DWC/Q0111: Pest Control Technician (Household & Small Establishment)

Brief Job Description

A Pest Control Technician plays a pivotal role in managing pest-related issues for households and small establishments. This operational position involves implementing pest control measures and maintaining a pest-free environment. The technician is responsible for assessing, identifying, and addressing pest infestations through various methods and treatments.

Personal Attributes

This job requires the individual to take full responsibility of the domestic and commercial pest control services. The individual should be attentive to details, and have a methodical approach. The individual should also have problem solving attitude with basic communication skills, and good personal hygiene along with physically fitness and able to work in a variety of environment.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [DWC/N0127: Post treatment activity and after sales service](#)
2. [DWC/N0126: Conduct pest control activity as per treatment plan](#)
3. [DWC/N0125: Develop customised treatment plan based on identified pests](#)
4. [DWC/N0124: Conduct inspection of the infested area](#)
5. [DWC/N9902: Maintain service standards and communicate effectively](#)
6. [DGT/VSQ/N0101: Employability Skills \(30 Hours\)](#)
7. [DWC/N9903: Maintain health, hygiene and safety standards](#)

DWC/N0127: Post treatment activity and after sales service

Description

This unit is about conducting post treatment activities and providing after sales service to the clients.

Scope

The scope covers the following :

- Conduct post treatment inspection
- Provide advice and recommendations on preventive measures
- Maintain detailed records of inspections, treatments, and follow-up activities
- Collect payment

Elements and Performance Criteria

Conduct post treatment inspection

To be competent, the user/individual on the job must be able to:

- PC1.** conduct a thorough inspection of the treated area within the designated timeframe after treatment
- PC2.** utilise appropriate tools and techniques to ensure a comprehensive evaluation of the treated environment
- PC3.** assess the effectiveness of the treatment based on the observed reduction in pest activity and client feedback

Provide advice and recommendations on preventive measures

To be competent, the user/individual on the job must be able to:

- PC4.** offer detailed advice to clients on potential pest attractants and recommend effective preventive measures
- PC5.** recommend practical and sustainable preventive measures based on the identified pest type and property type (e.g., sealing cracks, storing food properly, eliminating clutter)
- PC6.** assess the presence of structural damage or deficiencies contributing to pest access or harbourage (e.g., leaky pipes, gaps in walls, damaged flooring)
- PC7.** recommend necessary repairs or modifications to address structural weaknesses and prevent future pest entry
- PC8.** provide clients with basic information about common pests and their identification signs (e.g., appearance, behaviour, damage caused)

Maintain detailed records of inspections, treatments, and follow-up activities

To be competent, the user/individual on the job must be able to:

- PC9.** accurately document all findings and observations during inspections, treatments, and follow-up activities
- PC10.** maintain detailed records of applied treatments, including dates, methods, pesticides used, and specific locations of application
- PC11.** use a standardised format for records to ensure consistency, clarity, and easy retrieval of information

Qualification Pack

PC12. archive records securely for future reference, legal compliance, and potential warranty claims

Collect payment

To be competent, the user/individual on the job must be able to:

PC13. issue receipts or invoices promptly and professionally, detailing services rendered and total costs incurred

PC14. offer various payment options (cash, card, UPI) to cater to client preferences, as per organisational SOP

PC15. follow organisational SOP for recording and depositing collected payments

PC16. seek feedback from clients on the effectiveness of the pest control treatment and overall satisfaction with the service

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. pest biology and identification

KU2. different pest stages (eggs, larvae, pupae, adults)

KU3. importance of conducting post-treatment inspections

KU4. various indicators of pest survival after treatment

KU5. common attractants for various pest types

KU6. different pest life stages and their varying susceptibility to control methods

KU7. limitations and benefits of various inspection tools (flashlights, mirrors, probes)

KU8. use of visual scanning, tracking, and monitoring devices

KU9. organisation SOP for inspection, treatment, monitoring and payment collection

KU10. SOP for post-treatment activities and after-sales service

KU11. standardised record-keeping formats, warranty claims and different payment options

KU12. invoices and receipts

KU13. importance of client satisfaction

KU14. regulations and legal requirements governing pest control practices

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. communicate effectively with clients during post-treatment activities, addressing concerns and explaining inspection findings

GS2. adjust communication styles when interacting with clients to cater to their individual preferences

GS3. read and understand work orders, health and safety instructions, reports, invoice, etc.

