CUTM/AGR/Q1101: Advanced Farm Equipment Supervisor

Brief Job Description

The supervisor is responsible to supervise advanced farm machinery operation based on the standard operating procedure, supervise GPS-guided machinery and automated systems. He also monitor crop health and environmental conditions using sensors, adjust farming practices based on data analytics and remote sensing and conduct routine maintenance and ensure equipment safety.

Personal Attributes

An Advanced Farm Equipment Supervisor should be technically skilled, safety-conscious, and detail-oriented with strong problem-solving abilities. They must demonstrate leadership in managing teams, adaptability to modern mechanized farming practices, and responsibility in equipment maintenance. Good communication, planning, and decision-making skills, along with a commitment to efficiency, sustainability, and precision farming, are essential.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [CUTM/AGR/N1101: Supervise advanced machining seedbed preparation](#)
2. [CUTM/AGR/N1102: Supervise Advanced Machining Sowing/Transplanting](#)
3. [CUTM/AGR/N1103: Supervise an Advanced Intercultural Equipment](#)
4. [CUTM/AGR/N1104: Supervise Mechanized Harvesting and Threshing](#)
5. [CUTM/VSQ/N7801: Ensure organizational health, safety, and security](#)
6. [DGT/VSQ/N0102: Employability Skills \(60 Hours\)](#)

CUTM/AGR/N1101: Supervise advanced machining seedbed preparation

Description

The Supervise advanced machining seedbed preparation NOS under the Advanced Farm Equipment Supervisor qualification (NSQF Level 5) focuses on equipping learners with the skills to manage precision tillage operations using advanced technologies. Here trainees learn to handle, calibrate, and operate precision tillage equipment, implement variable depth and width adjustments, and apply advanced soil engagement techniques. The goal is to ensure uniform soil conditioning, optimal seedbed preparation, and efficient field operations using GPS-guided systems and smart machinery. The module emphasizes safety, calibration accuracy, and effective use of technology for modern, sustainable farming practices.

Scope

The scope covers the following :

- This NOS enables supervisors to manage and execute advanced seedbed preparation using precision tillage equipment. The scope includes calibrating and operating modern machinery, implementing variable depth and width adjustments, and applying advanced soil engagement techniques to achieve optimal soil tilth. It emphasizes uniform soil conditioning, soil health enhancement, and maximizing crop yield. The role also includes ensuring operational safety and troubleshooting equipment issues, aligning with the integration of smart agriculture practices and sustainable land preparation.

Elements and Performance Criteria

Comprehensive Farm Machinery Operation and Crop Field Preparation

To be competent, the user/individual on the job must be able to:

- PC1.** Field type for different crop farming operation.
- PC2.** Cropping season (Kharif and Rabi crops) & Knowledge on Climatic condition for farming.
- PC3.** Soil type; Different crops need different type of soil for growth.
- PC4.** Levelling of seed bed for sowing or transplanting by laser land levelers.
- PC5.** Skill on operation of primary tillage equipment (M.B Plough, Disc plough, Indigenous plough, rotavator, Power tiller & Tractor).
- PC6.** Skill on operation of secondary tillage equipment (Cultivator, Ridger, Harrow).
- PC7.** Advanced farm machinery operation based on artificial intelligence.
- PC8.** Operation of driverless tractor, self-operated machinery.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** different soil types and their suitability for various crops. This includes knowledge of Kharif and Rabi seasons, climate factors, and how they influence seedbed preparation.

