Qualification Pack

CON/Q4104: Painting and Decorating (WorldSkills)

Brief Job Description

A painter and decorator works in the commercial and public sectors and is responsible for the external and internal appearance of a building and its protection from water, rust, corrosion, mould, and insect infestation. There is a direct relationship between the nature and quality of the service required and the payment made by the client. Therefore, the painter and decorator has a continuing responsibility to work professionally and interactively with the client in order to give satisfaction and thus maintain and grow the business.

Personal Attributes

The person should be physically fit to work in varying locations and conditions. The person should be organized, diligent, methodical, safety-conscious, and a prompt decision-maker. In addition to being a team player, the individual should have good communication skills.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [CON/N4101: Work Organization, Management and Communication](#)
2. [CON/N4102: Problem Solving, Innovation and Creativity](#)
3. [CON/N4103: Interpretation of Drawings](#)
4. [CON/N4109: Construction of Test Project \(Painting and Decorating\)](#)
5. [CON/N4105: Quality Check and Handover](#)

Remarks:

i) There is no specified minimum job entry age for the skill competitions, however, the competitor(s) must not be older than 22 years in the year of the competition as per WorldSkills Standards. ii) The validity of these qualifications shall be only for two years or as per the WorldSkills competition cycle, whichever is earlier". (Please refer clause 4.1.(d) of NCVET Order No. 32001/06/2023/NCVET, dated 26.01.2024)

Qualification Pack

CON/N4101: Work Organization, Management and Communication

Description

This NOS deals with ensuring safe and healthy working environment at competition area by proper utilization of safety gears and effective communication skill with juries and competitors.

Scope

The scope covers the following :

- Adopt healthy and safe work practices at competition area
- Management of workplace
- Effective communication at competition area

Elements and Performance Criteria

Adopt healthy and safe work practices at competition area

To be competent, the user/individual on the job must be able to:

- PC1.** Explain health and safety legislation, obligations, and documentation
- PC2.** check and ensure the availability of appropriate and usable Personal Protective Equipment (PPE) at the workplace
- PC3.** use the appropriate PPE according to the nature of work and ensure other personnel also do the same
- PC4.** follow and promote the appropriate measures to ensure hygiene in the workplace, e.g.regular cleaning and sanitization
- PC5.** follow the applicable emergency procedures and ensure the personnel also do the same
- PC6.** Learn precautions for the safe use of power and cordless tools
- PC7.** Apply standards and laws relating to security, safety, and hygiene in plastering and drywall systems

Management of workplace

To be competent, the user/individual on the job must be able to:

- PC8.** establish methods for optimal and economically organized construction site. regarding construction plan and equipment, organization and procedures, material management, staffing and timelines
- PC9.** determine the correct calculations and estimates by using principles and methods
- PC10.** store plasterboards and related products safely and securely
- PC11.** be proactive in own continuous professional development in order to keep abreast of methods of working in the construction industry and changing technologies, for example acoustics, sustainability and environmental impact
- PC12.** Work effectively as part of teams
- PC13.** Work effectively with other trades
- PC14.** Establish and maintain high quality standards and working processes
- PC15.** identify problems promptly and manage their resolution

Qualification Pack

- PC16.** select, use and store all materials safely
- PC17.** plan work areas to maximize efficiency and maintain the discipline of regular tidying
- PC18.** principles and methods for determine the correct calculations and estimates
- PC19.** understand technical terminology and symbols

Effective communication at competition area

To be competent, the user/individual on the job must be able to:

- PC20.** visualize and translate customer wishes making recommendations which meet/improve their design and budgetary requirements where qualified to do so
- PC21.** Produce a cost and time estimate for customers
- PC22.** introduce related trades to support customer requirements
- PC23.** work effectively in a team to facilitate efficiency/productivity/quality and cost control
- PC24.** recognize the needs of architects and related trades
- PC25.** explain the importance of swiftly resolving misunderstandings and conflicting demands

