CUTM/AGR/Q1701: Polyhouse Installation, Monitoring and Service Supervisor

Brief Job Description

A Polyhouse Installation, Monitoring and Service Supervisor will design the structure and assist in installing the polyhouse. He shall monitor operation and maintenance of the polyhouse structure. He may use and control the instruments installed inside the structure. The person may also assist in cultivation practices such as maintaining nursery, transplanting, inter cultivation, irrigation, micro climate control, harvesting and post harvesting of vegetable and flower crops.

Personal Attributes

A Polyhouse Installation, Monitoring and Service Supervisor should be technically skilled, proactive, and detail-oriented. They must possess leadership qualities, problem-solving ability, and a strong understanding of protected cultivation practices. Good communication, teamwork, adaptability, and commitment to safety and quality are essential for managing installation, crop care, and post-harvest operations effectively.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [CUTM/AGR/N1701: Plan and setup the polyhouse](#)
2. [CUTM/AGR/N1702: Preparation of land and installation of irrigation inside polyhouse](#)
3. [CUTM/AGR/N1703: Monitor and maintain polyhouse](#)
4. [CUTM/AGR/N1704: Suggest suitable Crop production and nursery management in polyhouse](#)
5. [CUTM/AGR/N1705: Post- harvest and marketing of polyhouse produce](#)
6. [CUTM/AGR/N1706: Maintain Health and Safety at Work Place](#)
7. [DGT/VSQ/N0102: Employability Skills \(60 Hours\)](#)

CUTM/AGR/N1701: Plan and setup the polyhouse

Description

Describe the measures to ensure Land preparation for installing irrigation and fertigation system. Understand the installation process required for irrigation and fertigation purposes

Scope

The scope covers the following :

- Combines Technics and operation to get a productive and sustainable growing environment.

Elements and Performance Criteria

Assist in design, layout, survey of land and procurement of polyhouse materials

To be competent, the user/individual on the job must be able to:

- PC1.** Designing the greenhouse with the consultation of experts.
- PC2.** Selection of suitable lands for constructing polyhouse
- PC3.** Surveying and levelling the land .
- PC4.** Analyse the foundation strength for polyhouse construction.
- PC5.** Make polyhouse drawing/ installation plan for polyhouse structure.
- PC6.** Select the quality materials for construction.
- PC7.** Find the different locations for material procurement .

Arrange the required resources

To be competent, the user/individual on the job must be able to:

- PC8.** Arranging construction materials.
- PC9.** Arrangement of skilled and unskilled labours.

Assisting in setting up the polyhouse

To be competent, the user/individual on the job must be able to:

- PC10.** Assist in installation of various structure materials of polyhouse.
- PC11.** Join various structural members of polyhouse.
- PC12.** Covering the polyethylene over structure without wrinkles and damage.
- PC13.** Installing the shade net and insect proof nets.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Explain the process of levelling the land
- KU2.** State the ploughing and harrowing process of the land
- KU3.** List the basics of crop cultivation/package and practices of soil solarisation for pathogen-free soil

Qualification Pack

- KU4.** Discuss the raised bed preparation
- KU5.** Explain the calculation of drip materials requirement for polyhouse
- KU6.** List the items required for procurement of drip irrigation requirement
- KU7.** List the items required for procurement of drip irrigation requirement
- KU8.** Explain the significance of the Crop calendar and the basic crop cultivation practices
- KU9.** List certain Micro Irrigation Products
- KU10.** Detail the Crop parameters and specifications of the micro irrigation system

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Clearly communicate technical requirements, resource needs, and timelines to team members and stakeholders
- GS2.** Identify and resolve issues during the planning and installation process, such as site preparation challenges or resource constraints.
- GS3.** Maintain strict adherence to safety protocols during land preparation and irrigation setup to protect workers and equipment.
- GS4.** Plan and execute tasks systematically to meet project deadlines without compromising quality.
- GS5.** Analyze soil quality, ensure proper leveling, and perform necessary soil amendments for optimal crop growth.
- GS6.** Design and install efficient irrigation systems, such as drip or sprinkler setups, tailored to polyhouse needs.
- GS7.** Ensure accurate alignment and connectivity of irrigation components, including pipes, filters, and valves.
- GS8.** Implement water conservation techniques and sustainable practices, such as rainwater harvesting or fertigation, to enhance efficiency

