CUTM/SGJ/Q0102: Paper Recycling Supervisor

Brief Job Description

The paper recycling Supervisor should be able to collect market information for business planning and decision making, set-up paper recycling plant, operate the plant, manage the team, finance and administrative activities along with marketing, making quality products ensuring organizational health, safety and security.

Personal Attributes

A Paper Recycling Supervisor should be organized, responsible, and environmentally conscious. They must possess leadership qualities, technical knowledge of recycling processes, and the ability to manage teams and workflows. Attention to detail, safety awareness, problem-solving skills, and effective communication are essential for maintaining productivity and quality in recycling operations.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [CUTM/SGJ/N0104: Ensure setting up of paper recycling plant](#)
2. [CUTM/SGJ/N0105: Overseeing of paper recycling operation, monitoring & troubleshoot](#)
3. [CUTM/SGJ/N0106: Plan activities for increasing sales of recycled paper products](#)
4. [CUTM/SGJ/N0107: Ensure collection of market information for smooth supply chain](#)
5. [CUTM/VSQ/N7801: Ensure organizational health, safety, and security](#)
6. [DGT/VSQ/N0102: Employability Skills \(60 Hours\)](#)

CUTM/SGJ/N0104: Ensure setting up of paper recycling plant

Description

This NOS focuses on business planning, resource assessment, legal compliance and operational groundwork. It covers market research, estimation of plant requirements, identifying funding schemes, preparing project proposals, selecting equipment, and fulfilling environmental and safety regulations to establish a functional paper recycling unit efficiently.

Scope

The scope covers the following :

- The scope of the NOS includes identifying market needs, collecting business data, selecting appropriate technology, estimating costs, securing finances, and complying with legal and environmental guidelines to establish a functional, safe, and efficient recycling plant for sustainable paper production.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** gather market information for collection of various waste paper resources like direct or indirect
- PC2.** collect various types of high demanded, recycled paper products available in the market
- PC3.**
 - collect information for estimating market demand for products at various levels, Levels: Local, regional, national,
 - and international
- PC4.**
 - select type of recycled product by obtaining information on costs of various resources required for setting up of plant
 - resources: land, building, paper waster, power, water, skilled manpower & operational cost, etc.
- PC5.** Plan, prepare project proposal with financials on capital investment, operational expenses and profit
- PC6.** evaluate various options for raising capital options: personal, loans, micro financing, SME finance, crowd funding, etc
- PC7.** analyze and choose appropriate scheme from the list provided by the government for entrepreneurial development in paper recycling project
- PC8.** identify appropriate legal ownership structure suitable to the nature of the business activity and convenience of operations
- PC9.** identify various legal, health and safety regulations and guidelines applicable
- PC10.** select and register a business name for organization by checking availability and duplicity of name
- PC11.** design an appropriate trademark or logo for the organization with aesthetic features features: appropriate, unique, portray business activities, attractive, simple, etc.
- PC12.** identify different locations for paper waste collection like recycler and paper merchants
- PC13.** collect and pack the paper waste together for easy transportation
- PC14.** sort out the recovered waste paper by its grade, surface treatment and structure

Qualification Pack

PC15. prepare them for recycling once the required quantity of paper waste is ready

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** how to collect and analyze market data to estimate demand for recycled paper products at local, regional, and national levels.
- KU2.** how to assess costs and availability of essential resources like land, water, power, skilled manpower, and raw materials for establishing a recycling unit.
- KU3.** applicable legal structures, health and safety standards, business registration processes, and government schemes that support recycling entrepreneurship.
- KU4.** how to draft a business plan including capital investment, operational expenses, and potential profitability.
- KU5.** about various financial support options such as loans, microfinancing, and crowdfunding for setting up the recycling plant.
- KU6.** suitable locations for the plant based on logistics, accessibility, and availability of waste paper. Know how to organize physical setup and infrastructure.
- KU7.** the operation and maintenance of recycling equipment like shredders, beater machines, and pulp processors used during setup and production.
- KU8.** techniques to identify, sort, and prepare different grades of paper waste for recycling operations.
- KU9.** the importance of designing a business name, logo, and trademark that reflect the nature and uniqueness of the recycling business.
- KU10.** the strategies for sourcing waste paper from recyclers, merchants, and community partnerships, ensuring efficient transportation and storage.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** gather market intelligence on waste paper sources, recycled product demand, and customer preferences at local, regional, and national levels.
- GS2.** prepare detailed business proposals including capital investment, operational costs, profitability forecasts, and financial sourcing (e.g., loans, government schemes).
- GS3.** be proficient in understanding of legal structures, licensing, safety regulations, and organizational registration requirements for establishing a recycling unit.
- GS4.** be competent in evaluating land, water, power, manpower, and equipment needs for setting up the plant and choosing suitable locations.
- GS5.** be best in organizing and managing collection, segregation, packing, and transportation of different grades of waste paper efficiently.
- GS6.** operate recycling processes such as pulping, de-inking, sheet formation, drying, and finishing especially for planning plant layout and equipment flow.
- GS7.** identify machinery suppliers, negotiate purchases, and coordinate installation, setup, and team training for operations.

