CUTM/AGR/Q0203: Fisheries Post Harvest Supervisor

Brief Job Description

The Individual is responsible to understand quality parameters of fish and fishery products, postharvest handling of fish and shellfishes, value addition to fish and shellfish and conversion of fish by-catch and processing by-products into high-value products.

Personal Attributes

A Fisheries Post-Harvest Supervisor should be detail-oriented, hygienic, and knowledgeable in fish handling and preservation. They must possess strong organizational and technical skills to ensure quality, safety, and compliance during processing. Commitment to cleanliness, ability to manage teams, and awareness of sustainable waste management are essential, along with adaptability to cold environments and evolving food safety standards.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [CUTM/AGR/N0209: Post-Harvest handling of Fish and Shellfish](#)
2. [CUTM/AGR/N0210: Value added fisheries product and preservation](#)
3. [CUTM/AGR/N0211: Quality Assurance in Fish processing](#)
4. [CUTM/AGR/N0212: Waste Management in Fish Processing](#)
5. [CUTM/VSQ/N7804: Ensure organizational health, safety and security for self and others](#)
6. [DGT/VSQ/N0102: Employability Skills \(60 Hours\)](#)

CUTM/AGR/N0209: Post-Harvest handling of Fish and Shellfish

Description

This NOS focuses on efficient post-harvest handling of fish and shellfish to maintain freshness and quality. It includes hygiene practices, cold storage, transportation, sorting, grading, and packaging methods. The objective is to minimize spoilage, extend shelf life, and ensure food safety compliance in the fisheries supply chain.

Scope

The scope covers the following :

- The scope includes handling, preserving, and storing fish and shellfish to maintain quality and prevent spoilage. It covers chilling, freezing, hygiene protocols, food safety compliance, grading, and packaging techniques. The NOS also focuses on efficient cold chain logistics and reducing post-harvest losses for both domestic and export markets.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Identify the best packaging materials for storage of fish and shellfish.
- PC2.** Factors contributing to spoilage of fish and shellfish.
- PC3.** Pre-processing techniques of fish, prawns, lobster, squid, cuttle fish, crab, depuration of bivalves, etc.
- PC4.** Chemical, physical and sensory freshness analysis of fish and shellfish.
- PC5.** Cold chain and refrigerated transport systems.
- PC6.** Identify different freezing equipment.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** post-harvest handling techniques to maintain fish and shellfish quality.
- KU2.** chilling, freezing, and transportation methods to prevent spoilage.
- KU3.** of food safety standards such as HACCP, FSSAI, and FDA regulations.
- KU4.** biochemical changes in fish post-harvest and their impact on freshness.
- KU5.** sanitation and hygiene practices in fish handling and storage.
- KU6.** cold chain logistics and its role in fish preservation.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** handle fish safely while following hygiene protocols.

Qualification Pack

- GS2.** choose appropriate storage and preservation methods.
- GS3.** coordinate with suppliers, buyers, and regulatory agencies.
- GS4.** identify and address post-harvest losses.
- GS5.** manage workers in fish handling and processing units.
- GS6.** maintain efficiency in storage and transportation.

CUTM/AGR/N0210: Value added fisheries product and preservation

Description

This NOS focuses on processing and preserving fishery products to enhance value and shelf life. It includes filleting, drying, pickling, smoking, marination, and packaging techniques. The objective is to create market-ready fish products while ensuring food safety, nutritional quality, and compliance with industry standards.

Scope

The scope covers the following :

- The scope includes processing techniques, preservation methods, storage, and packaging of fishery products. It covers nutritional enhancement, food additives, hygiene, quality control, and marketability. The NOS also focuses on utilization of by-products and application of modern preservation technologies to minimize waste and maximize profitability.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Minced-based fish product.
- PC2.** Cured fish product.
- PC3.** Fermented fish product
- PC4.** Marinated Fish product
- PC5.** Understand the end product quality.
- PC6.** Knowledge on natural preservative applicable for fish products.
- PC7.** Understanding on packaging and storage methods of different value-added fish products.
- PC8.** Understand different parameters involved the preservation (time, temperature, humidity, water activity)

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** processing techniques for value-added fish products like fillets, fish sausages, and surimi.
- KU2.** preservation methods, including drying, pickling, smoking, and marination.
- KU3.** packaging requirements for extended shelf life and improved marketability.
- KU4.** nutritional composition and factors affecting fish product quality.
- KU5.** food additives, preservatives, and their regulatory limits.
- KU6.** waste utilization techniques for fish by-products.
- KU7.** emerging technologies like vacuum packaging and modified atmosphere storage.