CUTM/AGR/N1702: Preparation of land and installation of irrigation inside polyhouse

Description

Monitoring and maintaining a polyhouse involves regular checks of temperature, humidity, irrigation systems, and pest control to ensure optimal conditions for plant growth. It also includes timely cleaning, repairing structural components, and maintaining proper ventilation for healthy crop production.

Scope

The scope covers the following :

- The NOS includes managing environmental parameters, ensuring the functioning of irrigation and fertigation systems, and addressing pest and disease management. It also covers routine maintenance of polyhouse structures and ensuring compliance with safety and quality standards.

Elements and Performance Criteria

Land preparation

To be competent, the user/individual on the job must be able to:

- PC1.** Levelling the land.
- PC2.** Ploughing and harrowing the land.
- PC3.** Soil solarization for pathogen free soil.
- PC4.** Raise bed preparation.

Irrigation system installation

To be competent, the user/individual on the job must be able to:

- PC5.** Measure the area required to install irrigation system.
- PC6.** Calculation of drip materials requirement for polyhouse.
- PC7.** Procurement of drip irrigation requirement.
- PC8.** Installation of drip irrigation system.
- PC9.** Skill to operate and maintain the drip irrigation system.

Fertigation system installation

To be competent, the user/individual on the job must be able to:

- PC10.** Calculation of nutrients required.
- PC11.** Selection and installation of fertigation system.
- PC12.** Operation and maintenance of fertigation system.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Design and components of a polyhouse (frame, cladding, ventilation, etc.).
- KU2.** Functionality and maintenance of systems like irrigation, fertigation, and cooling.

Qualification Pack

- KU3.** Techniques for maintaining optimal temperature, humidity, and light.
- KU4.** environmental control systems such as fans, foggers, and shade nets.
- KU5.** Nutritional needs and watering schedules for specific crops.
- KU6.** Operation and maintenance of drip and sprinkler systems.
- KU7.** Usage of thermometers, hygrometers, and soil moisture sensors.
- KU8.** Proper pruning, training, and harvesting techniques.
- KU9.** Crop rotation and scheduling for sustainable production.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Identify and resolve issues during the planning and installation process, such as site preparation challenges or resource constraints.
- GS2.** Maintain strict adherence to safety protocols during land preparation and irrigation setup to protect workers and equipment.
- GS3.** convey issues and instructions clearly to the team.
- GS4.** Identify and resolve operational issues promptly
- GS5.** use innovative thinking for improving polyhouse efficiency.
- GS6.** Prioritizing tasks to ensure timely completion of activities like watering, maintenance, and harvesting.
- GS7.** Proficiently use monitoring tools like sensors and automation systems.
- GS8.** Operation and maintenance of irrigation, fertigation, and climate control systems.
- GS9.** Assess crop growth and identifying areas for improvement
- GS10.** Maintain detailed logs of environmental parameters, crop cycles, and maintenance activities.

CUTM/AGR/N1703: Monitor and maintain polyhouse

Description

This NOS involves supervising, monitoring, and maintaining the infrastructure, equipment, and climatic conditions of a polyhouse to ensure optimal crop growth. It includes managing ventilation, irrigation, pest control, structural integrity, sensor systems, and hygiene, while ensuring compliance with safety and agronomic standards for high-value horticultural production.

Scope

The scope covers the following :

- The scope includes monitoring polyhouse structures, microclimate control systems, irrigation lines, fertigation units, and pest exclusion nets. It also covers managing repairs, preventive maintenance, calibration of sensors, record-keeping, and workforce coordination to ensure sustainable and uninterrupted operation of polyhouse facilities for commercial crop production.