Qualification Pack

- GS8.** build and train a team for operating machinery, maintaining safety standards, and following efficient workflow protocols.

CUTM/SGJ/N0105: Overseeing of paper recycling operation, monitoring & troubleshoot

Description

This NOS involves managing and supervising the recycling process, monitoring plant operations, and ensuring timely maintenance. It includes setting up plant infrastructure, training staff, checking equipment functionality, handling breakdowns, maintaining safety, and ensuring smooth operation of all machinery to produce quality recycled paper products. This NOS also covers documentation, preventive maintenance schedules, and rapid troubleshooting to avoid major disruptions in operations.

Scope

The scope covers the following :

- The scope of the NOS includes managing daily operations of the recycling plant. This covers setting up equipment, supervising processing stages, ensuring quality output, maintaining machinery, and troubleshooting technical issues to avoid disruptions and maintain optimal efficiency.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Estimate the plant capacity requirement based on the market potential, paper waste collection capacity and budget of the projects
- PC2.** Identify the land and building location to set-up recycling plant based on the capacity
- PC3.** Identify the recycling plant equipment supplier and negotiate the pricing
- PC4.** Issue purchase order for the plant equipment, set-up, installation and training
- PC5.** Identify the facilities required for plant set up Facilities: power, water and floor type
- PC6.** Prepare all the required infra before plant commissioning
- PC7.** Prepare floor map for proper location of each equipment based on size and working area required
- PC8.**
 - Arrange necessary power supply to each equipment
 -
- PC9.** Assist the plant installation team as per their requirement
- PC10.** Check the working condition of each equipment
- PC11.** Train the team on operation and maintenance of the plant
- PC12.** Check the quality of the product from the installed plant
- PC13.**
 - Complete all documentation work for the plant
 -
- PC14.** plan regular preventive and predictive maintenance schedule as per equipment supplier recommendation
- PC15.** train the team to do breakdown, preventive and predictive maintenance
- PC16.** follow of the complete of regular maintenance as per schedule
- PC17.** complete repair work as soon as issue faced to avoid major breakdown

Qualification Pack

PC18. Secure all important documents related to maintenance

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** how to estimate plant capacity based on market potential, available paper waste, and budgetary considerations.
- KU2.** how to assess and select appropriate land and building layouts, infrastructure (like water, power), and floor plans for optimal equipment placement.
- KU3.** Acquire knowledge of identifying vendors, negotiating contracts, issuing purchase orders, and supporting equipment installation and testing processes.
- KU4.** the working principles, preventive and predictive maintenance, and repair protocols for key machines like shredders, pulpers, de-inking systems, VAT machines, and cutters.
- KU5.** how to assess the final paper output quality and ensure it meets required specifications, including thickness, texture, and finish.
- KU6.** be familiar with training modules for staff on equipment usage, maintenance, safety procedures, and emergency preparedness.
- KU7.** methods for tracking equipment performance, scheduling maintenance, documenting issues, and ensuring traceability.
- KU8.** be adept at identifying and resolving machine issues quickly to avoid downtime and maintain operational efficiency.
- KU9.** relevant safety, health, and environmental regulations and best practices applicable to paper recycling plants.
- KU10.** how to optimize the use of water, energy, and raw materials during operations, aligning with sustainability goals.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** be skilled in estimating plant capacity, selecting location, identifying suppliers, and supporting installation and commissioning of equipment.
- GS2.** be proficient in operating and maintaining recycling machines such as shredders, beaters, pulpers, and paper cutters. Understands preventive and predictive maintenance schedules.
- GS3.** regularly inspect equipment, ensure operational functionality, identify breakdowns, and execute timely repair to avoid downtime.
- GS4.** train team members on safe operation, troubleshooting, and maintenance procedures. Ensures team productivity and adherence to quality standards.
- GS5.** implement safety protocols, inspects for hazards, ensures the use of PPE, and aligns operations with environmental and workplace regulations.
- GS6.** plan for essential plant resources like water, power, and space, prepares floor layouts and ensures optimized infrastructure for smooth workflow.
- GS7.** maintain consistency in product output by monitoring process parameters and adjusting equipment to achieve desired quality standards.

