## Qualification Pack

### ELE/Q3901: Smartphone Assembly Technician

#### Brief Job Description

A Smartphone assembly technician is responsible for interpreting assembly instructions, blueprint specifications, etc. to assemble or fix smartphone parts/components in correct position and alignment using approved techniques and equipment in a production unit.

#### Personal Attributes

The individual must have a good eye sight, steady hand, ability to pay attention to details and work for long hours generally in a standing position.

#### Applicable National Occupational Standards (NOS)

##### Compulsory NOS:

1. [ELE/N3902: Smartphone Pre-Assembly & Setup](#)
2. [ELE/N3903: Smartphone Component Integration and Commissioning](#)
3. [DGT/VSQ/N0101: Employability Skills \(30 Hours\)](#)

### ELE/N3902: Smartphone Pre-Assembly & Setup

#### Description

This NOS is about to carry out preparation, configuration, and initial hardware setup of smartphone components prior to final assembly, ensuring quality and functionality standards

#### Scope

The scope covers the following :

- This NOS covers the procedures, tools, and skills required to prepare, configure, and inspect smartphone components before final assembly while maintaining safety and quality standards

#### Elements and Performance Criteria

##### *Introduction and Pre requisites for Assembly*

To be competent, the user/individual on the job must be able to:

- PC1.** Describe the role and responsibilities of a Smartphone Assembly Technician; explain the scope of the smartphone manufacturing industry, key components involved (such as display, battery, motherboard, camera, connectors), and career opportunities in electronics manufacturing and service sectors.
- PC2.** Identify and review assembly instructions, specifications, quality standards, and parts list provided by the concerned authority and verify job requirements by cross-checking product specifications and work instructions from approved sources.
- PC3.** Coordinate with relevant team members for efficient workflow and process execution.
- PC4.** Gather necessary tools/equipment such as screwing machine, compression tools, and consumables in working condition.
- PC5.** Inspect and sort required components (LCD, rear & middle cover, touch panel, etc.) as per work order.
- PC6.** Conduct quality checks on components and raw materials to ensure no physical damage or defects.
- PC7.** Perform stepwise inspection of previous assembly stages to ensure completeness before proceeding.
- PC8.** Confirm that Printed Circuit Board Assembly (PCBA) is tested and validated for further assembly.

##### *Initial Component Handling and Pre Assembly Steps*

To be competent, the user/individual on the job must be able to:

- PC9.** Select the appropriate assembly method (manual or machine-based) according to work instructions.
- PC10.** Remove protective films, stickers, and unnecessary packaging from components using approved techniques.
- PC11.** Handle the LCD module in an Electrostatic Discharge (ESD)-safe environment to prevent damage.

## Qualification Pack

- PC12.** Clean components with industry-approved solutions (e.g., isopropyl alcohol) to remove dust and contaminants.
- PC13.** Organize the workspace and ensure compliance with safety standards before proceeding with assembly.

## Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Understanding of smartphone assembly workflow, key components (LCD, battery, motherboard, connectors), and industry standards
- KU2.** Knowledge of reading and interpreting assembly instructions, job orders, and component specifications
- KU3.** Awareness of quality control procedures to identify defects in components before assembly.
- KU4.** Knowledge of ESD precautions and safe handling techniques for sensitive components like LCD and PCBA
- KU5.** Understanding tool selection, maintenance, and workspace organization for efficient assembly operations

## Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Ability to collaborate and coordinate with team members to ensure smooth assembly workflow.
- GS2.** Skill to inspect and verify component readiness before assembly using visual checks and testing procedures
- GS3.** Ability to choose appropriate assembly tools and methods based on work instructions
- GS4.** Skilled in safe component handling, cleaning, and pre-assembly preparation under ESD-safe conditions
- GS5.** Ability to maintain safety compliance, orderly workspace, and follow approved best practices to prevent damage and errors

## Qualification Pack

### Assessment Criteria

| Assessment Criteria for Outcomes                                                                                                                                                                                                                                                                                    | Theory Marks | Practical Marks | Project Marks | Viva Marks |

### ELE/N3903: Smartphone Component Integration and Commissioning

#### Description

This NOS involves assembling and integrating key smartphone components such as display, battery, camera modules, and circuit boards, followed by functional testing, calibration, and software commissioning to ensure the device meets performance, safety, and quality standards

#### Scope

The scope covers the following :

- This NOS covers the integration, alignment, and connection of smartphone components along with functional testing and commissioning to ensure complete device readiness as per production standards

#### Elements and Performance Criteria

##### *Assembly and Fixing of Components*

To be competent, the user/individual on the job must be able to:

- PC1.** Securely assemble components (LCD, screen connectors, batteries, processors and covers, etc.) following approved procedures.
- PC2.** Attach the Printed Circuit Board Assembly (PCBA) onto the middle cover/case using proper fastening techniques.
- PC3.** Carefully mount and secure the LCD screen onto the PCBA as per specifications.
- PC4.** Apply LCD safety cover tape to protect against dust and contaminants.
- PC5.** Fix small modules such as SIM tray, SD card slot, and micro-connectors in their designated positions.
- PC6.** Assemble rear case components, ensuring proper alignment of camera module, vibrator, and speaker.
- PC7.** Verify that IMEI and serial number markings are accurate as per documentation standards.
- PC8.** Ensure each completed sub-assembly is placed in an Electrostatic Discharge (ESD) tray after assembly.

