FIC/Q8504: Traditional Sweet and Savoury Product Maker

Brief Job Description

A Traditional Sweet and Savoury Product Maker is responsible for making various types of sweet and savoury snack products. The individual is responsible for using their skills to carry out day to day activities in preparing variety of food items while meeting defined SOPs.

Personal Attributes

A Traditional Sweets and Savoury Product Maker must have the ability to plan, organize, prioritize, calculate and handle pressure. The individual must possess reading, writing, communication skills, organizational & analytical skills, as well as trouble shooting skills. In addition, the individual must maintain physical stamina and personal hygiene.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [FIC/N9026: Prepare for production](#)
2. [FIC/N8516: Carry out production of sweet and savoury products](#)
3. [FIC/N9906: Apply food safety guidelines in Food Processing](#)
4. [DGT/VSQ/N0101: Employability Skills \(30 Hours\)](#)

FIC/N9026: Prepare for production

Description

This NOS unit is about performing various tasks prior to production in the food processing industry.

Scope

The scope covers the following :

- Plan for production
- Clean and maintain work area, machineries, and tools for production
- Organize for production

Elements and Performance Criteria

Plan for production

To be competent, the user/individual on the job must be able to:

- PC1.** identify work requirements by obtaining instructions from the supervisor. Instructions: process chart, product flow chart, formulation, chart, etc.
- PC2.** plan and prioritize tasks as per work schedule. Tasks: inspect, clean, maintain, verify, etc.
- PC3.** estimate manpower and material requirements as per work requirement. Material: raw materials and packaging materials
- PC4.** ensure required quantity of raw materials, packaging materials, equipment, and manpower for production
- PC5.** plan capacity utilization of machinery with respect to the processing time, production order, and batch size for each product

Clean and maintain work area, machineries, and tools for production

To be competent, the user/individual on the job must be able to:

- PC6.** clean and maintain the work area as per organizational procedures
- PC7.** clean and maintain the machines and tools and sanitize them as per the organization's specifications and standards
- PC8.** dispose of the waste material at designated place safely. Waste material: hazardous waste, food waste, packaging waste, etc.
- PC9.** inspect the tools, equipment, and machinery to ascertain suitability for use
- PC10.** report information such as faulty tools and equipment to the concerned authority

Organize for production

To be competent, the user/individual on the job must be able to:

- PC11.** organize tools and equipment
- PC12.** receive and organize production materials appropriately. Production materials: raw materials, packaging materials, etc.
- PC13.** allot responsibilities/work to the assistants and helpers

Knowledge and Understanding (KU)

Qualification Pack

The individual on the job needs to know and understand:

- KU1.** production planning process
- KU2.** analysis and interpretation of various process charts, product flow charts, etc.
- KU3.** resource management process
- KU4.** procedure to estimate manpower and raw material
- KU5.** capacity utilization calculation
- KU6.** organizational policies and SOP on cleanliness
- KU7.** operating procedure and general maintenance of food production machineries
- KU8.** waste management procedures
- KU9.** methods to inspect tools, equipment and machinery
- KU10.** procedure to allot work or responsibility to the team

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read and interpret organizational policies, SOP, production charts, etc.
- GS2.** communicate effectively with subordinates as well as supervisors
- GS3.** plan and prioritize various tasks
- GS4.** be always punctual and courteous
- GS5.** organize all process/equipment manuals to access information easily
- GS6.** discuss task lists, schedules, and activities with the senior/supervisor

FIC/N8516: Carry out production of sweet and savoury products

Description

A Traditional Sweet and Savoury Product Maker is responsible for making various types of sweet and savoury snack products. The individual is responsible for using their skills to carry out day to day activities in preparing variety of food items while meeting defined SOPs.

