G&J/Q0905: Jewellery

Brief Job Description

Jeweler (the jewellery maker) fabricate and repair various jewellery articles. They create models from wax or metal and they may undertake the casting process (place wax model in casting ring, create moulds, pour molten metal into mould, or operate centrifugal casting machine to cast articles). Jeweler's also cut, saw, file, and solder pieces of jewellery together, using a soldering torch, carving tools and hand tools and polish the article. The individual works with machine and hand tools to create jewellery components such as wire, strips etc. and frames from precious metal as per the design of jewellery pieces and articles. Individual can make exclusive jewellery pieces for use, pieces ready to be set with precious gemstones.

Personal Attributes

The job requires the individual to have precision and excellent craftsmanship, attention to details, good eyesight, visualization, manual and finger dexterity, arm-hand steadiness. The individual is expected to have integrity.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [G&J/N0907: Work organization and management for Jewellery making](#)
2. [G&J/N0908: Design jewellery components](#)
3. [G&J/N0910: Manufacture of precious metal alloys](#)
4. [G&J/N0909: Preparation of precious metal alloys for the manufacture of jewellery components](#)
5. [G&J/N0911: Manufacture of both simple and complex jewellery components](#)
6. [G&J/N0906: Surface finish](#)

Qualification Pack (QP) Parameters

Sector	Gem & Jewellery
Sub-Sector	Handmade Gold and Gems-set Jewellery, Silver Smithing
Occupation	Gold Smithy (Specialized), Component Making/Filling/Assembling

Qualification Pack

Country	India
NSQF Level	4.5
Credits	17
Aligned to NCO/ISCO/ISIC Code	NCO-2015/ 7313.0703
Minimum Educational Qualification & Experience	Ability to read and write (as per world skill standards)
Minimum Level of Education for Training in School	Not Applicable
Pre-Requisite License or Training	NA
Minimum Job Entry Age	22 Years
Last Reviewed On	NA
Next Review Date	28/02/2026
NSQF Approval Date	31/01/2024
Version	1.0
Reference code on NQR	QG-4.5-GJ-01795-2024-V1-GJSCI
NQR Version	1

Remarks:

Competitors must not be older than 22 years in the year of the Competition as mentioned in the world skill technical description for Jewellery skill

Qualification Pack

G&J/N0907: Work organization and management for Jewellery making

Description

This OS unit is about organizing and managing work activity using different planning tools. Also, learn and follow safety guidelines

Scope

The scope covers the following :

- Plan for the work activity
- Follow policies, SOPs, work instructions, etc.
- Health, hygiene and safety in work area
- Use of personal protective equipment

Elements and Performance Criteria

Organizing and managing work

To be competent, the user/individual on the job must be able to:

- PC1.** Follow environmental policies, identify potential breaches of environmental regulations, and suggest improvements within the limit of own authority
- PC2.** Manage the environmental hazards/risks, resource use and inefficiencies associated with own workplace, at an appropriate level
- PC3.** Take account of the relevant environmental and resource efficiency systems and procedures for own work area
- PC4.** Plan a work activity using appropriate planning tools such as technical drawings, sample pieces and sketches or rendered images from 3D digital models, whilst following established procedures, including work health and safety (WHS) requirements
- PC5.** Check the plan to ensure accuracy and conformance and modify the plan components, as necessary, to overcome any unforeseen difficulties or developments
- PC6.** Identify hazards and implementing appropriate risk control measures and procedures
- PC7.** Select, use and maintain relevant personal protective equipment (PPE)
- PC8.** Evaluate the effectiveness of risk controls measures
- PC9.** Follow work instructions, standard operating procedures (SOPs) and safe work practices
- PC10.** Access and record relevant information from a range of sources
- PC11.** Recognize and use workplace appropriate terminology
- PC12.** Read, interpret and follow information in workplace documentation
- PC13.** Check and clarify information
- PC14.** Organize, categorize, and sequence information
- PC15.** Communicate using appropriate methods and procedures for a variety of situations
- PC16.** Create efficient work practices to minimize waste
- PC17.** Interpret technical terminology and symbols
- PC18.** Work with a high degree of accuracy and precision on fine and delicate pieces

Qualification Pack

- PC19.** Operate machinery and tools in a manner that avoids risk to him/ herself or others within the workshop
- PC20.** Gather relevant information, seek input from team members, and engage in effective dialogue to make informed decisions
- PC21.** Effectively communicate, provide, and receive feedback

