Qualification Pack

CUTM/AGR/Q0601: Pollinator Habitat Maker

Brief Job Description

A Pollinator Habitat Maker will be responsible for fabricating and maintaining natural habitat for supporting and sustaining biological species causing pollination. Broadly, the job of the designer will include designing the landscape of the habitat using appropriate methods, selection of plant species, selection of pollinating species and strategies for the conservation of habitat. The work will further include engaging the public to raise awareness about managing pollination, pollinators and pollinator habitat.

Personal Attributes

A Pollinator Habitat Maker should be environmentally conscious, patient, and attentive to ecological details. They must possess a strong interest in biodiversity, plant-pollinator interactions, and sustainable habitat design. Good observational skills, creativity in planting layout, and a commitment to conservation are essential. Communication abilities are important for spreading awareness and engaging communities in pollinator-friendly practices.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [CUTM/AGR/N0601: Pollination, Pollinators, habitat designing](#)
2. [CUTM/AGR/N0602: Plant species for pollination](#)
3. [CUTM/AGR/N0603: Pollinator habitat maintenance and conservation](#)
4. [CUTM/AGR/N0604: Awareness on importance of pollinator habitat](#)
5. [CUTM/AGR/N0605: Health and Hygiene in pollinator habitat](#)
6. [DGT/VSQ/N0101: Employability Skills \(30 Hours\)](#)

CUTM/AGR/N0601: Pollination, Pollinators, habitat designing

Description

This NOS focuses on understanding the role of pollinators in agriculture and biodiversity. It covers the study of different pollinators, their habitat requirements, and the impact of environmental factors on their survival. The standard includes designing and maintaining pollinator-friendly habitats, selecting native plants, and implementing conservation strategies. It also emphasizes sustainable farming practices, ecological balance, and pollination management techniques to enhance crop productivity and biodiversity conservation.

Scope

The scope covers the following :

- This NOS focuses the study and management of pollinators essential for biodiversity and agricultural productivity. It includes designing and maintaining pollinator-friendly habitats, selecting native plant species, and implementing conservation strategies. The scope extends to ecological balance, sustainable farming practices, and mitigating threats like habitat loss and pesticides. It also involves monitoring pollinator populations, enhancing natural pollination, and ensuring compliance with environmental regulations for long-term sustainability.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Definition of pollination, importance of pollination.
- PC2.** Types of pollination, self and cross pollination
- PC3.** Mechanism of pollination.
- PC4.** Basic requirement of design of pollinator paradise
- PC5.** Aspects required for site selection for the new habitat
- PC6.** Methods of planting new habitat.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Understanding the role of pollination in plant reproduction.
- KU2.** Types of pollination: self-pollination and cross-pollination and Factors affecting pollination efficiency.
- KU3.** Different types of pollinators (bees, butterflies, birds, bats, etc.).
- KU4.** Principles of designing a pollinator-friendly habitat.
- KU5.** Sustainable landscaping techniques to support pollinators.
- KU6.** Importance of maintaining ecological balance and biodiversity.
- KU7.** Organic and eco-friendly farming practices that support pollinators.
- KU8.** Conservation laws and policies related to pollinator protection.

Qualification Pack

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Basic understanding of pollination and the role of pollinators (bees, butterflies, birds, etc.).
- GS2.** Communication skills for interacting with farmers, environmentalists, and stakeholders.
- GS3.** Awareness of environmental conservation and sustainable practices.
- GS4.** Time management and teamwork skills for project coordination.
- GS5.** Expertise in designing and maintaining pollinator-friendly habitats.
- GS6.** Knowledge of native plants, floral diversity, and their impact on pollinators.
- GS7.** Technical skills for using tools and methods in habitat creation and maintenance.
- GS8.** Compliance with agricultural and environmental regulations related to pollination.

Qualification Pack

CUTM/AGR/N0602: Plant species for pollination

Description

This NOS focuses on understanding the role of specific plant species in attracting and supporting pollinators like bees, butterflies, and birds. It covers the identification, selection, and cultivation of native plants that enhance pollination efficiency. The standard also includes sustainable habitat management, conservation strategies, and the impact of environmental factors on plant-pollinator interactions. This NOS ensures the development of pollinator-friendly ecosystems to improve biodiversity, agricultural productivity, and ecological balance.