Generic Skills (GS)

Qualification Pack

User/individual on the job needs to know how to:

- GS1.** select appropriate processing techniques based on fish type.
- GS2.** determine storage conditions and preservation methods.
- GS3.** do marketing and branding value-added fish products.
- GS4.** address quality defects and processing challenges.
- GS5.** manage processing units and supervise workers.
- GS6.** evaluate processing efficiency and identify cost-saving strategies.

CUTM/AGR/N0211: Quality Assurance in Fish processing

Description

This NOS focuses on ensuring quality and safety in fish processing through proper handling, storage, testing, and compliance with food safety regulations. It includes quality checks, hygiene monitoring, and laboratory analysis to maintain product integrity and ensure consumer health protection.

Scope

The scope covers the following :

- The scope includes quality inspection, food safety compliance, microbiological testing, traceability, and documentation in fish processing. It also covers cold chain monitoring, and regulatory audits to ensure high-quality fishery products meet market and export standards.

Elements and Performance Criteria

Understanding the different quality parameters associated with fish

To be competent, the user/individual on the job must be able to:

PC1. Important quality parameters, fish physiology affecting the quality.

PC2. Factors affecting the quality of fish and fishery products.

Knowledge on various methods of assessment and maintenance of quality

To be competent, the user/individual on the job must be able to:

PC3. Post-harvest technology to maintain the quality of raw material.

PC4. Microbiological procedures and Equipment used in microbiology lab.

PC5. Management of quality parameters within prescribed limits.

PC6. Hazard Analysis and Critical Control Point (HACCP)

PC7. Quality certification standards

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. quality parameters in fish processing, including sensory, microbiological, and chemical aspects.

KU2. food safety laws and regulatory requirements, such as FSSAI, HACCP, and EU standards.

KU3. contaminants in fishery products, including heavy metals, biotoxins, and microbial pathogens.

KU4. Good Manufacturing Practices (GMP) and Standard Operating Procedures (SOPs) in fish processing.

KU5. sampling and testing methods for evaluating fish freshness and safety.

KU6. cold chain monitoring and its role in maintaining fish quality.

KU7. waste disposal practices to ensure hygiene in processing units.

Qualification Pack

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** inspect raw fish and finished products for quality compliance.
- GS2.** handle quality deviations and corrective actions.
- GS3.** coordinate with quality control teams and regulatory bodies.
- GS4.** identify and address fish quality issues.
- GS5.** train and manage workers in food safety protocols.
- GS6.** ensure compliance with testing and reporting schedules.
- GS7.** interpret laboratory test results and suggest quality improvements.

CUTM/AGR/N0212: Waste Management in Fish Processing

Description

This NOS focuses on effective waste management practices in fish processing, ensuring compliance with environmental regulations. It includes waste segregation, disposal, recycling, and by-product utilization to minimize environmental impact and promote sustainability in the fisheries industry.

Scope

The scope covers the following :

- The scope includes waste classification, disposal methods, recycling, and sustainable waste management in fish processing. It covers environmental safety, bio-composting, by-product utilization, and pollution control measures to ensure responsible waste handling and regulatory compliance.

Elements and Performance Criteria

Knowledge on biochemistry of fishery by-catch and by-products

To be competent, the user/individual on the job must be able to:

- PC1.** Understand the difference between fish catch and by-catch.
- PC2.** Understand the composition of various parts of fish and shellfish.
- PC3.** Clearly understand the role of different chemicals used for conversion.

Information about handling of fish and shellfish waste

To be competent, the user/individual on the job must be able to:

- PC4.** Understand detailed information on parameters differentiating bycatch with catch.
- PC5.** Knowledge on different processing practices of fish and shellfish.
- PC6.** Information about the different kinds of by-products produced in different processing plants.
- PC7.** Know about handling of different fishery by-catch and by-products.

Knowledge on production of high value end product

To be competent, the user/individual on the job must be able to:

- PC8.** Know the biochemistry of different parts of fish and shellfish.
- PC9.** Selection and application of appropriate method for production of high value product.
- PC10.** Biochemical analysis of high value end products.
- PC11.** Functional properties of high value end products.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** types of fish processing waste, including organic and inorganic materials.
- KU2.** waste segregation techniques and proper disposal methods.
- KU3.** environmental regulations related to fisheries waste management.

Qualification Pack

- KU4.** fish by-product utilization, such as fish meal, fish oil, and collagen extraction.
- KU5.** waste reduction strategies, including efficient raw material usage and process optimization.
- KU6.** bio-composting and anaerobic digestion for organic waste.
- KU7.** hazardous waste handling and disposal to prevent environmental contamination.
- KU8.** sanitation and hygiene protocols for waste management facilities.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** classify and separate different types of fish processing waste.
- GS2.** use decision-making skills in choosing appropriate waste disposal methods.
- GS3.** coordinate with waste disposal agencies and regulatory bodies.
- GS4.** address waste management challenges and improve efficiency.
- GS5.** develop and implement waste management systems.
- GS6.** assess waste reduction opportunities and environmental impact.
- GS7.** promote sustainable and eco-friendly fish processing practices.

