Qualification Pack

HAR/ITS/Q0301: Software/Application Testing Assistant

Brief Job Description

The qualification provides the techniques and skills to use modern software testing tools to support software testing projects. The course provides the candidates to learn how to planning a test project, design test cases and data, conduct testing operations, manage software problems and defects, and generate a testing report

Personal Attributes

The person should have strong analytical and problem-solving skills to identify and troubleshoot issues effectively. Attention to detail and a curious mindset are also essential to ensure thorough testing and quality assurance.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [HAR/ITS/N0301: Working with Operating System](#)
2. [HAR/ITS/N0302: Manual Testing](#)
3. [HAR/ITS/N0303: Java Programming](#)
4. [HAR/ITS/N0304: Introduction to Database and Database Testing \(Manual\)](#)
5. [HAR/ITS/N0305: Automation Testing with selenium](#)
6. [DGT/VSQ/N0102: Employability Skills \(60 Hours\)](#)

Qualification Pack

HAR/ITS/N0301: Working with Operating System

Description

Provides a foundational understanding of operating systems, exploring their types, core functions, and architecture.

Scope

The scope covers the following :

- Equips learners with the skills necessary for roles in system administration, IT support etc.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Define operating system, its types and functions.
- PC2.** Explain the concept of process management and multithreading.
- PC3.** Explain memory management in operating system
- PC4.** Describe basic commands in Linux / Unix operating system

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** The objective and goals of the organization and scope of work
- KU2.** The principles of operating systems, including types of OS, process management, multithreading, and memory management.
- KU3.** How operating systems interact with hardware and manage system resources.
- KU4.** The importance of operating systems in maintaining organizational IT infrastructure, ensuring performance, security, and resource management.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Make informed decisions regarding operating system selection, configuration, and updates based on organizational needs and technical requirements.
- GS2.** Apply problem-solving techniques to troubleshoot operating system issues, optimize performance, and configure system resources efficiently.
- GS3.** To manage tasks effectively, ensuring timely installation, configuration, and troubleshooting of operating systems.
- GS4.** Deliver efficient and reliable operating system solutions that meet user needs and enhance organizational operation

Qualification Pack

HAR/ITS/N0302: Manual Testing

Description

Provides a comprehensive understanding of manual software testing principles, practices, and processes

Scope

The scope covers the following :

- Prepares learners to design, execute, and document manual tests effectively, equipping them with essential skills for roles in software testing, quality assurance, and quality control within software development teams and organizations.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Explain software testing principles and differentiate between Quality Control and Quality Assurance
- PC2.** Explain the various phases of the Software Development Life Cycle (SDLC) and Software Testing Life Cycle (STLC)
- PC3.** Explain and differentiate between different test levels and test design techniques.
- PC4.** Mention the importance of documentation in software testing and Describe various types of testing documents.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Organization objective, its goals and Scope of the work
- KU2.** To apply knowledge of software testing principles, SDLC, and STLC, along with practical skills in test case design, execution, and documentation.
- KU3.** The role of software testing within the broader software development process and its impact on the business objectives.
- KU4.** The organizational structure and how to collaborate between the development, testing, and operations teams to ensure a smooth workflow and integration of testing activities.
- KU5.** How to prioritize testing efforts based on risk, project requirements, and business needs, ensuring that critical components of the software are thoroughly tested.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Prioritise the work based on their importance.
- GS2.** Organize testing tasks, setting up testing environments, and managing time to make sure testing is done efficiently and on schedule.

Qualification Pack

- GS3.** Conduct testing with the end-user in mind, ensuring that the final product meets customer expectations and functions correctly.
- GS4.** Identify issues during testing, determine their causes, and recommend solutions to resolve them.
- GS5.** Collaborate and work in a team effectively and efficiently

HAR/ITS/N0303: Java Programming

Description

Provides fundamental concepts of OOPs and Java Programming.