GS4. communicate with supervisor and fellow technicians

GS5. ensure efficient time management and optimum resource utilisation

GS6. work systematically with attention to detail

Qualification Pack

- GS7.** maintain proper records as per given format
- GS8.** organise and analyse information relevant to work
- GS9.** uphold ethical standards in pesticide application, ensuring transparency, honesty, and integrity in all interactions
- GS10.** prioritise client satisfaction by exceeding expectations

DWC/N0126: Conduct pest control activity as per treatment plan

Description

This unit involves carrying out pest control activities as per the customised treatment plan, while adhering to all the relevant safety protocols.

Scope

The scope covers the following :

- Prepare the area for pesticide application
- Apply selected pesticides using specialised equipment
- Adhere to safety precautions

Elements and Performance Criteria

Prepare the Area for Pesticide Application

To be competent, the user/individual on the job must be able to:

- PC1.** assess the need for temporary removal of obstacles to access pest harbourages and ensure thorough treatment
- PC2.** safely and carefully disassemble and relocate furniture, fittings, or false ceiling panels, minimising damage and ensuring their safe reinstallation
- PC3.** clearly communicate the need for relocation to the client and obtain their consent before proceeding
- PC4.** reinstall furniture, fittings, and false ceiling panels properly and securely, minimising disruption to the client's environment
- PC5.** ensure proper removal or protection of food items, utensils, and personal belongings from the treatment area
- PC6.** secure the treatment area and restrict access to unauthorised personnel and pets during application and for the designated re-entry period

Apply selected pesticides using specialised equipment

To be competent, the user/individual on the job must be able to:

- PC7.** select and assemble appropriate equipment based on the chosen treatment method (e.g., sprayers, bait stations, fumigation equipment, traps)
- PC8.** calibrate and adjust equipment settings as needed to deliver the correct dosage and application pattern
- PC9.** follow the prescribed application method for each pesticide in the treatment plan, considering factors like target pest, property type, and environmental conditions
- PC10.** mix chemical/botanical pesticides accurately, adhering to specified ratios and dilution instructions to avoid under- or over-application
- PC11.** select the appropriate application technique (spraying, baiting, fumigation, trapping) based on the chosen pesticide, target pest, and property type
- PC12.** apply pesticides precisely and evenly, focusing on identified harbourages, entry points, and areas of pest activity

Qualification Pack

- PC13.** ensure proper placement and deployment of bait stations, traps, or fumigation equipment
- PC14.** seal and secure areas as necessary for fumigation, following safety protocols and ensuring proper ventilation after treatment
- PC15.** monitor the application process and adjust techniques as needed to address unexpected challenges or ensure effectiveness
- PC16.** inspect the treated area, observing for signs of decreased pest activity, dead pests, or altered pest behaviour
- PC17.** use monitoring tools like bait station checks, trap counts, or visual inspections to quantify pest reduction
- PC18.** maintain equipment properly after use, following cleaning and decontamination procedures

Adhere to safety precautions

To be competent, the user/individual on the job must be able to:

- PC19.** strictly follow safety protocols, including the use of personal protective equipment (PPE) during pesticide application
- PC20.** follow label instructions for mixing, handling, and applying pesticides, adhering to safety warnings and precautions
- PC21.** manage potential hazards, such as spills, leaks, and allergic reactions, knowing emergency procedures and first-aid measures
- PC22.** dispose of empty pesticide containers and used PPE safely, following local regulations/organisational SOP

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** General Pest Management Service (GMPS)
- KU2.** different types of pesticides, their modes of action, and target pests
- KU3.** biology, behaviour, and life cycles of common pests targeted by pesticides
- KU4.** mixing ratios of pesticides, application rates, safety warnings, and re-entry intervals
- KU5.** potential risks and hazards associated with different pesticides
- KU6.** factors influencing pesticide effectiveness, such as pest resistance, environmental conditions, and application techniques
- KU7.** various application methods, including spraying, baiting, fumigation, and localised treatments
- KU8.** functionality and safe operation of various pest control equipment
- KU9.** potential equipment malfunctions and troubleshooting techniques
- KU10.** potential pest harbourages within different types of property structures (e.g., walls, ceilings, furniture)
- KU11.** role of non-chemical pest control methods like exclusion, sanitation, and habitat modification
- KU12.** cultural and regional factors influencing pest control practices and pesticide preferences
- KU13.** emergency response procedures in the event of spills, exposure incidents, or adverse reactions
- KU14.** basic first-aid procedures

Qualification Pack

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read manuals, work orders, health and safety instructions, etc.
- GS2.** build positive client relationships through effective communication and responsiveness
- GS3.** collaborate with team members to coordinate and communicate effectively during pesticide application activities
- GS4.** efficiently plan and execute pesticide applications within designated timeframe
- GS5.** address unexpected issues during pesticide application with adaptability and strategic problem-solving
- GS6.** utilise standardised reporting formats and procedures for documenting pest control activities clearly and efficiently
- GS7.** uphold ethical standards in pesticide application, ensuring transparency, honesty, and integrity in all interactions
- GS8.** prioritise client satisfaction by exceeding expectations

DWC/N0125: Develop customised treatment plan based on identified pests

Description

This unit involves carrying out pest identification and developing customised treatment plan for addressing identified pest.