Qualification Pack

- GS8.** effective allocation of manpower and schedules activities to maximize operational efficiency and meet delivery timelines.

CUTM/SGJ/N0106: Plan activities for increasing sales of recycled paper products

Description

This NOS focuses on enhancing product quality, packaging, marketing, and customer engagement. It emphasizes analyzing market trends, identifying prospective clients, taking feedback, pricing competitively, and adopting promotion strategies to boost sales and customer satisfaction.

Scope

The scope covers the following :

- The scope includes developing efficient production processes, maintaining product quality, setting competitive pricing, conducting market research, gathering client feedback, implementing promotional strategies, and ensuring timely distribution to increase sales and customer satisfaction.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** check the working condition of various equipment of recycling plant
- PC2.** identify the type and grade of paper to be recycled
- PC3.** set-up the machine parameter as per the input paper type, quantity
- PC4.** make changes in the process parameter of the equipment
- PC5.** feed the waste paper on the chopper machine to cut into small pieces. Vary the cutting parameter to get required size of cut pieces
- PC6.** transfer cut pieces of paper into beater machine based on the capacity of the machine
- PC7.** switch on the beater machine and run up to 8 hours to make it into a pulp
- PC8.** move the pulp into storage tank for further processing
- PC9.** transfer the required quantity to paper lifting VAT machine to get proper pulp sheet
- PC10.** send the sheet to screw press machine to dry out 80% of water content in the pulp sheet
- PC11.** store the sheet up to 20 hours for natural dry
- PC12.** load the dried sheet to calendar machine with high pressure to get the required surface finish and thickness of the paper sheet
- PC13.** cut the sheet to the required size using paper cut machine
- PC14.** check the quality of the paper as per requirement
- PC15.** count the required quantity and pack the paper bundle for various application
- PC16.** dispatch the recycled paper to next stage for further process
- PC17.** achieve the required productivity to meet the delivery time
- PC18.** achieve the required quality by ensuring proper process steps followed each stage
- PC19.** follow the safety standards to avoid any accidents, damage to the machine, product or personnel
- PC20.** report problem to the concerned immediately for rectification

Qualification Pack

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** the full paper recycling workflow from waste paper collection and shredding, to pulping, drying, finishing, and packaging of the final product
- KU2.** working knowledge of equipment such as chopper machines, beaters, paper lifting VATs, screw presses, calendar machines, and paper cutters used throughout the production line
- KU3.** how to achieve desired productivity targets and maintain the quality of paper sheets through adherence to proper procedures and timely troubleshooting
- KU4.** how to prepare recycled paper products for market by ensuring their quality, quantity, and professional packaging to meet customer expectations and market standards
- KU5.** aware of paper quality benchmarks such as thickness, strength, surface finish, odor control, and moisture content as part of ensuring customer satisfaction
- KU6.** to research current market pricing, seasonal demand patterns, and pricing strategies to stay competitive and relevant in the recycled paper market
- KU7.** consumer preferences, motivations, and buying habits to effectively tailor marketing and sales strategies
- KU8.** how to collect and act on client feedback regarding product quality, delivery timelines, and responsiveness to enhance customer relationships
- KU9.** develop familiarity with customer relationship management systems (CRM), cold calling techniques, email outreach strategies, and customer data tracking
- KU10.** acquire skills to analyze sales metrics, KPIs, and market response in order to continuously optimize sales performance and strategic decisions

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** monitor and adjust machinery parameters (e.g., chopper, beater, VAT machines) to ensure the production of quality recycled paper sheets.
- GS2.** be skilled in organizing the recycling stages (cutting, pulping, pressing, drying, calendaring, cutting, packing) to meet both productivity and delivery timelines.
- GS3.** ensure product consistency by implementing quality checks on thickness, surface finish, and strength of recycled paper as per customer requirements.
- GS4.** create and implement market-aligned sales strategies, including pricing, seasonal offers, and client targeting to boost revenue.
- GS5.** be proficient in identifying customer needs, collecting feedback on product quality and service, and tailoring sales efforts accordingly.
- GS6.** understand and apply different promotional techniques like product demonstrations, advertising (print, social media, brochures), and branding to attract new clients.
- GS7.** Plan effective distribution routes and ensure timely delivery of finished paper products using proper logistics channels.
- GS8.** Work with team members to achieve collective sales targets, conduct reviews, and align operations with market demand and production capabilities.

