals with ensuring safe and healthy working environment at competition area by proper utilization of safety gears and effective communication skill with juries and competitors.

Scope

The scope covers the following :

- Adopt healthy and safe work practices at competition area
- Management of workplace
- Effective communication at competition area

Elements and Performance Criteria

Adopt healthy and safe work practices at competition area

To be competent, the user/individual on the job must be able to:

- PC1.** Explain health and safety legislation, obligations, and documentation
- PC2.** check and ensure the availability of appropriate and usable Personal Protective Equipment (PPE) at the workplace
- PC3.** use the appropriate PPE according to the nature of work and ensure other personnel also do the same
- PC4.** follow and promote the appropriate measures to ensure hygiene in the workplace, e.g.regular cleaning and sanitization
- PC5.** follow the applicable emergency procedures and ensure the personnel also do the same
- PC6.** Learn precautions for the safe use of power and cordless tools
- PC7.** Apply standards and laws relating to security, safety, and hygiene in plastering and drywall systems

Management of workplace

To be competent, the user/individual on the job must be able to:

- PC8.** establish methods for optimal and economically organized construction site. regarding construction plan and equipment, organization and procedures, material management, staffing and timelines
- PC9.** determine the correct calculations and estimates by using principles and methods
- PC10.** store plasterboards and related products safely and securely
- PC11.** be proactive in own continuous professional development in order to keep abreast of methods of working in the construction industry and changing technologies, for example acoustics, sustainability and environmental impact
- PC12.** Work effectively as part of teams
- PC13.** Work effectively with other trades
- PC14.** Establish and maintain high quality standards and working processes
- PC15.** identify problems promptly and manage their resolution

Qualification Pack

- PC16.** select, use and store all materials safely
- PC17.** plan work areas to maximize efficiency and maintain the discipline of regular tidying
- PC18.** principles and methods for determine the correct calculations and estimates
- PC19.** understand technical terminology and symbols

Effective communication at competition area

To be competent, the user/individual on the job must be able to:

- PC20.** visualize and translate customer wishes making recommendations which meet/improve their design and budgetary requirements where qualified to do so
- PC21.** Produce a cost and time estimate for customers
- PC22.** introduce related trades to support customer requirements
- PC23.** work effectively in a team to facilitate efficiency/productivity/quality and cost control
- PC24.** recognize the needs of architects and related trades
- PC25.** explain the importance of swiftly resolving misunderstandings and conflicting demands

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Health, hygiene, and safety legislation, obligations, regulations and documentation
- KU2.** principles of working safely with electricity
- KU3.** Accident/first-aid/fire/emergency procedures and reporting
- KU4.** situations when personal protective equipment must be used
- KU5.** purposes, uses, care, maintenance, and storage of all hand and powered tools and equipment together with their safety implications
- KU6.** purposes, uses, care and storage of materials
- KU7.** sustainability measures applying to the use of green materials and recycling
- KU8.** the significance of planning, accuracy, checking, and attention to detail in all working practices
- KU9.** importance of integrity and trustworthiness
- KU10.** value of managing own continuing professional development
- KU11.** value of building and maintaining trust and productive working relationships
- KU12.** importance of swiftly resolving misunderstandings and conflicting demands
- KU13.** need for security for the storage of tools and materials
- KU14.** criteria for being understandable within teams and to non specialists
- KU15.** recognised IT systems and related professional design software

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** maintain the appropriate data and records
- GS2.** read the appropriate reports and literature concerning the test project

Qualification Pack

- GS3.** communicate professionally with all the stakeholders
- GS4.** listen attentively to understand the information/ instructions being shared and take appropriate action
- GS5.** coordinate with co-workers to achieve the work objectives
- GS6.** plan and execute tasks based on priority
- GS7.** identify possible disruptions to work and take appropriate mitigation measures
- GS8.** take prompt action to deal with workplace emergencies and accidents
- GS9.** evaluate all possible solutions to work-related problems and select the best one
- GS10.** follow the recommended practices for the timely completion of work and achievement of organizational objectives

CON/N4103: Interpretation of Drawings

Description

This NOS deals with understanding of the test project drawings along with its process of measurements.

