CUTM/SGJ/Q0101: Paper Recycling Operator cum Technician

Brief Job Description

The Paper Recycling Operator cum Technician should be able to prepare the recycling operation, operate the paper recycling plant, maintain and repair the machine to produce quality products by practicing occupational health, safety and security as per the organizational standard.

Personal Attributes

A Paper Recycling Operator cum Technician should be environmentally conscious, physically fit, and detail-oriented. They must have good mechanical aptitude, the ability to follow safety protocols, and strong observational skills. Responsibility, teamwork, and commitment to quality are essential, along with a willingness to learn and adapt to evolving recycling technologies.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [CUTM/SGJ/N0101: Prepare for paper recycling operation based on Client requirement](#)
2. [CUTM/SGJ/N0102: Perform paper recycling operation](#)
3. [CUTM/SGJ/N0103: Inspect finished products quality, quantity, and package as per client requirement](#)
4. [CUTM/VSQ/N7801: Ensure organizational health, safety, and security](#)
5. [DGT/VSQ/N0102: Employability Skills \(60 Hours\)](#)

Qualification Pack

CUTM/SGJ/N0101: Prepare for paper recycling operation based on Client requirement

Description

This NOS covers the preparation process for paper recycling based on client requirements. It includes identifying suitable wastepaper, understanding recycling procedures, selecting appropriate chemicals and equipment, ensuring compliance with quality standards, and organizing raw materials efficiently to optimize recycling operations while maintaining environmental and safety regulations.

Scope

The scope covers the following :

- The scope of this NOS includes assessing client requirements, selecting appropriate wastepaper for recycling, preparing equipment and chemicals, and ensuring adherence to quality and environmental standards. It also involves organizing raw materials, maintaining records, and coordinating with team members to optimize efficiency in the paper recycling process.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** identify the sources for collecting papers.
- PC2.** obtain the papers from identified places/persons.
- PC3.** obtain the Work plan from authorized person.
- PC4.** identify the Information and data for the end product.
- PC5.** prepare the raw material as per the work plan.
- PC6.** check the availability of the raw materials: type of wastepaper, relevant chemicals, dyes, various natural fiber materials.
- PC7.** check the working of the tools, equipment and machinery.
- PC8.** use the Personal Protective Equipment (PPE) as per the safety guidelines.
- PC9.** receive the raw materials and remove non fiber materials non-fiber materials: paper clips, polythene and plastics, metals and other trash.
- PC10.** clean the wastepaper to get dust free papers for maintaining the quality.
- PC11.** sort the waste papers as per color, thickness and sizes.
- PC12.** weigh and label the sorted papers.
- PC13.** store the Sorted papers separately for further processing.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Different types of wastepaper, their classification, sources, and suitability for recycling based on client requirements.

Qualification Pack

- KU2.** The complete paper recycling process, including pulping, cleaning, deinking, refining, and sheet formation.
- KU3.** Key quality parameters for recycled paper, such as fiber strength, brightness, moisture content, and contaminant levels.
- KU4.** Various chemicals and additives used in paper recycling, including bleaching agents, defoamers, retention aids, and fillers.
- KU5.** Operation and maintenance of recycling machinery such as pulpers, screens, refiners, flotation cells, and deinking units.
- KU6.** Standard procedures for sorting, grading, and storing wastepaper to maintain quality and efficiency.
- KU7.** Environmental and safety regulations related to paper recycling, including waste management, emissions control, and water treatment.
- KU8.** Documentation and reporting requirements for tracking material usage, production output, and compliance with client specifications.
- KU9.** Understanding of cost-effective recycling techniques, resource optimization, and waste minimization strategies.
- KU10.** Effective communication and coordination with clients, suppliers, and team members to ensure recycling operations meet client expectations.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Read and interpret client specifications, standard operating procedures (SOPs), and quality guidelines related to paper recycling.
- GS2.** Communicate effectively with supervisors, team members, and suppliers to ensure proper material selection and recycling process execution.
- GS3.** Maintain accurate documentation of raw materials, process parameters, and quality checks for compliance and reporting.
- GS4.** Plan and organize recycling operations efficiently, ensuring optimal use of raw materials, machinery, and manpower.
- GS5.** Identify and analyze common issues in waste paper quality, contamination levels, and process inefficiencies, and take corrective actions.
- GS6.** Make informed decisions on material selection, machine settings, and chemical usage based on client requirements and quality standards.
- GS7.** Apply problem-solving skills to troubleshoot machinery malfunctions, process inconsistencies, and unexpected material variations.
- GS8.** Ensure customer-centric operations by aligning production processes with client expectations for recycled paper quality and delivery timelines.
- GS9.** Use critical thinking to evaluate recycling process efficiency and suggest improvements for cost-effectiveness and sustainability.
- GS10.** Work collaboratively with team members and other departments to maintain a smooth workflow and achieve production targets.