CUTM/SGJ/N0107: Ensure collection of market information for smooth supply chain

Description

This NOS focuses on identifying customer needs, analyzing market trends, evaluating machinery performance, and aligning recycling operations accordingly. It involves practical knowledge in sorting, pulping, quality control, packaging, and adhering to environmental and market regulations to optimize supply chain efficiency.

Scope

The scope covers the following :

- The scope of the NOS includes gathering and analyzing data on market trends, customer preferences, and demand for recycled paper products. This helps in optimizing production, ensuring timely distribution, and aligning recycling operations with market needs.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** identify prospective customers and their requirements w.r.t the recycled paper products
- PC2.** observe latest market trends and patterns relevant to own line of business and consider the same while deciding on desired product quality
- PC3.** ensure zero defect products by quality checking different parameters
- PC4.** take feedback from clients on quality of product, responsiveness and timeliness
- PC5.** ensure client feedback for improvement is discussed and actioned
- PC6.** conduct market research on pricing of various recycled paper products
- PC7.** estimate the cost or expenses to fix the price products like cost of raw materials, taxes, rent, salaries, power and water consumptions, logistic costs, etc.
- PC8.** pack recycled paper products professionally and attractively using packing materials
- PC9.**
 - advertise recycled paper products on various media for promotion, local radio, I print publications, internet,
 - hoardings, posters, pamphlets, brochures, signage, product placements
- PC10.** distribute the products to different places for sale using proper logistics channels
- PC11.** Insist important and benefits of paper recycling
- PC12.** Offer discounts during special seasons like, Diwali, new year, other festival for bulk purchasing

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** how to identify prospective customers and their requirements related to recycled paper products.

Qualification Pack

- KU2.** knowledge of analyzing ongoing market trends, customer demand, and product quality expectations to stay aligned with market needs.
- KU3.** how to collect and interpret client feedback regarding product quality, responsiveness, and service timeliness for continuous improvement.
- KU4.** how to conduct market research on pricing of recycled paper products and estimate costs including raw materials, taxes, labor, logistics, etc.
- KU5.** familiarity with advertising strategies using various media like local radio, print, internet, hoardings, brochures, and product placements.
- KU6.** proper techniques for packaging recycled products professionally and attractively using suitable materials.
- KU7.** distribution mechanisms and how to use effective logistics channels for smooth delivery and market reach.
- KU8.** advocate the importance and benefits of paper recycling to the public and stakeholders, promoting eco-friendly behavior.
- KU9.** how to plan and execute discount offers during peak seasons (e.g., festivals) to boost bulk sales.
- KU10.** awareness of local and national regulations related to waste management, product packaging, environmental standards, and customer rights.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** observe and analyze market trends and consumer demand to align production and sales strategies accordingly
- GS2.** identify & Interact client
- GS3.** ensure production of zero-defect products by understanding and checking multiple quality parameters like thickness, strength, and appearance.
- GS4.** estimate production costs including raw materials, labor, rent, utilities, and logistics to set competitive pricing strategies.
- GS5.** professionally pack finished products and plan effective logistics for their distribution to different market locations.
- GS6.** organize promotional campaigns such as festive or bulk purchase discounts to enhance market reach and sales volumes.
- GS7.** analyze composition of the waste paper stream to improve sorting, pulping, and recycling efficiency.

CUTM/VSQ/N7801: Ensure organizational health, safety, and security

Description

This NOS focuses on maintaining workplace safety, health, and security by identifying hazards, following safety procedures, using personal protective equipment (PPE), and responding to emergencies. It ensures compliance with health and safety regulations, proper waste disposal, and adherence to security protocols to create a safe and productive work environment.

