## Qualification Pack

### FIC/Q9003: Production Manager (Processed Food Industry)

#### Brief Job Description

A Production Manager (Food) in the food processing industry oversees the entire production process, ensuring the efficient and timely production of various food products. This includes production planning, coordinating with various departments, and implementing quality and safety standards to meet both organizational goals and regulatory requirements. The role also involves managing documentation, ensuring compliance with food safety systems (e.g., FSSAI, HACCP), and leading continuous improvement initiatives to optimize production efficiency and sustainability.

#### Personal Attributes

The individual should have attention to detail, good leadership and swift problem-solving skills. The person should be organized, proactive about safety and compliance, and skilled at managing cross-functional teams. Other key requirements include strong communication, mathematical, analytical, and advanced computer and organizational skills.

#### Applicable National Occupational Standards (NOS)

##### Compulsory NOS:

1. [FIC/N9014: Manage production processes in the food processing unit](#)
2. [FIC/N9015: Manage production optimization and cost efficiency in the food processing unit](#)
3. [FIC/N9016: Manage documentation and implement safety and environmental policies in the food processing unit](#)
4. [FIC/N9906: Apply food safety guidelines in Food Processing](#)
5. [DGT/VSQ/N0102: Employability Skills \(60 Hours\)](#)

### FIC/N9014: Manage production processes in the food processing unit

#### Description

This unit is about managing the production processes in the food processing unit by leading the production team, planning and executing production schedules, coordinating with the maintenance team, monitoring performance and ensuring that all stages of production are carried out efficiently, safely, and in compliance with regulatory standards.

#### Scope

The scope covers the following :

- Lead the production team
- Plan production and execution
- Coordinate with the maintenance team
- Monitor and improve production
- Conduct new product trials

#### Elements and Performance Criteria

##### *Lead the production team*

To be competent, the user/individual on the job must be able to:

- PC1.** communicate organizational policies and goals, ensuring the production team understands and aligns with objectives
- PC2.** achieve department targets through effective leadership tailored to both organizational needs and employee capabilities
- PC3.** engage regularly with employees, offering feedback and addressing concerns to build trust and support
- PC4.** motivate and recognize employees in achieving work and development goals
- PC5.** encourage employees to take responsibility, make decisions, and lead within their expertise
- PC6.** oversee personnel actions like promotions, transfers, and disciplinary measures
- PC7.** lead the production team through challenges and obstacles.
- PC8.** coordinate efficiently with team members and allocate tasks based on skills and production requirements

##### *Plan production and execution*

To be competent, the user/individual on the job must be able to:

- PC9.** review sales forecasts, production plans, and market demands to set production priorities
- PC10.** confirm resource availability (materials, equipment, manpower) to meet production targets
- PC11.** plan production in terms of output, quality, cost, time, and manpower
- PC12.** analyze risks of missing delivery timelines and notify relevant stakeholders if issues arise
- PC13.** develop production schedules within budget and available resources, coordinating with other departments
- PC14.** communicate production schedules through the organization's systems (e.g., email, ERP)

## Qualification Pack

### *Coordinate with the maintenance team*

To be competent, the user/individual on the job must be able to:

- PC15.** share production schedules with maintenance teams to ensure alignment for equipment availability
- PC16.** coordinate with maintenance for required materials, consumables, and manpower to avoid disruptions
- PC17.** oversee equipment maintenance during breakdowns, emergencies, or routine servicing
- PC18.** analyze equipment performance data to assess production capacity
- PC19.** ensure equipment reliability and minimal downtime through collaboration with maintenance teams
- PC20.** foster strong communication between production and maintenance to optimize performance and identify improvement opportunities
- PC21.** ensure maintenance procedures comply with food safety and environmental standards
- PC22.** collaborate with the maintenance team to schedule and oversee preventive maintenance activities, ensuring minimal disruption to production processes

### *Monitor and improve production*

To be competent, the user/individual on the job must be able to:

- PC23.** monitor raw materials, packaging, manpower, and wastage during production, addressing variances
- PC24.** resolve issues affecting production targets within allocated budgets
- PC25.** adjust production schedules to account for variables impacting output
- PC26.** track production costs and outputs, optimizing processes to reduce expenses and improve quality
- PC27.** reschedule production when needed, minimizing wastage and ensuring efficient resource use
- PC28.** review production processes regularly, identifying and implementing improvement opportunities
- PC29.** set and implement policies and procedures to enhance production yield, quality, and cost control
- PC30.** ensure documentation meets audit requirements (e.g., ISO, HACCP) and organizational standards
- PC31.** implement training and development initiatives to continuously upskill the workforce, optimize production processes, and drive operational improvements