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** The requirements and implications of jewellery production on the environment and related sustainability issues
- KU2.** Workplace hazards and risks associated with own work role
- KU3.** Sources of advice relating to the objectives, requirements, and specifications
- KU4.** Timeframe for activity completion
- KU5.** Quality requirements of the product or service
- KU6.** Techniques and reasons for prioritizing of each step in a plan
- KU7.** Modifications that can be made to the plan to respond to
- KU8.** unforeseen developments
- KU9.** Risk control measures
- KU10.** Reporting requirements for accidents, incidents, and other nonconformance with WHS procedures
- KU11.** Information analysis techniques appropriate to tasks and position
- KU12.** Methods of categorizing and organizing information including correct sequencing of information
- KU13.** Methods of recording and communicating information
- KU14.** Types of information relevant to the workplace and required tasks
- KU15.** Processes or tools for effective decision making
- KU16.** How to deliver and receive constructive criticism to better work in a collaborative manner
- KU17.** Procedures for checking and maintaining individual specialist tools and shared workshop tools and machines
- KU18.** Safe operation and maintenance of shared workshop machines and individual tools
- KU19.** Procedures for the secure storage of jewellery and materials
- KU20.** Risks attached to the use of natural and propane gas, oxygen, electricity acid, and chemical products
- KU21.** Out-sourcing practices to external contractors for the purposes of electro-plating and the electro-plating process, gemstone mounting and the gemstone mounting process
- KU22.** Processes for manufacturing both single and mass unit production, e.g., 1 piece, 10 pieces, 100 pieces

Generic Skills (GS)

User/individual on the job needs to know how to:

Qualification Pack

- GS1.** read job sheets, technical drawings, etc.
- GS2.** organize required toolkit at the work bench for better time management
- GS3.** communicate effectively with coordinators
- GS4.** to plan for daily work activity
- GS5.** analyze designs based on the 2D sketch

G&J/N0908: Design jewellery components

Description

This OS unit is about designing 2D sketches based on the concepts and customer requirements

Scope

The scope covers the following :

- Design 2D sketches based on the concepts

Elements and Performance Criteria

Designing a jewellery component

To be competent, the user/individual on the job must be able to:

- PC1.** Apply product knowledge to address customer requirements
- PC2.** Propose alternative products and/or services to satisfy customer requirements and taking action to implement these
- PC3.** Identify and interpret specifications
- PC4.** Select equipment appropriate to the illustrating method and requirements and prepare or modify drawings
- PC5.** Approve final illustration as per design information and process in accordance with procedures
- PC6.** Identify purpose and needs, including design restraints, budget considerations, item end-use, proportions and desired features, available materials
- PC7.** Develop research/ideas to a sufficient level to determine customer expectations and/or design outcomes
- PC8.** Communicate concepts in terms suitable to relevant customer or other contacts e.g., engineer, master pattern maker
- PC9.** Clearly communicate the degree to which the customer requirements can be met
- PC10.** Document and maintain design processes, features, and design development notes relevant to the iterative process
- PC11.** Use callouts as visual cues to quickly and efficiently communicate design intent and thought process
- PC12.** Produce basic form drawings/sketches that accurately reflect the design concept; this can extend to shadow, and highlight techniques for emphasis to display jewellery design concepts and rendering illustrations
- PC13.** Seek input from others who have relevant expertise or diverse perspectives
- PC14.** Engage in discussions, participate in forums, or consult with colleagues, mentors, or subject matter experts
- PC15.** Identify and solve problems that may affect design form or functionality

Knowledge and Understanding (KU)

Qualification Pack

The individual on the job needs to know and understand:

- KU1.** Specialist techniques both historical and regional
- KU2.** Features and characteristics of products and services offered
- KU3.** Product and service availability and processes
- KU4.** Range of customer requirements for product/service and alternatives available
- KU5.** Reasons for informing the customer promptly of the ability/inability to meet the customer requirements
- KU6.** Strategies for managing customer issues
- KU7.** Record keeping requirements of customer service interactions and transactions
- KU8.** Iterative processes to enable effective development of client designs
- KU9.** Potential problems or limitations that may affect or limit a client's design
- KU10.** Effective communication techniques to better understand client needs
- KU11.** Trends, innovations, and breakthroughs in relevant design fields
- KU12.** Methods to establish rapport with customers aimed at providing a positive customer experience
- KU13.** Design resources and where to locate them
- KU14.** Research techniques and available resources
- KU15.** Existing designs, ethical and competitive considerations
- KU16.** Applicable industry standards or regulations
- KU17.** Design principles including form, function, harmony, line definition (interpretive/actual)
- KU18.** Drawing media and their purposes/applications including paper, ink/pencil/stencils/erasers, etc.
- KU19.** Rules and methods of displaying ideas and concepts through basic sketches and drawings
- KU20.** Available manufacturing technologies and their suitability for jewellery manufacture
- KU21.** The interrelationship of technical and design drawings
- KU22.** Two Dimensional and Three Dimensional drawing techniques
- KU23.** Elements and principles of design of basic and complex jewellery components
- KU24.** Terminology and symbols used in technical drawings produced from CAD software
- KU25.** Jewellery construction techniques
- KU26.** The use of techniques associated with applying texturing to precious metal surfaces for creative effect
- KU27.** How to extract mass and area properties using 3D design software
- KU28.** Information on specifications, design documentation, illustrations, design drawings and other applicable source documents
- KU29.** Industry requirements and availability of industry expertise
- KU30.** Safe work practices

Generic Skills (GS)

User/individual on the job needs to know how to:

Qualification Pack

- GS1.** read job sheets, design sheets technical drawings, etc.
- GS2.** organize required toolkit at the work bench for better time management
- GS3.** communicate effectively with coordinators
- GS4.** to plan for daily work activity
- GS5.** analyze designs based on the 2D sketch

G&J/N0910: Manufacture of precious metal alloys

Description

This OS unit is about manufacturing precious metal alloys by casting process.

Scope

The scope covers the following :

- Calculate the quantities of fine precious metals and base metals required for making alloys
- Cast precious metal alloy ingots and bars

Elements and Performance Criteria

Make precious metal alloys

To be competent, the user/individual on the job must be able to:

- PC1.** Recognize authenticity and quality signs for precious metals
- PC2.** Source precious metals of the correct price and quality for jewellery manufacture
- PC3.** Calculate the proportions and quantities of fine precious metals and base metals required for any predetermined amount of any recognized precious metal alloy
- PC4.** Cast precious metal alloy ingots and bars of any predetermined weight, with a minimum of residual impurities, ready to be milled or rolled in preparation for the manufacture of jewellery components

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** The content of precious metal alloys and the impact that additives have on the precious metal in terms of colour, pliability, and durability
- KU2.** How alloys react to various processes used by the jewellery maker
- KU3.** The properties of precious metal alloys and their solders
- KU4.** Laws and regulations relating to precious metal content for sale and export
- KU5.** Assaying processes and procedures for the country of operation, purchase, and sale of jewellery products
- KU6.** Forms in which precious metals are sold, such as sheet/wire/ granules etc.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read job sheets, technical drawings, etc.
- GS2.** organize required toolkit at the work bench for better time management
- GS3.** communicate effectively with coordinators

Qualification Pack

GS4. to plan for daily work activity

GS5. calculate the weight using basic mathematical formulae

G&J/N0909: Preparation of precious metal alloys for the manufacture of jewellery components

Description

This OS unit is about making various basic jewellery components using different tools and equipment.

Scope

The scope covers the following :

- Make metal sheets and wire of different shapes and sizes

Elements and Performance Criteria

Make basic components for jewellery pieces

To be competent, the user/individual on the job must be able to:

- PC1.** Manufacture precious metal sheet or square wire, and reduce to any pre-determined thickness using manual or electrically powered rolling mills
- PC2.** Manufacture and reduce the thickness of square or round wire in precious metal alloys to any pre-determined dimensions using drawing banks
- PC3.** Manufacture round wire from square wire, and reduce to any predetermined diameter using a drawing bank
- PC4.** Use basic mathematical formulas to calculate metal weights and reach desired dimensions

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Properties and applications of various recognized precious metal alloys
- KU2.** Procedures for the transformation of precious metal alloy ingots in preparation for the manufacture of jewellery components
- KU3.** Applications and uses for different recognized precious metals

G&J/N0911: Manufacture of both simple and complex jewellery components

Description

This OS unit is about making simple and complex jewellery pieces using various tools and processes.