Scope

The scope covers the following :

- Processing of evaporated milk (khoya)
- Processing of Sugar Syrup
- Processing of sweet products
- Processing of Savoury Products
- Canning of Products
- Packaging and Labelling of the products
- Post production cleaning and regular maintenance of equipment

Elements and Performance Criteria

Processing of evaporated milk (khoya)

To be competent, the user/individual on the job must be able to:

- PC1.** fill measured volume of milk into container/steam jacketed kettle/silos/evaporator
- PC2.** set controls of steam jacketed kettle/silos/evaporator to stir milk until moisture evaporates upto desired moisture level; controls: temperature, pressure, agitator speed, time etc.
- PC3.** check the consistency of evaporated milk (khoya) and continue stirring till a concentration of 50% of total solids is attained
- PC4.** transfer khoya into container to storage room and ensure desired temperature is maintained till further processing between stones/plates to achieve required fineness, collect the milled material (flour/powder) from the discharge outlet

Processing of Sugar Syrup

To be competent, the user/individual on the job must be able to:

- PC5.** measure the amount of sugar and water required
- PC6.** transfer measured quantity of mixture into steam jacketed kettle/silos
- PC7.**
 - controls the parameters of the steam jacketed kettle
 - parameters: speed, temperature pressure, time etc.
- PC8.** check the soluble sugar content with refractometer after the syrup is formed as per the composition required
- PC9.** ensure the transfer of sugar syrup at optimum temperature to avoid crystallisation for further processing

Processing of sweet products

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC10.** clean, sort and grind the available raw material; Raw materials: besan flour, cashew/almond batter, maida, ghee/oil, nuts etc.
- PC11.** transfer the prepared material (khoya) and other raw materials (maida) into the container for kneading it manually or in a kneader and set the speed of the stirrer to mix the ingredients evenly
- PC12.** mix the ground ingredients with the kneaded raw material
- PC13.** load dough in feed hopper of continuous snack making machine/extruder and adjust controls to set speed of the conveyors, dough cutter to cut dough into specified weight
- PC14.** cut the product as per the desired shape and size or transfer the material into a moulder prior to cutting
- PC15.** transfer measured quantity of oil into the fryer and set controls of fryer such as temperature and level of oil etc.
- PC16.** add shaped balls into heated oil to fry, stir continuously and ensure not to under fry or over fry
- PC17.** follow company norms for reusing/discard the excess oil/used oil respectively
- PC18.** check the desired parameters of the product parameters: appearance, texture, taste, oil absorbing capacity, etc.
- PC19.** add the products into the cooking vat containing sugar syrup
- PC20.** • ensure cooking meets the required consistency and check the physical parameters of the product
• Parameters: colour, texture, sweetness, soaking capacity, etc.
- PC21.** transfer product into cooling station
- PC22.** set the parameters of the cooling station to cool the products
- PC23.** pack the sample product using appropriate packaging material and transfer to lab for quality analysis

Processing of Savoury Products

To be competent, the user/individual on the job must be able to:

- PC24.** • measure specified quantity of raw materials and ingredients
• Raw materials: flour, salt, spice powder, etc.
- PC25.** set the speed of the dough mixer and feed the dough with ground ingredients to mix uniformly
- PC26.** • transfer the mixture in the hopper of sheeting machine and set the parameters
• Parameters: speed, temperature, time, etc
- PC27.** • set the parameters of the extruder and transfer the raw material into the extruder
• Parameters: temperature, pressure, RPM, etc.
- PC28.** • collect the extruded products from the extruder and perform further processing depending on the product requirement
• Requirement: frying, baking, etc Requirement: frying, baking, etc.
- PC29.** add sliced vegetable/extruded or shaped dough into the oil and maintain the temperature as per the product requirement during frying
- PC30.** transfer weighed product into the drum of blender machine to blend with desired amount of seasonings
- PC31.** check for presence of metallic substances in the products using organisational practices
- PC32.** • check the physical parameters of the product for any variation
• Physical parameters: dimension, appearance, texture, taste, etc.

Qualification Pack

PC33. take samples as per specified amounts and handover to quality lab for testing

Canning of Products

To be competent, the user/individual on the job must be able to:

PC34. feed flattened cans into can forming machine and operate machine to form cans

PC35. set the parameters of filling machine Parameters: weight and volume

PC36. feed product and sugar syrup in the filling machine

PC37. operate seaming machine to expel air during retorting and seal filled cans

PC38. • set the parameters of retort machine to sterilize the canned products
• Parameters: pressure, time, temperature, etc.

PC39. prepare the cooling tunnel to cool the cans

PC40. • set control parameters of the drying tunnel to dry the cooled cans
• Parameters: temperature, air flow and conveyor speed

PC41. store the products maintaining storage conditions following SOP

Packaging and Labelling of the products

To be competent, the user/individual on the job must be able to:

PC42. load the desired packaging material on the machine appropriately

PC43. load the products on the packaging conveyor ensuring product safety

PC44. start the packaging machine safely and control the output of wrapped and labelled products as per the specifications

PC45. monitor the process to ascertain suitable packaging for the production

PC46. • record information (manual, ERP, etc.) of finished products details as per FSSAI regulations
• Details: Name of the product, batch number, time of packing, date of manufacture, date of expiry, other label details, primary and secondary packaging materials for all finished products, storage conditions etc.