Elements and Performance Criteria

Polyhouse operation and maintenance

To be competent, the user/individual on the job must be able to:

- PC1.** Understand microclimate changes in polyhouse.
- PC2.** Raising curtains, cover shade nets whenever required.
- PC3.** Monitor of polyhouse instruments.
- PC4.** Washing of Polyfilm at regular interval.
- PC5.** Painting of structural members to avoid rusting.
- PC6.** Liming of polyfilm during summer to reduce sunlight intensity.

Regular checking of structure

To be competent, the user/individual on the job must be able to:

- PC7.** Periodically checking of structure to identify the damages.
- PC8.** Regular monitoring the instruments workability.

Regular checking of structure

To be competent, the user/individual on the job must be able to:

- PC9.** Replacing the broken profiles/ springs.
- PC10.** Pasting the damaged polyfilms with UV stabilized tapes.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Structure and components of different types of polyhouses (e.g., naturally ventilated, fan and pad system).

Qualification Pack

- KU2.** Climatic parameters (temperature, humidity, Carbon dioxide, light intensity) and their effect on crop health.
- KU3.** Operation of automated systems like foggers, exhaust fans, misting, and climate controllers.
- KU4.** Types of irrigation and fertigation systems used in polyhouse farming.
- KU5.** Principles of Integrated Pest and Disease Management (IPDM) specific to protected environments.
- KU6.** Procedures for regular inspection and preventive maintenance of polyhouse infrastructure.
- KU7.** Understanding of calibration and usage of environmental sensors and controllers.
- KU8.** Basic electrical and plumbing knowledge for repairing minor faults in equipment.
- KU9.** Standard Operating Procedures (SOPs) for hygiene, biosecurity, and worker safety.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Organize and prioritize tasks to meet project deadlines while ensuring high-quality work.
- GS2.** Develop detailed plans and blueprints for polyhouse layout, including structural design and materials required
- GS3.** Evaluate the site for suitability, ensuring proper leveling, drainage, and environmental conditions for polyhouse installation.
- GS4.** Efficiently manage materials, tools, and labor to optimize project cost and resources.
- GS5.** Monitor each stage of the polyhouse setup to ensure adherence to technical specifications and standards.
- GS6.** Guide workers in cleaning, repair, and daily operations within the polyhouse.
- GS7.** Detect and resolve minor issues in irrigation, ventilation, and shading systems.
- GS8.** Plan and schedule maintenance activities to ensure smooth polyhouse operations.

CUTM/AGR/N1704: Suggest suitable Crop production and nursery management in polyhouse

Description

This NOS involves recommending appropriate crops, cultivation techniques, and nursery management practices suited to polyhouse conditions. It includes crop planning, variety selection, seedling raising, transplanting schedules, and resource optimization, ensuring high productivity and quality. It supports protected cultivation through scientific nursery establishment and environmentally controlled crop management strategies.

Scope

The scope covers the following :

- This NOS involves recommending appropriate crops, cultivation techniques, and nursery management practices suited to polyhouse conditions. It includes crop planning, variety selection, seedling raising, transplanting schedules, and resource optimization, ensuring high productivity and quality. It supports protected cultivation through scientific nursery establishment and environmentally controlled crop management strategies.

Elements and Performance Criteria

Raising seedlings

To be competent, the user/individual on the job must be able to:

- PC1.** Suggest suitable seed selection of vegetables and flower for polyhouse
- PC2.** Suggest suitable seed selection of vegetables and flower for polyhouse
- PC3.** Suggest suitable bed preparation for raising nursery
- PC4.** Sowing the seeds of vegetables and flowers
- PC5.** Suggest watering the seedlings
- PC6.** Suggest providing required nutrition
- PC7.** Suggest applying the pesticide if required

Plant transplanting

To be competent, the user/individual on the job must be able to:

- PC8.** Selecting the healthy seedling for transplantation
- PC9.** Transplanting the plants maintaining the crop geometry
- PC10.** Watering the transplanted plants.
- PC11.** Gap filling by replacing the dead plants
- PC12.** Learning to give proper support for the crops
- PC13.** Staking procedure for crops like cucumber, tomato and capsicum
- PC14.** Water the polyhouse crops as per the crop need.
- PC15.** Application of water soluble fertilizers in the recommended quantity to promote the healthy growth of seedlings, vegetables and plants.
- PC16.** Application of micronutrients.

