Qualification Pack

GNU/ASC/Q0101: Jr. Technician - Mechatronics

Brief Job Description

A Diploma in Mechatronics Technology is a specialized educational program that focuses on providing students with practical skills and theoretical knowledge related to various aspects of industrial automation processes and technologies.

Personal Attributes

A Diploma in Mechatronics Technology is a specialized educational program that focuses on providing students with practical skills and theoretical knowledge related to various aspects of industrial automation processes and technologies.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [GNU/ASC/N0110: MECHATRONICS WORKSHOP PRACTICE](#)
2. [GNU/ASC/N0109: INDUSTRIAL SAFETY](#)
3. [GNU/ASC/N0108: CAD \(2D\)](#)
4. [GNU/ASC/N0107: ENGINEERING MECHANICS](#)
5. [GNU/ASC/N0106: FUNDAMENTAL OF ELECTRONICS ENGINEERING](#)
6. [GNU/ASC/N0105: EMPLOYABILITY SKILLS-1](#)
7. [GNU/ASC/N0104: ENGINEERING DRAWING](#)
8. [GNU/ASC/N0103: MECHANICAL WORKSHOP PRACTICE](#)
9. [GNU/ASC/N0102: PHYSICS](#)
10. [GNU/ASC/N0101: BASIC MATHEMATICS](#)

Qualification Pack (QP) Parameters

Sector	Automotive
Sub-Sector	Mechatronics

Qualification Pack

Occupation	Jr Assembly Technician
Country	India
NSQF Level	3.5
Credits	40
Aligned to NCO/ISCO/ISIC Code	NCO-2015/3114.0100
Minimum Educational Qualification & Experience	10th grade pass with NA of experience OR Previous relevant Qualification of NSQF Level (3)
Minimum Level of Education for Training in School	
Pre-Requisite License or Training	NA
Minimum Job Entry Age	16 Years
Last Reviewed On	NA
Next Review Date	27/08/2029
NSQC Approval Date	27/08/2024
Version	1.0
Reference code on NQR	QG-3.5-AU-02962-2024-V1-GU
NQR Version	1

Qualification Pack

GNU/ASC/N0110: MECHATRONICS WORKSHOP PRACTICE

Description

Students will understand the principles and functions of electronic test equipment, basic and active electronic components, and various circuit connections. They will be able to explain the operational theory behind these components and tools. They will also gain knowledge of how simulation software is used to model electronic circuits and predict their behaviour.

Scope

The scope covers the following :

- Jr. Technician - Mechatronics

Elements and Performance Criteria

MECHATRONICS WORKSHOP PRACTICE

To be competent, the user/individual on the job must be able to:

PC1. MECHATRONICS WORKSHOP PRACTICE

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. MECHATRONICS WORKSHOP PRACTICE

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. MECHATRONICS WORKSHOP PRACTICE

Qualification Pack

Assessment Criteria

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
<i>MECHATRONICS WORKSHOP PRACTICE</i>	50	25	-	25
PC1. MECHATRONICS WORKSHOP PRACTICE	-	-	-	-

Qualification Pack

GNU/ASC/N0109: INDUSTRIAL SAFETY

Description

Terminal outcomes of "Industrial Safety" encompass the overall knowledge, skills, and competencies that students are expected to achieve by the end of the course. These outcomes reflect a comprehensive understanding of safety principles, practices, regulations, and their application in industrial settings.

Safety Principles and Concepts: Demonstrate a thorough understanding of fundamental safety principles, concepts, and theories that apply to various industrial environments.

Hazard Identification and Risk Assessment: Proficiently identify potential workplace hazards, assess risks, and develop strategies to mitigate and manage these risks effectively.

Personal Protective Equipment (PPE): Expertly select and use appropriate PPE for various workplace hazards, ensuring worker protection and compliance.

Safe Work Practices: Implement and advocate for safe work practices, ergonomic considerations, and proper body mechanics to prevent injuries.