##### *Final Fixing Quality Checks and Post Assembly Activities*

To be competent, the user/individual on the job must be able to:

- PC9.** Attach RF cables, connectors, and antenna as per design requirements.
- PC10.** Securely fix the rear cover with the middle cover and complete remaining connector installations.
- PC11.** Ensure the camera lens is positioned and fixed correctly to maintain optical quality.
- PC12.** Conduct a final alignment check to verify the precise positioning of all parts before sealing.
- PC13.** Continuously monitor the assembly line and identify any potential defects or process inefficiencies.
- PC14.** Confirm that the assembled product adheres to production quality and compliance standards using AI-based alignment tools, and vision inspection systems to ensure proper connectivity of parts like camera modules, motherboards, and sensors.

## Qualification Pack

- PC15.** Store all tools and unused materials in designated storage areas after use.
- PC16.** Submit completed smartphone units to the designated department for further testing or packaging.
- PC17.** Maintain documentation for assembled units, highlighting any deviations or rectifications performed.

## Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Knowledge of smartphone internal component architecture and correct assembly sequence
- KU2.** Understanding various fastening and mounting techniques for PCBA, LCD, camera, and connectors
- KU3.** Awareness of protection procedures like using LCD tape and placing assemblies in ESD trays
- KU4.** Knowledge of production compliance standards including IMEI validation, alignment accuracy, and quality checks
- KU5.** Understanding documentation and traceability requirements for assembled units and deviations

## Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Ability to handle and assemble fine smartphone components with precision to avoid damage
- GS2.** Skill to perform visual and tool-based alignment checks and correct placement of modules like camera and antenna
- GS3.** Capability to detect defects, inefficiencies, and ensure zero-defect assembly using AI/vision tools
- GS4.** Ability to maintain ESD-safe practices, organized workstations, and proper storage of tools/materials
- GS5.** Competence in completing documentation and coordinating product flow to testing/packaging departments

## Qualification Pack

### Assessment Criteria

## Assessment Guidelines and Assessment Weightage

### Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training centre (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/training centre based on this criterion.
6. To pass the Qualification Pack, every trainee should score a minimum of 70% of aggregate marks to successfully clear the assessment.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

## Qualification Pack

### Minimum Aggregate Passing % at QP Level : 70

(**Please note:** Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

### Assessment Weightage

Compulsory NOS

| National Occupational Standards                              | Theory Marks | Practical Marks | Project Marks | Viva Marks | Total Marks | Weightage  |
|--------------------------------------------------------------|--------------|-----------------|---------------|------------|-------------|------------|
| ELE/N3902.Smartphone Pre-Assembly & Setup                    | 40           | 60              | -             | -          | 100         | 40         |
| ELE/N3903.Smartphone Component Integration and Commissioning | 40           | 60              | -             | -          | 100         | 40         |
| DGT/VSQ/N0101.Employability Skills (30 Hours)                | 20           | 30              | -             | -          | 50          | 20         |
| <b>Total</b>                                                 | <b>100</b>   | <b>150</b>      | <b>-</b>      | <b>-</b>   | <b>250</b>  | <b>100</b> |

### Glossary

|                                              |                                                                                                                                                                                                                                                                                                  |
|----------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Sector</b>                                | Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.                                                                      |
| <b>Sub-sector</b>                            | Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.                                                                                                                                                                                     |
| <b>Occupation</b>                            | Occupation is a set of job roles, which perform similar/ related set of functions in an industry.                                                                                                                                                                                                |
| <b>Job role</b>                              | Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.                                                                                                                                                                                |
| <b>Occupational Standards (OS)</b>           | OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts. |
| <b>Performance Criteria (PC)</b>             | Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.                                                                                                                                                                    |
| <b>National Occupational Standards (NOS)</b> | NOS are occupational standards which apply uniquely in the Indian context.                                                                                                                                                                                                                       |
| <b>Qualifications Pack (QP)</b>              | QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.                                                                                                                       |
| <b>Unit Code</b>                             | Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'                                                                                                                                                                                                        |
| <b>Unit Title</b>                            | Unit title gives a clear overall statement about what the incumbent should be able to do.                                                                                                                                                                                                        |
| <b>Description</b>                           | Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.                                                                                                                   |
| <b>Scope</b>                                 | Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.                                                                                            |

## Qualification Pack

|                                         |                                                                                                                                                                                                                                                                                                                                                                        |
|-----------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Knowledge and Understanding (KU)</b> | Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.                                                                                                                                               |
| <b>Organisational Context</b>           | Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.                                                                                                                                                                       |
| <b>Technical Knowledge</b>              | Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.                                                                                                                                                                                                                                                               |
| <b>Core Skills/ Generic Skills (GS)</b> | Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles. |
| <b>Electives</b>                        | Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.                                                                            |
| <b>Options</b>                          | Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.                                                                                                                                                          |
| <b>Declarative Knowledge</b>            | Declarative knowledge refers to facts, concepts and principles that need to be known and/or understood in order to accomplish a task or to solve a problem.                                                                                                                                                                                                            |
| <b>Key Learning Outcome</b>             | Key learning outcome is the statement of what a learner needs to know, understand and be able to do in order to achieve the terminal outcomes. A set of key learning outcomes will make up the training outcomes. Training outcome is specified in terms of knowledge, understanding (theory) and skills (practical application).                                      |
| <b>OJT (M)</b>                          | On-the-job training (Mandatory) trainees are mandated to complete specified hours of training on site                                                                                                                                                                                                                                                                  |
| <b>OJT (R)</b>                          | On-the-job training (Recommended) trainees are recommended the specified hours of training on site                                                                                                                                                                                                                                                                     |
| <b>Procedural Knowledge</b>             | Procedural knowledge addresses how to do something, or how to perform a task. It is the ability to work, or produce a tangible work output by applying cognitive, affective or psychomotor skills.                                                                                                                                                                     |
| <b>Training Outcome</b>                 | Training outcome is a statement of what a learner will know, understand and be able to do upon the completion of the training.                                                                                                                                                                                                                                         |
