Qualification Pack

GNU/ASC/Q0501: Technician - Mechatronics

Brief Job Description

A Diploma in Mechatronics Technology is a specialized educational program that focuses on providing students with practical skills and theoretical knowledge related to various aspects of industrial automation processes and technologies.

Personal Attributes

Technician - Mechatronics

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [GNU/ASC/N0201: Manufacturing Processes-1](#)
2. [GNU/ASC/N0202: ANALOG & DIGITAL CIRCUITS](#)
3. [GNU/ASC/N0203: EMPLOYABILITY SKILLS-2](#)
4. [GNU/ASC/N0204: ENVIRONMENTAL STUDIES](#)
5. [GNU/ASC/N0205: Basic Electrical Engineering](#)
6. [GNU/ASC/N0206: Sensors and Actuators](#)
7. [GNU/ASC/N0207: Manufacturing Processes-2](#)
8. [GNU/ASC/N0208: METROLOGY AND INSTRUMENTATION](#)
9. [GNU/ASC/N0209: BEST INDUSTRIAL PRACTICES](#)
10. [GNU/ASC/N0210: COMPUTER PROGRAMMING PYTHON](#)

Qualification Pack (QP) Parameters

Sector	Automotive
Sub-Sector	Mechatronics, Manufacturing
Occupation	Technician Mechatronics, Assembly Technician

Qualification Pack

Country	India
NSQF Level	4.0
Credits	40
Aligned to NCO/ISCO/ISIC Code	NCO-2015/3114.0100
Minimum Educational Qualification & Experience	Previous relevant Qualification of NSQF Level (3.5 Jr. Technician Mechatronics)
Minimum Level of Education for Training in School	
Pre-Requisite License or Training	NA
Minimum Job Entry Age	17 Years
Last Reviewed On	NA
Next Review Date	27/08/2027
NSQF Approval Date	27/08/2024
Version	1.0
Reference code on NQR	QG-04-AU-02963-2024-V1-GU
NQR Version	1

Qualification Pack

GNU/ASC/N0201: Manufacturing Processes-1

Description

Learner has both the theoretical knowledge and practical skills necessary for a career in manufacturing engineering. They become proficient in understanding and applying various manufacturing processes, selecting suitable materials, and ensuring quality control. The course fosters a solid foundation for advanced studies and professional growth in manufacturing and related fields. Graduates are capable of addressing manufacturing challenges, improving processes, and contributing to technological advancements in the industry. They emerge as competent professionals ready to meet the demands of modern manufacturing environments.

Scope

The scope covers the following :

- Technician Mechatronics

Elements and Performance Criteria

Manufacturing Processes-1

To be competent, the user/individual on the job must be able to:

PC1. Manufacturing Processes-1

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. Manufacturing Processes-1

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. Manufacturing Processes-1

Qualification Pack

Assessment Criteria

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
<i>Manufacturing Processes-1</i>	50	25	-	25
PC1. Manufacturing Processes-1	-	-	-	-
NOS Total	50	25	-	25

Qualification Pack

National Occupational Standards (NOS) Parameters

NOS Code	GNU/ASC/N0201
NOS Name	Manufacturing Processes-1

Qualification Pack

GNU/ASC/N0202: ANALOG & DIGITAL CIRCUITS

Description

The terminal outcome is to equip students with comprehensive skills in both theoretical and practical aspects of analog and digital circuits. They become proficient in designing, analysing, and troubleshooting various electronic circuits. The course prepares students for advanced studies and professional roles in electronics, telecommunications, and related industries. Graduates can confidently tackle complex electronic problems and contribute to technological innovation. They emerge as well-rounded professionals ready to meet industry demands.

Scope

The scope covers the following :

- Technician Mechatronics

Elements and Performance Criteria

ANALOG & DIGITAL CIRCUITS

To be competent, the user/individual on the job must be able to:

PC1. ANALOG & DIGITAL CIRCUITS

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. ANALOG & DIGITAL CIRCUITS

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. ANALOG & DIGITAL CIRCUITS

GNU/ASC/N0204: ENVIRONMENTAL STUDIES

Description

Achieve a solid understanding of environmental issues and their global impact. Be capable of applying theoretical knowledge to practical environmental problems. Be prepared to contribute to sustainable environmental practices and policies. Develop critical thinking and problem-solving skills related to environmental challenges. Emerge as a responsible individual committed to environmental stewardship.

Scope

The scope covers the following :

- Technician Mechatronics

Elements and Performance Criteria

ENVIRONMENTAL STUDIES

To be competent, the user/individual on the job must be able to:

PC1. ENVIRONMENTAL STUDIES

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. ENVIRONMENTAL STUDIES

GNU/ASC/N0205: Basic Electrical Engineering

Description

Achieve a solid foundation in both theoretical and practical aspects of basic electrical engineering. Be proficient in designing, analyzing, and troubleshooting basic electrical circuits. Be prepared for advanced studies in electrical engineering and related fields. Be equipped with essential skills to handle real-world electrical engineering tasks and projects. Emerge as a competent individual ready to meet the challenges of the electrical engineering industry.