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Health, hygiene, and safety legislation, obligations, regulations and documentation
- KU2.** principles of working safely with electricity
- KU3.** Accident/first-aid/fire/emergency procedures and reporting
- KU4.** situations when personal protective equipment must be used
- KU5.** purposes, uses, care, maintenance, and storage of all hand and powered tools and equipment together with their safety implications
- KU6.** purposes, uses, care and storage of materials
- KU7.** sustainability measures applying to the use of green materials and recycling
- KU8.** the significance of planning, accuracy, checking, and attention to detail in all working practices
- KU9.** importance of integrity and trustworthiness
- KU10.** value of managing own continuing professional development
- KU11.** value of building and maintaining trust and productive working relationships
- KU12.** importance of swiftly resolving misunderstandings and conflicting demands
- KU13.** need for security for the storage of tools and materials
- KU14.** criteria for being understandable within teams and to non specialists
- KU15.** recognised IT systems and related professional design software

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** maintain the appropriate data and records
- GS2.** read the appropriate reports and literature concerning the test project

Qualification Pack

- GS3.** communicate professionally with all the stakeholders
- GS4.** listen attentively to understand the information/ instructions being shared and take appropriate action
- GS5.** coordinate with co-workers to achieve the work objectives
- GS6.** plan and execute tasks based on priority
- GS7.** identify possible disruptions to work and take appropriate mitigation measures
- GS8.** take prompt action to deal with workplace emergencies and accidents
- GS9.** evaluate all possible solutions to work-related problems and select the best one
- GS10.** follow the recommended practices for the timely completion of work and achievement of organizational objectives

CON/N4102: Problem Solving, Innovation and Creativity

Description

This NOS deals with diagnostic approaches to problem solving by innovations and creativity

Scope

The scope covers the following :

- Develop the problem solving techniques by new innovations and creativity

Elements and Performance Criteria

Develop the problem solving techniques by new innovations and creativity

To be competent, the user/individual on the job must be able to:

- PC1.** Check work regularly, particularly for accuracy/standard to minimize problems at a later stage
- PC2.** Recognize and understand problems swiftly and follow a self-managed process for resolving
- PC3.** Challenge incorrect information to prevent problems
- PC4.** Develop creative solutions to challenges when working on restoration projects
- PC5.** Recognize opportunities to contribute ideas to improve the product and overall level of customer satisfaction
- PC6.** Demonstrate a willingness to try new methods and embrace change

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** The common types of problem which can occur within the work process
- KU2.** Diagnostic approaches to problem solving
- KU3.** understand trends and developments in the industry including new materials Methods, and equipment/technology
- KU4.** Keep up to date with changes in the industry

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** maintain work-related notes and records
- GS2.** read the relevant literature to learn about the latest developments in the field of work
- GS3.** communicate clearly and politely with co-workers and clients
- GS4.** listen attentively to understand the information/ instructions being shared by the speaker
- GS5.** plan and prioritize tasks to ensure timely completion
- GS6.** coordinate with co-workers to achieve work objectives

Qualification Pack

GS7. take quick decisions to deal with workplace emergencies/ accidents

CON/N4103: Interpretation of Drawings

Description

This NOS deals with understanding of the test project drawings along with its process of measurements.

Scope

The scope covers the following :

- Interpretation and execution of drawings as per standards

Elements and Performance Criteria

Interpretation and execution of drawings as per standards

To be competent, the user/individual on the job must be able to:

- PC1.** Prepare site measurement drawings
- PC2.** Accurately interpret all plans, elevations, sections and enlarged details
- PC3.** Produce basic outline drawings (hand and CAD) including elevations, plans, and sections to full size
- PC4.** produce accurate complex drawings on wood to make figure on the wall/floor
- PC5.** Identify drawing errors or items that require clarification
- PC6.** Determine and check quantities of materials required
- PC7.** Calculate a cost and price for the work
- PC8.** Identify horizontal and vertical key dimensions and all angles
- PC9.** Identify curved work and mortar joint finishes
- PC10.** Interpret all project features and their required construction methods
- PC11.** Establish any features that need special equipment or templates and source these
- PC12.** Recognize specified bonding patterns and obey bonding rules during construction
- PC13.** Provide advice and guidance to other professionals such as architects and quantity surveyors
- PC14.** Keep essential notes on each installation process
- PC15.** Explain complex specialist and technical information about installations to clients and other professionals
- PC16.** Apply mathematic geometry principles to the calculation of angles, areas, perimeters, curves, arcs, volumes, ratios, etc.
- PC17.** Prepare the materials requirements, taking into account increased requirements due to compression, wastage, breakage, etc.
- PC18.** Calculate formwork surfaces and materials requirements
- PC19.** Calculate formwork surfaces and materials requirements for face concrete formwork
- PC20.** Interpret, analyse, and work with construction plans (e.g. design plans, formwork plans, reinforcement plans, detail drawings, etc.) and material and parts lists

Knowledge and Understanding (KU)

Qualification Pack

The individual on the job needs to know and understand:

- KU1.** The essential information required for floor plans in construction drawings including sections, datum levels, wall constructions, material codes, depth dimensions, heights, schedules and specification
- KU2.** Interpretation and execution of drawings to ISO-A or ISO-E standards
- KU3.** The importance of checking for missing information or errors, anticipating problems and resolving in advance of the setting out process
- KU4.** The role and use of geometry
- KU5.** Mathematical processes and problem solving
- KU6.** The range of costs to be included in estimates
- KU7.** Trends in the industry including new materials and construction methods
- KU8.** The demands and specific properties and qualities of different building materials, such as organic and inorganic materials, coating materials, mounting materials, jointing and adhesive material
- KU9.** Primary elements such as floor, wall and ceiling systems and storefronts
- KU10.** How to choose efficient attachments, and the correct material for cement, wood and steel constructions
- KU11.** How to fabricate ceiling elements to correlate with heat insulation systems, soundproofing and fire protection systems and decorative aspects in the design of walls and ceilings
- KU12.** Principles and methods of technical construction
- KU13.** The relationship between the properties and characteristics of building materials and their impact on comfortable living spaces
- KU14.** The variety of building materials, their chemical and physical processes, capillary action, porosity, diffusion, and condensation as well as their implications for recycling
- KU15.** External and internal colour schemes, e.g. monochromatic, analogous, complementary, warm/advancing, contrasting and cool/receding

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** maintain work-related notes and records
- GS2.** read the relevant literature to learn about the latest developments in the field of work

CON/N4109: Construction of Test Project (Painting and Decorating)

Description

This NOS deals with the construction of test project for Painting and Decorating Skill.

Scope

The scope covers the following :

- Application of paint brush and roller
- Application of paint by spray
- Application of wallpaper
- Application of decorative techniques
- Application of sign writing / lettering

Elements and Performance Criteria

Application of paint brush and roller

To be competent, the user/individual on the job must be able to:

- PC1.** Check the condition of substrates e.g. new or existing, hazardous/ non-hazardous
- PC2.** Check the types of substrates e.g. timber, plaster (porous and non-porous surfaces), plastic, or metals
- PC3.** Use the correct preparation process for the types of substrate to include cleaning, priming, de-greasing, sealing
- PC4.** Prepare paints following the correct process, including stirring/ mixing/straining
- PC5.** Select the appropriate equipment to apply paint depending on the material, substrates, and quantity of work
- PC6.** Take into consideration the effects of temperature on paint e.g. humidity levels and weather conditions for external work
- PC7.** Protect the surrounding area to include coverage of floors/features and signage to avoid effects on people
- PC8.** Apply the correct paint systems for the types of substrate using brush, roller, paint pad, or spray, e.g. primers, undercoats and gloss
- PC9.** Use masking aids for “cutting in”/producing accurate lines
- PC10.** Regularly check the quality of painting by opacity tests to ensure consistent coverage
- PC11.** Refer to other trades where problems emerge (immediately or at a later stage) for investigation, e.g. water stain
- PC12.** Check that the quality of finishes meets specification, and take any corrective actions