PC47. report information such as non-compliant product to the supervisor promptly as per organisational practices

PC48. • document and maintain record on production, process details and the types of finished products produced
• Production records: raw material used, products produced, production sequence, defects observed, equipment and machinery details, efficiency and capacity utilization of equipment

PC49. verify documents and track from finished product to ingredients, in case of quality concerns and for quality management system audits

Post production cleaning and regular maintenance of equipment

To be competent, the user/individual on the job must be able to:

PC50. clean work area, machinery, equipment and tools using recommended cleaning agents and sanitizers

PC51. inspect the tools, equipment and machinery periodically to identify defects and ensure their upkeep and maintenance

PC52. report equipment faults to the concerned department/supervisor as per organisational practice

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

Qualification Pack

- KU1.** organization standards, process standards and procedures followed in the organization
- KU2.** types of raw materials required to produce different products in the organization
- KU3.** process and procedures for production of various products
- KU4.** job responsibilities/duties of a traditional sweets and savoury product maker
- KU5.** internal processes like procurement, store management, inventory management, quality management and key contact points for query resolution
- KU6.** technique to use different equipment in snacks industry
- KU7.** food safety and hygiene standards laid down by the organization during preparation
- KU8.** the temperature at which oil needs to be sprayed and the quantity of same
- KU9.** the particle size of the seasoning being sprinkled on the product
- KU10.** the quantity of seasonings being sprinkled
- KU11.** importance of maintaining uniform size of the raw materials
- KU12.** methods of handling all types of raw materials
- KU13.** importance of production process, process parameters and flow chart as per recipe formulation
- KU14.** temperature requirement for different products
- KU15.** types of equipment used in the processing of sweets and savoury products in the organisation
- KU16.** working of different types of processing equipment
- KU17.** desired areas to keep tools and equipment used in
- KU18.** basic tests required in checking physical parameters
- KU19.** types and categories of packaging materials and types of packaging machineries
- KU20.** storage procedures for raw materials, packaging materials and finished goods
- KU21.** cleaning procedures like CIP and COP
- KU22.** different cleaning agents required in the processing area
- KU23.** FSSAI regulations for handling additives as well as for packaging and labelling
- KU24.** importance of proper packaging of products
- KU25.** information to be recorded in a proper manner
- KU26.** different process parameters required for different products

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** note the information communicated
- GS2.** record all the raw materials, sources and suppliers of raw materials and packaging materials, time and date of receiving and the quantity received
- GS3.** note the readings of the process parameters like weight, number of pieces, grades, varieties, temperature, timing, pH level etc and provide necessary information to fill the process chart
- GS4.** note down observations (if any) related to the process
- GS5.** write information documents to internal departments/ internal teams
- GS6.** note down the data for online ERP or as per applicability in the organization

Qualification Pack

- GS7.** read and interpret the process required for producing various types of products
- GS8.** read and interpret and process flowchart for all products produced
- GS9.** read equipment manuals and process documents to understand the equipments operation and process requirement
- GS10.** read internal information documents sent by internal teams
- GS11.** discuss task lists, schedules and activities with team mates and clear the queries from the supervisors
- GS12.** effectively communicate with team members
- GS13.** attentively listen and comprehend the information given by the speaker
- GS14.** analyse critical points in day to day tasks through experience and observation and identify control measures to solve the issue
- GS15.** handle issues in the absence of supervisor
- GS16.** organize raw materials and packaging materials required for all products
- GS17.** plan and prioritize the work based on the instructions received
- GS18.** plan to utilise time and equipment's effectively
- GS19.** organize all process/ equipment manuals so as to access information easily
- GS20.** support the manager in scheduling tasks for helpers
- GS21.** understand customer requirements and their priority and respond as per their needs
- GS22.** apply domain information about maintenance processes
- GS23.** use reasoning skills to identify and resolve basic problems
- GS24.** use acquired knowledge and training of the process for identifying and handling issues

Qualification Pack

Assessment Criteria

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
<i>Processing of evaporated milk (khoya)</i>	2	4	-	-
PC1. fill measured volume of milk into container/steam jacketed kettle/silos/evaporator	-	-	-	-

FIC/N9906: Apply food safety guidelines in Food Processing

Description

This unit covers the essential components of food safety, Good Manufacturing Practices (GMP), and personal hygiene in the food industry. It emphasizes the importance of individuals working in the food industry in protecting the health and well-being of consumers by following food safety protocols and procedures and ensuring the production of safe and high-quality food products.