Scope

The scope covers the following :

- This NOS covers workplace hazard identification, adherence to safety regulations, proper use of personal protective equipment (PPE), emergency response, fire safety, first aid, and waste management. It also includes implementing security measures, ensuring workplace hygiene, and promoting a safety-conscious culture to prevent accidents and maintain a secure working environment.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** identify different kinds of possible hazards at the workplace hazards: environmental, personal, ergonomic and chemical.
- PC2.** recognize other possible security issues existing in the workplace.
- PC3.** plan safety techniques for self and others.
- PC4.** recognize different measures to curb the hazards.
- PC5.** implement programs for health, safety and security of the people at the workplace.
- PC6.** communicate the safety plans to everyone at the workplace.
- PC7.** attach disciplinary rules with the implementation at the workplace.
- PC8.** comply with regulatory health and safety guidelines applicable to the workplace.
- PC9.** use and maintain protective equipment as per requirement in a production house.
- PC10.** ensure organizational activities in line with approved guidelines and procedures.
- PC11.** undertake and advise healthy lifestyle for self and others.
- PC12.** follow environment management system related procedures.
- PC13.** ensure safe handling and disposal of waste and debris.
- PC14.** minimize health and safety risks to self and others due to own actions.
- PC15.** monitor the workplace and work processes for potential risks and threats to self and others.
- PC16.** carry out periodic check to keep work area free from hazards and obstructions.
- PC17.** ensure participation of self and others in mock drills/ evacuation procedures organized at the workplace.
- PC18.** organize first aid, firefighting and emergency training sessions for others.
- PC19.** instruct and guide others to take action in the event of fire, emergencies or accidents.

Qualification Pack

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** safety guidelines, workplace policies, and compliance with national and industry safety standards.
- KU2.** common hazards such as electrical risks, fire, chemical exposure, and physical injuries.
- KU3.** different types of PPE (gloves, helmets, safety shoes, goggles) and their correct usage.
- KU4.** the proper handling, operation, and maintenance of workplace tools to prevent accidents.
- KU5.** Awareness of first aid procedures, fire evacuation plans, and emergency contact protocols.
- KU6.** fire hazards, fire extinguisher types, and safe fire-handling procedures in case of an incident.
- KU7.** the importance of keeping the workplace clean, organized, and free of potential hazards.
- KU8.** proper lifting posture, use of lifting tools, and avoiding strain-related injuries.
- KU9.** workplace security protocols, restricted areas, and unauthorized access prevention.
- KU10.** safe disposal methods for hazardous and non-hazardous materials to ensure environmental compliance.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** report safety concerns, follow instructions, and communicate hazards to supervisors and colleagues.
- GS2.** Identify workplace safety issues and taking appropriate actions to prevent accidents.
- GS3.** Handle safety-related measurements like voltage limits, weight capacity, and fire extinguisher ratings.
- GS4.** Ensure timely completion of tasks while following safety protocols and risk management procedures.
- GS5.** Work effectively with colleagues to maintain a safe and secure work environment.
- GS6.** Identify risks such as electrical shocks, fire, slippery surfaces, and chemical exposure in a workplace.
- GS7.** Ensure the safe use of machines, hand tools, and electrical equipment to prevent accidents.
- GS8.** Follow safety protocols, emergency procedures, and workplace safety policies.
- GS9.** do basic first aid techniques, fire safety procedures, and responding to workplace accidents.
- GS10.** Ensure proper disposal of hazardous and non-hazardous waste in compliance with environmental standards.

DGT/VSQ/N0102: Employability Skills (60 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Career Development & Goal Setting
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

- PC1.** identify employability skills required for jobs in various industries
- PC2.** identify and explore learning and employability portals

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

- PC3.** recognize the significance of constitutional values, including civic rights and duties, citizenship, responsibility towards society etc. and personal values and ethics such as honesty, integrity, caring and respecting others, etc.
- PC4.** follow environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

- PC5.** recognize the significance of 21st Century Skills for employment
- PC6.** practice the 21st Century Skills such as Self-Awareness, Behaviour Skills, time management, critical and adaptive thinking, problem-solving, creative thinking, social and cultural awareness, emotional awareness, learning to learn for continuous learning etc. in personal and professional life

Basic English Skills

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC7.** use basic English for everyday conversation in different contexts, in person and over the telephone
- PC8.** read and understand routine information, notes, instructions, mails, letters etc. written in English
- PC9.** write short messages, notes, letters, e-mails etc. in English

Career Development & Goal Setting

To be competent, the user/individual on the job must be able to:

- PC10.** understand the difference between job and career
- PC11.** prepare a career development plan with short- and long-term goals, based on aptitude

Communication Skills

To be competent, the user/individual on the job must be able to:

- PC12.** follow verbal and non-verbal communication etiquette and active listening techniques in various settings
- PC13.** work collaboratively with others in a team

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

- PC14.** communicate and behave appropriately with all genders and PwD
- PC15.** escalate any issues related to sexual harassment at workplace according to POSH Act

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

- PC16.** select financial institutions, products and services as per requirement
- PC17.** carry out offline and online financial transactions, safely and securely
- PC18.** identify common components of salary and compute income, expenses, taxes, investments etc
- PC19.** identify relevant rights and laws and use legal aids to fight against legal exploitation

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

- PC20.** operate digital devices and carry out basic internet operations securely and safely
- PC21.** use e- mail and social media platforms and virtual collaboration tools to work effectively
- PC22.** use basic features of word processor, spreadsheets, and presentations

Entrepreneurship

To be competent, the user/individual on the job must be able to:

- PC23.** identify different types of Entrepreneurship and Enterprises and assess opportunities for potential business through research
- PC24.** develop a business plan and a work model, considering the 4Ps of Marketing Product, Price, Place and Promotion
- PC25.** identify sources of funding, anticipate, and mitigate any financial/ legal hurdles for the potential business opportunity

Customer Service

To be competent, the user/individual on the job must be able to:

- PC26.** identify different types of customers
- PC27.** identify and respond to customer requests and needs in a professional manner.

Qualification Pack

PC28. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC29. create a professional Curriculum vitae (Résumé)

PC30. search for suitable jobs using reliable offline and online sources such as Employment exchange, recruitment agencies, newspapers etc. and job portals, respectively

PC31. apply to identified job openings using offline /online methods as per requirement

PC32. answer questions politely, with clarity and confidence, during recruitment and selection

PC33. identify apprenticeship opportunities and register for it as per guidelines and requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills and different learning and employability related portals

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use English language for effective verbal (face to face and telephonic) and written communication in formal and informal set up

KU6. importance of career development and setting long- and short-term goals

KU7. about effective communication

KU8. POSH Act

KU9. Gender sensitivity and inclusivity

KU10. different types of financial institutes, products, and services

KU11. how to compute income and expenditure

KU12. importance of maintaining safety and security in offline and online financial transactions

KU13. different legal rights and laws

KU14. different types of digital devices and the procedure to operate them safely and securely

KU15. how to create and operate an e- mail account and use applications such as word processors, spreadsheets etc.

KU16. how to identify business opportunities

KU17. types and needs of customers

KU18. how to apply for a job and prepare for an interview

KU19. apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. read and write different types of documents/instructions/correspondence

GS2. communicate effectively using appropriate language in formal and informal settings

Qualification Pack

- GS3.** behave politely and appropriately with all
- GS4.** how to work in a virtual mode
- GS5.** perform calculations efficiently
- GS6.** solve problems effectively
- GS7.** pay attention to details
- GS8.** manage time efficiently
- GS9.** maintain hygiene and sanitization to avoid infection

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Assessment System Overview:

- Batches assigned to the assessment agencies for conducting the assessment on SIDH or email
- Assessment agencies send the assessment confirmation to TP looping AB
- Assessment agency deploys the ToA certified Assessor for executing the assessment
- AB monitors the assessment process & records

2. Testing Environment:

- Check the Assessment location, date and time
- If the batch size is more than 30, then there should be 2 Assessors.
- Check that the allotted time to the candidates to complete Theory & Practical Assessment is correct.

Qualification Pack

3. Assessment Quality Assurance levels/Framework:

- Question bank is created by the Subject Matter Experts (SME) are verified by the AB.
- Questions are mapped to the specified assessment criteria
- Assessor must be ToA certified & trainer must be ToT Certified

4. Types of evidence or evidence-gathering protocol:

- Time-stamped & geotagged reporting of the assessor from assessment location
- Centre photographs with signboards and scheme specific branding
- Video call verification/online proctoring will be done during assessment by AA.

5. Method of verification or validation:

- Surprise visit to the assessment location by AB

6. Minimum Percentage Required

- 70% overall to pass.
- Minimum 70% in each NOS

7. Reassessment: Candidates failing the assessment will be given one opportunity for reassessment after additional training.

8. Assessor Details: ToA Certified Assessor with relevant experience

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Qualification Pack

Minimum Passing % at NOS Level: 70

(Please note: A Trainee must score the minimum percentage for each NOS separately as well as on the QP as a whole.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