Qualification Pack

Pest management

To be competent, the user/individual on the job must be able to:

- PC17.** Monitor the plants to identify the symptoms of pests and disease
- PC18.** Application of proper pesticides and insecticides to control pest and disease infestation
- PC19.** Remove the dead and damaged seedlings, vegetables, flowers and plants at regular interval
- PC20.** Application of herbicides and weedicides and carry out manual weeding to prevent unwanted growth in the polyhouse

Harvesting

To be competent, the user/individual on the job must be able to:

- PC21.** Check the maturity of flowers and vegetables grown in the polyhouse for harvest
- PC22.** Harvest the flowers and vegetables using the appropriate tools and collect them in appropriate baskets and/ or containers
- PC23.** Store the harvested flowers and vegetables at the recommended temperature, humidity and hygienic conditions

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Climatic requirements and growth conditions of different crops suitable for polyhouse cultivation.
- KU2.** Principles of crop scheduling and rotation specific to protected environments.
- KU3.** Selection criteria for high-yielding, disease-resistant, and polyhouse-compatible crop varieties.
- KU4.** Nursery establishment techniques including media preparation, seed treatment, and sowing methods.
- KU5.** Temperature, humidity, and light regulation required for healthy seedling development.
- KU6.** Water and nutrient management in nursery and post-transplant stages.
- KU7.** Pest and disease management strategies for seedlings in polyhouse settings.
- KU8.** Safe use of plant growth regulators and micronutrients during nursery stages.
- KU9.** Standards for seedling quality, hardening off, and transplanting techniques.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Identify and suggest suitable crops and varieties based on market and environmental conditions.
- GS2.** Recommend scientifically-sound nursery management practices.
- GS3.** Prepare and maintain seedling trays, soil-less media, and nursery structures.
- GS4.** Monitor seedling growth stages and advise on timely irrigation and nutrition.
- GS5.** Coordinate and supervise seed sowing, thinning, and transplanting activities.
- GS6.** Identify early symptoms of pests/diseases and suggest timely interventions.
- GS7.** Advise on resource optimization (space, water, media) to reduce costs.

Qualification Pack

GS8. Communicate effectively with farmers, workers, and agri-consultants.

CUTM/AGR/N1705: Post- harvest and marketing of polyhouse produce

Description

This NOS focuses on managing post-harvest handling, quality control, packaging, storage, and marketing of produce grown in polyhouses. It includes grading, sorting, cold chain management, and identifying market linkages. The role ensures minimal losses, improved shelf life, and better price realization for high-value horticultural crops grown under protected cultivation.

Scope

The scope covers the following :

- The scope includes implementing post-harvest practices like cleaning, sorting, grading, packaging, and storing of polyhouse-grown vegetables, fruits, or flowers. It also involves identifying buyers, setting prices, maintaining records, and linking with local or distant markets to maximize returns while ensuring quality and compliance with food safety standards.

Elements and Performance Criteria

Sorting and grading of produce

To be competent, the user/individual on the job must be able to:

- PC1.** Storing the harvested yield in safe place
- PC2.** Maintain the storage pest
- PC3.** Sort and grade the flowers with proper dimension and quality
- PC4.** Sort and grade the flowers with proper dimension and quality
- PC5.** Packaging and parceling methods

Marketing of polyhouse produce

To be competent, the user/individual on the job must be able to:

- PC6.** Identify the right market place for polyhouse produce
- PC7.** Transporting vegetables and flowers without damaging the produce

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Methods for harvesting at the right maturity stage to preserve quality.
- KU2.** Techniques for sorting, grading, and packaging to meet market standards.
- KU3.** Knowledge of storage techniques, including cold storage and controlled atmospheric conditions.
- KU4.** Understanding methods to prevent post-harvest losses due to spoilage or damage.
- KU5.** Best practices for safe and efficient transportation of produce to maintain freshness and minimize damage.
- KU6.** Strategies for market research, identifying target markets, and customer demand analysis.