CUTM/SGJ/N0102: Perform paper recycling operation

Description

This NOS covers executing the paper recycling process, including pulping, cleaning, deinking, refining, and sheet formation. It involves operating and monitoring recycling machinery, maintaining process parameters, ensuring quality standards, minimizing waste, and following environmental and safety regulations to produce high-quality recycled paper as per client specifications.

Scope

The scope covers the following :

- The scope of this NOS includes carrying out the complete paper recycling process, operating and monitoring machinery, controlling process parameters, and ensuring efficient pulp recovery. It also involves maintaining quality standards, optimizing resource utilization, troubleshooting process issues, minimizing waste, and adhering to environmental, safety, and compliance regulations.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** check the working condition of various equipment of recycling plant.
- PC2.** identify the type and grade of paper to be recycled.
- PC3.** set-up the machine parameter as per the input paper type, quantity.
- PC4.** make changes in the process parameter of the equipment.
- PC5.** feed the wastepaper on the chopper machine to cut into small pieces. Vary the cutting parameter to get required size of cut pieces.
- PC6.** transfer cut pieces of paper into beater machine based on the capacity of the machine.
- PC7.** switch on the beater machine and run up to 8 hours to make it into a pulp.
- PC8.** move the pulp into storage tank for further processing.
- PC9.** transfer the required quantity to paper lifting VAT machine to get proper pulp sheet.
- PC10.** send the sheet to screw press machine to dry out 80% of water content in the pulp sheet.
- PC11.** store the sheet up to 20 hours for natural dry.
- PC12.** load the dried sheet to calendar machine with high pressure to get the required surface finish and thickness of the paper sheet.
- PC13.** cut the sheet to the required size using paper cut machine.
- PC14.** check the quality of the paper as per requirement.
- PC15.** count the required quantity and pack the paper bundle for various application.
- PC16.** dispatch the recycled paper to next stage for further process.
- PC17.** achieve the required productivity to meet the delivery time.
- PC18.** achieve the required quality by ensuring proper process steps followed each stage.
- PC19.** follow the safety standards to avoid any accidents, damage to the machine, product or personnel.
- PC20.** report problem to the concerned immediately for rectification.