Application of paint by spray

To be competent, the user/individual on the job must be able to:

- PC13.** Check the condition of substrates, e.g. new or existing
- PC14.** Check the types of substrate, e.g. timber, plastic, or metal

Qualification Pack

- PC15.** Use the correct preparation processes for the types of substrate to include cleaning, priming, de-greasing, and sealing
- PC16.** Prepare paint following correct processes, as appropriate to include stirring/mixing/straining and viscosity
- PC17.** Select the appropriate equipment to apply the paint depending on the material, substrate and quantity of work
- PC18.** Take into consideration the effects of temperature, on paint e.g. humidity levels and weather conditions for external work
- PC19.** Protect surrounding areas to include coverage of floors/features and signage to avoid effects on people
- PC20.** Select appropriate spray equipment e.g. HVLP, airless, electrostatic and pressure feed
- PC21.** Apply spray paints, following COSHH and manufacturer's guidelines for the type of substrate, e.g. primer, undercoat and gloss
- PC22.** Use large scale masking aids for 'cutting in'/producing accurate lines
- PC23.** Clean and thoroughly maintain spray equipment
- PC24.** Regularly check the quality of the painting by opacity tests to ensure consistent coverage
- PC25.** Check film thickness by WFT (wet film thickness) or DFT (dry film thickness)
- PC26.** Refer to other trades where problems emerge (immediately or at a later stage) for investigation, e.g. water stain
- PC27.** Check that the quality of finish meets the specification, to include no defects, and take any correction action

Application of wallpaper

To be competent, the user/individual on the job must be able to:

- PC28.** Check condition of substrates, e.g. new or existing
- PC29.** Check types of substrate, e.g. timber, plastic, plaster, or metal
- PC30.** Use the correct preparation process for the type of substrate to include cleaning, priming, de-greasing, sealing for a defect, e.g. water or oil stains
- PC31.** Size and seal the surface for even porosity, or apply lining paper as appropriate
- PC32.** Check for pattern matching requirements: random, set, off-set, alternate lengths, and reverse
- PC33.** Cut and trim wallpapers efficiently for cost effectiveness
- PC34.** Take particular precautions, e.g. use of cotton gloves, for high quality/expensive papers
- PC35.** Paste the wall and the paper or use a pasting machine (if not ready pasted), using a range of adhesives e.g. for vinyl, flock and lincrusta
- PC36.** Ensure manufacturers' guidelines are followed with regard to soaking times as necessary
- PC37.** Select the best starting positions, e.g. working away from the light, and take into consideration patterns including murals
- PC38.** Hang to vertical or plumb line and check for accuracy, taking corrective action as required
- PC39.** Re-plumb as appropriate e.g. around obstacles
- PC40.** Ensure joints are butt with exceptions such as damp-proof paper
- PC41.** Check for quality, e.g. shade variation and notify the manufacturer as appropriate
- PC42.** Check that the overall quality meets customer specification

Application of decorative techniques

Qualification Pack

To be competent, the user/individual on the job must be able to:

- PC43.** Select and use and apply specialist materials e.g. sponging, ragging, bagging, stippling, and blending, wood graining, marbling and trompe l'oeil, gilding (gold and silver leaf)
- PC44.** Select and use specialist tools, e.g. for gilding
- PC45.** Design and apply stencils
- PC46.** Apply to a range of surfaces, e.g. cardboard, plastic, timber, plaster and metal
- PC47.** Prepare surfaces to a perfect finish, including clean, smooth and sized