Scope

The scope covers the following :

- Identify types of pest and extent of infestation
- Develop customised treatment plan
- Provide cost estimation to client

Elements and Performance Criteria

Identify types of pest and extent of infestation

To be competent, the user/individual on the job must be able to:

- PC1.** analyse inspection findings to accurately identify the specific pest species present based on physical characteristics, behaviour, and activity signs
- PC2.** differentiate between similar-looking pests, as each requires a different treatment approach
- PC3.** determine the extent of the infestation by mapping the areas of pest activity, estimating the population size, and identifying potential harbourages
- PC4.** communicate findings and observations to the client in a clear, concise, and understandable manner, addressing any questions or concerns they may have

Develop customised treatment plan

To be competent, the user/individual on the job must be able to:

- PC5.** develop a comprehensive treatment plan that addresses the specific pest types, infestation level, and property characteristics
- PC6.** select the most appropriate treatment methods based on their efficacy, safety, and suitability for the identified pest, property type, and client preferences
- PC7.** integrate various eco-friendly chemicals/botanical chemical or non-chemical control strategies, such as baiting, trapping, exclusion techniques, and pesticide application, for a multi-pronged approach
- PC8.** develop a clear and sequential treatment schedule, outlining the timing and frequency of each control method application
- PC9.** educate the client on the treatment plan, explaining the expected outcomes, potential risks, and any necessary precautions

Provide cost estimation to client

To be competent, the user/individual on the job must be able to:

- PC10.** calculate the total cost of the proposed plan, including labour, materials, equipment, and any additional fees, such as taxes, etc.

Qualification Pack

- PC11.** clearly communicate the cost estimation to the customer in a transparent and understandable manner
- PC12.** offer alternative options with varying price points to cater to different budgets
- PC13.** clearly communicate the estimated timeframe for completing the treatment
- PC14.** obtain written or verbal confirmation from the client regarding their acceptance of the proposed treatment plan and cost estimate

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** impact of type and age of property on pest infestation
- KU2.** different stages of pest development (e.g., eggs, larvae, pupae, adults)
- KU3.** life cycle, breeding habits, and preferred environments of the identified pest
- KU4.** subtle morphological features of different pests
- KU5.** factors influencing the effectiveness of different treatments such as pest resistance, environmental conditions, and application techniques
- KU6.** potential risks and safety considerations associated with different pest control chemicals and methods
- KU7.** emergency response procedures in case of accidental exposure or adverse reactions
- KU8.** The Insecticides Act, 1968 and Insecticides Rules, 1971
- KU9.** Central Insecticides Board & Registration Committee (CIB & RC) licenced insecticides (pesticides)
- KU10.** banned and 'Restricted Use' pesticides
- KU11.** permissible chemical usage, dosage limits, and proper disposal practices
- KU12.** legal and regulatory compliances of the proposed methods
- KU13.** latest advancements and technologies in pest control, including eco-friendly and targeted approaches

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write records as per given format
- GS2.** engage effectively with clients, understanding their concerns and explaining treatment plans
- GS3.** work efficiently and effectively
- GS4.** work systematically with required attention to detail and adherence to all safety requirements
- GS5.** maintain proper etiquette in front of the clients
- GS6.** efficiently plan and implement treatment schedules
- GS7.** uphold ethical standards in client interactions, ensuring honesty, transparency, and integrity
- GS8.** prioritise client satisfaction by exceeding expectations

DWC/N0124: Conduct inspection of the infested area

Description

This unit encompasses the knowledge, understanding, and skills needed to conduct a thorough inspection of the infested areas, encompassing detailed examination of both indoor and outdoor locations.