Scope

The scope covers the following :

- Interpretation and execution of drawings as per standards

Elements and Performance Criteria

Interpretation and execution of drawings as per standards

To be competent, the user/individual on the job must be able to:

- PC1.** Prepare site measurement drawings
- PC2.** Accurately interpret all plans, elevations, sections and enlarged details
- PC3.** Produce basic outline drawings (hand and CAD) including elevations, plans, and sections to full size
- PC4.** produce accurate complex drawings on wood to make figure on the wall/floor
- PC5.** Identify drawing errors or items that require clarification
- PC6.** Determine and check quantities of materials required
- PC7.** Calculate a cost and price for the work
- PC8.** Identify horizontal and vertical key dimensions and all angles
- PC9.** Identify curved work and mortar joint finishes
- PC10.** Interpret all project features and their required construction methods
- PC11.** Establish any features that need special equipment or templates and source these
- PC12.** Recognize specified bonding patterns and obey bonding rules during construction
- PC13.** Provide advice and guidance to other professionals such as architects and quantity surveyors
- PC14.** Keep essential notes on each installation process
- PC15.** Explain complex specialist and technical information about installations to clients and other professionals
- PC16.** Apply mathematic geometry principles to the calculation of angles, areas, perimeters, curves, arcs, volumes, ratios, etc.
- PC17.** Prepare the materials requirements, taking into account increased requirements due to compression, wastage, breakage, etc.
- PC18.** Calculate formwork surfaces and materials requirements
- PC19.** Calculate formwork surfaces and materials requirements for face concrete formwork
- PC20.** Interpret, analyse, and work with construction plans (e.g. design plans, formwork plans, reinforcement plans, detail drawings, etc.) and material and parts lists

Knowledge and Understanding (KU)

Qualification Pack

The individual on the job needs to know and understand:

- KU1.** The essential information required for floor plans in construction drawings including sections, datum levels, wall constructions, material codes, depth dimensions, heights, schedules and specification
- KU2.** Interpretation and execution of drawings to ISO-A or ISO-E standards
- KU3.** The importance of checking for missing information or errors, anticipating problems and resolving in advance of the setting out process
- KU4.** The role and use of geometry
- KU5.** Mathematical processes and problem solving
- KU6.** The range of costs to be included in estimates
- KU7.** Trends in the industry including new materials and construction methods
- KU8.** The demands and specific properties and qualities of different building materials, such as organic and inorganic materials, coating materials, mounting materials, jointing and adhesive material
- KU9.** Primary elements such as floor, wall and ceiling systems and storefronts
- KU10.** How to choose efficient attachments, and the correct material for cement, wood and steel constructions
- KU11.** How to fabricate ceiling elements to correlate with heat insulation systems, soundproofing and fire protection systems and decorative aspects in the design of walls and ceilings
- KU12.** Principles and methods of technical construction
- KU13.** The relationship between the properties and characteristics of building materials and their impact on comfortable living spaces
- KU14.** The variety of building materials, their chemical and physical processes, capillary action, porosity, diffusion, and condensation as well as their implications for recycling
- KU15.** External and internal colour schemes, e.g. monochromatic, analogous, complementary, warm/advancing, contrasting and cool/receding

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** maintain work-related notes and records
- GS2.** read the relevant literature to learn about the latest developments in the field of work
- GS3.** communicate clearly and politely with co-workers and clients
- GS4.** listen attentively to understand the information/ instructions being shared by the speaker
- GS5.** plan and prioritize tasks to ensure timely completion
- GS6.** coordinate with co-workers to achieve work objectives
- GS7.** take quick decisions to deal with workplace emergencies/ accidents

CON/N4108: Construction of Test Project (Plastering and Drywall Systems)

Description

This NOS deals with the construction of test project for Plastering and Drywall Systems Skill.