Scope

The scope covers the following :

- Calculate the quantities of fine precious metals and base metals required for making alloys
- Cast precious metal alloy ingots and bars

Elements and Performance Criteria

Make a jewellery components

To be competent, the user/individual on the job must be able to:

- PC1.** Manufacture Chenier/tubes and reduce to any predetermined diameters using a drawing bank
- PC2.** Transform precious metal alloy sheet, wire or Chenier/tube into simple jewellery components employing bending, shaping, and forming to conform to any shape pre-determined by technical drawing or sample component
- PC3.** Drill precious metals accurately to conform to any shape predetermined by technical drawings or sample component
- PC4.** Transform simple jewellery components employing abrasive techniques such as milling, grinding, filing, ajour-sawing etc. to conform to any shape pre-determined by technical drawings or sample components
- PC5.** Hammer, emboss, shape or dome precious metal sheets of appropriate thickness into low relief, to conform to any shapes predetermined by technical drawings or sample components using appropriate doming tools
- PC6.** Manufacture settings for precious gemstones to conform to shapes or designs pre-determined by technical drawings or sample components
- PC7.** Manufacture functioning mechanisms for jewellery such as hinges, clasps, articulations, pressure snaps riveting and screw threads as determined by technical drawings or sample components, or of their own design
- PC8.** Ensure that manufactured functioning components can withstand constant use without sacrificing any mechanical properties
- PC9.** Assemble basic jewellery components and complex jewellery components into completed jewellery pieces by means of precious metal solder joins to conform to any designs pre-determined by technical drawing or sample components
- PC10.** Repair damaged or worn pieces of jewellery so that the restored pieces will be indistinguishable from their original aspect at the time of manufacture

Knowledge and Understanding (KU)

Qualification Pack

The individual on the job needs to know and understand:

- KU1.** Legislation and regulations regarding the purchase, production, and sale of precious metals, gemstones, and finished pieces
- KU2.** Various jewellery components and their uses
- KU3.** Techniques and methods for forming and constructing components and methods for finishing components
- KU4.** A sufficient understanding of gemstone setting to ensure the successful seating and setting of a gemstone by a professional gem setter
- KU5.** The correct and safe use of solders and soldering torches, and hard soldering techniques
- KU6.** Other techniques used in the joining of one or more components to create a completed piece without the use of heat or solder

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read job sheets, technical drawings, etc.
- GS2.** organize required toolkit at the work bench for better time management
- GS3.** communicate effectively with coordinators
- GS4.** to plan for daily work activity
- GS5.** analyze designs based on the 2D sketch

G&J/N0906: Surface finish

Description

This OS unit is about finishing jewellery pieces using various hand tools and consumables and also, managing precious metal lemel control and collection.

Scope

The scope covers the following :

- Finish jewellery pieces using different tools and consumables
- Manage the precious metal lemel control and collection

Elements and Performance Criteria

Finish the jewellery

To be competent, the user/individual on the job must be able to:

- PC1.** Remove marks, scratches, and surface imperfections throughout all stages of manufacture of simple and complex jewellery components and completed jewellery pieces before the application of final surface finishes
- PC2.** Finish surfaces at stages throughout the manufacturing process
- PC3.** Apply non-reflective 800ASA sandpaper (or equivalent) appropriate for critical evaluation and/or passing on to any subsequent phases of production requiring other jewellery' industry skills, such as casting, gem-setting, engraving, and polishing
- PC4.** Work in an organized and efficient manner to minimize loss of precious metals
- PC5.** Return all surplus metal and lemel/scrap to assess loss prior to recycling

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Skill specific finishing and polishing methods and techniques
- KU2.** The effect of different types and grades of polishing media on the surface finish
- KU3.** Procedures, tools, and techniques to gain the optimum surface finish
- KU4.** Common surface imperfections and defects and appropriate methods for their repair
- KU5.** International grades of sandpaper used in surface finishing
- KU6.** Precious metal lemel control and collection processes to reduce waste and encourage reuse
- KU7.** Best practice for refining to ensure maximum returns of scrap precious metals to ensure sustainable practices are upheld in the workplace

Generic Skills (GS)

User/individual on the job needs to know how to:

Qualification Pack

- GS1.** organize required toolkit at the work bench for better time management
- GS2.** communicate effectively with coordinators
- GS3.** to plan for daily work activity
- GS4.** read the job sheet for details like, weight tolerance limits, etc.

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