Scope

The scope covers the following :

- Jr. Technician - Mechatronics

Elements and Performance Criteria

INDUSTRIAL SAFETY

To be competent, the user/individual on the job must be able to:

PC1. INDUSTRIAL SAFETY

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. INDUSTRIAL SAFETY

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. INDUSTRIAL SAFETY

Qualification Pack

GNU/ASC/N0108: CAD (2D)

Description

Students proficient in mechanical AutoCAD 2D drafting can produce precise and detailed technical drawings essential for manufacturing and assembly. They communicate design intent clearly to engineers and machinists, enhancing collaboration and reducing production errors. This skill improves job readiness in mechanical design and drafting roles, boosting productivity and efficiency. Knowledge of industry standards and CAD tools allows them to create accurate and organized drawings, supporting effective project documentation and implementation.

Scope

The scope covers the following :

- Jr. Technician - Mechatronics

Elements and Performance Criteria

CAD (2D)

To be competent, the user/individual on the job must be able to:

PC1. CAD (2D)

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

GNU/ASC/N0101: BASIC MATHEMATICS

Description

The subject is classified under Basic Sciences and students are intended to know about the basic concepts and principles of Mathematics as a tool to analyse the Engineering problems. The course content should be taught so as to understand and perform the Engineering concepts and computations. Prepare him/her self for finding Area and Volume.

Scope

The scope covers the following :

- BASIC MATHEMATICS

Elements and Performance Criteria

BASIC MATHEMATICS

To be competent, the user/individual on the job must be able to:

PC1. BASIC MATHEMATICS

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. Knowledge of Basic Mathematics Terms

Qualification Pack

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Assessment System Overview:

- Batches assigned to the assessment agencies for conducting the assessment on SDMS/SIP or email
- Assessment agencies send the assessment confirmation to VTP/TC looping SSC
- Assessment agency deploys the ToA certified Assessor for executing the assessment
- SSC monitors the assessment process & records

2. Testing Environment:

- Confirm that the centre is available at the same address as mentioned on SDMS or SIP
- Check the duration of the training.
- Check the Assessment Start and End time to be as 10 a.m. and 5 p.m.

Qualification Pack

- If the batch size is more than 30, then there should be 2 Assessors.
- Check that the allotted time to the candidates to complete Theory & Practical Assessment is correct.
- Check the mode of assessment—Online (TAB/Computer) or Offline (OMR/PP).
- Confirm the number of TABs on the ground is correct to execute the Assessment smoothly.
- Check the availability of the Lab Equipment for the particular Job Role.

3. Assessment Quality Assurance levels / Framework:

- Question papers created by the Subject Matter Experts (SME)
- Question papers created by the SME verified by the other subject Matter Experts
- Questions are mapped with Semester-wise Curriculum.
- Question papers are prepared considering that level 1 to 3 are for the unskilled & semi-skilled individuals, and level 4 and above are for the skilled, supervisor & higher management
- Assessor must be ToA certified & trainer must be ToT Certified
- Assessment agency must follow the assessment guidelines to conduct the assessment

4. Types of evidence or evidence-gathering protocol:

- Time-stamped & geotagged reporting of the assessor from assessment location
- Centre photographs with signboards and scheme specific branding
- Biometric or manual attendance sheet (stamped by TP) of the trainees during the training period
- Time-stamped & geotagged assessment (Theory + Viva + Practical) photographs & videos

5. Method of verification or validation:

- Surprise visit to the assessment location
- Random audit of the batch
- Random audit of any candidate

6. Method for assessment documentation, archiving, and access

Qualification Pack

- Hard copies of the documents are stored
- Soft copies of the documents & photographs of the assessment are uploaded / accessed from Cloud Storage
- Soft copies of the documents & photographs of the assessment are stored in the Hard Drives

Minimum Aggregate Passing % at QP Level : 40

(**Please note:** Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