Qualification Pack

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** The step-by-step process of paper recycling, including pulping, cleaning, deinking, refining, and sheet formation.
- KU2.** Different types of waste paper and their impact on the quality of the final recycled paper product.
- KU3.** Functions, working principles, and maintenance of recycling machinery such as pulpers, screens, refiners, washers, and deinking units.
- KU4.** The role of chemicals like bleaching agents, pH regulators, retention aids, and defoamers in the recycling process.
- KU5.** Quality control measures, including testing methods for fiber strength, brightness, moisture content, and contaminant levels in recycled paper.
- KU6.** Standard operating procedures (SOPs) for handling, sorting, and processing wastepaper efficiently.
- KU7.** Safety protocols, hazard identification, and emergency response procedures in a paper recycling plant.
- KU8.** Environmental regulations, waste management practices, and sustainability considerations in paper recycling operations.
- KU9.** Documentation and record-keeping requirements for tracking production, raw material usage, and process parameters.
- KU10.** Coordination with supervisors, quality control teams, and maintenance personnel to ensure smooth and efficient recycling operations.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Read and interpret work instructions, process parameters, and quality standards for paper recycling operations.
- GS2.** Communicate effectively with team members, supervisors, and maintenance staff to ensure smooth recycling operations.
- GS3.** Maintain accurate records of raw material usage, process parameters, and production output for reporting and compliance.
- GS4.** Plan and organize recycling tasks efficiently, ensuring optimal use of time, machinery, and resources.
- GS5.** Identify and troubleshoot process issues such as poor fiber recovery, excessive ink residues, or equipment malfunctions.
- GS6.** Make informed decisions on adjusting machine settings, chemical dosages, and process flow based on operational requirements.
- GS7.** Apply problem-solving skills to minimize waste, improve efficiency, and ensure consistent recycled paper quality.
- GS8.** Follow customer-centric practices by ensuring the recycled paper meets client specifications and delivery timelines.

Qualification Pack

- GS9.** Use analytical thinking to evaluate process efficiency and suggest improvements for better productivity and sustainability.
- GS10.** Work collaboratively with other departments, such as quality control and logistics, to ensure seamless production and dispatch.

CUTM/SGJ/N0103: Inspect finished products quality, quantity, and package as per client requirement

Description

This NOS covers inspecting the quality, quantity, and packaging of recycled paper products as per client requirements. It includes conducting quality checks, identifying defects, ensuring proper packaging, maintaining records, and coordinating with production and logistics teams to ensure that finished products meet specified standards before dispatch.

Scope

The scope covers the following :

- The scope of this NOS includes inspecting recycled paper products for quality, verifying quantity as per client requirements, and ensuring proper packaging. It involves conducting tests, identifying defects, maintaining inspection records, adhering to quality standards, and coordinating with production and logistics teams to ensure timely delivery of compliant products.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Check paper texture, color, surface finish, and etc. with the given approved product.
- PC2.** Segregate and reject the paper material that are not meeting the quality requirement and process, Recycle it again.
- PC3.** Write the observations of the process parameter, inspection parameter and maintain batch wise information.
- PC4.** Maintain records of each batch per the batch etc.
- PC5.** Report to Supervisor on the regular basis as per organizational requirement. Report the issues immediately in case of emergency.
- PC6.** Collect a sample of first and last output from each batch for future reference.
- PC7.** Get approval from the Supervisor to ship the material to next stage.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Quality parameters of recycled paper, including strength, thickness, brightness, moisture content, and surface finish.
- KU2.** Standard testing methods for inspecting recycled paper, such as tensile strength testing, GSM measurement, and moisture analysis.
- KU3.** Different types of packaging materials and techniques used to protect finished paper products during storage and transportation.
- KU4.** Client specifications for product quality, dimensions, and packaging standards based on end-use requirements.

Qualification Pack

- KU5.** Procedures for batch-wise inspection, sampling techniques, and documentation of quality control checks.
- KU6.** Compliance requirements for labeling, barcoding, and record-keeping to ensure traceability and quality assurance.
- KU7.** Coordination with production, quality control, and logistics teams to ensure timely inspection, packaging, and dispatch of finished products.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Read and interpret client specifications, quality standards, and packaging guidelines for recycled paper products.
- GS2.** Communicate effectively with supervisors, quality control teams, and packaging staff to ensure adherence to inspection requirements.
- GS3.** Maintain accurate documentation of inspection results, product counts, defects, and packaging records for compliance and reporting.
- GS4.** Plan and organize inspection and packaging tasks to ensure timely completion and efficient use of resources.
- GS5.** Identify and analyze defects in finished products, such as inconsistent texture, incorrect dimensions, or packaging issues, and take corrective action.
- GS6.** Make informed decisions on product acceptance, rework, or rejection based on inspection findings and client requirements.
- GS7.** Apply problem-solving skills to resolve issues related to quality deviations, packaging damage, or labeling errors.