Qualification Pack

- KU7.** Knowledge of pricing, negotiation, and sales techniques to maximize profitability.
- KU8.** Familiarity with food safety standards, packaging regulations, and certifications required for market entry.
- KU9.** Understanding the end-to-end process of getting produce from farm to market.
- KU10.** Coordination with buyers, distributors, and retailers.
- KU11.** Maintaining records of inventory, sales, and expenses to ensure traceability and profitability.
- KU12.** Knowledge of composting and recycling to manage waste effectively.
- KU13.** Techniques to utilize unsold produce or by-products efficiently.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Monitor and guide cleaning, sorting, grading, and packing activities.
- GS2.** Identify post-harvest issues and recommend corrective actions.
- GS3.** Operate and maintain basic tools like weighing scales, grading tables, and cold rooms.
- GS4.** Assess crop quality and segregate damaged or under-grade produce.
- GS5.** Maintain packaging and dispatch records.
- GS6.** Identify potential markets and establish links with traders or aggregators.
- GS7.** Negotiate prices and terms with buyers while ensuring fair trade.
- GS8.** Train staff on hygiene, food safety, and packaging protocols.

CUTM/AGR/N1706: Maintain Health and Safety at Work Place

Description

Maintaining health and safety in the agriculture sector involves implementing measures to prevent accidents, injuries, and illnesses caused by machinery, chemicals, and environmental conditions. This includes providing proper training, using protective equipment, ensuring safe handling of tools and chemicals, and maintaining a clean and hazard-free work environment. Regular safety audits and adherence to government regulations further ensure the well-being of workers.

Scope

The scope covers the following :

- Maintaining health and safety in the agriculture sector ensures the well-being of workers by minimizing risks associated with machinery, chemicals, and environmental factors. It encompasses proper training, use of protective equipment, and adherence to safety protocols to prevent accidents, illnesses, and injuries, thereby fostering a secure and productive work environment.

Elements and Performance Criteria

Recognize and address the hazards in the sector

To be competent, the user/individual on the job must be able to:

- PC1.** Identify different kinds of possible hazards such as environmental, personal, ergonomic, and chemical at the workplace.
- PC2.** Recognize other possible security issues existing in the workplace.
- PC3.** Plan safety techniques for self and others.
- PC4.** Recognize different measures to curb the hazards.
- PC5.** Implement programs for health, safety, and security of the people at the workplace.
- PC6.** Communicate the safety plans to everyone at the workplace.
- PC7.** Attach disciplinary rules with the implementation at the workplace.

Ensure organizational health, safety and security for self and others

To be competent, the user/individual on the job must be able to:

- PC8.** Comply with regulatory health and safety guidelines applicable to the workplace.
- PC9.** Use and maintain protective equipment as per requirement in a production house.
- PC10.** Ensure organizational activities in line with approved guidelines and procedures.
- PC11.** Undertake and advise healthy lifestyle for self and others.
- PC12.** Follow environment management system related procedures.
- PC13.** Ensure storage of materials and tools in line with manufacturers and Cooperative Society or NGO or SHG requirements.
- PC14.** Ensure safe handling and disposal of waste and debris.
- PC15.** Minimize health and safety risks to self and others due to own actions.
- PC16.** Monitor the work place and work processes for potential risks and threats to self and others.
- PC17.** Carry out periodic check to keep work area free from hazards and obstructions.