Scope

The scope covers the following :

- Conduct site visit
- Inspect both interior and exterior of the property
- Detect presence of pest

Elements and Performance Criteria

Conduct site visit

To be competent, the user/individual on the job must be able to:

- PC1.** schedule and organise site visits in a timely manner in accordance with client preference / scheduled appointment times
- PC2.** establish effective communication with the property owner or designated contact person to gather relevant information
- PC3.** obtain necessary background information about the pest problem, including type of property (e.g., residential, office building, food establishment), suspected pest type(s), severity of the infestation and history of previous pest control attempts
- PC4.** briefly explain the inspection process to the concerned person and address any immediate safety concerns

Inspect both interior and exterior of the property

To be competent, the user/individual on the job must be able to:

- PC5.** gather relevant safety equipment (e.g., gloves, mask, flashlight) and ensure proper attire for the inspection
- PC6.** visually examine the interior spaces of the property, including rooms, kitchens, storage areas, and other accessible spaces
- PC7.** inspect areas with high moisture content, potential food sources, and harbourage sites conducive to pest activity
- PC8.** thoroughly inspect the exterior of the property, covering potential pest entry points, and hiding spots such as cracks, crevices, drains, and around windows/doors
- PC9.** utilise appropriate tools and equipment to aid in the inspection, such as flashlights, mirrors, and probes

Detect presence of pest

To be competent, the user/individual on the job must be able to:

- PC10.** identify pest presence through sound and visual cues, including direct sightings of live or dead pests and/or eggs
- PC11.** search for droppings, nests, gnaw marks, burrows or any other indications of pest activity

Qualification Pack

- PC12.** employ specialised techniques, such as trapping or monitoring devices, to confirm the type and extent of the pest infestation
- PC13.** take detailed notes and photographs of relevant findings, including potential entry points, pest activity signs (e.g., droppings, nests), and damage caused by pests
- PC14.** maintain a professional conduct throughout the inspection, demonstrating respect for the client's property and privacy

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** standard operating procedure (SOP) for customer handling
- KU2.** common pests, including insects, rodents, and other vermin, and their characteristic signs
- KU3.** life cycle, habits, and preferred environments of common pests encountered in domestic and commercial settings
- KU4.** pest signs and indicators, including droppings, eggs, exuviate, nests, and damage patterns
- KU5.** standard inspection protocols for different property types and suspected pests
- KU6.** use of appropriate tools and equipment for effective inspection
- KU7.** advanced inspection methods, such as thermal imaging or moisture detection, where applicable
- KU8.** factors contributing to pest infestations, including environmental conditions and structural vulnerabilities
- KU9.** landscape, waste management, and building construction that may influence pest presence
- KU10.** local regulations and reporting requirements for specific pests
- KU11.** licensing requirements and compliance with industry standards
- KU12.** potential health risks associated with different pest infestations

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** clearly and concisely communicate with property owners and occupants, preferably in local language
- GS2.** document inspection results accurately and comprehensively
- GS3.** analyse and interpret signs of pest infestations
- GS4.** work in coordination with team
- GS5.** work systematically with attention to detail and adherence to all safety requirements
- GS6.** maintain proper records as per given format
- GS7.** manage time effectively during inspections
- GS8.** organise and analyse information relevant to work

DGT/VSQ/N0101: Employability Skills (30 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

PC1. understand the significance of employability skills in meeting the job requirements

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

PC2. identify constitutional values, civic rights, duties, personal values and ethics and environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

PC3. explain 21st Century Skills such as Self-Awareness, Behavior Skills, Positive attitude, self-motivation, problem-solving, creative thinking, time management, social and cultural awareness, emotional awareness, continuous learning mindset etc.

Basic English Skills

To be competent, the user/individual on the job must be able to:

PC4. speak with others using some basic English phrases or sentences

Communication Skills

To be competent, the user/individual on the job must be able to:

PC5. follow good manners while communicating with others

PC6. work with others in a team

Qualification Pack

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

PC7. communicate and behave appropriately with all genders and PwD

PC8. report any issues related to sexual harassment

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

PC9. use various financial products and services safely and securely

PC10. calculate income, expenses, savings etc.

PC11. approach the concerned authorities for any exploitation as per legal rights and laws

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

PC12. operate digital devices and use its features and applications securely and safely

PC13. use internet and social media platforms securely and safely

Entrepreneurship

To be competent, the user/individual on the job must be able to:

PC14. identify and assess opportunities for potential business

PC15. identify sources for arranging money and associated financial and legal challenges

Customer Service

To be competent, the user/individual on the job must be able to:

PC16. identify different types of customers

PC17. identify customer needs and address them appropriately

PC18. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC19. create a basic biodata

PC20. search for suitable jobs and apply

PC21. identify and register apprenticeship opportunities as per requirement

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use basic spoken English language

KU6. Do and dont of effective communication

KU7. inclusivity and its importance

KU8. different types of disabilities and appropriate communication and behaviour towards PwD