Scope

The scope covers the following :

- The NOS covers the selection, cultivation, and management of plant species that support pollinators like bees, butterflies, and birds. It includes identifying native plants, enhancing biodiversity, and designing pollinator-friendly habitats. The scope extends to sustainable agricultural practices, conservation strategies, and ecological balance. It also focuses on mitigating threats like habitat loss and pesticide use while promoting pollination for improved crop yield and environmental sustainability.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Specific features of plants attracting pollinators.
- PC2.** Suitable nesting sites for pollination.
- PC3.** Specific criteria for plant selection
- PC4.** Recognition of flowers required for pollination
- PC5.** Evaluation of plant shape and size required for selection of plants
- PC6.** Role of plant density in effective pollination
- PC7.** Native plants and seed sources needed for pollination
- PC8.** Methods of planting a pollinator habitat.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Identification of key plant species that attract pollinators.
- KU2.** Floral traits that influence pollinator attraction (color, scent, nectar production).
- KU3.** Importance of plant diversity in supporting pollinators.
- KU4.** Impact of climate, soil, and environmental conditions on plant-pollinator interactions.
- KU5.** Effects of pesticides and chemicals on pollination.
- KU6.** Sustainable farming practices that support pollination.
- KU7.** Selection and cultivation of pollinator-friendly plants.

Qualification Pack

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Identifying pollinator-friendly plant species and their growth conditions.
- GS2.** Finding solutions for declining pollinator populations and habitat loss.
- GS3.** Working with environmentalists, farmers, and policymakers to promote pollination.
- GS4.** Adjusting to environmental changes and new agricultural practices.
- GS5.** Implementing eco-friendly techniques to support pollination.
- GS6.** Using tools and methods for monitoring plant-pollinator interactions.
- GS7.** Understanding environmental laws and best practices for plant conservation.

CUTM/AGR/N0603: Pollinator habitat maintenance and conservation

Description

This NOS focuses on the knowledge and skills required to maintain and conserve pollinator habitats. It includes monitoring habitat health, managing floral diversity, removing invasive species, applying eco-friendly practices, and ensuring the long-term sustainability of environments that support pollinators such as bees, butterflies, and other beneficial insects.

Scope

The scope covers the following :

- This NOS outlines the scope of work involved in maintaining and conserving pollinator habitats. It includes assessing habitat conditions, preserving native plant species, managing seasonal floral resources, preventing habitat degradation, and protecting nesting and foraging areas. The scope emphasizes sustainable practices to enhance biodiversity and ensure the continued presence of essential pollinators in natural and managed landscapes.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Significance of pollinator habitat conservation
- PC2.** Maintenance of Flowering forbs, woody species and successional shrubs.
- PC3.** Conservation practice for site management of pollinators
- PC4.** Practice for pesticide protection
- PC5.** Practice for appropriate nesting sites.
- PC6.** Practice for forages
- PC7.** Government and Environmental organizations associated with conservation of pollinator habitat.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Methods for controlling invasive species without harming pollinators.
- KU2.** Best practices for conserving natural pollinator habitats.
- KU3.** Importance of native plant species for long-term sustainability.
- KU4.** Techniques to enhance habitat resilience against climate change.
- KU5.** Identifying signs of habitat degradation.
- KU6.** Understanding policies and laws related to pollinator habitat conservation.
- KU7.** Compliance with environmental protection guidelines.
- KU8.** Key plant species that support pollinators.

Qualification Pack

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Follow verbal and written instructions related to habitat tasks.
- GS2.** Maintain records of habitat activities and pollinator observations.
- GS3.** Apply basic arithmetic for area measurement and counting plant species.
- GS4.** Show attentiveness to detail while identifying invasive species or degraded zones.
- GS5.** Identify and assess the condition of pollinator habitats using field techniques.
- GS6.** Operate basic tools and equipment for habitat maintenance (e.g., trimmers, hand hoes).
- GS7.** Implement protective measures for conserving nesting sites and shelter zones.
- GS8.** Coordinate with ecological teams to plan restoration or seasonal maintenance.

CUTM/AGR/N0604: Awareness on importance of pollinator habitat

Description

This NOS focuses on building awareness about the vital role of pollinators in ecosystems and agriculture. It involves understanding pollinator species, their interactions with plants, threats to their survival, and sustainable practices to conserve their habitats. The aim is to promote ecological balance and biodiversity through informed actions and community engagement.