Application of sign writing / lettering

To be competent, the user/individual on the job must be able to:

- PC48.** Take into consideration the number of repeats/connections, location of doors, windows, corners, access requirements, room dimensions, stencil size, and spacing when working on walls
- PC49.** Follow the required order of application
- PC50.** Transfer images using different methods, e.g. tracing, pouncing, CAD materials
- PC51.** Apply the frisk film using different methods, e.g. spray and roller
- PC52.** Ensure enlarging
- PC53.** Apply the finish by free hand or template
- PC54.** Accurately measure when setting out the lettering

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** The purposes of painting: protection, preservation, sanitation, decoration, and identification, e.g. colour coding
- KU2.** The significance of following manufacturers' guidelines
- KU3.** COSHH requirements
- KU4.** Impacts of materials on the general public and necessary precautions e.g. allergies
- KU5.** The range of brushes, rollers, and trowel/texturing tools
- KU6.** The variety of surface coatings e.g. water and solvent borne: wood Treatments, e.g. stains and preservatives
- KU7.** Materials which cannot be sprayed e.g. paste and some primers
- KU8.** Methods of production including wet embossing, laminating, dry embossing, heat expansion, particles on to wet adhesive
- KU9.** Methods of printing to include block, screen, machine, wet, dry and embossing
- KU10.** Types of pattern to include set/straight match, drop/offset match, and random/free match
- KU11.** Range of papers (including specialist) and their characteristics: pulps, anaglyptic, washable, vinyl, duplex, simplex, fabric-backed vinyl, paper backed fabrics, hand-print, paper-backed vinyl, warps/ weftless, lincrusta, supadurables, flock, hessian, metallic, glass fibre, foil, and damp
- KU12.** The situations when lining paper is required, including solvent painted wall and excessive making good
- KU13.** Methods of trimming: pre-trimmed and removing selvages

Qualification Pack

- KU14.** The importance of accurate trimming when removing a selvedge
- KU15.** Methods of jointing for paper types to include butt, overlap, and cut
- KU16.** International performance symbols e.g. spongeable, peelable and off-set match
- KU17.** Types of adhesive, e.g. cellulose and starch and their suitability for different papers
- KU18.** Pasting methods in relation to the range of papers: pasting machine, brush, roller, ready-pasted, and pasting the wall directly
- KU19.** Historical considerations for restoration and preservation work e.g. following a flood or fire
- KU20.** A variety of decorative techniques
- KU21.** Preparation methods to include wet abrading, dry abrading, making good and spot priming
- KU22.** Defects which can occur-uneven colour, ropiness, sinking, bittiness
- KU23.** Appropriate coating types for use as ground coats for painted decorative work
- KU24.** Stencil types: positive, negative, and multi-plate
- KU25.** Methods used for enlarging and reducing stencils: accurate measurement, grid, illuminated projection and photocopying
- KU26.** Methods of transferring a design - including trace and pounce and photocopy onto the stencil plate materials of paper and proprietary Stencil card
- KU27.** The suitability of base materials used for cutting stencil plates: glass plate, proprietary cutting mat
- KU28.** The importance of cleanliness, hand position, knife angle, direction of cutting, blade sharpness, repair of broken ties, size, and sequence of pattern (small areas and vertical lines first), free movement of stencil plate, margin widths
- KU29.** Methods for securing stencils to surfaces - proprietary, spray adhesive, and tape (masking, low-tack)

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write in at least one language, preferably in the local language of the site
- GS2.** read sketches/routine work drawings, instructions provided for the work and various signboards, safety rules, safety tags, exit route information in one or more languages, preferably in the local language of the site
- GS3.** speak in one or more language, preferably one of the local language at the site
- GS4.** communicate orally and effectively with team members
- GS5.** analyze the safety aspects of the workplace
- GS6.** plan work and organize required resource effectively
- GS7.** complete work as per agreed time schedule and quality parameters
- GS8.** resolve any conflict within the teammates
- GS9.** evaluate the complexity of the tasks
- GS10.** identify any violation of safety norms during the work

