HCS/N9908: Working in a Team

Description

This unit is about working as part of a team in the process.

Elements and Performance Criteria

Commitment and trust

To be competent, the user/individual on the job must be able to:

- PC1.** Be accountable to ones own role in whole process.
- PC2.** Perform all roles with full responsibility.

Communication

To be competent, the user/individual on the job must be able to:

- PC3.** Report problems faced during the process.
- PC4.** Talk politely with other team members and colleagues.
- PC5.** Submit daily report of own performance.

Adaptability

To be competent, the user/individual on the job must be able to:

- PC6.** Adjust in different work situations.
- PC7.** Give due importance to others point of view.
- PC8.** Avoid conflicting situations.

Creative freedom

To be competent, the user/individual on the job must be able to:

- PC9.** Develop new ideas for work procedures
- PC10.** Improve upon the existing techniques to increase process efficiency

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** General rules and regulations in the sector.
- KU2.** Procedure followed to get the final output.
- KU3.** Safe working practices to be adopted.
- KU4.** Reporting to the supervisor or higher authority about any grievances faced.
- KU5.** Understanding the importance of the previous and next step of the process.
- KU6.** Process flow in the handicraft section.
- KU7.** Material sequence of flow.
- KU8.** Functions of different parts of product development.
- KU9.** Tools and equipments used.
- KU10.** Guidelines for operating the equipment.
- KU11.** Safety procedures to be followed as applicable.

Qualification Pack

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Prepare status and progress reports.
- GS2.** Write memos and e-mail to co-workers, and vendors to provide them with work updates and to request appropriate information without English language errors regarding grammar or sentence construct.

HCS/N8415: Entrepreneurship skills in the Traditional Painting sector

Description

The unit on Entrepreneurship Skills in the Traditional Painting Sector focuses on empowering artists with the knowledge and tools needed to turn their artistic talents into successful enterprises. This unit covers essential entrepreneurial concepts specifically tailored to the traditional painting industry, where artists balance heritage and modern business strategies.

Scope

The scope covers the following :

- creativity and innovation
- cultural awareness
- technical skills
- market research
- branding and promotion
- networking and collaboration
- sales and negotiation Skills
- sustainability practices

Elements and Performance Criteria

Creativity and Innovation

To be competent, the user/individual on the job must be able to:

- PC1.** explore new themes, designs, and techniques while preserving the traditional essence of the painting
- PC2.** innovate with materials, tools, or methods to create unique, marketable pieces

Cultural Awareness

To be competent, the user/individual on the job must be able to:

- PC3.** deep understanding and respect for traditional art forms and their historical significance
- PC4.** leverage cultural heritage to tell a story that resonates with customers

Technical Skills

To be competent, the user/individual on the job must be able to:

- PC5.** proficiency in various painting techniques (e.g., fresco, watercolor, oil painting) and tools (e.g., brushes, palette knives)
- PC6.** understanding of color theory and composition

Market Research

To be competent, the user/individual on the job must be able to:

- PC7.** identify customer preferences, emerging trends, and demand for specific types of traditional artwork
- PC8.** explore niche markets such as collectors, interior designers, or art galleries

Branding and Promotion

To be competent, the user/individual on the job must be able to:

Qualification Pack

PC9. develop a personal or brand identity that highlights the authenticity and uniqueness of the traditional art form

PC10. use social media, exhibitions, and online platforms to showcase work and build a following
Networking and Collaboration

To be competent, the user/individual on the job must be able to:

PC11. collaborate with galleries, art curators, and cultural organizations to expand reach

PC12. build relationships with suppliers, mentors, and other artists to enhance business opportunities

Sales and Negotiation Skills

To be competent, the user/individual on the job must be able to:

PC13. effectively negotiate prices and contracts with clients, galleries, and art buyers

PC14. use storytelling to enhance the value of each painting during the sales process

Sustainability Practices

To be competent, the user/individual on the job must be able to:

PC15. awareness of eco-friendly materials and practices in the painting process

PC16. commitment to promoting sustainable art-making methods

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. Personnel management, relevant legislation, standards, policies, and procedures followed in the company

KU2. Understand who your customers are (e.g., collectors, interior designers, cultural enthusiasts).

KU3. Stay updated on current trends in art and design to align offerings with market demand

PC2. identify constitutional values, civic rights, duties, personal values and ethics and environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

PC3. explain 21st Century Skills such as Self-Awareness, Behavior Skills, Positive attitude, self-motivation, problem-solving, creative thinking, time management, social and cultural awareness, emotional awareness, continuous learning mindset etc.