CUTM/VSQ/N7804: Ensure organizational health, safety and security for self and others

Description

This NOS focuses on maintaining personal hygiene, workplace safety, and environmental responsibility. It outlines procedures for disease prevention, safe equipment handling, waste disposal, and emergency response. The standard ensures that individuals follow preventive measures and safety protocols to create a clean, hazard-free, and health-conscious work environment.

Scope

The scope covers the following :

- The scope covers adherence to sanitation and hygiene norms, safe use of tools and chemicals, proper waste management, first aid administration, and compliance with government and workplace advisories. It aims to prepare individuals to work safely under routine and emergency situations, reducing risks to themselves, coworkers, and the environment.

Elements and Performance Criteria

Maintain personal hygiene

To be competent, the user/individual on the job must be able to:

- PC1.** wash hands, legs and face with soap/alcohol based sanitizer at reasonable intervals
- PC2.** wash the worn clothes with soap and sundry before use next time
- PC3.** ensure the face is covered with mask or three layers of cloth-piece
- PC4.** follow the workplace sanitization norms including distancing from sick people

Maintain clean and safe workplace

To be competent, the user/individual on the job must be able to:

- PC5.** carry out basic safety checks before operation of all tools, implements, and machinery and report identified hazards to the supervisor
- PC6.** follow the instructions mentioned on the labels of chemicals/pesticides/fumigants etc to avoid hazards
- PC7.** sanitize equipment, tools and machinery before and after use
- PC8.** dispose waste safely and correctly in the designated area
- PC9.** work in a manner which minimizes environmental damage, ensuring all procedures and instructions for controlling risks are followed
- PC10.** follow government / workplace advisories in case of outbreak of any disease/disaster

Administer appropriate emergency procedures

To be competent, the user/individual on the job must be able to:

- PC11.** follow procedures for dealing with accidents, fires and emergencies, including communicating location and directions to the location of emergency, as per the workplace requirements

Qualification Pack

- PC12.** provide treatment appropriate to the patient's injuries in accordance with recognized first aid techniques
- PC13.** report details of first aid administered in accordance with workplace procedures

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Importance of personal hygiene in preventing infection and illness.
- KU2.** Use and effectiveness of masks and sanitizers.
- KU3.** Workplace safety norms, including sanitization and distancing practices.
- KU4.** Basic safety checks and hazard identification protocols.
- KU5.** Safe handling and usage instructions of chemicals and pesticides.
- KU6.** Procedures for cleaning and sanitizing tools and machinery.
- KU7.** Waste disposal methods and designated disposal areas.
- KU8.** Environmental safety practices and risk mitigation.
- KU9.** Government and workplace advisories related to health emergencies.
- KU10.** First aid techniques and workplace protocols for injury reporting.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Ability to follow hygiene and sanitization routines consistently.
- GS2.** Situational awareness to identify unsafe practices or potential hazards.
- GS3.** Communication skills to report hazards and emergencies accurately.
- GS4.** Decision-making during accidents or outbreaks.
- GS5.** Capability to use PPE and follow safety signs/instructions.
- GS6.** Time management in emergency response or first aid delivery.
- GS7.** Teamwork while maintaining workplace health and safety norms.
- GS8.** Basic technical skill to perform equipment safety checks.
- GS9.** Problem-solving in waste management and chemical handling.
- GS10.** Record-keeping for first aid and incident reporting.

DGT/VSQ/N0102: Employability Skills (60 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Career Development & Goal Setting
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

- PC1.** identify employability skills required for jobs in various industries
- PC2.** identify and explore learning and employability portals

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

- PC3.** recognize the significance of constitutional values, including civic rights and duties, citizenship, responsibility towards society etc. and personal values and ethics such as honesty, integrity, caring and respecting others, etc.
- PC4.** follow environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

- PC5.** recognize the significance of 21st Century Skills for employment
- PC6.** practice the 21st Century Skills such as Self-Awareness, Behaviour Skills, time management, critical and adaptive thinking, problem-solving, creative thinking, social and cultural awareness, emotional awareness, learning to learn for continuous learning etc. in personal and professional life

Basic English Skills

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC7.** use basic English for everyday conversation in different contexts, in person and over the telephone
- PC8.** read and understand routine information, notes, instructions, mails, letters etc. written in English
- PC9.** write short messages, notes, letters, e-mails etc. in English