Qualification Pack

- KU2.** both primary (e.g., MB plough, disc plough, rotavator) and secondary tillage equipment (e.g., harrow, ridger, cultivator) operations, their calibration, and applications for precise soil preparation.
- KU3.** precision tillage principles, including how to calibrate depth and speed settings to achieve uniform seedbeds for optimal germination and crop emergence.
- KU4.** variable depth and width adjustment features on advanced implements to ensure effective seed-to-soil contact and minimize compaction.
- KU5.** modern soil conditioning practices such as strip tillage, vertical tillage, and using soil conditioners, aimed at improving aeration, moisture retention, and root zone health.
- KU6.** the operation of driverless tractors and AI-powered farm machinery, including their benefits in reducing labor, enhancing precision, and improving operational efficiency.
- KU7.** tools such as GPS/GNSS receivers, field mapping software, and sensor-based calibration systems to monitor, adjust, and optimize tillage and soil preparation.
- KU8.** safety guidelines and proper use of personal protective equipment (PPE) while operating and maintaining machinery to avoid workplace accidents.
- KU9.** how to interpret data from sensors and field conditions to make informed decisions regarding machinery settings and seedbed preparation techniques.
- KU10.** how advanced tillage and precision agriculture can reduce soil erosion, optimize input use, and promote sustainable agricultural practices.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** calibrate and adjust precision tillage equipment for accurate depth and width control, essential for optimal seedbed preparation under variable soil conditions.
- GS2.** analyze soil type, moisture content, and topography to choose appropriate tillage and soil conditioning techniques.
- GS3.** operate, troubleshoot, and maintenance of advanced and AI-enabled farm equipment such as laser land levelers, rotary tillers, and driverless tractors.
- GS4.** use of advanced soil engagement methods (strip tillage, variable rate tillage) to promote uniform soil tilth, reduce compaction, and enhance crop root penetration.
- GS5.** operate GPS/GNSS-guided machines and integrate remote monitoring software and sensor data for informed decision-making in seedbed preparation.
- GS6.** diagnose and resolve machinery performance issues, ensuring uninterrupted operations in varied field conditions.
- GS7.** follow standard safety procedures, including the use of protective gear and adherence to operational guidelines during machinery handling.
- GS8.** supervise and guide field teams, communicate technical instructions clearly, and coordinate effectively with stakeholders and workers.
- GS9.** use software platforms, variable rate technologies, and data analytics to optimize equipment settings and seedbed quality.

CUTM/AGR/N1102: Supervise Advanced Machining Sowing/Transplanting

Description

This NOS focuses on supervising the operation, calibration, and maintenance of advanced sowing and transplanting machinery such as precision planters, pneumatic seed drills, and transplanters. The supervisor ensures optimal seed placement, depth, spacing, and integration of variable rate technology (VRT) to maximize crop emergence, yield, and resource efficiency. It also includes managing IoT-enabled equipment, troubleshooting technical issues, and performing pre/post-operational maintenance. The role combines technical expertise with data-driven decision-making to enhance productivity, sustainability, and precision in modern sowing and transplanting operations.

Scope

The scope covers the following :

- The scope of this NOS includes supervising and operating advanced sowing and transplanting machinery to ensure precision in seed placement and crop establishment. It encompasses managing the calibration and maintenance of modern equipment such as precision planters, pneumatic seed drills, and transplanters. The role also involves integrating variable rate technology (VRT), GPS systems, and IoT-based machinery for enhanced accuracy and efficiency. The supervisor ensures proper handling of automated systems to optimize planting density, reduce seed wastage, and improve overall farm productivity while adhering to safety and maintenance protocols.

Elements and Performance Criteria

Operation and Maintenance of Advanced Sowing Machinery and Equipment

To be competent, the user/individual on the job must be able to:

- PC1.** Understand the importance of preparing appropriate germinated seeds and seedlings for sowing through advanced machinery/equipment.
- PC2.** Understand the working and operation of each component of advanced machinery.
- PC3.** Learn the operation of all the advanced sowing machineries i.e., Precision planters, multi crop pneumatic seed drills, multi crop planters and advanced trans planters.
- PC4.** Learn to maintain the IOT based and advanced machinery before use, after use and during un seasons by proper greasing and lubricating.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** the significance of using appropriately germinated seeds and healthy seedlings suitable for advanced sowing/transplanting machinery to ensure high germination and crop establishment rates
- KU2.** detailed knowledge of the structure, function, and operation of components of advanced sowing equipment like precision planters, pneumatic seed drills, and transplanting machines