Qualification Pack

<i>Application of paint brush and roller</i>	6	14	-	-
PC1. Check the condition of substrates e.g. new or existing, hazardous/ non-hazardous	-	-	-	-
PC2. Check the types of substrates e.g. timber, plaster (porous and non-porous surfaces), plastic, or metals	-	-	-	-
PC3. Use the correct preparation process for the types of substrate to include cleaning, priming, de-greasing, sealing	-	-	-	-
PC4. Prepare paints following the correct process, including stirring/ mixing/straining	-	-	-	-
PC5. Select the appropriate equipment to apply paint depending on the material, substrates, and quantity of work	-	-	-	-
PC6. Take into consideration the effects of temperature on paint e.g. humidity levels and weather conditions for external work	-	-	-	-
PC7. Protect the surrounding area to include coverage of floors/features and signage to avoid effects on people	-	-	-	-
PC8. Apply the correct paint systems for the types of substrate using brush, roller, paint pad, or spray, e.g. primers, undercoats and gloss	-	-	-	-
PC9. Use masking aids for “cutting in”/producing accurate lines	-	-	-	-
PC10. Regularly check the quality of painting by opacity tests to ensure consistent coverage	-	-	-	-
PC11. Refer to other trades where problems emerge (immediately or at a later stage) for investigation, e.g. water stain	-	-	-	-
PC12. Check that the quality of finishes meets specification, and take any corrective actions	-	-	-	-

<i>Application of paint by spray</i>	6	14	-	-
PC13. Check the condition of substrates, e.g. new or existing	-	-	-	-
PC14. Check the types of substrate, e.g. timber, plastic, or metal	-	-	-	-
PC15. Use the correct preparation processes for the types of substrate to include cleaning, priming, degreasing, and sealing	-	-	-	-
PC16. Prepare paint following correct processes, as appropriate to include stirring/mixing/straining and viscosity	-	-	-	-
PC17. Select the appropriate equipment to apply the paint depending on the material, substrate and quantity of work	-	-	-	-
PC18. Take into consideration the effects of temperature, on paint e.g. humidity levels and weather conditions for external work	-	-	-	-
PC19. Protect surrounding areas to include coverage of floors/features and signage to avoid effects on people	-	-	-	-
PC20. Select appropriate spray equipment e.g. HVLP, airless, electrostatic and pressure feed	-	-	-	-
PC21. Apply spray paints, following COSHH and manufacturer's guidelines for the type of substrate, e.g. primer, undercoat and gloss	-	-	-	-
PC22. Use large scale masking aids for 'cutting in'/producing accurate lines	-	-	-	-
PC23. Clean and thoroughly maintain spray equipment	-	-	-	-
PC24. Regularly check the quality of the painting by opacity tests to ensure consistent coverage	-	-	-	-
PC25. Check film thickness by WFT (wet film thickness) or DFT (dry film thickness)	-	-	-	-

Qualification Pack

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
PC26. Refer to other trades where problems emerge (immediately or at a later stage) for investigation, e.g. water stain	-	-	-	-
PC27. Check that the quality of finish meets the specification, to include no defects, and take any correction action	-	-	-	-
<i>Application of wallpaper</i>	6	14	-	-
PC28. Check condition of substrates, e.g. new or existing	-	-	-	-
PC29. Check types of substrate, e.g. timber, plastic, plaster, or metal	-	-	-	-
PC30. Use the correct preparation process for the type of substrate to include cleaning, priming, de-greasing, sealing for a defect, e.g. water or oil stains	-	-	-	-
PC31. Size and seal the surface for even porosity, or apply lining paper as appropriate	-	-	-	-
PC32. Check for pattern matching requirements: random, set, off-set, alternate lengths, and reverse	-	-	-	-
PC33. Cut and trim wallpapers efficiently for cost effectiveness	-	-	-	-
PC34. Take particular precautions, e.g. use of cotton gloves, for high quality/expensive papers	-	-	-	-
PC35. Paste the wall and the paper or use a pasting machine (if not ready pasted), using a range of adhesives e.g. for vinyl, flock and lincrusta	-	-	-	-
PC36. Ensure manufacturers' guidelines are followed with regard to soaking times as necessary	-	-	-	-
PC37. Select the best starting positions, e.g. working away from the light, and take into consideration patterns including murals	-	-	-	-
PC38. Hang to vertical or plumb line and check for accuracy, taking corrective action as required	-	-	-	-