Scope

The scope covers the following :

- Equips the learners with Java programming skills enabling them to efficiently automate testing processes.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Differentiate between JDK, JRE, and JVM
- PC2.** Effectively use variables, keywords, basic data types and control statements in Java to create functional programs
- PC3.** Describe the OOPs concept in Java .
- PC4.** Creates and uses classes and objects, constructors and destructors.
- PC5.** Define and Use Arrays and Strings.
- PC6.** Define and use exceptional handling mechanism to handle errors in java programming
- PC7.** Explain and implement multithreading in java programming

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Organization's structure, policies, procedures and guidelines
- KU2.** The purpose and scope of the work to be carried out within the Organization.
- KU3.** How to apply OOP concepts like classes, objects, inheritance, and polymorphism to design reusable and maintainable test scripts.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Manage time resources and task to meet the deadlines.
- GS2.** Prepares simple and easy-to-understand test plans and test case documents in Java-based testing environments.
- GS3.** Works effectively with developers and other team members for improving the product quality.
- GS4.** communicate effectively in team discussions and meetings
- GS5.** Handle multiple tasks concurrently

HAR/ITS/N0304: Introduction to Database and Database Testing (Manual)

Description

Provides a foundational understanding of database concepts, database testing, its significance, testing processes, and different testing types

Scope

The scope covers the following :

- Understanding of database concepts, database testing equipping students with the skills to perform manual database testing effectively.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Explain the concept of database and various database terminologies
- PC2.** Identify and differentiate various types of keys in Database
- PC3.** Writes and executes SQL commands to create, modify, and manage databases and tables.
- PC4.** Describe database testing and its importance
- PC5.** Explain the database testing process.
- PC6.** Describe different types of database testing.
- PC7.** Performs manual database testing to verify data consistency, integrity, and accuracy.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Objective of the organization and scope of the work
- KU2.** Understanding the importance of database testing in ensuring the reliability and accuracy of organizational systems.
- KU3.** To create, manage, and query databases effectively using SQL commands.
- KU4.** The critical role of accurate and secure data management in an organization.
- KU5.** How database and testing skills contribute to the organization's efficiency and customer satisfaction.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Chooses appropriate database structures, keys, and testing strategies to meet project requirements.
- GS2.** Plans database creation, testing workflows, and schedules tasks effectively to meet deadlines.

Qualification Pack

- GS3.** design database and testing processes align with user requirements and enhance data accuracy.
- GS4.** Works effectively in teams to integrate databases into broader system workflows and resolve shared challenges.

HAR/ITS/N0305: Automation Testing with selenium

Description

Provides the basics of automation testing, focusing on using Selenium to automate software tests efficiently.

Scope

The scope covers the following :

- Helps beginners learn automation testing using Selenium, a popular tool for testing software. It opens up opportunities to work in software testing.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Describe automation testing, its advantages and disadvantages.
- PC2.** Differentiate between Automation and Manual Testing
- PC3.** Describe Automation testing tools
- PC4.** Describe Selenium commands and scripts used for Automation Testing
- PC5.** Define and differentiate Selenium Webdriver and selenium RC

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** The role of automation testing in increasing the speed and accuracy of the testing process.
- KU2.** How to apply automation testing to meet organizational goals.
- KU3.** How to prioritize test cases for automation based on business needs and project requirements.
- KU4.** The importance of communication and teamwork in successfully implementing and maintaining automation strategies in an organization.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Choose the right Selenium tool, based on the complexity of the test and the testing environment.
- GS2.** Efficiently manages multiple testing projects, ensuring proper allocation of time and resources for automation tasks.
- GS3.** Communicates automation testing results clearly to stakeholders, offering detailed reports and feedback on test performance.

Qualification Pack

- GS4.** Works collaboratively with cross-functional teams, including developers and product managers, to integrate automated tests into the development pipeline.