Career Development & Goal Setting

To be competent, the user/individual on the job must be able to:

- PC10.** understand the difference between job and career
- PC11.** prepare a career development plan with short- and long-term goals, based on aptitude

Communication Skills

To be competent, the user/individual on the job must be able to:

- PC12.** follow verbal and non-verbal communication etiquette and active listening techniques in various settings
- PC13.** work collaboratively with others in a team

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

- PC14.** communicate and behave appropriately with all genders and PwD
- PC15.** escalate any issues related to sexual harassment at workplace according to POSH Act

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

- PC16.** select financial institutions, products and services as per requirement
- PC17.** carry out offline and online financial transactions, safely and securely
- PC18.** identify common components of salary and compute income, expenses, taxes, investments etc
- PC19.** identify relevant rights and laws and use legal aids to fight against legal exploitation

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

- PC20.** operate digital devices and carry out basic internet operations securely and safely
- PC21.** use e- mail and social media platforms and virtual collaboration tools to work effectively
- PC22.** use basic features of word processor, spreadsheets, and presentations

Entrepreneurship

To be competent, the user/individual on the job must be able to:

- PC23.** identify different types of Entrepreneurship and Enterprises and assess opportunities for potential business through research
- PC24.** develop a business plan and a work model, considering the 4Ps of Marketing Product, Price, Place and Promotion
- PC25.** identify sources of funding, anticipate, and mitigate any financial/ legal hurdles for the potential business opportunity

Customer Service

To be competent, the user/individual on the job must be able to:

- PC26.** identify different types of customers
- PC27.** identify and respond to customer requests and needs in a professional manner.

Qualification Pack

PC28. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC29. create a professional Curriculum vitae (Résumé)

PC30. search for suitable jobs using reliable offline and online sources such as Employment exchange, recruitment agencies, newspapers etc. and job portals, respectively

PC31. apply to identified job openings using offline /online methods as per requirement

PC32. answer questions politely, with clarity and confidence, during recruitment and selection

PC33. identify apprenticeship opportunities and register for it as per guidelines and requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills and different learning and employability related portals

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use English language for effective verbal (face to face and telephonic) and written communication in formal and informal set up

KU6. importance of career development and setting long- and short-term goals

KU7. about effective communication

KU8. POSH Act

KU9. Gender sensitivity and inclusivity

KU10. different types of financial institutes, products, and services

KU11. how to compute income and expenditure

KU12. importance of maintaining safety and security in offline and online financial transactions

KU13. different legal rights and laws

KU14. different types of digital devices and the procedure to operate them safely and securely

KU15. how to create and operate an e- mail account and use applications such as word processors, spreadsheets etc.

KU16. how to identify business opportunities

KU17. types and needs of customers

KU18. how to apply for a job and prepare for an interview

KU19. apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. read and write different types of documents/instructions/correspondence

GS2. communicate effectively using appropriate language in formal and informal settings

Qualification Pack

- GS3.** behave politely and appropriately with all
- GS4.** how to work in a virtual mode
- GS5.** perform calculations efficiently
- GS6.** solve problems effectively
- GS7.** pay attention to details
- GS8.** manage time efficiently
- GS9.** maintain hygiene and sanitization to avoid infection

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Assessment System Overview:

- Batches assigned to the assessment agencies for conducting the assessment on SIDH or email
- Assessment agencies send the assessment confirmation to TP looping AB/AA to accept in SIDH
- Assessment agency deploys the ToA certified Assessor for executing the assessment
- AB monitors the assessment process & records

2. Testing Environment:

- Check the Assessment location, date and time
- If the batch size is more than 30, then there should be 2 Assessors.
- Check that the allotted time to the candidates to complete Theory & Practical Assessment is correct.

Qualification Pack

3. Assessment Quality Assurance levels/Framework:

- Question bank is created by the Subject Matter Experts (SME) are verified by the AB
- Questions are mapped to the specified assessment criteria.
- Assessor must be ToA certified & trainer must be ToT Certified

4. Types of evidence or evidence-gathering protocol:

- Time-stamped & geotagged reporting of the assessor from assessment location.
- Centre photographs with signboards and scheme specific branding
- Video Call verification/online proctoring will be done during the assessment from AB.

5. Method of verification or validation:

- Surprise visit to the assessment location

6. Minimum Percentage Required

- 70% overall to pass.
- Minimum 70% in each NOS

7. Reassessment: Candidates failing the assessment will be given one opportunity for reassessment after additional training.

8. Assessor Details: ToA Certified Assessor with relevant experience.

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Minimum Passing % at NOS Level: 70

(Please note: A Trainee must score the minimum percentage for each NOS separately as well as on the QP as a

Qualification Pack

whole.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