Qualification Pack

- KU3.** Comprehend techniques to achieve uniform seed depth and accurate seed placement that influence germination, plant spacing, and yield optimization
- KU4.** automated systems that control row spacing and planting rates, and how they impact crop density, soil health, and resource utilization
- KU5.** principles of VRT for seed distribution including its integration with GPS and field data for efficient seeding across variable field conditions
- KU6.** how to calibrate sowing/transplanting machinery accurately for different seed sizes, crop types, and field conditions to ensure optimal machine performance
- KU7.** the procedures for daily, seasonal, and preventive maintenance including greasing, lubrication, and part replacements to keep advanced sowing equipment operational and durable
- KU8.** IoT-enabled systems used for monitoring, controlling, and diagnosing equipment during sowing operations
- KU9.** different soil types, moisture levels, and crop requirements, and how these factors influence machine adjustments and operation strategy during sowing
- KU10.** the importance of following safety protocols while operating and maintaining sowing/transplanting machines to prevent accidents and ensure safe usage

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** operate and supervise the use of precision planters, pneumatic seed drills, and advanced transplanters with an understanding of their components and functionality
- GS2.** calibrate and maintain seed drills and transplanters, ensuring optimal seed placement, depth, and spacing for diverse crops and field conditions
- GS3.** integrate and application of VRT for optimized seed distribution based on field variability, soil conditions, and crop needs
- GS4.** manage automated row spacing and planting rate optimization systems, using digital tools and GPS-based auto-guidance technologies
- GS5.** analyze field data and creating seeding prescriptions using mapping and data management software to ensure precision farming
- GS6.** Apply regular greasing, lubrication, and part inspections to maintain machinery during use and off-season, and can troubleshoot functional issues independently
- GS7.** do germination, seed-soil interaction, and planting techniques to enhance crop emergence and uniformity.
- GS8.** Follow proper safety protocols and regulatory guidelines while handling equipment, ensuring both personal and workplace safety during operations
- GS9.** Coordinate with farm operators and machine handlers, communicates instructions clearly, and ensures proper task execution in field settings
- GS10.** learn and adopt new technologies like IOT-integrated machinery and AI-based agricultural systems as per evolving industry standards

CUTM/AGR/N1103: Supervise an Advanced Intercultural Equipment

Description

The Supervise an advanced intercultural equipment NOS equips learners to manage and operate smart intercultural machinery such as GPS-guided sprayers and drone-based application systems. It focuses on integrating IoT-enabled devices, ensuring equipment maintenance, calibrating sprayers, preparing spray solutions, and following safety and environmental guidelines. This module trains supervisors to optimize input application through Variable Rate Technology (VRT), improve water and nutrient management, and ensure safe and precise intercultural operations in modern, data-driven agriculture.

Scope

The scope covers the following :

- The scope of this NOS includes supervising the operation, maintenance, and safety of smart intercultural farm equipment such as automated sprayers, drones, and IoT-integrated systems. The role encompasses precision tasks like GPS-guided machinery navigation, variable rate technology (VRT) utilization, drone battery management, and calibration of sprayers. It also involves ensuring equipment safety, reporting workplace emergencies, and promoting sustainable practices like waste disposal and PPE usage. This NOS equips the supervisor to optimize resource use, enhance operational efficiency, and contribute to sustainable precision farming practices.

Elements and Performance Criteria

Operation, Maintenance, and Safety Practices for Smart Spraying Equipment and Drone-Based Applications

To be competent, the user/individual on the job must be able to:

- PC1.** Connect and operate machines with mobile applications (Bluetooth or GSM) and IOTs.
- PC2.** To change the drone battery and perform post operation maintenance of drone.
- PC3.** To inspect the electrostatic unit of the sprayer and clean the nozzles for any blockages.
- PC4.** Inspect the delivery hose joints and clean the tank using clean water after removing the nozzle as per the SOP.
- PC5.** Clean the strainers and delivery hoses using clean water.
- PC6.** Test the tank for leakage or loose hose connections.
- PC7.** To examine the by-pass and cut-off valve in engine-controlled sprayer for wear and tear/damage.
- PC8.** To prepare the spray solution and mixture as per the guidelines.
- PC9.** To calibrate the sprayer and make necessary adjustments for field operation.
- PC10.** To check the nozzles and replace them after certain period of time.
- PC11.** Wear protective equipment and clothing such as face mask, respirators, hand gloves, boots while field operation.
- PC12.** Report workplace emergencies/ accidents as per the organizational policy.
- PC13.** Dispose non-recyclable waste appropriately.