### *Conduct new product trials*

To be competent, the user/individual on the job must be able to:

- PC32.** manage trial production by aligning objectives, processes, and roles with cross-functional teams
- PC33.** develop technical procedures for trials and train the team on new processes
- PC34.** identify and mitigate hazards during trials, providing necessary training
- PC35.** schedule trials without disrupting regular production and ensure resource availability
- PC36.** monitor trial production, adjusting processes to meet specifications
- PC37.** document trial outcomes and recommend improvements, sharing findings with relevant stakeholders

## Qualification Pack

- PC38.** coordinate with the Research and Development (R&D) and quality teams to plan and execute new product trials, ensuring adherence to production and quality standards

### Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** how to effectively communicate company goals, values, and policies to the production team
- KU2.** various leadership approaches and their application depending on team dynamics, individual capabilities, and organizational goals
- KU3.** the techniques to engage, motivate, and provide feedback to team members, fostering a culture of accountability and continuous improvement
- KU4.** the best practices for managing personnel actions such as promotions, transfers, disciplinary measures, and resolving workplace conflicts
- KU5.** effective team building practices to foster collaboration, encourage initiative, and lead the team through challenges
- KU6.** sales forecasting and market trend analysis to set accurate production priorities
- KU7.** how to assess and confirm the availability of critical resources such as raw materials, packaging, equipment, and manpower to meet production demands
- KU8.** how to develop and manage production schedules that align with output, quality, time, and budget requirements, while coordinating across departments
- KU9.** the risk identification techniques to address potential production delays
- KU10.** using of appropriate ERP systems and communication tools to manage and share production schedules
- KU11.** the equipment maintenance requirements, including preventive, corrective, and emergency maintenance, to minimize downtime and ensure consistent production
- KU12.** the importance of effective communication and collaboration with maintenance teams
- KU13.** how to interpret equipment performance data to assess production capabilities and identify areas for improvement
- KU14.** the regulatory requirements for equipment maintenance related to food safety (e.g., HACCP) and environmental standards
- KU15.** how to monitor the usage of raw materials, packaging, manpower, and wastage against production plans, and address variances
- KU16.** the importance of tracking production costs, and implementing improvements to optimize yield, product quality and minimize expenses
- KU17.** the importance of adjusting production schedules in response to unforeseen variables or urgent requirements
- KU18.** the continuous improvement methodologies (e.g., Lean, Six Sigma) to review and enhance production processes
- KU19.** the documentation and audit requirements for food processing, including compliance with ISO, HACCP, and other relevant standards
- KU20.** the objectives and processes involved in managing trial production runs, including alignment with cross-functional teams, e.g. QA, maintenance, planning
- KU21.** the potential hazards during trial production and strategies for hazard prevention and control

## Qualification Pack

- KU22.** the process of scheduling and conducting trial production without disrupting regular production
- KU23.** the trial production monitoring and documentation requirements

### Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** convey organizational policies, production schedules, and feedback clearly across teams
- GS2.** lead and motivate the production team, fostering accountability and performance
- GS3.** develop and manage production schedules, ensuring resources are aligned with priorities
- GS4.** address production challenges and risks, optimizing processes and minimizing disruptions
- GS5.** coordinate effectively with cross-functional teams, including maintenance and R&D, to meet production goals
- GS6.** make informed decisions about personnel actions, resource allocation, and production adjustments
- GS7.** analyze production data, equipment performance, and trial outcomes to drive improvements
- GS8.** ensure timely execution of production plans and trials without disrupting ongoing operations

## Qualification Pack

### Assessment Criteria

| Assessment Criteria for Outcomes                                                                                                    | Theory Marks | Practical Marks | Project Marks | Viva Marks |
|-------------------------------------------------------------------------------------------------------------------------------------|--------------|-----------------|---------------|------------|
| <i>Lead the production team</i>                                                                                                     | <b>7</b>     | <b>9</b>        | -             | <b>4</b>   |
| <b>PC1.</b> communicate organizational policies and goals, ensuring the production team understands and aligns with objectives      | 1            | 1               | -             | 0.5        |
| <b>PC2.</b> achieve department targets through effective leadership tailored to both organizational needs and employee capabilities | 1            | 1               | -             | 0.5        |
| <b>PC3.</b> engage regularly with employees, offering feedback and addressing concerns to build trust and support                   | 1            | 1               | -             | 0.5        |
| <b>PC4.</b> motivate and recognize employees in achieving work and development goals                                                | 1            | 1               | -             | 0.5        |
| <b>PC5.</b> encourage employees to take responsibility, make decisions, and lead within their expertise                             | 1            | 1               | -             | 0.5        |
| <b>PC6.</b> oversee personnel actions like promotions, transfers, and disciplinary measures                                         | 1            | 2               | -             | 0.5        |
| <b>PC7.</b> lead the production team through challenges and obstacles.                                                              | 0.5          | 1               | -             | 0.5        |
| <b>PC8.</b> coordinate efficiently with team members and allocate tasks based on skills and production requirements                 | 0.5          | 1               | -             | 0.5        |
| <i>Plan production and execution</i>                                                                                                | <b>6</b>     | <b>10</b>       | -             | <b>4</b>   |
| <b>PC9.</b> review sales forecasts, production plans, and market demands to set production priorities                               | 1            | 1               | -             | 1          |
| <b>PC10.</b> confirm resource availability (materials, equipment, manpower) to meet production targets                              | 1            | 1               | -             | 0.5        |
| <b>PC11.</b> plan production in terms of output, quality, cost, time, and manpower                                                  | 1            | 2               | -             | 0.5        |
| <b>PC12.</b> analyze risks of missing delivery timelines and notify relevant stakeholders if issues arise                           | 1            | 1               | -             | 0.5        |