Scope

The scope covers the following :

- Construction of drywall systems Insulation
- Conduct Insulation
- Carryout finishing of plasterboard
- Carryout Internal and External Plastering
- Carryout creation and fitting of decorative mouldings
- Carryout heritage and decorative techniques

Elements and Performance Criteria

Construction of drywall systems Insulation

To be competent, the user/individual on the job must be able to:

- PC1.** Set out the different elements of walls and ceilings
- PC2.** Measure accurately
- PC3.** Accurately cut metal profiles
- PC4.** Erect framing with inserts for windows and doors – square, plumb and levelled
- PC5.** Screw, fix, or crimp metal components
- PC6.** Channel and stud metal profiles
- PC7.** Install curved metal work such as archways, barreled ceilings
- PC8.** Cut and fix with adhesives and screws plasterboard sheets
- PC9.** Cut and fix with adhesives and screws fibre cement boards
- PC10.** Construct frames using Expanded Metal Lath (EML)

Conduct Insulation

To be competent, the user/individual on the job must be able to:

- PC11.** Install and fix acoustic products
- PC12.** Install and fix thermal products
- PC13.** Install and fix fireproof material and other materials to prevent the spread of fire
- PC14.** Use resilient material
- PC15.** Test installations and modify accordingly

Carryout finishing of plasterboard

To be competent, the user/individual on the job must be able to:

- PC16.** Prepare plasterboards to receive finishes
- PC17.** Cut beads and trims

Qualification Pack

- PC18.** Mix plastering compounds
- PC19.** Finish plasterboard joins manually by taping and jointing finishes
- PC20.** Manually sand finished joints
- PC21.** Apply full surface coatings
- PC22.** Finish plasterboard using skim coats of Gypsum plaster

Carryout Internal and External Plastering

To be competent, the user/individual on the job must be able to:

- PC23.** Prepare surfaces for plastering
- PC24.** Mix plaster to the correct consistency
- PC25.** Apply render, float, skim, and set coats to straight and curved surfaces
- PC26.** Apply smooth coat finishes
- PC27.** Repair plasterwork
- PC28.** Meet contract specifications
- PC29.** Apply legislation and official guidance to working methods
- PC30.** Use and maintain PPE, equipment and resources appropriately and effectively
- PC31.** Dispose of waste safely
- PC32.** Measure, mark out, apply, and finish
- PC33.**
 - Prepare materials and apply to external backgrounds:
 - i) Brick and/or block and/or concrete surfaces
 - ii) Plinths
 - iii) Internal and external angles
 - iv) Reveals
 - v) Walls
 - vi) Installation of Expanded Metal Lath (EML)
 - vii) Form industry recognized external rendering finishes
 - viii) Two-coat work
 - ix) Three-coat work
 - x) Internal and external angles

- PC34.** Apply textured coated finishing

Carryout creation and fitting of decorative mouldings

To be competent, the user/individual on the job must be able to:

- PC35.** Listen to, interpret, and respect the opinion of customers
- PC36.** Interpret proposed themes
- PC37.** Cut products
- PC38.** Create internal and external mitres
- PC39.** Apply and stick decorative coatings
- PC40.** Prepare and run in-situ moulds
- PC41.** Measure and cut components
- PC42.** Cut and fix paper-faced cornices
- PC43.** Match, mitre and install cast ornamental cornices and panel mouldings including: Moulds, Arches, Coving, Dado Rails, Cornices, Skirting, Panel moulds, Ceiling roses
- PC44.** Repair decorative mouldings

Carryout heritage and decorative techniques

Qualification Pack

To be competent, the user/individual on the job must be able to:

- PC45.** Respect buildings' history
- PC46.** Interpret and follow plans and specifications
- PC47.** Communicate effectively with clients and officials
- PC48.** Prepare materials
- PC49.** Prepare buildings ready for renovation or repair for both internal and external surfaces
- PC50.** Apply appropriate plastering techniques according to buildings' history and fabrication, whilst maintaining their integrity for both internal and external surfaces

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Standards and laws for constructing partitions and ceilings in plasterboard
- KU2.** Specialist terminology
- KU3.** Construction methods including timber framed buildings
- KU4.** Framing systems used in construction of walls and ceilings
- KU5.** Screws and fastenings used in construction of walls and ceilings
- KU6.** Different types of plasterboard and fibre cement boards
- KU7.** different drywall systems and the handling of the common equipment and materials
- KU8.** how to correctly execute works, including complex wall shapes and covers, and the integration of metal frames and sanitary components
- KU9.** The requirements for fire and sound protection and isolation
- KU10.** Methods for creating decorative designs for walls and ceiling.
- KU11.** Techniques for realizing designs for arched walls and ceilings
- KU12.** Methods for building decorative and sound protection/ improvements
- KU13.** Accepted methods for making and providing detailed materials lists
- KU14.** Safety regulations relating to the storage, handling, and installation of insulation materials
- KU15.** Fire Rating and Regulations Impact of building regulations
- KU16.** The influence of sustainability and environmental impact on insulation products and techniques
- KU17.** Current and changing technologies and practices for insulation
- KU18.** Principles and methods for choosing correct insulation systems for inner and outer constructions, depending on the setting
- KU19.** The equipment and machinery for working on joints, edges, corners, connections and finishing
- KU20.** Different methods of finishing plasterboards
- KU21.** Materials and techniques used in finishing plasterboards
- KU22.** The applicable standards for finishing, including the use of glass fibre and paper tape
- KU23.** How to finish angles with sharp edges, metal angle beats, non-coat beats and all types of outside and inside corner beats
- KU24.** Types of plaster and their uses