Basic English Skills

To be competent, the user/individual on the job must be able to:

PC4. speak with others using some basic English phrases or sentences

Communication Skills

To be competent, the user/individual on the job must be able to:

PC5. follow good manners while communicating with others

PC6. work with others in a team

Qualification Pack

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

PC7. communicate and behave appropriately with all genders and PwD

PC8. report any issues related to sexual harassment

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

PC9. use various financial products and services safely and securely

PC10. calculate income, expenses, savings etc.

PC11. approach the concerned authorities for any exploitation as per legal rights and laws

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

PC12. operate digital devices and use its features and applications securely and safely

PC13. use internet and social media platforms securely and safely

Entrepreneurship

To be competent, the user/individual on the job must be able to:

PC14. identify and assess opportunities for potential business

PC15. identify sources for arranging money and associated financial and legal challenges

Customer Service

To be competent, the user/individual on the job must be able to:

PC16. identify different types of customers

PC17. identify customer needs and address them appropriately

PC18. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC19. create a basic biodata

PC20. search for suitable jobs and apply

PC21. identify and register apprenticeship opportunities as per requirement

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use basic spoken English language

KU6. Do and dont of effective communication

KU7. inclusivity and its importance

KU8. different types of disabilities and appropriate communication and behaviour towards PwD

KU9. different types of financial products and services

Qualification Pack

- KU10.** how to compute income and expenses
- KU11.** importance of maintaining safety and security in financial transactions
- KU12.** different legal rights and laws
- KU13.** how to operate digital devices and applications safely and securely
- KU14.** ways to identify business opportunities
- KU15.** types of customers and their needs
- KU16.** how to apply for a job and prepare for an interview
- KU17.** apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate effectively using appropriate language
- GS2.** behave politely and appropriately with all
- GS3.** perform basic calculations
- GS4.** solve problems effectively
- GS5.** be careful and attentive at work
- GS6.** use time effectively
- GS7.** maintain hygiene and sanitisation to avoid infection

HCS/N8401: Carry out the process of making Warli painting

Description

This OS unit is about preparing raw materials, creating designs, and checking quality of painted canvas

Scope

The scope covers the following :

- prepare required raw materials
- perform warli painting making process as per the standard procedures
- check painting quality and productivity standards

Elements and Performance Criteria

Prepare required raw materials

To be competent, the user/individual on the job must be able to:

- PC1.** identify raw materials for making warli painting
- PC2.** collect raw materials like cow dung, water, rice powder, etc. in prescribed quantities
- PC3.** differentiate between various types of raw materials like rice, turmeric powder, kumkum powder, etc. to obtain colour
- PC4.** collect raw materials like rice, turmeric powder, kumkum powder, etc. in prescribed quantities
- PC5.** collect tools like scissor, measuring scale, pencil, wooden stick, etc.
- PC6.** prepare cotton cloth prior to the processing stage using tools like, scissor, measuring scale, pencil, etc.
- PC7.** prepare colours using raw material such as turmeric powder, rice powder, etc.
- PC8.** arrange raw materials carefully for further usage in making appropriate traditional painting
- PC9.** deliver remaining raw material to the designated storage locations

Perform warli painting making process as per the standard procedures

To be competent, the user/individual on the job must be able to:

- PC10.** make slurry of cow dung and water
- PC11.** apply slurry on prepared piece of cotton cloth with the help of flat brush
- PC12.** ensure slurry coated cotton cloth is dried in shade until completely dry
- PC13.** make designs on dried cotton cloth using colours prepared and with the help of wooden stick
- PC14.** paint the canvas meticulously

Check painting quality and productivity standards

To be competent, the user/individual on the job must be able to:

- PC15.** inspect the process based on the quality standard parameters to ensure appropriate cutting of cotton cloth is achieved
- PC16.** ensure colours are prepared of right consistency
- PC17.** inspect slurry coated cotton cloth is dried as per standards before applying paint

Qualification Pack

- PC18.** monitor the quality of designs while painting canvas
- PC19.** ensure painted canvas is dried as per standards
- PC20.** maintain records of inspection results/tests
- PC21.** ensure that there is no wastage of materials
- PC22.** prepare a sample template to collect information during inspection based on colour's consistency, drying of cotton cloth and painting quality.
- PC23.** Achieve periodical targets set by the supervisor

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** personnel management, relevant legislation, standards, policies, and procedures followed in the company
- KU2.** organisational structure
- KU3.** the locations where materials are typically stored
- KU4.** the key product lines of the company
- KU5.** basic chemical properties of various raw materials used
- KU6.** appropriate colour making techniques
- KU7.** appropriate painting techniques
- KU8.** process of applying slurry on cotton cloth
- KU9.** size and shape of the cotton cloth to be cut into
- KU10.** basic calculation methods required for calculating raw materials
- KU11.** handle the use of sharp tool
- KU12.** ensuring that there is no mal handling/accidents due to improper handling of the raw materials
- KU13.** the recommended storage of the final product
- KU14.** risk and impact of not following defined procedures/work instructions
- KU15.** the hierarchy for reporting identified problems
- KU16.** implications of delays in the process