## Qualification Pack

| Assessment Criteria for Outcomes                                                                                                                                  | Theory Marks | Practical Marks | Project Marks | Viva Marks |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|-----------------|---------------|------------|
| <b>PC13.</b> develop production schedules within budget and available resources, coordinating with other departments                                              | 1            | 2               | -             | 0.5        |
| <b>PC14.</b> communicate production schedules through the organization's systems (e.g., email, ERP)                                                               | 1            | 3               | -             | 1          |

## Qualification Pack

# FIC/N9015: Manage production optimization and cost efficiency in the food processing unit

## Description

This unit is about driving production optimization and cost efficiency in the food processing unit by streamlining processes, reducing waste, and implementing cost-effective practices to enhance productivity while maintaining quality and safety standards

## Scope

The scope covers the following :

- Optimize production
- Manage utilities and energy
- Implement production process changes
- Manage the production budget

## Elements and Performance Criteria

### *Optimize production*

To be competent, the user/individual on the job must be able to:

- PC1.** analyze production data, including equipment performance, process efficiency, downtime, and maintenance to identify performance issues and recommend improvements
- PC2.** collect and analyze performance data to pinpoint inefficiencies, propose cost-saving measures, and implement approved process changes
- PC3.** collaborate with supervisors and operators to resolve production issues, identify appropriate solutions, monitor implementation, and review outcomes
- PC4.** ensure adherence to food safety, quality, and regulatory standards during optimization efforts
- PC5.** utilize technology and innovative practices to optimize production processes, enhance efficiency, and drive continuous improvement

### *Manage utilities and energy*

To be competent, the user/individual on the job must be able to:

- PC6.** assess energy and utility consumption, and develop strategies to minimize without compromising production
- PC7.** detect sources of waste, propose and implement solutions to optimize utility usage, and monitor results
- PC8.** implement methods to recycle resources (e.g. water) and maintain efficient production scheduling while controlling utility costs
- PC9.** incorporate sustainable practices and innovative technologies to reduce environmental impact

### *Implement production process changes*

To be competent, the user/individual on the job must be able to:

## Qualification Pack

- PC10.** identify areas for process improvement, assess the impact on quality and operations, and communicate the need for change
- PC11.** develop new processes, assign responsibilities, and provide training to ensure smooth transition and compliance with regulations
- PC12.** monitor the implementation of changes, ensure effectiveness, and recognize employee contributions to efficiency improvements
- PC13.** manage resistance to change by utilizing effective communication, leadership, and problem-solving skills to facilitate successful implementation of new production processes

### *Manage the production budget*

To be competent, the user/individual on the job must be able to:

- PC14.** manage production within the allocated budget by optimizing workforce and avoiding unnecessary overtime
- PC15.** investigate discrepancies between actual and budgeted costs and take appropriate corrective actions to maintain financial control
- PC16.** motivate the team to propose cost-reduction ideas and implement feasible suggestions to encourage cost-saving
- PC17.** utilize data analytics and appropriate software to make informed decisions on production efficiency and cost management
- PC18.** implement and integrate Industry 4.0 tools, e.g. Internet of Things (IoT) sensors, predictive analytics, and AI-driven optimization to enhance production efficiency, predictive maintenance, and real-time decision-making
- PC19.** develop and implement contingency plans to manage sudden disruptions like equipment failures or supply chain issues, ensuring minimal impact on production

## Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** the principles and processes involved in business operations, including financial, marketing, and production
- KU2.** the strategies, policies, procedures, and standards relevant to production and cost management
- KU3.** the accounting models and financial planning to manage production budgets effectively
- KU4.** the budgetary systems and methodologies to monitor, control, and evaluate performance against budgets, including variance analysis
- KU5.** the code of business conduct and ethical standards in managing production
- KU6.** workforce modelling, planning, and efficient utilization
- KU7.** production management, including product-specific processes in food manufacturing
- KU8.** the process equipment design, capability, operational protocols, and maintenance requirements to ensure optimal performance
- KU9.** the process improvement tools and techniques such as Lean, Six Sigma, and Kaizen to enhance efficiency
- KU10.** the appropriate methods to identify and assess current performance metrics and improvement opportunities, using data analysis

## Qualification Pack

- KU11.** the techniques to analyze process data for performance evaluation and troubleshooting
- KU12.** the statistical tools for analyzing process capability and identifying trends, such as Statistical Process Control (SPC)
- KU13.** the methods to calculate and analyze energy and utility consumption and strategies to minimize waste and inefficiencies
- KU14.** the techniques for analyzing current processes, procedures, and structures that need modification for performance improvement
- KU15.** the rationale, risks, and benefits of implementing changes in production processes
- KU16.** the methods to assess the benefits and risks associated with proposed changes
- KU17.** the strategies to influence and drive the change process within management, including stakeholder communication and engagement
- KU18.** the best practices for optimizing energy and utilities in production, including energy recycling and loss prevention techniques
- KU19.** the methods to identify, assess, and implement energy-saving strategies without impacting production efficiency
- KU20.** the Food Safety and Standards Authority of India (FSSAI) and other relevant food regulatory systems
- KU21.** Good Manufacturing Practices (GMP), Good Hygiene Practices (GHP), and their role in ensuring food safety
- KU22.** Hazard Analysis and Critical Control Points (HACCP) for identifying and mitigating food safety risks
- KU23.** Quality Management Systems (QMS) including ISO standards for maintaining product quality and consistency
- KU24.** ISO standards (ISO 22000, ISO 9001) for food safety and quality management
- KU25.** Occupational Health and Safety Management Systems (OHSAS) to ensure a safe working environment in the production unit
- KU26.** the Industry 4.0 tools, such as IoT sensors, predictive analytics, and AI-driven optimizations
- KU27.** the contingency planning methods to effectively manage sudden disruptions
- KU28.** the importance of contingency planning in production processes

## Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** analyze production data, identify inefficiencies, and propose improvements using data-driven insights
- GS2.** resolve production issues and implement cost-saving measures through collaboration and innovative solutions
- GS3.** communicate clearly to facilitate process changes, ensure team alignment, and address resistance to change
- GS4.** lead teams through transitions and optimization efforts while maintaining adherence to quality and regulatory standards
- GS5.** incorporate sustainable practices and energy-efficient methods to reduce waste and control costs

## Qualification Pack

- GS6.** optimize production costs within budget, identify discrepancies, and implement cost-control strategies
- GS7.** utilize Industry 4.0 tools, such as IoT sensors and predictive analytics, to enhance production efficiency and decision-making
- GS8.** manage disruptions effectively and changes in production processes through contingency planning and process improvements

## Qualification Pack

### FIC/N9016: Manage documentation and implement safety and environmental policies in the food processing unit

#### Description

This unit is about ensuring accurate documentation and implementing safety and environmental policies in the food processing unit by maintaining compliance with regulatory standards, overseeing audits, and enforcing protocols for a safe and sustainable production environment.

#### Scope

The scope covers the following :

- Implement and monitor documentation system in production
- Implement and monitor safety and environmental management policies

#### Elements and Performance Criteria

##### *Implement and monitor documentation system in production*

To be competent, the user/individual on the job must be able to:

- PC1.** train the production team on the importance and use of documentation
- PC2.** ensure all documents are accurate, up-to-date, systematically maintained and accessible for audits.
- PC3.** facilitate access to auditors for relevant records and information
- PC4.** ensure corrective actions are documented to maintain compliance with organizational and regulatory standards
- PC5.** develop systems to track production data from maintained records
- PC6.** leverage digitalization and modern technology to implement automated documentation systems, for accurate real-time data tracking and reporting

##### *Implement and monitor safety and environmental management policies*

To be competent, the user/individual on the job must be able to:

- PC7.** communicate the importance of safety and environmental regulations to the team and ensure awareness of policies
- PC8.** collaborate with the quality team to develop and implement safety and environmental SOPs in the production processes
- PC9.** ensure compliance with safety protocols in the production area
- PC10.** ensure safety and environmental SOPs are easily accessible to all team members and ensure adherence to regulations
- PC11.** identify and mitigate safety and environmental hazards in production
- PC12.** organize safety and environmental training for staff to control and prevent hazards
- PC13.** conduct regular inspections to ensure the use of protective gear and adherence to safety systems
- PC14.** review safety records and conduct audits to monitor compliance, addressing any non-compliance