Scope

The scope covers the following :

- This NOS covers the scope of understanding the significance of pollinators, recognizing their role in plant reproduction and food production, and identifying threats to their survival. It includes creating awareness about pollinator-friendly practices, promoting habitat conservation, and encouraging community participation to protect and enhance pollinator populations for ecological and agricultural sustainability.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Self-understanding on pollination, pollinators and pollinator habitat.
- PC2.** Educational programme at school level for awareness about pollination and pollinators.
- PC3.** Use of educative and publicity materials for awareness about pollination, pollinators
- PC4.** Corner meeting, workshops and conferences for increasing awareness.
- PC5.** Essay and debates at different educational levels and community levels for increasing awareness about importance of pollination, pollinators and pollinator habitat.
- PC6.** Organizing training camps for awareness.
- PC7.** Different NGO forums across the world promoting the importance of pollinators, pollination and making habitat.
- PC8.** Debate, and discussion in workplace of employees on general awareness on pollination and making habitat.
- PC9.** Creating digital social media (facebook, twitter etc..) for spreading awareness among public
- PC10.** Making short motivational movies for awareness about making and conservation of pollinator habitat

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Understand the importance of native and diverse plant species in supporting pollinator populations.
- KU2.** Know the consequences of habitat destruction, pesticide use, and climate change on pollinators.

Qualification Pack

- KU3.** Be familiar with sustainable practices that help conserve pollinator habitats (e.g., organic farming, habitat corridors).
- KU4.** Understand seasonal blooming patterns and how they affect pollinator food availability.
- KU5.** Know about invasive species that negatively impact pollinator-friendly plants.
- KU6.** Understand the community and agricultural benefits of maintaining pollinator habitats.
- KU7.** Be aware of government schemes, environmental policies, or local initiatives supporting pollinator conservation.
- KU8.** Be aware of the plant-pollinator relationship and its impact on biodiversity and crop productivity.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Communicate clearly with peers, supervisors, and community members about pollinator importance.
- GS2.** Record observations and prepare simple reports on pollinator behavior and habitat status.
- GS3.** Use basic numeracy skills to count pollinators, plants, or assess frequency of visits.
- GS4.** Exhibit a positive attitude towards environmental conservation and ecological sustainability.
- GS5.** Conduct basic surveys or awareness drives to educate others about pollinator conservation.
- GS6.** Recognize and report harmful practices such as pesticide overuse or habitat destruction.
- GS7.** Demonstrate responsibility and initiative in maintaining pollinator habitats.
- GS8.** Show adaptability and problem-solving skills in outdoor awareness or fieldwork conditions.

Qualification Pack

CUTM/AGR/N0605: Health and Hygiene in pollinator habitat

Description

This NOS involves the maintenance of proper health and hygiene standards in pollinator habitats to ensure a safe, clean, and sustainable environment for bees, butterflies, and other beneficial species. It includes daily cleaning practices, contamination control, use of eco-friendly materials, and awareness of pollinator behavior to prevent disease and stress.

Scope

The scope covers the following :

- The scope covers cleaning of pollinator enclosures, organic waste disposal, regular inspection of water and food sources, and maintaining sanitary conditions in both natural and man-made pollinator spaces. It also includes identifying risks and taking proactive steps to ensure optimal living conditions for pollinators year-round.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Habitat assessment procedure
- PC2.** Pollinator population sustainability
- PC3.** Criteria for plant species selection
- PC4.** General idea on designing the landscape
- PC5.** Creating awareness programme on making pollinator habitat
- PC6.** Building relationship with Govt and NGOs on making pollinator habitat
- PC7.** Threat to pollinator habitat
- PC8.** Criteria for restoration of habitat
- PC9.** Policies for sustainability of pollinator habitat
- PC10.** Conservation strategies to be adopted.
- PC11.** Maintenance of sanitation and hygiene
- PC12.** Research programme on importance of pollinator habitat
- PC13.** Environmental factors affecting the habitat.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Importance of cleanliness and hygiene in pollinator habitats.
- KU2.** Basic understanding of pollinators' behavior and their sensitivity to pollutants.
- KU3.** Types of harmful chemicals and contaminants that affect pollinators.
- KU4.** Techniques for safe removal of waste from habitats.
- KU5.** Proper maintenance of bee boxes, hives, and nesting sites.

Qualification Pack

- KU6.** Knowledge of local flora and its role in promoting pollinator health.
- KU7.** Use of natural and organic materials in pollinator zones.
- KU8.** Identification of common pests and diseases in pollinator environments.
- KU9.** Seasonal hygiene practices for pollinator sustainability.
- KU10.** Awareness of environmental regulations and eco-friendly practices.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Ability to maintain cleanliness in and around pollinator zones.
- GS2.** Skill in identifying contamination or infection in pollinator habitats.
- GS3.** Use of basic tools for cleaning and sanitizing without harming pollinators.
- GS4.** Communicating effectively with team members about hygiene protocols.
- GS5.** Recording and reporting hygiene issues or pest outbreaks.
- GS6.** Time management to perform regular maintenance routines.
- GS7.** Ability to follow standard procedures for safe handling of organic waste.
- GS8.** Adaptability to seasonal changes and their impact on habitat hygiene.
- GS9.** Performing checks on feeders, water sources, and nesting sites.
- GS10.** Ability to work respectfully around pollinators without disturbing them.