Qualification Pack

- PC18.** Ensure participation of self and others in mock drills or evacuation procedures organized at the workplace.
- PC19.** Organize first aid, fire-fighting and emergency training sessions for others.
- PC20.** Instruct and guide others to take action in the event of fire, emergencies or accidents.
- PC21.** Follow Cooperative Society/NGO/SHG procedures for evacuation when required.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Workplace Safety Regulations: Awareness of relevant laws, standards, and guidelines for maintaining safety in agricultural and construction settings, including polyhouse installations.
- KU2.** Risk Assessment: Ability to identify, evaluate, and mitigate potential hazards such as falls, electrical risks, and heavy machinery accidents during polyhouse construction and service.
- KU3.** Personal Protective Equipment (PPE): Knowledge of appropriate PPE (e.g., gloves, helmets, goggles, and boots) and ensuring all team members are equipped and trained to use them properly.
- KU4.** Emergency Procedures: Understanding emergency protocols, including evacuation plans, fire safety measures, and first aid procedures tailored to polyhouse operations.
- KU5.** Tool and Equipment Safety: Proficiency in the safe use and maintenance of tools and machinery used in polyhouse installation and service, such as drills, cutters, and lifting equipment.
- KU6.** Safe Material Handling: Techniques for safely lifting, transporting, and handling materials like pipes, sheets, and greenhouse structures to prevent injuries.
- KU7.** Environmental Awareness: Understanding the environmental impact of polyhouse operations, including waste management and ensuring the safe use of chemicals like fertilizers and pesticides.
- KU8.** Ergonomics and Work Posture: Knowledge of proper body mechanics to minimize strain and injuries during manual tasks and construction work.
- KU9.** Team Health Monitoring: Ability to monitor the health and well-being of the team, ensuring hydration, breaks, and safe working conditions in challenging environments.
- KU10.** Continuous Training and Auditing: Commitment to regular safety training, workshops, and workplace audits to reinforce safety practices and address emerging risks.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Follow safety protocols and guidelines strictly while installing, repairing, or maintaining polyhouse structures and equipment.
- GS2.** Use personal protective equipment (PPE) correctly (helmets, gloves, safety harnesses, masks) during structural and electrical work.
- GS3.** Identify and report hazards such as exposed wiring, unstable scaffolding, or chemical leaks to supervisors promptly.

Qualification Pack

- GS4.** Handle tools and machinery safely, ensuring proper use and storage to avoid accidents or damage.
- GS5.** Respond effectively to emergencies like electrical shocks, falls, or fire incidents using first-aid and evacuation procedures.
- GS6.** Conduct basic risk assessments before starting tasks, especially those involving heights or electrical systems.
- GS7.** Train junior staff or workers on safe practices and emergency protocols within the polyhouse environment.

DGT/VSQ/N0102: Employability Skills (60 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Career Development & Goal Setting
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

- PC1.** identify employability skills required for jobs in various industries
- PC2.** identify and explore learning and employability portals

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

- PC3.** recognize the significance of constitutional values, including civic rights and duties, citizenship, responsibility towards society etc. and personal values and ethics such as honesty, integrity, caring and respecting others, etc.
- PC4.** follow environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

- PC5.** recognize the significance of 21st Century Skills for employment
- PC6.** practice the 21st Century Skills such as Self-Awareness, Behaviour Skills, time management, critical and adaptive thinking, problem-solving, creative thinking, social and cultural awareness, emotional awareness, learning to learn for continuous learning etc. in personal and professional life

Basic English Skills

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC7.** use basic English for everyday conversation in different contexts, in person and over the telephone
- PC8.** read and understand routine information, notes, instructions, mails, letters etc. written in English
- PC9.** write short messages, notes, letters, e-mails etc. in English

Career Development & Goal Setting

To be competent, the user/individual on the job must be able to:

- PC10.** understand the difference between job and career
- PC11.** prepare a career development plan with short- and long-term goals, based on aptitude

Communication Skills

To be competent, the user/individual on the job must be able to:

- PC12.** follow verbal and non-verbal communication etiquette and active listening techniques in various settings
- PC13.** work collaboratively with others in a team

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

- PC14.** communicate and behave appropriately with all genders and PwD
- PC15.** escalate any issues related to sexual harassment at workplace according to POSH Act

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

- PC16.** select financial institutions, products and services as per requirement
- PC17.** carry out offline and online financial transactions, safely and securely
- PC18.** identify common components of salary and compute income, expenses, taxes, investments etc
- PC19.** identify relevant rights and laws and use legal aids to fight against legal exploitation