Scope

The scope covers the following :

- Apply personal hygiene and follow Good Manufacturing practices at the workplace.
- Implement Food Safety and pre-requisite programs (PRP) at the workplace.

Elements and Performance Criteria

Apply personal hygiene and follow Good Manufacturing practices at workplace

To be competent, the user/individual on the job must be able to:

- PC1.** PC1. follow a site relevant documented procedure for Personal Hygiene and Visitor/ Contractor rules.
- PC2.** PC2. follow work instructions at levels of employees inside a food manufacturing site and ensure that the relevant instructions are well communicated and being followed at the fixed timelines.
- PC3.** PC3. ensure timely participate and carry out the relevant training and awareness sessions on personal hygiene, GMP, and related topics.
- PC4.** PC4. ensure timely medical examination from a prescribed and authorized doctor and comply with the guidelines of Schedule IV as described in Food Safety Standard Authority of India (FSSAI) guidelines.
- PC5.** PC5. fill in data in the daily monitoring checklist related to personal hygiene, food safety, and GMP.
- PC6.**
 - PC6. follow a site-relevant documented procedure and area-wise work instructions for Good Manufacturing Practices (GMP) to be followed on the site.
 - procedure: Hand washing requirements, Gowning & De gowning protocols, cleaning, and sanitation of employee lockers, follow the protocols as laid down in the different categories of processing areas like Low Risk, High Risk, High Care areas, etc.
- PC7.** PC7. follow all validated Do's & Don'ts inside a food manufacturing firm.
- PC8.** PC8. follow man and materials movement throughout the production facility, to restrict unwanted hazards to cross-contaminate the products which are being manufactured in the facility.
- PC9.** PC9. refer to the process flow charts, HACCP summary plan, and critical process parameters in each and respective areas of the production line.
- PC10.** PC10. identify the material requirements such as manufacturing equipments, Utensils, and other processing aids, cleaning chemicals, and cleaning work instructions in all the relevant areas of the manufacturing facility. Also, a special focus shall be given to Allergens and their risks. Wherever required, the allergen requirements shall be separately addressed.

Qualification Pack

- PC11.** PC11. ensure to properly tag and number all the equipment, machinery, tools, and other processing aids to keep proper traceability of the product being manufactured and handled at the site.
- PC12.** PC12. follow and implement all training and awareness guidelines in the manufacturing area and regularly participate in training effectiveness for evaluation.
- PC13.** PC13. participate in audits and address the aspects of Good Manufacturing Procedures, personal hygiene, and food safety.
- PC14.** PC14. ensure the record keeping and documentation such as Daily Monitoring Sheets, Batch Traceability Records, machine records, product parameters, process control parameters, etc.

Implement food safety practices at the workplace

To be competent, the user/individual on the job must be able to:

- PC15.** PC15. maintain updated facilities, equipment, and tool and design requirements to minimize the risks associated with the products being handled at the site.
- PC16.** PC16. follow the instruction in the raw and packaging materials warehouse and ensure receiving material parameters match all the laid requirements. parameters: Incoming vehicles Visual report, storage, and handling requirements, hazardous and non-hazardous goods, allergens, cross-contamination risks, Quarantine, Accepted & rejected goods, monitoring temperature and humidity, etc.
- PC17.** PC17. follow FSSAI Schedule IV requirements related to Pest Control, Cleaning, and Sanitation, Utilities, Waste Disposal, Prevention of Cross-Contamination, allergen management, corrective action, preventive actions, food operation control etc.
- PC18.** PC18. ensure timely check of the critical control points and product parameters.
- PC19.** PC19. record keeping and documentation such as daily monitoring sheets, cleaning sheets, parameters, etc.
- PC20.** PC20. report any food safety and GMP issue to the supervisor, if any.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** importance of personal hygiene, GMP, visitors & contractor's rules. Associated risk in case of deviation from the standard policies and how the requirement is linked with the site's FSSAI License.
- KU2.** KU2. importance of training and work instruction delivered by the supervisors.
- KU3.** KU3. importance of filling the records and checklists, formats and how to ensure that the timely and effective completion is achieved.
- KU4.** KU4. knowledge of trainings and skills required to perform in food processing premises.
- KU5.** KU5. understand FSSAI Schedule IV requirements of food handlers and PRPs within the processing area
- KU6.** KU6. importance of timely medical examinations and awareness of communicable diseases
- KU7.** Understanding of Do's & Don'ts, intellect mindset to understand the visual illustrations
- KU8.** KU8. understanding about Site Zoning plans.
- KU9.** KU9. awareness of layout which would help to demarcate the defined movements of RM, PM, FG, and wastes generated during the processing of goods. This one lays a framework to launch Good Manufacturing Practices (GMP) successfully and effectively on site.