Scope

The scope covers the following :

- Technician Mechatronics

Elements and Performance Criteria

Basic Electrical Engineering

To be competent, the user/individual on the job must be able to:

PC1. Basic Electrical Engineering

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

GNU/ASC/N0206: Sensors and Actuators

Description

Achieve a comprehensive understanding of control systems, signal processing, sensors, actuators, and mechatronic systems. Develop the ability to compare and analyse open and closed-loop control systems. Gain proficiency in signal processing techniques, including analog-to-digital and digital-to-analog conversions. Understand the selection, operation, and troubleshooting of various sensors and actuators. Acquire practical skills in designing and implementing mechatronic systems. Be prepared to apply mechatronic principles to real-world applications and future innovations. Develop problem-solving and critical thinking skills related to advanced control and automation systems.

Scope

The scope covers the following :

- Technician Mechatronics

Elements and Performance Criteria

Sensors and Actuators

To be competent, the user/individual on the job must be able to:

PC1. Sensors and Actuators

GNU/ASC/N0209: BEST INDUSTRIAL PRACTICES

Description

Workplace Safety: Demonstrate an understanding of basic workplace safety protocols, including hazard identification, proper tool usage, and personal protective equipment (PPE) requirements. Work Ethics and Professionalism: Exhibit professionalism, punctuality, teamwork, and effective communication skills in an industrial setting. Basic Tool Proficiency: Develop proficiency in using common hand tools, power tools, and measuring instruments relevant to industrial tasks. Material Handling: Learn safe and efficient methods for handling materials, including lifting, transporting, and storing items in an industrial environment. Basic Manufacturing Processes: Gain familiarity with fundamental manufacturing processes such as machining, welding, assembly, and quality control. Precision Measurement: Develop skills in using precision measuring tools such as calipers, micrometres, and gauges to ensure accurate work.

Scope

The scope covers the following :

- Technician Mechatronics

Elements and Performance Criteria

BEST INDUSTRIAL PRACTICES

To be competent, the user/individual on the job must be able to:

PC1. BEST INDUSTRIAL PRACTICES

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

GNU/ASC/N0210: COMPUTER PROGRAMMING PYTHON

Description

Attain a foundational understanding of Python programming language and its applications. Develop the ability to write and debug Python code for various tasks and applications. Gain knowledge of basic programming concepts such as variables, data types, loops, and functions. Understand the principles of object-oriented programming (OOP) and its implementation in Python. Be proficient in problem-solving using Python programming techniques. Be prepared to apply Python skills to automate tasks, analyze data, and develop simple applications. Develop a strong foundation for further study and specialization in Python programming.

Scope

The scope covers the following :

- Technician Mechatronics

Elements and Performance Criteria

COMPUTER PROGRAMMING PYTHON

To be competent, the user/individual on the job must be able to:

PC1. COMPUTER PROGRAMMING PYTHON

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Assessment System Overview:

- Batches assigned to the assessment agencies for conducting the assessment on SDMS/SIP or email
- Assessment agencies send the assessment confirmation to VTP/TC looping SSC
- Assessment agency deploys the ToA certified Assessor for executing the assessment
- SSC monitors the assessment process & records

2. Testing Environment:

- Confirm that the centre is available at the same address as mentioned on SDMS or SIP
- Check the duration of the training.
- Check the Assessment Start and End time to be as 10 a.m. and 5 p.m.

Qualification Pack

- If the batch size is more than 30, then there should be 2 Assessors.
- Check that the allotted time to the candidates to complete Theory & Practical Assessment is correct.
- Check the mode of assessment—Online (TAB/Computer) or Offline (OMR/PP).
- Confirm the number of TABs on the ground is correct to execute the Assessment smoothly.
- Check the availability of the Lab Equipment for the particular Job Role.

3. Assessment Quality Assurance levels / Framework:

- Question papers created by the Subject Matter Experts (SME)
- Question papers created by the SME verified by the other subject Matter Experts
- Questions are mapped with Semester-wise Curriculum.
- Question papers are prepared considering that level 1 to 3 are for the unskilled & semi-skilled individuals, and level 4 and above are for the skilled, supervisor & higher management
- Assessor must be ToA certified & trainer must be ToT Certified
- Assessment agency must follow the assessment guidelines to conduct the assessment

4. Types of evidence or evidence-gathering protocol:

- Time-stamped & geotagged reporting of the assessor from assessment location
- Centre photographs with signboards and scheme specific branding
- Biometric or manual attendance sheet (stamped by TP) of the trainees during the training period
- Time-stamped & geotagged assessment (Theory + Viva + Practical) photographs & videos

5. Method of verification or validation:

- Surprise visit to the assessment location
- Random audit of the batch
- Random audit of any candidate

6. Method for assessment documentation, archiving, and access

Qualification Pack

- Hard copies of the documents are stored
- Soft copies of the documents & photographs of the assessment are uploaded / accessed from Cloud Storage
- Soft copies of the documents & photographs of the assessment are stored in the Hard Drives

Minimum Aggregate Passing % at QP Level : 40

(**Please note:** Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