Qualification Pack

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
PC39. Re-plumb as appropriate e.g. around obstacles	-	-	-	-
PC40. Ensure joints are butt with exceptions such as damp-proof paper	-	-	-	-
PC41. Check for quality, e.g. shade variation and notify the manufacturer as appropriate	-	-	-	-
PC42. Check that the overall quality meets customer specification	-	-	-	-
<i>Application of decorative techniques</i>	6	14	-	-
PC43. Select and use and apply specialist materials e.g. sponging, ragging, bagging, stippling, and blending, wood graining, marbling and trompe l'oeil, gilding (gold and silver leaf)	-	-	-	-
PC44. Select and use specialist tools, e.g. for gilding	-	-	-	-
PC45. Design and apply stencils	-	-	-	-
PC46. Apply to a range of surfaces, e.g. cardboard, plastic, timber, plaster and metal	-	-	-	-
PC47. Prepare surfaces to a perfect finish, including clean, smooth and sized	-	-	-	-
<i>Application of sign writing / lettering</i>	6	14	-	-
PC48. Take into consideration the number of repeats/connections, location of doors, windows, corners, access requirements, room dimensions, stencil size, and spacing when working on walls	-	-	-	-
PC49. Follow the required order of application	-	-	-	-
PC50. Transfer images using different methods, e.g. tracing, pouncing, CAD materials	-	-	-	-
PC51. Apply the frisk film using different methods, e.g. spray and roller	-	-	-	-
PC52. Ensure enlarging	-	-	-	-
PC53. Apply the finish by free hand or template	-	-	-	-

Qualification Pack

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
PC54. Accurately measure when setting out the lettering	-	-	-	-

CON/N4105: Quality Check and Handover

Description

This NOS deals with the quality check of test project prepared as per standards and handing over the same to the concerned juries.

Scope

The scope covers the following :

- Quality check of the test project
- Handover the project to juries

Elements and Performance Criteria

Quality check of the test project

To be competent, the user/individual on the job must be able to:

- PC1.** Inspect equipment, structures, and/or material to identify the nature and causes of errors, defects, or problems
- PC2.** Think critically by using logic and reasoning to identify the strengths and weaknesses of alternative solutions, conclusions or approaches to problems
- PC3.** Identify actual and potential problems
- PC4.** Analyse information and evaluate options to choose and use the best solution
- PC5.** Evaluate solutions and optimize results
- PC6.** The need for all work to be presented to meet customer and related trades needs and expectations
- PC7.** The importance of joint finishing in line with the specifications provided
- PC8.** The different techniques of applying different joint finishes

Handover the project to juries

To be competent, the user/individual on the job must be able to:

- PC9.** understand the process of marking and assessment criteria of respective trade
- PC10.** respond to the juries on the queries being raised by them
- PC11.** Make and follow through decision
- PC12.** Apply appropriate techniques according to buildings' history and fabrication, whilst maintaining their integrity for both internal and external surfaces
- PC13.** Leave work areas in a suitable condition for inspection and subsequent work
- PC14.** Report positive and negative variances in work processes and results, together with their implications
- PC15.** Organize any waste material so that it can be disposed of or recycled efficiently