Qualification Pack

- KU10.** KU10. understand the manufacturing process, product parameters and process control parameters such as CCPs
- KU11.** KU11. understanding about Hazard Analysis and Critical Control Points (HACCP)
- KU12.** KU12. understanding about Allergens and their types and controls to monitor effective handling of allergen raw materials on site.
- KU13.** KU13. basic understanding of traceability and mock recall
- KU14.** KU14. awareness about Internal & external Audits
- KU15.** KU15. understanding for RCA CAPA, cleaning and sanitation
- KU16.** KU16. awareness about record keeping and data monitoring in various sheets as per organizational requirement

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** GS1. read and comprehend basic content to read labels, charts, signages, symbols and product manuals
- GS2.** GS2. communicate with coworkers appropriately to clarify instructions and other issues
- GS3.** GS3. plan and organize the work schedule, work area, tools, equipment, and materials for improved productivity
- GS4.** GS4. plan and prioritize tasks as per work requirements
- GS5.** GS5. always be punctual and courteous
- GS6.** GS6. good observations and intellect mindset

Qualification Pack

Assessment Criteria

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
<i>Apply personal hygiene and follow Good Manufacturing practices at workplace</i>	22	44	-	6
PC1. PC1. follow a site relevant documented procedure for Personal Hygiene and Visitor/ Contractor rules.	2	4	-	-
PC2. PC2. follow work instructions at levels of employees inside a food manufacturing site and ensure that the relevant instructions are well communicated and being followed at the fixed timelines.	2	4	-	2
PC3. PC3. ensure timely participate and carry out the relevant training and awareness sessions on personal hygiene, GMP, and related topics.	2	4	-	-
PC4. PC4. ensure timely medical examination from a prescribed and authorized doctor and comply with the guidelines of Schedule IV as described in Food Safety Standard Authority of India (FSSAI) guidelines.	2	4	-	-
PC5. PC5. fill in data in the daily monitoring checklist related to personal hygiene, food safety, and GMP.	2	4	-	-
PC6. - PC6. follow a site-relevant documented procedure and area-wise work instructions for Good Manufacturing Practices (GMP) to be followed on the site. - procedure: Hand washing requirements, Gowning & De gowning protocols, cleaning, and sanitation of employee lockers, follow the protocols as laid down in the different categories of processing areas like Low Risk, High Risk, High Care areas, etc.	2	4	-	2
PC7. PC7. follow all validated Do's & Don'ts inside a food manufacturing firm.	1	2	-	1
PC8. PC8. follow man and materials movement throughout the production facility, to restrict unwanted hazards to cross-contaminate the products which are being manufactured in the facility.	2	4	-	-
PC9. PC9. refer to the process flow charts, HACCP summary plan, and critical process parameters in each and respective areas of the production line.	1	2	-	1