DGT/VSQ/N0101: Employability Skills (30 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

PC1. understand the significance of employability skills in meeting the job requirements

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

PC2. identify constitutional values, civic rights, duties, personal values and ethics and environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

PC3. explain 21st Century Skills such as Self-Awareness, Behavior Skills, Positive attitude, self-motivation, problem-solving, creative thinking, time management, social and cultural awareness, emotional awareness, continuous learning mindset etc.

Basic English Skills

To be competent, the user/individual on the job must be able to:

PC4. speak with others using some basic English phrases or sentences

Communication Skills

To be competent, the user/individual on the job must be able to:

PC5. follow good manners while communicating with others

PC6. work with others in a team

Qualification Pack

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

PC7. communicate and behave appropriately with all genders and PwD

PC8. report any issues related to sexual harassment

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

PC9. use various financial products and services safely and securely

PC10. calculate income, expenses, savings etc.

PC11. approach the concerned authorities for any exploitation as per legal rights and laws

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

PC12. operate digital devices and use its features and applications securely and safely

PC13. use internet and social media platforms securely and safely

Entrepreneurship

To be competent, the user/individual on the job must be able to:

PC14. identify and assess opportunities for potential business

PC15. identify sources for arranging money and associated financial and legal challenges

Customer Service

To be competent, the user/individual on the job must be able to:

PC16. identify different types of customers

PC17. identify customer needs and address them appropriately

PC18. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC19. create a basic biodata

PC20. search for suitable jobs and apply

PC21. identify and register apprenticeship opportunities as per requirement

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use basic spoken English language

KU6. Do and dont of effective communication

KU7. inclusivity and its importance

KU8. different types of disabilities and appropriate communication and behaviour towards PwD

KU9. different types of financial products and services

Qualification Pack

- KU10.** how to compute income and expenses
- KU11.** importance of maintaining safety and security in financial transactions
- KU12.** different legal rights and laws
- KU13.** how to operate digital devices and applications safely and securely
- KU14.** ways to identify business opportunities
- KU15.** types of customers and their needs
- KU16.** how to apply for a job and prepare for an interview
- KU17.** apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate effectively using appropriate language
- GS2.** behave politely and appropriately with all
- GS3.** perform basic calculations
- GS4.** solve problems effectively
- GS5.** be careful and attentive at work
- GS6.** use time effectively
- GS7.** maintain hygiene and sanitisation to avoid infection

Qualification Pack

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Assessment System Overview:

- Batches assigned to the assessment agencies for conducting the assessment on SIDH or email
- Assessment agencies send the assessment confirmation to TP looping AB/AA to accept in SIDH
- Assessment agency deploys the ToA certified Assessor for executing the assessment
- AB monitors the assessment process & records

2. Testing Environment:

- Check the Assessment location, date and time
- If the batch size is more than 30, then there should be 2 Assessors.
- Check that the allotted time to the candidates to complete Theory & Practical Assessment is correct.

3. Assessment Quality Assurance levels/Framework:

Qualification Pack

- Question bank is created by the Subject Matter Experts (SME) are verified by the AB
 - Questions are mapped to the specified assessment criteria.
 - Assessor must be ToA certified & trainer must be ToT Certified
4. Types of evidence or evidence-gathering protocol:
- Time-stamped & geotagged reporting of the assessor from assessment location.
 - Centre photographs with signboards and scheme specific branding
 - Video Call verification/online proctoring will be done during the assessment from AB.
5. Method of verification or validation:
- Surprise visit to the assessment location
6. Minimum Percentage Required
- 70% overall to pass.
 - Minimum 60% in each NOS
7. Reassessment: Candidates failing the assessment will be given one opportunity for reassessment after additional training.
8. Assessor Details: ToA Certified Assessor with relevant experience.

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Minimum Passing % at NOS Level: 60

(Please note: A Trainee must score the minimum percentage for each NOS separately as well as on the QP as a whole.)

Assessment Weightage

Compulsory NOS

National Occupational Standards	Theory Marks	Practical Marks	Project Marks	Viva Marks	Total Marks	Weightage
CUTM/AGR/N0601.Pollination, Pollinators, habitat designing	30	40	-	30	100	20

Qualification Pack

National Occupational Standards	Theory Marks	Practical Marks	Project Marks	Viva Marks	Total Marks	Weightage
CUTM/AGR/N0602.Plant species for pollination	30	40	-	30	100	10

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