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

Qualification Pack

- KU1.** The need for all work to be presented to meet customer and related trades needs and expectations
- KU2.** The importance of joint finishing in line with the specifications provided
- KU3.** Presentation including the brushing and cleaning of brickwork plus the tidying and cleaning of the work area (specific skill)
- KU4.** The different techniques of applying different joint finishes
- KU5.** The required quality standards for the task in hand
- KU6.** The nature and causes of substandard work and defects
- KU7.** The available range of quality checks and methods Alternative methods for effecting remedies and repairs

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** maintain work-related notes and records
- GS2.** read the relevant literature to learn about the latest developments in the field of work
- GS3.** listen attentively to understand the information/ instructions being shared by the speaker
- GS4.** communicate clearly and politely with co-workers and clients
- GS5.** coordinate with co-workers to achieve work objectives
- GS6.** plan and prioritize tasks to ensure timely completion
- GS7.** identify possible disruptions to work and take appropriate preventive measures
- GS8.** take quick decisions to deal with workplace emergencies/ accidents
- GS9.** evaluate all possible solutions to a problem to select the best one

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

Days and allocation of Judgement and Measurement marks are finalized at the Competition by the Experts; however, 30% minimum of Measurement and/or blind marking must be carried out on day C4.

Each completed module (or parts thereof) are assessed on the day on which it is completed, except wallpapering (wallpapering to be assessed on day 1 for cutting and matching, general appearance day 2 for gaps, overlaps, bubbles, and lifting)

A. Module 1 - Speed Mural and Colour Matching

B. Speed competition

- At the speed competition all Competitors have to work as fast and as precisely as possible. The expenditure of time is awarded with maximum 2 marks. The fastest Competitor is awarded 2 marks, the others in the order in which they complete the task 0.10 marks less (if there are more Competitors than 20, the marking needs to be changed). Competitors who finish simultaneously will receive the same number of marks, the next Competitor 0.20 or more marks less.

C. Dimensional Accuracy: For the dimensional accuracy tests, a deviation of ± 1.0 mm from the required

Qualification Pack

measurement is tolerated and deviations of more than 1.0 mm from the required measurement is given 0 marks: Maximum 1 mark is awarded per measurement point.

D. Module 2 - Free technique: Info sheet, artistic composition (Judgement), technical execution, colour concept, accurate implementation. The free technique is marked according to three criteria:

- Technical execution, maximum 3 marks (Measurement);
- The technical execution is assessed with measurement criteria. The detailed and final marking scheme is developed and agreed; by all Experts before the Competition;
- Artistic composition, maximum 2 marks (Judgement);
- The artistic composition is assessed with judgement criteria by all the Experts;
- The level of difficulty must also be assessed by the judgement group;
- The information sheet is assessed with Measurement criteria, maximum 0.50 marks;
- Colour concept, maximum 1 mark;
- Accurate implementation, maximum 2 marks;
- The final work needs to match the information sheet.

E. Module 3 - Lettering: Correct colour, clean surfaces, straight lines, clean corners, no visible reference lines, dimensional accuracy.

F. Module 4 - Main Design: Correct colour, clean surfaces, straight lines, clean corners, no visible reference lines, dimensional accuracy, overall appearance (Judgement).

G. Module 5 - Wallpapering: Cutting and pattern matching to internal corner, clean surfaces, connections, dimensional accuracy.

H. Module 6 - Door and Architraves: Panel door with moulding, inner panel only by spray, door frame and bottom skirting marks. The outer panel, the inner panel, and the moulding are painted in three different colours.

I. 0-3 Scale:

- 0: performance below industry standard
- 1: performance meets industry standard
- 2: performance meets and, in specific respects, exceeds industry standard
- 3: performance wholly exceeds industry standard and is judged as excellent

Minimum Aggregate Passing % at QP Level : 70

Qualification Pack

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