## Qualification Pack

- PC15.** implement and oversee waste management processes, ensuring compliance with environmental regulations
- PC16.** respond promptly to environmental hazards and incidents
- PC17.** conduct risk assessments, address safety gaps, and ensure continuous improvement of safety procedures
- PC18.** analyze environmental records and implement improvements to meet industry and regulatory standards

## Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** the documentation and records management system, including methods to organize and maintain up-to-date records for audits
- KU2.** the QMS, including its key components like process control, continuous improvement, and quality assurance standards
- KU3.** the Environmental Management System (EMS), including policies on waste management, pollution prevention, and sustainability
- KU4.** the quality mark accreditations, such as ISO certifications, and their relevance to production
- KU5.** the audit procedures and audit requirements to ensure compliance with industry and regulatory standards
- KU6.** the health and safety policy in food processing to ensure employee safety and minimize workplace hazards
- KU7.** the food safety systems like FSSAI and other international regulatory frameworks such as Food Safety Modernization Act (FSMA)
- KU8.** the importance and methods to ensure complete, accurate, and up-to-date documentation to meet compliance and regulatory standards
- KU9.** the methods for conducting internal and external audits to identify discrepancies, non-compliance, and opportunities for improvement
- KU10.** the techniques to identify potential risks to the organization and employees, as well as procedures for resolving system discrepancies
- KU11.** how to identify and analyze inherent problems with production processes, and suggest corrective measures to improve efficiency and compliance
- KU12.** the applicable regulations, guidelines, and codes of practice related to health, food safety, hygiene, and sanitation
- KU13.** the environmental standards, including compliance with regulatory requirements on waste disposal, recycling, and resource conservation
- KU14.** the physical, chemical, and biological hazards in food production and methods to measure, control, and prevent them
- KU15.** how to establish systems for monitoring, measuring, and reporting on health, safety, and environmental performance
- KU16.** the audit procedures for ensuring food safety, hygiene, and sanitation compliance
- KU17.** how to implement safety protocols in a food processing unit to ensure employee protection and adherence to GMP, GHP, and HACCP

## Qualification Pack

**KU18.** the food regulatory systems and procedures for obtaining certifications and maintaining compliance

### Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** ensure accurate, up-to-date documentation and compliance with safety and environmental standards
- GS2.** communicate the documentation, safety, and environmental policies to the production team
- GS3.** conduct training on documentation systems and safety/environmental protocols to build team competency
- GS4.** identify and mitigate safety and environmental hazards while maintaining compliance through corrective actions
- GS5.** maintain and track production data, safety records, and compliance documentation systematically
- GS6.** leverage digital tools and automated systems for real-time documentation and monitoring
- GS7.** facilitate audits by ensuring easy access to up-to-date records and compliance documentation
- GS8.** conduct risk assessments, audits, and inspections to identify safety and environmental gaps and drive continuous improvement

## Qualification Pack

### Assessment Criteria

| Assessment Criteria for Outcomes                                                                                                                           | Theory Marks | Practical Marks | Project Marks | Viva Marks |

## Qualification Pack

### FIC/N9906: Apply food safety guidelines in Food Processing

#### Description

This unit covers the essential components of food safety, Good Manufacturing Practices (GMP), and personal hygiene in the food industry. It emphasizes the importance of individuals working in the food industry in protecting the health and well-being of consumers by following food safety protocols and procedures and ensuring the production of safe and high-quality food products.

#### Scope

The scope covers the following :

- Apply personal hygiene and follow Good Manufacturing practices at the workplace.
- Implement Food Safety and pre-requisite programs (PRP) at the workplace.

#### Elements and Performance Criteria

##### *Apply personal hygiene and follow Good Manufacturing practices at workplace*

To be competent, the user/individual on the job must be able to:

- PC1.** PC1. follow a site relevant documented procedure for Personal Hygiene and Visitor/ Contractor rules.
- PC2.** PC2. follow work instructions at levels of employees inside a food manufacturing site and ensure that the relevant instructions are well communicated and being followed at the fixed timelines.
- PC3.** PC3. ensure timely participate and carry out the relevant training and awareness sessions on personal hygiene, GMP, and related topics.
- PC4.** PC4. ensure timely medical examination from a prescribed and authorized doctor and comply with the guidelines of Schedule IV as described in Food Safety Standard Authority of India (FSSAI) guidelines.
- PC5.** PC5. fill in data in the daily monitoring checklist related to personal hygiene, food safety, and GMP.
- PC6.**
  - PC6. follow a site-relevant documented procedure and area-wise work instructions for Good Manufacturing Practices (GMP) to be followed on the site.
  - procedure: Hand washing requirements, Gowning & De gowning protocols, cleaning, and sanitation of employee lockers, follow the protocols as laid down in the different categories of processing areas like Low Risk, High Risk, High Care areas, etc.
- PC7.** PC7. follow all validated Do's & Don'ts inside a food manufacturing firm.
- PC8.** PC8. follow man and materials movement throughout the production facility, to restrict unwanted hazards to cross-contaminate the products which are being manufactured in the facility.
- PC9.** PC9. refer to the process flow charts, HACCP summary plan, and critical process parameters in each and respective areas of the production line.
- PC10.** PC10. identify the material requirements such as manufacturing equipments, Utensils, and other processing aids, cleaning chemicals, and cleaning work instructions in all the relevant areas of the manufacturing facility. Also, a special focus shall be given to Allergens and their risks. Wherever required, the allergen requirements shall be separately addressed.

## Qualification Pack

- PC11.** PC11. ensure to properly tag and number all the equipment, machinery, tools, and other processing aids to keep proper traceability of the product being manufactured and handled at the site.
- PC12.** PC12. follow and implement all training and awareness guidelines in the manufacturing area and regularly participate in training effectiveness for evaluation.
- PC13.** PC13. participate in audits and address the aspects of Good Manufacturing Procedures, personal hygiene, and food safety.
- PC14.** PC14. ensure the record keeping and documentation such as Daily Monitoring Sheets, Batch Traceability Records, machine records, product parameters, process control parameters, etc.

### *Implement food safety practices at the workplace*

To be competent, the user/individual on the job must be able to:

- PC15.** PC15. maintain updated facilities, equipment, and tool and design requirements to minimize the risks associated with the products being handled at the site.
- PC16.** PC16. follow the instruction in the raw and packaging materials warehouse and ensure receiving material parameters match all the laid requirements. parameters: Incoming vehicles Visual report, storage, and handling requirements, hazardous and non-hazardous goods, allergens, cross-contamination risks, Quarantine, Accepted & rejected goods, monitoring temperature and humidity, etc.
- PC17.** PC17. follow FSSAI Schedule IV requirements related to Pest Control, Cleaning, and Sanitation, Utilities, Waste Disposal, Prevention of Cross-Contamination, allergen management, corrective action, preventive actions, food operation control etc.
- PC18.** PC18. ensure timely check of the critical control points and product parameters.
- PC19.** PC19. record keeping and documentation such as daily monitoring sheets, cleaning sheets, parameters, etc.
- PC20.** PC20. report any food safety and GMP issue to the supervisor, if any.

## Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** importance of personal hygiene, GMP, visitors & contractor's rules. Associated risk in case of deviation from the standard policies and how the requirement is linked with the site's FSSAI License.
- KU2.** KU2. importance of training and work instruction delivered by the supervisors.
- KU3.** KU3. importance of filling the records and checklists, formats and how to ensure that the timely and effective completion is achieved.
- KU4.** KU4. knowledge of trainings and skills required to perform in food processing premises.
- KU5.** KU5. understand FSSAI Schedule IV requirements of food handlers and PRPs within the processing area
- KU6.** KU6. importance of timely medical examinations and awareness of communicable diseases
- KU7.** Understanding of Do's & Don'ts, intellect mindset to understand the visual illustrations
- KU8.** KU8. understanding about Site Zoning plans.
- KU9.** KU9. awareness of layout which would help to demarcate the defined movements of RM, PM, FG, and wastes generated during the processing of goods. This one lays a framework to launch Good Manufacturing Practices (GMP) successfully and effectively on site.

## Qualification Pack

- KU10.** KU10. understand the manufacturing process, product parameters and process control parameters such as CCPs
- KU11.** KU11. understanding about Hazard Analysis and Critical Control Points (HACCP)
- KU12.** KU12. understanding about Allergens and their types and controls to monitor effective handling of allergen raw materials on site.
- KU13.** KU13. basic understanding of traceability and mock recall
- KU14.** KU14. awareness about Internal & external Audits
- KU15.** KU15. understanding for RCA CAPA, cleaning and sanitation
- KU16.** KU16. awareness about record keeping and data monitoring in various sheets as per organizational requirement

## Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** GS1. read and comprehend basic content to read labels, charts, signages, symbols and product manuals
- GS2.** GS2. communicate with coworkers appropriately to clarify instructions and other issues
- GS3.** GS3. plan and organize the work schedule, work area, tools, equipment, and materials for improved productivity
- GS4.** GS4. plan and prioritize tasks as per work requirements
- GS5.** GS5. always be punctual and courteous
- GS6.** GS6. good observations and intellect mindset