DGT/VSQ/N0102: Employability Skills (60 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Career Development & Goal Setting
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

- PC1.** identify employability skills required for jobs in various industries
- PC2.** identify and explore learning and employability portals

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

- PC3.** recognize the significance of constitutional values, including civic rights and duties, citizenship, responsibility towards society etc. and personal values and ethics such as honesty, integrity, caring and respecting others, etc.
- PC4.** follow environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

- PC5.** recognize the significance of 21st Century Skills for employment
- PC6.** practice the 21st Century Skills such as Self-Awareness, Behaviour Skills, time management, critical and adaptive thinking, problem-solving, creative thinking, social and cultural awareness, emotional awareness, learning to learn for continuous learning etc. in personal and professional life

Basic English Skills

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC7.** use basic English for everyday conversation in different contexts, in person and over the telephone
- PC8.** read and understand routine information, notes, instructions, mails, letters etc. written in English
- PC9.** write short messages, notes, letters, e-mails etc. in English

Career Development & Goal Setting

To be competent, the user/individual on the job must be able to:

- PC10.** understand the difference between job and career
- PC11.** prepare a career development plan with short- and long-term goals, based on aptitude

Communication Skills

To be competent, the user/individual on the job must be able to:

- PC12.** follow verbal and non-verbal communication etiquette and active listening techniques in various settings
- PC13.** work collaboratively with others in a team

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

- PC14.** communicate and behave appropriately with all genders and PwD
- PC15.** escalate any issues related to sexual harassment at workplace according to POSH Act

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

- PC16.** select financial institutions, products and services as per requirement
- PC17.** carry out offline and online financial transactions, safely and securely
- PC18.** identify common components of salary and compute income, expenses, taxes, investments etc
- PC19.** identify relevant rights and laws and use legal aids to fight against legal exploitation

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

- PC20.** operate digital devices and carry out basic internet operations securely and safely
- PC21.** use e- mail and social media platforms and virtual collaboration tools to work effectively
- PC22.** use basic features of word processor, spreadsheets, and presentations

Entrepreneurship

To be competent, the user/individual on the job must be able to:

- PC23.** identify different types of Entrepreneurship and Enterprises and assess opportunities for potential business through research
- PC24.** develop a business plan and a work model, considering the 4Ps of Marketing Product, Price, Place and Promotion
- PC25.** identify sources of funding, anticipate, and mitigate any financial/ legal hurdles for the potential business opportunity

Customer Service

To be competent, the user/individual on the job must be able to:

- PC26.** identify different types of customers
- PC27.** identify and respond to customer requests and needs in a professional manner.

Qualification Pack

PC28. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC29. create a professional Curriculum vitae (Résumé)

PC30. search for suitable jobs using reliable offline and online sources such as Employment exchange, recruitment agencies, newspapers etc. and job portals, respectively

PC31. apply to identified job openings using offline /online methods as per requirement

PC32. answer questions politely, with clarity and confidence, during recruitment and selection

PC33. identify apprenticeship opportunities and register for it as per guidelines and requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills and different learning and employability related portals

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use English language for effective verbal (face to face and telephonic) and written communication in formal and informal set up

KU6. importance of career development and setting long- and short-term goals

KU7. about effective communication

KU8. POSH Act

KU9. Gender sensitivity and inclusivity

KU10. different types of financial institutes, products, and services

KU11. how to compute income and expenditure

KU12. importance of maintaining safety and security in offline and online financial transactions

KU13. different legal rights and laws

KU14. different types of digital devices and the procedure to operate them safely and securely

KU15. how to create and operate an e- mail account and use applications such as word processors, spreadsheets etc.

KU16. how to identify business opportunities

KU17. types and needs of customers

KU18. how to apply for a job and prepare for an interview

KU19. apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. read and write different types of documents/instructions/correspondence

GS2. communicate effectively using appropriate language in formal and informal settings

Qualification Pack

- GS3.** behave politely and appropriately with all
- GS4.** how to work in a virtual mode
- GS5.** perform calculations efficiently
- GS6.** solve problems effectively
- GS7.** pay attention to details
- GS8.** manage time efficiently
- GS9.** maintain hygiene and sanitization to avoid infection

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