Qualification Pack

- KU25.** Types of background surfaces and their impact on plastering
- KU26.** Techniques and practices for plastering
- KU27.** Tools and equipment used in plastering
- KU28.** How to complete patching and repairs
- KU29.** Techniques for cutting internal and external mitred corners
- KU30.** The use of plaster coatings
- KU31.** Legislation and guidance for the application of external plastering and coatings
- KU32.** Safe working practices in relation to external plastering including the use of scaffolding platforms
- KU33.** The equipment and PPE needed for external plastering work
- KU34.** The characteristics, quality, uses, and limitations, of available materials and techniques
- KU35.** Methods of application
- KU36.** The appropriate and safe disposal of waste
- KU37.** Principles and methods for evaluating and assigning subgrade and plaster
- KU38.** The composition of plasters and which problems can occur regarding their adhesive properties
- KU39.** Structural plasters, trowel techniques, special plasters and their applications
- KU40.** methods for working with, and restoring, graffiti and stucco marquetry, stucco and cracks, joints, edges, corners and finishes
- KU41.** Methods and principles for making decorative mouldings
- KU42.** The range and use of decorative mouldings
- KU43.** Specialist finishes such as Scraffito, Venetian Plaster, textured mixtures, and other specialist techniques
- KU44.** Adhesives used in fitting decorative mouldings
- KU45.** Methods for creating all types of mouldings
- KU46.** Various specialist materials used on heritage sites and historical buildings
- KU47.** The history of a building, its fabrication and building techniques
- KU48.** The laws and regulations relating to planning and conservation
- KU49.** Specialist finishes such as Scraffito, Venetian Plaster, textured mixtures, and other specialist techniques
- KU50.** drawing, plan reading, designing, and sketching
- KU51.** Methods for combining personal creativity and talents with design skills
- KU52.** the process of preparing models, coggling, and plastering
- KU53.** How to apply core and arming materials, anti-friction and parting agents and basic constructions of arches
- KU54.** The design of ceiling surfaces with manufactured stucco and cast element
- KU55.** constructions and plaster cutting techniques

Generic Skills (GS)

User/individual on the job needs to know how to:

Qualification Pack

- GS1.** write in at least one language, preferably in the local language of the site
- GS2.** read sketches/routine work drawings, instructions provided for the work and various signboards, safety rules, safety tags, exit route information in one or more languages, preferably in the local language of the site
- GS3.** speak in one or more language, preferably one of the local language at the site
- GS4.** communicate orally and effectively with team members
- GS5.** analyze the safety aspects of the workplace
- GS6.** plan work and organize required resource effectively
- GS7.** complete work as per agreed time schedule and quality parameters
- GS8.** resolve any conflict within the teammates
- GS9.** evaluate the complexity of the tasks
- GS10.** identify any violation of safety norms during the work

CON/N4105: Quality Check and Handover

Description

This NOS deals with the quality check of test project prepared as per standards and handing over the same to the concerned juries.