## Qualification Pack

### Assessment Criteria

| Assessment Criteria for Outcomes                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Theory Marks | Practical Marks | Project Marks | Viva Marks |

### DGT/VSQ/N0102: Employability Skills (60 Hours)

#### Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

#### Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Career Development & Goal Setting
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

#### Elements and Performance Criteria

##### *Introduction to Employability Skills*

To be competent, the user/individual on the job must be able to:

- PC1.** identify employability skills required for jobs in various industries
- PC2.** identify and explore learning and employability portals

##### *Constitutional values – Citizenship*

To be competent, the user/individual on the job must be able to:

- PC3.** recognize the significance of constitutional values, including civic rights and duties, citizenship, responsibility towards society etc. and personal values and ethics such as honesty, integrity, caring and respecting others, etc.
- PC4.** follow environmentally sustainable practices

##### *Becoming a Professional in the 21st Century*

To be competent, the user/individual on the job must be able to:

- PC5.** recognize the significance of 21st Century Skills for employment
- PC6.** practice the 21st Century Skills such as Self-Awareness, Behaviour Skills, time management, critical and adaptive thinking, problem-solving, creative thinking, social and cultural awareness, emotional awareness, learning to learn for continuous learning etc. in personal and professional life

##### *Basic English Skills*

To be competent, the user/individual on the job must be able to:

## Qualification Pack

- PC7.** use basic English for everyday conversation in different contexts, in person and over the telephone
- PC8.** read and understand routine information, notes, instructions, mails, letters etc. written in English
- PC9.** write short messages, notes, letters, e-mails etc. in English

### *Career Development & Goal Setting*

To be competent, the user/individual on the job must be able to:

- PC10.** understand the difference between job and career
- PC11.** prepare a career development plan with short- and long-term goals, based on aptitude

### *Communication Skills*

To be competent, the user/individual on the job must be able to:

- PC12.** follow verbal and non-verbal communication etiquette and active listening techniques in various settings
- PC13.** work collaboratively with others in a team

### *Diversity & Inclusion*

To be competent, the user/individual on the job must be able to:

- PC14.** communicate and behave appropriately with all genders and PwD
- PC15.** escalate any issues related to sexual harassment at workplace according to POSH Act

### *Financial and Legal Literacy*

To be competent, the user/individual on the job must be able to:

- PC16.** select financial institutions, products and services as per requirement
- PC17.** carry out offline and online financial transactions, safely and securely
- PC18.** identify common components of salary and compute income, expenses, taxes, investments etc
- PC19.** identify relevant rights and laws and use legal aids to fight against legal exploitation

### *Essential Digital Skills*

To be competent, the user/individual on the job must be able to:

- PC20.** operate digital devices and carry out basic internet operations securely and safely
- PC21.** use e- mail and social media platforms and virtual collaboration tools to work effectively
- PC22.** use basic features of word processor, spreadsheets, and presentations

### *Entrepreneurship*

To be competent, the user/individual on the job must be able to:

- PC23.** identify different types of Entrepreneurship and Enterprises and assess opportunities for potential business through research
- PC24.** develop a business plan and a work model, considering the 4Ps of Marketing Product, Price, Place and Promotion
- PC25.** identify sources of funding, anticipate, and mitigate any financial/ legal hurdles for the potential business opportunity

### *Customer Service*

To be competent, the user/individual on the job must be able to:

- PC26.** identify different types of customers
- PC27.** identify and respond to customer requests and needs in a professional manner.

## Qualification Pack

**PC28.** follow appropriate hygiene and grooming standards

*Getting ready for apprenticeship & Jobs*

To be competent, the user/individual on the job must be able to:

**PC29.** create a professional Curriculum vitae (Résumé)

**PC30.** search for suitable jobs using reliable offline and online sources such as Employment exchange, recruitment agencies, newspapers etc. and job portals, respectively

**PC31.** apply to identified job openings using offline /online methods as per requirement

**PC32.** answer questions politely, with clarity and confidence, during recruitment and selection

**PC33.** identify apprenticeship opportunities and register for it as per guidelines and requirements

## Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

**KU1.** need for employability skills and different learning and employability related portals

**KU2.** various constitutional and personal values

**KU3.** different environmentally sustainable practices and their importance

**KU4.** Twenty first (21st) century skills and their importance

**KU5.** how to use English language for effective verbal (face to face and telephonic) and written communication in formal and informal set up