Qualification Pack

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** how to operate and integrate intercultural equipment with mobile applications, Bluetooth/GSM connectivity, and IoT platforms for precision farming and remote operations.
- KU2.** electrostatic sprayers, drone-based pesticide sprayers, and associated tasks like battery changing, nozzle cleaning, and post-operation maintenance.
- KU3.** the use of personal protective equipment (PPE) (masks, gloves, respirators, etc.), safe disposal of non-recyclable waste, and emergency reporting procedures as per organizational standards.
- KU4.** the process to calibrate sprayers, adjust nozzles, valves, and prepare chemical spray mixtures in accordance with crop and environmental requirements.
- KU5.** VRT systems for efficient resource application applying the right inputs at the right place and time based on field data analytics and soil variability.
- KU6.** the use of GPS-guided tractors and equipment for field navigation, minimizing overlap, and maintaining input uniformity across operations.
- KU7.** setup and efficient use of automated irrigation systems, including moisture sensors, weather stations, and remote-control interfaces to ensure optimal water efficiency.
- KU8.** routine checks, cleaning of delivery hoses, tanks, and strainers, as well as identifying wear and tear in valves or nozzles to maintain smooth equipment functioning.
- KU9.** GPS and sensor data, interpret field conditions, and make operational decisions for intercultural activities like fertilization, irrigation, and spraying.
- KU10.** organizational SOPs for machinery operation, field application, maintenance, and waste handling for safety and sustainability.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Operate and maintain electrostatic sprayers, IOT-enabled devices, and drone-based spraying systems.
- GS2.** Ensure proper calibration, inspection, and safety of components such as nozzles, strainers, and valves.
- GS3.** Use GPS-guided machinery for accurate field navigation and resource application.
- GS4.** Utilize variable rate technology (VRT) to optimize use of inputs like water, fertilizer, and pesticides.
- GS5.** Monitor and operate automated irrigation systems efficiently to maximize water usage and minimize wastage.
- GS6.** Use sensors and remote monitoring systems to assess field conditions and make informed irrigation decisions.
- GS7.** Conduct timely checks and maintenance of drones, sprayers, and irrigation systems.
- GS8.** Identify and resolve mechanical or software issues affecting field equipment operations.
- GS9.** Respond effectively to equipment malfunction, field variability, and environmental conditions using analytical thinking.

Qualification Pack

- GS10.** Calibrate systems based on data inputs and troubleshoot for optimal field performance.
- GS11.** Follow strict safety protocols such as using PPEs and reporting workplace accidents.
- GS12.** Implement environmentally responsible practices like proper disposal of chemical waste.
- GS13.** Operate mobile apps and remote systems (Bluetooth, GSM) for real-time machine control and monitoring.
- GS14.** Analyze field data for resource planning and crop health assessments.
- GS15.** Coordinate with technicians, farm workers, and external vendors to implement intercultural operations.
- GS16.** Report technical problems and progress updates clearly to supervisors and stakeholders.
- GS17.** Guide field operators in machinery handling, chemical mixing, and field safety compliance.
- GS18.** Supervise a team for timely and accurate execution of intercultural operations.
- GS19.** Keep up-to-date with emerging farm automation technologies and standard operating procedures.
- GS20.** Adapt to different crops, soil types, and machinery configurations as required.

CUTM/AGR/N1104: Supervise Mechanized Harvesting and Threshing

Description

The Supervise mechanized harvesting and threshing NOS under the Advanced Farm Equipment Supervisor qualification focuses on the efficient and safe use of modern harvesting machinery. It involves supervising the operation, calibration, and maintenance of equipment such as combine harvesters, reapers, and threshers. The supervisor ensures minimal grain loss, high-quality output, and safe machinery handling. Key tasks include troubleshooting mechanical/electronic issues, maintaining operational records, and guiding the post-operation servicing and storage of machines. This NOS equips learners with both technical and managerial competencies essential for advanced mechanized harvesting systems.