CUTM/VSQ/N7801: Ensure organizational health, safety, and security

Description

This NOS focuses on maintaining workplace safety, health, and security by identifying hazards, following safety procedures, using personal protective equipment (PPE), and responding to emergencies. It ensures compliance with health and safety regulations, proper waste disposal, and adherence to security protocols to create a safe and productive work environment.

Scope

The scope covers the following :

- This NOS covers workplace hazard identification, adherence to safety regulations, proper use of personal protective equipment (PPE), emergency response, fire safety, first aid, and waste management. It also includes implementing security measures, ensuring workplace hygiene, and promoting a safety-conscious culture to prevent accidents and maintain a secure working environment.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** identify different kinds of possible hazards at the workplace hazards: environmental, personal, ergonomic and chemical.
- PC2.** recognize other possible security issues existing in the workplace.
- PC3.** plan safety techniques for self and others.
- PC4.** recognize different measures to curb the hazards.
- PC5.** implement programs for health, safety and security of the people at the workplace.
- PC6.** communicate the safety plans to everyone at the workplace.
- PC7.** attach disciplinary rules with the implementation at the workplace.
- PC8.** comply with regulatory health and safety guidelines applicable to the workplace.
- PC9.** use and maintain protective equipment as per requirement in a production house.
- PC10.** ensure organizational activities in line with approved guidelines and procedures.
- PC11.** undertake and advise healthy lifestyle for self and others.
- PC12.** follow environment management system related procedures.
- PC13.** ensure safe handling and disposal of waste and debris.
- PC14.** minimize health and safety risks to self and others due to own actions.
- PC15.** monitor the workplace and work processes for potential risks and threats to self and others.
- PC16.** carry out periodic check to keep work area free from hazards and obstructions.
- PC17.** ensure participation of self and others in mock drills/ evacuation procedures organized at the workplace.
- PC18.** organize first aid, firefighting and emergency training sessions for others.
- PC19.** instruct and guide others to take action in the event of fire, emergencies or accidents.

Qualification Pack

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** safety guidelines, workplace policies, and compliance with national and industry safety standards.
- KU2.** common hazards such as electrical risks, fire, chemical exposure, and physical injuries.
- KU3.** different types of PPE (gloves, helmets, safety shoes, goggles) and their correct usage.
- KU4.** the proper handling, operation, and maintenance of workplace tools to prevent accidents.
- KU5.** Awareness of first aid procedures, fire evacuation plans, and emergency contact protocols.
- KU6.** fire hazards, fire extinguisher types, and safe fire-handling procedures in case of an incident.
- KU7.** the importance of keeping the workplace clean, organized, and free of potential hazards.
- KU8.** proper lifting posture, use of lifting tools, and avoiding strain-related injuries.
- KU9.** workplace security protocols, restricted areas, and unauthorized access prevention.
- KU10.** safe disposal methods for hazardous and non-hazardous materials to ensure environmental compliance.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** report safety concerns, follow instructions, and communicate hazards to supervisors and colleagues.
- GS2.** Identify workplace safety issues and taking appropriate actions to prevent accidents.
- GS3.** Handle safety-related measurements like voltage limits, weight capacity, and fire extinguisher ratings.
- GS4.** Ensure timely completion of tasks while following safety protocols and risk management procedures.
- GS5.** Work effectively with colleagues to maintain a safe and secure work environment.
- GS6.** Identify risks such as electrical shocks, fire, slippery surfaces, and chemical exposure in a workplace.
- GS7.** Ensure the safe use of machines, hand tools, and electrical equipment to prevent accidents.
- GS8.** Follow safety protocols, emergency procedures, and workplace safety policies.
- GS9.** do basic first aid techniques, fire safety procedures, and responding to workplace accidents.
- GS10.** Ensure proper disposal of hazardous and non-hazardous waste in compliance with environmental standards.