**KU6.** importance of career development and setting long- and short-term goals

**KU7.** about effective communication

**KU8.** POSH Act

**KU9.** Gender sensitivity and inclusivity

**KU10.** different types of financial institutes, products, and services

**KU11.** how to compute income and expenditure

**KU12.** importance of maintaining safety and security in offline and online financial transactions

**KU13.** different legal rights and laws

**KU14.** different types of digital devices and the procedure to operate them safely and securely

**KU15.** how to create and operate an e- mail account and use applications such as word processors, spreadsheets etc.

**KU16.** how to identify business opportunities

**KU17.** types and needs of customers

**KU18.** how to apply for a job and prepare for an interview

**KU19.** apprenticeship scheme and the process of registering on apprenticeship portal

## Generic Skills (GS)

User/individual on the job needs to know how to:

**GS1.** read and write different types of documents/instructions/correspondence

**GS2.** communicate effectively using appropriate language in formal and informal settings

## Qualification Pack

- GS3.** behave politely and appropriately with all
- GS4.** how to work in a virtual mode
- GS5.** perform calculations efficiently
- GS6.** solve problems effectively
- GS7.** pay attention to details
- GS8.** manage time efficiently
- GS9.** maintain hygiene and sanitization to avoid infection

## Qualification Pack

## Assessment Guidelines and Assessment Weightage

### Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

## Qualification Pack

**Minimum Aggregate Passing % at QP Level : 70**

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

|----------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Sector</b>                                | Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.                                                                      |
| <b>Sub-sector</b>                            | Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.                                                                                                                                                                                     |
| <b>Occupation</b>                            | Occupation is a set of job roles, which perform similar/ related set of functions in an industry.                                                                                                                                                                                                |
| <b>Job role</b>                              | Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.                                                                                                                                                                                |
| <b>Occupational Standards (OS)</b>           | OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts. |
| <b>Performance Criteria (PC)</b>             | Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.                                                                                                                                                                    |
| <b>National Occupational Standards (NOS)</b> | NOS are occupational standards which apply uniquely in the Indian context.                                                                                                                                                                                                                       |
| <b>Qualifications Pack (QP)</b>              | QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.                                                                                                                       |
| <b>Unit Code</b>                             | Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'                                                                                                                                                                                                        |
| <b>Unit Title</b>                            | Unit title gives a clear overall statement about what the incumbent should be able to do.                                                                                                                                                                                                        |
| <b>Description</b>                           | Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.                                                                                                                   |
| <b>Scope</b>                                 | Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.                                                                                            |
| <b>Knowledge and Understanding (KU)</b>      | Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.                                                                         |

## Qualification Pack

|                                         |                                                                                                                                                                                                                                                                                                                                                                        |
|-----------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Organisational Context</b>           | Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.                                                                                                                                                                       |
| <b>Technical Knowledge</b>              | Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.                                                                                                                                                                                                                                                               |
| <b>Core Skills/ Generic Skills (GS)</b> | Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles. |
| <b>Electives</b>                        | Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.                                                                            |
| <b>Options</b>                          | Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.                                                                                                                                                          |
| <b>Sector</b>                           | Sector is a conglomeration of different business operations having similar businesses and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.                                                                                                                                          |
| <b>Sub-Sector</b>                       | Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.                                                                                                                                                                                                                                                           |
| <b>Occupation</b>                       | Occupation is a set of job roles, which perform similar/ related set of functions in an industry.                                                                                                                                                                                                                                                                      |
| <b>Job role</b>                         | Job role defines a unique set of functions that together form a unique employment opportunity in an organization                                                                                                                                                                                                                                                       |
| <b>Occupational Standards (OS)</b>      | OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.                                                                       |
| <b>Performance Criteria</b>             | Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.                                                                                                                                                                                                                                          |
| <b>National Occupational Standard</b>   | NOS are occupational standards which apply uniquely in the Indian context.                                                                                                                                                                                                                                                                                             |

## Qualification Pack

|                                           |                                                                                                                                                                                                                                                                                             |
|-------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Qualification Pack</b>                 | QP comprises the set of OS, together with the educational, training, and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.                                                                                                                 |
| <b>Unit Code</b>                          | Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'.                                                                                                                                                                                                  |
| <b>Unit Title</b>                         | Unit title gives a clear overall statement about what the incumbent should be able to do.                                                                                                                                                                                                   |
| <b>Description</b>                        | Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for                                                                                                               |
| <b>Scope</b>                              | Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.                                                                                       |
| <b>Knowledge &amp; Understanding (KU)</b> | Knowledge and Understanding (KU) are statements that together specify, the technical, generic, professional, and organizational specific knowledge that an individual needs in order to perform to the required standard.                                                                   |
| <b>Organizational Context</b>             | Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers has of their relevant areas of responsibility.                                                                                             |
| <b>Technical Knowledge</b>                | Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.                                                                                                                                                                                    |
| <b>Core Skills/Generic skills</b>         | Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication-related skills that are applicable to most job roles.  |
| <b>Electives</b>                          | Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives. |
| <b>Options</b>                            | Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.                                                                               |