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

- PC20.** operate digital devices and carry out basic internet operations securely and safely
- PC21.** use e- mail and social media platforms and virtual collaboration tools to work effectively
- PC22.** use basic features of word processor, spreadsheets, and presentations

Entrepreneurship

To be competent, the user/individual on the job must be able to:

- PC23.** identify different types of Entrepreneurship and Enterprises and assess opportunities for potential business through research
- PC24.** develop a business plan and a work model, considering the 4Ps of Marketing Product, Price, Place and Promotion
- PC25.** identify sources of funding, anticipate, and mitigate any financial/ legal hurdles for the potential business opportunity

Customer Service

To be competent, the user/individual on the job must be able to:

- PC26.** identify different types of customers
- PC27.** identify and respond to customer requests and needs in a professional manner.

Qualification Pack

PC28. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC29. create a professional Curriculum vitae (Résumé)

PC30. search for suitable jobs using reliable offline and online sources such as Employment exchange, recruitment agencies, newspapers etc. and job portals, respectively

PC31. apply to identified job openings using offline /online methods as per requirement

PC32. answer questions politely, with clarity and confidence, during recruitment and selection

PC33. identify apprenticeship opportunities and register for it as per guidelines and requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills and different learning and employability related portals

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use English language for effective verbal (face to face and telephonic) and written communication in formal and informal set up

KU6. importance of career development and setting long- and short-term goals

KU7. about effective communication

KU8. POSH Act

KU9. Gender sensitivity and inclusivity

KU10. different types of financial institutes, products, and services

KU11. how to compute income and expenditure

KU12. importance of maintaining safety and security in offline and online financial transactions

KU13. different legal rights and laws

KU14. different types of digital devices and the procedure to operate them safely and securely

KU15. how to create and operate an e- mail account and use applications such as word processors, spreadsheets etc.

KU16. how to identify business opportunities

KU17. types and needs of customers

KU18. how to apply for a job and prepare for an interview

KU19. apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. read and write different types of documents/instructions/correspondence

GS2. communicate effectively using appropriate language in formal and informal settings

Qualification Pack

- GS3.** behave politely and appropriately with all
- GS4.** how to work in a virtual mode
- GS5.** perform calculations efficiently
- GS6.** solve problems effectively
- GS7.** pay attention to details
- GS8.** manage time efficiently
- GS9.** maintain hygiene and sanitization to avoid infection

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Assessment System Overview:

- Batches assigned to the assessment agencies for conducting the assessment on SIDH or email
- Assessment agencies send the assessment confirmation to TP looping AB/AA to accept in SIDH
- Assessment agency deploys the ToA certified Assessor for executing the assessment
- AB monitors the assessment process & records

2. Testing Environment:

- Check the Assessment location, date and time
- If the batch size is more than 30, then there should be 2 Assessors.
- Check that the allotted time to the candidates to complete Theory & Practical Assessment is correct.

Qualification Pack

3. Assessment Quality Assurance levels/Framework:

- Question bank is created by the Subject Matter Experts (SME) are verified by the AB
- Questions are mapped to the specified assessment criteria.
- Assessor must be ToA certified & trainer must be ToT Certified

4. Types of evidence or evidence-gathering protocol:

- Time-stamped & geotagged reporting of the assessor from assessment location.
- Centre photographs with signboards and scheme specific branding
- Video Call verification/online proctoring will be done during the assessment from AB.

5. Method of verification or validation:

- Surprise visit to the assessment location

6. Minimum Percentage Required

- 70% overall to pass.
- Minimum 70% in each NOS

7. Reassessment: Candidates failing the assessment will be given one opportunity for reassessment after additional training.

8. Assessor Details: ToA Certified Assessor with relevant experience.

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Minimum Passing % at NOS Level: 70

(Please note: A Trainee must score the minimum percentage for each NOS separately as well as on the QP as a

Qualification Pack

whole.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