DGT/VSQ/N0102: Employability Skills (60 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Career Development & Goal Setting
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

- PC1.** identify employability skills required for jobs in various industries
- PC2.** identify and explore learning and employability portals

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

- PC3.** recognize the significance of constitutional values, including civic rights and duties, citizenship, responsibility towards society etc. and personal values and ethics such as honesty, integrity, caring and respecting others, etc.
- PC4.** follow environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

- PC5.** recognize the significance of 21st Century Skills for employment
- PC6.** practice the 21st Century Skills such as Self-Awareness, Behaviour Skills, time management, critical and adaptive thinking, problem-solving, creative thinking, social and cultural awareness, emotional awareness, learning to learn for continuous learning etc. in personal and professional life

Basic English Skills

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC7.** use basic English for everyday conversation in different contexts, in person and over the telephone
- PC8.** read and understand routine information, notes, instructions, mails, letters etc. written in English
- PC9.** write short messages, notes, letters, e-mails etc. in English

Career Development & Goal Setting

To be competent, the user/individual on the job must be able to:

- PC10.** understand the difference between job and career
- PC11.** prepare a career development plan with short- and long-term goals, based on aptitude

Communication Skills

To be competent, the user/individual on the job must be able to:

- PC12.** follow verbal and non-verbal communication etiquette and active listening techniques in various settings
- PC13.** work collaboratively with others in a team

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

- PC14.** communicate and behave appropriately with all genders and PwD
- PC15.** escalate any issues related to sexual harassment at workplace according to POSH Act

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

- PC16.** select financial institutions, products and services as per requirement
- PC17.** carry out offline and online financial transactions, safely and securely
- PC18.** identify common components of salary and compute income, expenses, taxes, investments etc
- PC19.** identify relevant rights and laws and use legal aids to fight against legal exploitation

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

- PC20.** operate digital devices and carry out basic internet operations securely and safely
- PC21.** use e- mail and social media platforms and virtual collaboration tools to work effectively
- PC22.** use basic features of word processor, spreadsheets, and presentations

Entrepreneurship

To be competent, the user/individual on the job must be able to:

- PC23.** identify different types of Entrepreneurship and Enterprises and assess opportunities for potential business through research
- PC24.** develop a business plan and a work model, considering the 4Ps of Marketing Product, Price, Place and Promotion
- PC25.** identify sources of funding, anticipate, and mitigate any financial/ legal hurdles for the potential business opportunity

Customer Service

To be competent, the user/individual on the job must be able to:

- PC26.** identify different types of customers

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Assessment System Overview:

- Batches assigned to the assessment agencies for conducting the assessment on SIDH or email
- Assessment agencies send the assessment confirmation to TP looping CUTM
- Assessment agency deploys the ToA certified Assessor for executing the assessment
- AB monitors the assessment process & records

2. Testing Environment:

- Check the Assessment location, date and time
- If the batch size is more than 30, then there should be 2 Assessors.
- Check that the allotted time to the candidates to complete Theory & Practical Assessment is correct.

Qualification Pack

3. Assessment Quality Assurance levels/Framework:

- Question bank is created by the Subject Matter Experts (SME) are verified by the other SME
- Questions are mapped to the specified assessment criteria
- Assessor must be ToA certified & trainer must be ToT Certified

4. Types of evidence or evidence-gathering protocol:

- Time-stamped & geotagged reporting of the assessor from assessment location
- Centre photographs with signboards and scheme specific branding
- Video Call verification/online proctoring will be done during the assessment from AB.

5. Method of verification or validation:

- Surprise visit to the assessment location

6. Minimum Percentage Required

- 70% overall to pass.
- Minimum 70% in each NOS

7. Reassessment: Candidates failing the assessment will be given one opportunity for reassessment after additional training.

8. Assessor Details: ToA Certified Assessor with relevant experience

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