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write down observations (if any)
- GS2.** write down cutting, colour making, and painting techniques
- GS3.** read and interpret symbols and readings
- GS4.** read about various coloring making and painting related information
- GS5.** read and understand manuals, health and safety instructions, memos, reports and job cards
- GS6.** interact with employees to work efficiently
- GS7.** make decisions pertaining to the concerned area of workplace

Qualification Pack

- GS8.** communicate the gaps in process, if any to supervisor
- GS9.** take the right raw materials according to the end product
- GS10.** detect problems in day to day tasks
- GS11.** maintain the working schedule appropriately in order to achieve the daily targets
- GS12.** interpret the customer preference, demand, etc. and accordingly make job sheet
- GS13.** follow instructions and work on areas of improvement identified
- GS14.** use reasoning skills to identify and resolve basic problems
- GS15.** analyze and detect any potential problems which could arise during operation

HCS/N8402: Carry out the process of making Patachitra painting

Description

This OS unit is about preparing raw materials, creating designs, and checking quality of painted canvas.

Scope

The scope covers the following :

- prepare and collect required raw materials tools
- perform patachitra painting making process as per the standard procedures
- check painting quality and productivity standards

Elements and Performance Criteria

Prepare and collect required raw materials and tools

To be competent, the user/individual on the job must be able to:

- PC1.** identify raw materials for making patachitra painting
- PC2.** collect raw materials like crushed tamarind seeds, chalk powder, gum, tamarind powder, cotton cloth, water, etc. in prescribed quantities
- PC3.** collect tools like pencil, eraser, khaddar stone, and chikana stone, etc. for preparing painting canvas.
- PC4.** determine various types of raw materials stones, chemicals and existing primary colours, etc. to obtain different colours
- PC5.** prepare cotton cloth prior to the processing stage using tools like, scissor, measuring scale, pencil, etc.
- PC6.** prepare colours using raw material
- PC7.** arrange raw materials carefully for further usage in making appropriate traditional painting
- PC8.** deliver remaining raw material to the designated storage locations

Perform patachitra painting making process as per the standard procedures

To be competent, the user/individual on the job must be able to:

- PC9.** make a mixture of tamarind seeds and water as per prescribed consistency
- PC10.** put cotton cloth in tamarind seeds and water mixture for 4-5 days
- PC11.** take out dipped cotton cloth and ensure sun drying of taken out cotton cloth
- PC12.** prepare a thick paste of chalk powder, tamarind powder, and gum
- PC13.** apply prepared paste on both sides of the sun dried cotton cloth
- PC14.** ensure coated cotton cloth is sun dried
- PC15.** smoothen the surface of cotton cloth by rubbing khaddar stone
- PC16.** rub chikana stone on smooth cotton cloth
- PC17.** make rough sketch with pencil on prepared cotton cloth canvas
- PC18.** apply paint on sketched canvas as per job script
- PC19.** paint the canvas meticulously

Qualification Pack

Check painting quality and productivity standards

To be competent, the user/individual on the job must be able to:

- PC20.** inspect the process based on the quality standard parameters to ensure appropriate painting is achieved
- PC21.** ensure cloth is soaked properly in tamarind mixture
- PC22.** inspect taken out cloth is sun dried
- PC23.** ensure paste is prepared of right consistency
- PC24.** inspect coated cotton cloth is dried as per standards
- PC25.** monitor the quality of smoothened cloth
- PC26.** monitor the quality of designs while painting canvas
- PC27.** ensure the painted canvas is dried as per standards
- PC28.** maintain records of inspection results/tests
- PC29.** ensure that there is no wastage of materials
- PC30.** prepare a sample template to collect information during inspection based on colour's consistency, drying of cotton cloth and painting quality
- PC31.** Achieve periodical targets set by the supervisor

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** personnel management, relevant legislation, standards, policies, and procedures followed in the company
- KU2.** organisational structure
- KU3.** the locations where materials are typically stored
- KU4.** the key product lines of the company

HCS/N8403: Carry out the process of making Madhubani painting

Description

This OS unit is about preparing raw materials, creating designs, and checking quality of painted canvas.