Qualification Pack

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
PC10. PC10. identify the material requirements such as manufacturing equipments, Utensils, and other processing aids, cleaning chemicals, and cleaning work instructions in all the relevant areas of the manufacturing facility. Also, a special focus shall be given to Allergens and their risks. Wherever required, the allergen requirements shall be separately addressed.	2	4	-	-
PC11. PC11. ensure to properly tag and number all the equipment, machinery, tools, and other processing aids to keep proper traceability of the product being manufactured and handled at the site.	1	2	-	-
PC12. PC12. follow and implement all training and awareness guidelines in the manufacturing area and regularly participate in training effectiveness for evaluation.	1	2	-	-
PC13. PC13. participate in audits and address the aspects of Good Manufacturing Procedures, personal hygiene, and food safety.	1	2	-	-
PC14. PC14. ensure the record keeping and documentation such as Daily Monitoring Sheets, Batch Traceability Records, machine records, product parameters, process control parameters, etc.	1	2	-	-
<i>Implement food safety practices at the workplace</i>	8	16	-	4
PC15. PC15. maintain updated facilities, equipment, and tool and design requirements to minimize the risks associated with the products being handled at the site.	2	4	-	-
PC16. PC16. follow the instruction in the raw and packaging materials warehouse and ensure receiving material parameters match all the laid requirements. parameters: Incoming vehicles Visual report, storage, and handling requirements, hazardous and non-hazardous goods, allergens, cross-contamination risks, Quarantine, Accepted & rejected goods, monitoring temperature and humidity, etc.	1	2	-	1

Qualification Pack

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
PC17. PC17. follow FSSAI Schedule IV requirements related to Pest Control, Cleaning, and Sanitation, Utilities, Waste Disposal, Prevention of Cross-Contamination, allergen management, corrective action, preventive actions, food operation control etc.	2	4	-	2
PC18. PC18. ensure timely check of the critical control points and product parameters.	1	2	-	-
PC19. PC19. record keeping and documentation such as daily monitoring sheets, cleaning sheets, parameters, etc.	1	2	-	1
PC20. PC20. report any food safety and GMP issue to the supervisor, if any.	1	2	-	-

Qualification Pack

DGT/VSQ/N0101: Employability Skills (30 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

PC1. understand the significance of employability skills in meeting the job requirements

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

PC2. identify constitutional values, civic rights, duties, personal values and ethics and environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

PC3. explain 21st Century Skills such as Self-Awareness, Behavior Skills, Positive attitude, self-motivation, problem-solving, creative thinking, time management, social and cultural awareness, emotional awareness, continuous learning mindset etc.

Basic English Skills

To be competent, the user/individual on the job must be able to:

PC4. speak with others using some basic English phrases or sentences

Communication Skills

To be competent, the user/individual on the job must be able to:

PC5. follow good manners while communicating with others

PC6. work with others in a team

Qualification Pack

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

PC7. communicate and behave appropriately with all genders and PwD

PC8. report any issues related to sexual harassment

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

PC9. use various financial products and services safely and securely

PC10. calculate income, expenses, savings etc.

PC11. approach the concerned authorities for any exploitation as per legal rights and laws

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

PC12. operate digital devices and use its features and applications securely and safely

PC13. use internet and social media platforms securely and safely

Entrepreneurship

To be competent, the user/individual on the job must be able to:

PC14. identify and assess opportunities for potential business

PC15. identify sources for arranging money and associated financial and legal challenges

Customer Service

To be competent, the user/individual on the job must be able to:

PC16. identify different types of customers

PC17. identify customer needs and address them appropriately

PC18. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC19. create a basic biodata

PC20. search for suitable jobs and apply

PC21. identify and register apprenticeship opportunities as per requirement

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use basic spoken English language

KU6. Do and dont of effective communication

KU7. inclusivity and its importance

KU8. different types of disabilities and appropriate communication and behaviour towards PwD

KU9. different types of financial products and services

Qualification Pack

- KU10.** how to compute income and expenses
- KU11.** importance of maintaining safety and security in financial transactions
- KU12.** different legal rights and laws
- KU13.** how to operate digital devices and applications safely and securely
- KU14.** ways to identify business opportunities
- KU15.** types of customers and their needs
- KU16.** how to apply for a job and prepare for an interview
- KU17.** apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate effectively using appropriate language
- GS2.** behave politely and appropriately with all
- GS3.** perform basic calculations
- GS4.** solve problems effectively
- GS5.** be careful and attentive at work
- GS6.** use time effectively
- GS7.** maintain hygiene and sanitisation to avoid infection

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training centre (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/training centre based on this criterion.
6. To pass the Qualification Pack, every trainee should score a minimum of 70% of aggregate marks to successfully clear the assessment.
7. In case of unsuccessful completion, the trainee may seek reassessment on the

Qualification Pack

Qualification Pack.

Minimum Aggregate Passing % at QP Level : 70

(**Please note:** Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Assessment Weightage

Compulsory NOS

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.
Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.

Qualification Pack

Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