Scope

The scope covers the following :

- The scope covers troubleshooting mechanical issues, maintaining performance logs, guiding post-operation servicing, and ensuring adherence to SOPs and safety protocols. This role plays a critical part in enhancing yield quality, reducing operational downtime, and optimizing machine performance through skilled supervision.

Elements and Performance Criteria

Supervision and Operational Management of Advanced Harvesting and Threshing Equipment

To be competent, the user/individual on the job must be able to:

- PC1.** Identify and select appropriate advanced harvesting and threshing machinery based on crop type and field conditions.
- PC2.** Supervise the pre-operation checks, calibration, and adjustments of harvesters and threshers for optimal performance.
- PC3.** Monitor the real-time operation of combine harvesters, reapers, and threshers ensuring efficient crop handling and minimal grain loss.
- PC4.** Ensure safe operation and adherence to standard operating procedures (SOPs) during harvesting and threshing activities.
- PC5.** Troubleshoot basic mechanical or electronic issues in harvesting and threshing equipment and coordinate timely maintenance.
- PC6.** Maintain proper records of machine usage, fuel consumption, output, and downtime for performance evaluation.
- PC7.** Guide the team on post-operation cleaning, servicing, and safe storage of equipment after use.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

Qualification Pack

- KU1.** the types of advanced harvesting and threshing equipment (e.g., combine harvesters, reapers, threshers) and their suitability based on crop type, field conditions, and desired outcomes.
- KU2.** how to conduct pre-operation inspections, adjustments, and calibrations to ensure equipment performance, accuracy, and readiness before field deployment.
- KU3.** the functionalities of harvesting systems including cutting, threshing, separation, grain handling, and GPS-based yield monitoring systems to maximize output and reduce grain loss.
- KU4.** how to adjust machine parameters (drum speed, concave clearance, fan speed, sieve opening) to optimize grain separation and minimize seed breakage or impurity levels under varying crop and moisture conditions
- KU5.** safety protocols for attaching, operating, and maintaining crop headers and cutting platforms to prevent injuries and maintain operational integrity.
- KU6.** daily and periodic maintenance tasks including lubrication, inspection, cleaning, component alignment, and parts replacement to reduce equipment downtime.
- KU7.** how to identify and resolve common malfunctions in electronic sensors, hydraulic systems, or mechanical linkages during harvesting and threshing operations.
- KU8.** how to maintain records related to fuel consumption, machine hours, harvested output, downtime, and breakdowns for operational analysis and performance evaluation.
- KU9.** how to guide and supervise the harvesting team on procedures like safe machine storage, cleaning, and preparing equipment for the next use.
- KU10.** how to implement standard operating procedures and workplace safety standards to minimize hazards during mechanized harvesting and threshing activities.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** operate and supervise advanced harvesting and threshing equipment such as combine harvesters, crop headers, and threshers, ensuring efficient performance with minimal grain loss.
- GS2.** adjust threshing and separation settings, crop header height, reel speed, and other parameters to match field and crop conditions for optimal output and grain quality.
- GS3.** perform routine maintenance, lubrication, and diagnostics of mechanical or electronic components to prevent breakdowns and ensure smooth operations.
- GS4.** Maintain accurate records of machine usage, fuel consumption, maintenance schedules, and output to assess efficiency and make data-driven decisions.
- GS5.** follow standard operating procedures (SOPs), safe equipment handling, and emergency response practices to avoid hazards during mechanized harvesting and threshing.
- GS6.** make quick and informed decisions related to equipment issues, field conditions, or safety incidents to ensure continuity and safety during operations
- GS7.** how to provide clear guidance to machine operators and helpers, ensuring proper task distribution, coordination, and adherence to safety and quality protocols.
- GS8.** how to communicate clearly and effectively with team members and stakeholders to relay operational plans, troubleshoot issues, and report progress