Scope

The scope covers the following :

- Quality check of the test project
- Handover the project to juries

Elements and Performance Criteria

Quality check of the test project

To be competent, the user/individual on the job must be able to:

- PC1.** Inspect equipment, structures, and/or material to identify the nature and causes of errors, defects, or problems
- PC2.** Think critically by using logic and reasoning to identify the strengths and weaknesses of alternative solutions, conclusions or approaches to problems
- PC3.** Identify actual and potential problems
- PC4.** Analyse information and evaluate options to choose and use the best solution
- PC5.** Evaluate solutions and optimize results
- PC6.** The need for all work to be presented to meet customer and related trades needs and expectations
- PC7.** The importance of joint finishing in line with the specifications provided
- PC8.** The different techniques of applying different joint finishes

Handover the project to juries

To be competent, the user/individual on the job must be able to:

- PC9.** understand the process of marking and assessment criteria of respective trade
- PC10.** respond to the juries on the queries being raised by them
- PC11.** Make and follow through decision
- PC12.** Apply appropriate techniques according to buildings' history and fabrication, whilst maintaining their integrity for both internal and external surfaces
- PC13.** Leave work areas in a suitable condition for inspection and subsequent work
- PC14.** Report positive and negative variances in work processes and results, together with their implications
- PC15.** Organize any waste material so that it can be disposed of or recycled efficiently

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

Qualification Pack

- KU1.** The need for all work to be presented to meet customer and related trades needs and expectations
- KU2.** The importance of joint finishing in line with the specifications provided
- KU3.** Presentation including the brushing and cleaning of brickwork plus the tidying and cleaning of the work area (specific skill)
- KU4.** The different techniques of applying different joint finishes
- KU5.** The required quality standards for the task in hand
- KU6.** The nature and causes of substandard work and defects
- KU7.** The available range of quality checks and methods Alternative methods for effecting remedies and repairs

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** maintain work-related notes and records
- GS2.** read the relevant literature to learn about the latest developments in the field of work
- GS3.** listen attentively to understand the information/ instructions being shared by the speaker
- GS4.** communicate clearly and politely with co-workers and clients
- GS5.** coordinate with co-workers to achieve work objectives
- GS6.** plan and prioritize tasks to ensure timely completion
- GS7.** identify possible disruptions to work and take appropriate preventive measures
- GS8.** take quick decisions to deal with workplace emergencies/ accidents
- GS9.** evaluate all possible solutions to a problem to select the best one

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

- 0: performance below industry standard 1: performance meets industry standard 2: performance meets and, in specific respects, exceeds industry standard 3: performance wholly exceeds industry standard and is judged as excellent
- Section A: Measurement: This will be assessed using the following criteria for module 1 and module 2
- The accuracy of the measurement before the application of any tapes, beads, or coatings.
- On module 3 and module 4 the measurements will be taken on the completion of the modules.
- Section B: Squareness/plumbness/level: This will be assessed using the following sub criteria for modules 1, 2, and 3:
- Section C: Plaster finishing/taping and jointing/External coatings: The straightness of the tapes and beads; The smoothness of the tapes; The straightness, smoothness and cleanness of the coatings.
- Section D: Mouldings/Speed module: The cleanness of the mouldings; The precision of the cutting and filling of the internal and external mitres on the component's mouldings in module 4; The straightness, smoothness and cleanliness of the internal and external mitres of the mouldings in module 4

Qualification Pack

- Section E: Speed module: The completion of the task; Time used to complete the work from fastest and slowest time; The accuracy of the measurements; The cleanliness and accuracy
- Section F: Technical conformity
- Section G: Freestyle module: Does the module conform to recognized industrial practice; Is the module in the correct place; Do the dimensions on the module conform to the drawing; Was the model completed within the time allowed?
- Tolerances for structure and plasterboard: ± 1 mm for the dimensions lower than 300 mm ± 2 mm for the dimensions between 301 mm and 1200 mm, ± 3 mm for the dimensions higher than 1200 mm. Tolerance 1 mm = 0 -300 mm Tolerance 2 mm = 301-1200 mm Tolerance 3 mm = 1201 mm and higher
- Tolerances in straightness for coatings and finishing: ± 1 mm for the dimensions lower than 500 mm ± 2 mm for the dimensions between 501 mm and 1500 mm ± 3 mm for the dimensions higher than 1500 mm. Tolerance 1 mm = 0 - 500 mm Tolerance 2 mm = 501-1500 mm Tolerance 3 mm = 1501 mm and higher
- Tolerances for mouldings and ornamentation: ± 1 mm for the dimensions lower than 300 mm ± 2 mm for the dimensions higher than 300 mm. Tolerance 1 mm = 0-300 mm Tolerance 2 mm = 301 mm and higher
All coatings will be assessed using the European Q standards

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