KU9. different types of financial products and services

Qualification Pack

- KU10.** how to compute income and expenses
- KU11.** importance of maintaining safety and security in financial transactions
- KU12.** different legal rights and laws
- KU13.** how to operate digital devices and applications safely and securely
- KU14.** ways to identify business opportunities
- KU15.** types of customers and their needs
- KU16.** how to apply for a job and prepare for an interview
- KU17.** apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate effectively using appropriate language
- GS2.** behave politely and appropriately with all
- GS3.** perform basic calculations
- GS4.** solve problems effectively
- GS5.** be careful and attentive at work
- GS6.** use time effectively
- GS7.** maintain hygiene and sanitisation to avoid infection

DWC/N9903: Maintain health, hygiene and safety standards

Description

This unit is about the following personal and workplace hygiene, following workplace practices to promote wellbeing and managing waste at workplace.

Scope

The scope covers the following :

- Follow personal and workplace hygiene
- Follow workplace practices to promote wellbeing
- Manage waste at workplace

Elements and Performance Criteria

Follow personal and workplace hygiene

To be competent, the user/individual on the job must be able to:

- PC1.** wash and sanitize hands at regular intervals with hand soap and alcohol-based sanitizers
- PC2.** keep the home or workplace free of germs, insects, and bugs by utilizing the proper environmentally friendly solutions or cleaning chemicals
- PC3.** wash the dishes and other items in accordance with the set requirements
- PC4.** sanitize all tools, equipment, and appliances with touch points on a regular basis
- PC5.** make sure that the garbage cans are frequently cleared in accordance with the timetable for cleanliness and maintenance
- PC6.** place trash in designated bins or the proper trash container
- PC7.** wear appropriate PPE like hair net, protective aprons, footwear, respirators, masks, etc. at work
- PC8.** maintain personal hygiene by brushing teeth frequently, bathing daily, dressing well, eating healthfully, etc.
- PC9.** avoid consumption of tobacco, paan, alcohol, smoking cigarettes, etc. at the workplace

Follow workplace practices to promote wellbeing

To be competent, the user/individual on the job must be able to:

- PC10.** adhere to safety protocols when using materials, tools, and equipment
- PC11.** follow guidelines and safety protocol while using electrical household gadgets
- PC12.** follow first aid instructions appropriately
- PC13.** recognize workplace risks and promptly inform anybody who should know about them
- PC14.** report to various emergency circumstances with prompt response and reporting
- PC15.** attend regular health check-ups
- PC16.** place medicines and hazardous chemicals away
- PC17.** keep sharp objects out of reach of child

Manage waste at workplace

Qualification Pack

To be competent, the user/individual on the job must be able to:

- PC18.** identify and separate hazardous, recyclable, and non-recyclable waste at the workplace
- PC19.** manage wastages like food, water, etc., as directed
- PC20.** dispose of sanitary and other hazardous wastes appropriately
- PC21.** recycle waste wherever applicable
- PC22.** discard PPEs in plastic bags that are sealed and labeled "infectious waste"
- PC23.** conserve materials, natural resources, and energy at work
- PC24.** use eco-friendly methods at work to reduce pollution of the air, water, and earth

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** reporting and handling safety-related issues
- KU2.** process for maintaining hygienic standards at work
- KU3.** process on personal hygiene
- KU4.** the significance of housekeeping in maintaining a secure and safe workplace
- KU5.** chemical solutions used for cleaning
- KU6.** various emergency circumstances and how they are handled
- KU7.** importance of preventive health check-up and healthy living
- KU8.** procedure to report health issues
- KU9.** instructions for operating and handling equipment as per standard
- KU10.** purpose and usage of PPE
- KU11.** basic first-aid procedures
- KU12.** methods of the waste management
- KU13.** resource conservation methods

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** note down instructions given by residents
- GS2.** communicate effectively with residents and others
- GS3.** report any issues at the workplace
- GS4.** analyze the impact of not adhering to the health and safety procedures

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Performance
2. Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down the proportion of marks for Theory and Skills Practical for each PC.
3. The assessment for the theory part will be based on the knowledge bank of questions created by the SSC.
4. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
5. Individual assessment agencies will create unique question papers for the theory part for each candidate at each examination/training centre (as per assessment criteria below).
6. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training centre based on these criteria.
7. To pass the Qualification Pack assessment, every trainee should score a minimum of 50% of %

Qualification Pack

aggregate marks to successfully clear the assessment.

8. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Minimum Aggregate Passing % at QP Level : 50

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