Qualification Pack

- GS9.** modify operational strategies based on crop type, moisture levels, field slope, and real-time conditions using data from GPS and sensors
- GS10.** do sensor-based monitoring, and yield mapping tools to enhance precision and performance of harvesting and threshing processes

Qualification Pack

CUTM/VSQ/N7801: Ensure organizational health, safety, and security

Description

This NOS focuses on maintaining workplace safety, health, and security by identifying hazards, following safety procedures, using personal protective equipment (PPE), and responding to emergencies. It ensures compliance with health and safety regulations, proper waste disposal, and adherence to security protocols to create a safe and productive work environment.

Scope

The scope covers the following :

- This NOS covers workplace hazard identification, adherence to safety regulations, proper use of personal protective equipment (PPE), emergency response, fire safety, first aid, and waste management. It also includes implementing security measures, ensuring workplace hygiene, and promoting a safety-conscious culture to prevent accidents and maintain a secure working environment.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** identify different kinds of possible hazards at the workplace hazards: environmental, personal, ergonomic and chemical.
- PC2.** recognize other possible security issues existing in the workplace.
- PC3.** plan safety techniques for self and others.
- PC4.** recognize different measures to curb the hazards.
- PC5.** implement programs for health, safety and security of the people at the workplace.
- PC6.** communicate the safety plans to everyone at the workplace.
- PC7.** attach disciplinary rules with the implementation at the workplace.
- PC8.** comply with regulatory health and safety guidelines applicable to the workplace.
- PC9.** use and maintain protective equipment as per requirement in a production house.
- PC10.** ensure organizational activities in line with approved guidelines and procedures.
- PC11.** undertake and advise healthy lifestyle for self and others.
- PC12.** follow environment management system related procedures.
- PC13.** ensure safe handling and disposal of waste and debris.
- PC14.** minimize health and safety risks to self and others due to own actions.
- PC15.** monitor the workplace and work processes for potential risks and threats to self and others.
- PC16.** carry out periodic check to keep work area free from hazards and obstructions.
- PC17.** ensure participation of self and others in mock drills/ evacuation procedures organized at the workplace.
- PC18.** organize first aid, firefighting and emergency training sessions for others.
- PC19.** instruct and guide others to take action in the event of fire, emergencies or accidents.

Qualification Pack

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** safety guidelines, workplace policies, and compliance with national and industry safety standards.
- KU2.** common hazards such as electrical risks, fire, chemical exposure, and physical injuries.
- KU3.** different types of PPE (gloves, helmets, safety shoes, goggles) and their correct usage.
- KU4.** the proper handling, operation, and maintenance of workplace tools to prevent accidents.
- KU5.** Awareness of first aid procedures, fire evacuation plans, and emergency contact protocols.
- KU6.** fire hazards, fire extinguisher types, and safe fire-handling procedures in case of an incident.
- KU7.** the importance of keeping the workplace clean, organized, and free of potential hazards.
- KU8.** proper lifting posture, use of lifting tools, and avoiding strain-related injuries.
- KU9.** workplace security protocols, restricted areas, and unauthorized access prevention.
- KU10.** safe disposal methods for hazardous and non-hazardous materials to ensure environmental compliance.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** report safety concerns, follow instructions, and communicate hazards to supervisors and colleagues.
- GS2.** Identify workplace safety issues and taking appropriate actions to prevent accidents.
- GS3.** Handle safety-related measurements like voltage limits, weight capacity, and fire extinguisher ratings.
- GS4.** Ensure timely completion of tasks while following safety protocols and risk management procedures.
- GS5.** Work effectively with colleagues to maintain a safe and secure work environment.
- GS6.** Identify risks such as electrical shocks, fire, slippery surfaces, and chemical exposure in a workplace.
- GS7.** Ensure the safe use of machines, hand tools, and electrical equipment to prevent accidents.
- GS8.** Follow safety protocols, emergency procedures, and workplace safety policies.
- GS9.** do basic first aid techniques, fire safety procedures, and responding to workplace accidents.
- GS10.** Ensure proper disposal of hazardous and non-hazardous waste in compliance with environmental standards.

Qualification Pack

DGT/VSQ/N0102: Employability Skills (60 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Career Development & Goal Setting
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

- PC1.** identify employability skills required for jobs in various industries
- PC2.** identify and explore learning and employability portals

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

- PC3.** recognize the significance of constitutional values, including civic rights and duties, citizenship, responsibility towards society etc. and personal values and ethics such as honesty, integrity, caring and respecting others, etc.
- PC4.** follow environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

- PC5.** recognize the significance of 21st Century Skills for employment
- PC6.** practice the 21st Century Skills such as Self-Awareness, Behaviour Skills, time management, critical and adaptive thinking, problem-solving, creative thinking, social and cultural awareness, emotional awareness, learning to learn for continuous learning etc. in personal and professional life

Basic English Skills

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC7.** use basic English for everyday conversation in different contexts, in person and over the telephone
- PC8.** read and understand routine information, notes, instructions, mails, letters etc. written in English
- PC9.** write short messages, notes, letters, e-mails etc. in English

Career Development & Goal Setting

To be competent, the user/individual on the job must be able to:

- PC10.** understand the difference between job and career
- PC11.** prepare a career development plan with short- and long-term goals, based on aptitude

Communication Skills

To be competent, the user/individual on the job must be able to:

- PC12.** follow verbal and non-verbal communication etiquette and active listening techniques in various settings
- PC13.** work collaboratively with others in a team

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

- PC14.** communicate and behave appropriately with all genders and PwD
- PC15.** escalate any issues related to sexual harassment at workplace according to POSH Act

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

- PC16.** select financial institutions, products and services as per requirement
- PC17.** carry out offline and online financial transactions, safely and securely
- PC18.** identify common components of salary and compute income, expenses, taxes, investments etc
- PC19.** identify relevant rights and laws and use legal aids to fight against legal exploitation

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

- PC20.** operate digital devices and carry out basic internet operations securely and safely
- PC21.** use e- mail and social media platforms and virtual collaboration tools to work effectively
- PC22.** use basic features of word processor, spreadsheets, and presentations

Entrepreneurship

To be competent, the user/individual on the job must be able to:

- PC23.** identify different types of Entrepreneurship and Enterprises and assess opportunities for potential business through research
- PC24.** develop a business plan and a work model, considering the 4Ps of Marketing Product, Price, Place and Promotion
- PC25.** identify sources of funding, anticipate, and mitigate any financial/ legal hurdles for the potential business opportunity

Customer Service

To be competent, the user/individual on the job must be able to:

- PC26.** identify different types of customers
- PC27.** identify and respond to customer requests and needs in a professional manner.

Qualification Pack

PC28. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC29. create a professional Curriculum vitae (Résumé)

PC30. search for suitable jobs using reliable offline and online sources such as Employment exchange, recruitment agencies, newspapers etc. and job portals, respectively

PC31. apply to identified job openings using offline /online methods as per requirement

PC32. answer questions politely, with clarity and confidence, during recruitment and selection

PC33. identify apprenticeship opportunities and register for it as per guidelines and requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills and different learning and employability related portals

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use English language for effective verbal (face to face and telephonic) and written communication in formal and informal set up

KU6. importance of career development and setting long- and short-term goals

KU7. about effective communication

KU8. POSH Act

KU9. Gender sensitivity and inclusivity

KU10. different types of financial institutes, products, and services

KU11. how to compute income and expenditure

KU12. importance of maintaining safety and security in offline and online financial transactions

KU13. different legal rights and laws

KU14. different types of digital devices and the procedure to operate them safely and securely

KU15. how to create and operate an e- mail account and use applications such as word processors, spreadsheets etc.

KU16. how to identify business opportunities

KU17. types and needs of customers

KU18. how to apply for a job and prepare for an interview

KU19. apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. read and write different types of documents/instructions/correspondence

GS2. communicate effectively using appropriate language in formal and informal settings

Qualification Pack

- GS3.** behave politely and appropriately with all
- GS4.** how to work in a virtual mode
- GS5.** perform calculations efficiently
- GS6.** solve problems effectively
- GS7.** pay attention to details
- GS8.** manage time efficiently
- GS9.** maintain hygiene and sanitization to avoid infection

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

"The following tools are proposed to be used for final assessment:

i. Written Test: This will comprise of (i) True / False Statements (ii) Multiple Choice Questions (iii) Matching Type

Questions. Online system for this will be preferred.

ii. Practical Test: This will comprise a test job to be prepared as per project briefing following appropriate working

steps, using necessary tools, equipment and instruments. Through observation it will be possible to ascertain

candidate's aptitude, attention to details, quality consciousness etc. The end product will be measured against

Qualification Pack

the pre-decided MCQ filled by the Assessor to gauge the level of candidates skill achievements.

Minimum Percentage Required

- 70% overall to pass.
- Minimum 60% in each NOS

Reassessment: Candidates failing the assessment will be given one opportunity for reassessment after additional training.

Assessor Details: ToA Certified Assessor with relevant experience"

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Minimum Passing % at NOS Level: 60

(Please note: A Trainee must score the minimum percentage for each NOS separately as well as on the QP as a whole.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
Declarative Knowledge	Declarative knowledge refers to facts, concepts and principles that need to be known and/or understood in order to accomplish a task or to solve a problem.
Key Learning Outcome	Key learning outcome is the statement of what a learner needs to know, understand and be able to do in order to achieve the terminal outcomes. A set of key learning outcomes will make up the training outcomes. Training outcome is specified in terms of knowledge, understanding (theory) and skills (practical application).
OJT (M)	On-the-job training (Mandatory) trainees are mandated to complete specified hours of training on site
OJT (R)	On-the-job training (Recommended) trainees are recommended the specified hours of training on site
Procedural Knowledge	Procedural knowledge addresses how to do something, or how to perform a task. It is the ability to work, or produce a tangible work output by applying cognitive, affective or psychomotor skills.
Training Outcome	Training outcome is a statement of what a learner will know, understand and be able to do upon the completion of the training.

Qualification Pack

Terminal Outcome	Terminal outcome is a statement of what a learner will know, understand and be able to do upon the completion of a module. A set of terminal outcomes help to achieve the training outcome.
Declarative Knowledge	Declarative knowledge refers to facts, concepts and principles that need to be known and/or understood in order to accomplish a task or to solve a problem.
Key Learning Outcome	Key learning outcome is the statement of what a learner needs to know, understand and be able to do in order to achieve the terminal outcomes. A set of key learning outcomes will make up the training outcomes. Training outcome is specified in terms of knowledge, understanding (theory) and skills (practical application).
OJT (M)	On-the-job training (Mandatory) trainees are mandated to complete specified hours of training on site.
OJT (R)	On-the-job training (Recommended) trainees are recommended the specified hours of training on site.
Procedural Knowledge	Procedural knowledge addresses how to do something, or how to perform a task. It is the ability to work, or produce a tangible work output by applying cognitive, affective or psychomotor skills.
Training Outcome	Training outcome is a statement of what a learner will know, understand and be able to do upon the completion of the training.
Terminal Outcome	Terminal outcome is a statement of what a learner will know, understand and be able to do upon the completion of a module. A set of terminal outcomes help to achieve the training outcome.
National Occupational Standard	NOS define the measurable performance outcomes required from an individual engaged in a particular task. They list down what an individual performing that task should know and also do.
Qualification	A formal outcome of an assessment and validation process which is obtained when a competent body determines that an individual has achieved learning outcomes to given standards
Qualification File	A Qualification File is a template designed to capture necessary information of a Qualification from the perspective of NSQF compliance. The Qualification File will be normally submitted by the awarding body for the qualification.
Sector	A grouping of professional activities on the basis of their main economic function, product, service or technology.
Long Term Training	Long-term skilling means any vocational training program undertaken for a year and above.

Qualification Pack