Scope

The scope covers the following :

- prepare required raw materials
- perform madhubani painting making process as per the standard procedures
- check painting quality and productivity standards

Elements and Performance Criteria

Prepare required raw materials

To be competent, the user/individual on the job must be able to:

- PC1.** identify raw materials for making madhubani painting
- PC2.** collect raw materials like paper, satin cloth, cotton cloth, etc. as per end product requirement
- PC3.** collect raw materials like rice, turmeric powder, kumkum powder, etc. in prescribed quantities to obtain colour
- PC4.** collect tools like scissor, measuring scale, pencil, etc. to prepare canvas of paper or cloth
- PC5.** prepare paper or cloth prior to the processing stage using tools like, scissor, measuring scale, pencil, etc.
- PC6.** prepare colours using raw material such as turmeric powder, rice powder, kumkum power, indigo, etc.
- PC7.** arrange raw materials carefully for further usage in making appropriate traditional painting
- PC8.** deliver remaining raw material to the designated storage locations

Perform madhubani painting making process as per the standard procedures

To be competent, the user/individual on the job must be able to:

- PC9.** make outline with pencil and scale on prepared sheet of paper or cloth
- PC10.** create rough sketch using pencil
- PC11.** ensure shapes and figures drawn with pencil are outlined with black paint using nib pens for paper and brush for fabric
- PC12.** paint the canvas meticulously
- PC13.** fill shapes and figures with prepared natural colours on paper and fabric colour in case of fabric
- PC14.** ensure painted paper or cloth is dried until completely dry

Check painting quality and productivity standards

To be competent, the user/individual on the job must be able to:

- PC15.** inspect the process based on the quality standard parameters to ensure appropriate cutting of cloth or paper is achieved

Qualification Pack

- PC16.** ensure colours are prepared of right consistency
- PC17.** inspect outlines are drawn as per product requirement
- PC18.** monitor the quality of designs while painting canvas
- PC19.** ensure painted canvas is dried as per standards
- PC20.** maintain records of inspection results/tests
- PC21.** ensure that there is no wastage of materials
- PC22.** prepare a sample template to collect information during inspection based on colour's consistency, drying of cloth or fabric and painting quality.
- PC23.** Achieve periodical targets set by the supervisor

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** personnel management, relevant legislation, standards, policies, and procedures followed in the company
- KU2.** organisational structure
- KU3.** the locations where materials are typically stored

HCS/N8404: Carry out the process of making Cheriyal painting

Description

This OS unit is about preparing raw materials, creating designs, and checking quality of painted canvas.

Scope

The scope covers the following :

- prepare required raw materials
- perform cheriyal painting making process as per the standard procedures
- check painting quality and productivity standards

Elements and Performance Criteria

prepare required raw materials

To be competent, the user/individual on the job must be able to:

- PC1.** identify raw materials for making cheriyal painting
- PC2.** collect raw material like khadi cotton cloth, pencil, tamarind seed paste, starch, tree gum, white powder, etc. in prescribed quantities to prepare canvas
- PC3.** make a slurry like mixture of tamarind seed paste, starch, tree gum and white powder (suddha matti) in proportion
- PC4.** cut khadi cotton cloth prior to the processing stage using tools like, scissor, measuring scale, pencil, etc. into required shape
- PC5.** apply prepared mixture evenly on both sides of the khadi cotton cloth
- PC6.** ensure three coats of the mixture is applied, allowing a day in between to make the canvas stiff and smooth
- PC7.** collect raw material like stone, turmeric, ash on an oil, sea shell, etc. in prescribed quantities to obtain colour
- PC8.** differentiate between various types of raw materials like rice, turmeric powder, kumkum powder, etc. to obtain colour
- PC9.** prepare colours by crushing stones and adding water and tree gum
- PC10.** prepare white colour by sea shell
- PC11.** mix tree gum in prepared colours in prescribed quantity to preserve colour and and make it a sticky paint
- PC12.** arrange raw materials carefully for further usage in making appropriate traditional painting
- PC13.** deliver remaining raw material to the designated storage locations

Perform cheriyal painting making process as per the standard procedures

To be competent, the user/individual on the job must be able to:

- PC14.** draw border on prepared khadi cotton cloth canvas with scale and pencil
- PC15.** sketch the outline of the painting with pen/pencil
- PC16.** fill prepared colours in outlined sketches with painting brush
- PC17.** make keen details such as eyes, hairlines, jewels with fine brushes

Qualification Pack

PC18. decorate the borders of the painting by making leaves and flowers

PC19. paint the canvas meticulously

Check painting quality and productivity standards

To be competent, the user/individual on the job must be able to:

PC20. inspect the process based on the quality standard parameters to ensure appropriate cutting of khadi cotton cloth is achieved

PC21. ensure mixture of tamarind seed, white powder, etc. in prepared in right consistency

PC22. ensure colours are prepared in right consistency

PC23. inspect slurry coated khadi cotton cloth is dried as per standards before creating sketch

PC24. monitor the quality of designs while making sketches and painting canvas

PC25. ensure painted canvas is dried as per standards

PC26. maintain records of inspection results/tests

PC27. ensure that there is no wastage of materials

PC28. Prepare a sample template to collect information during inspection based on slurry and colour's consistency, drying of khadi cotton cloth and painting quality.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. personnel management, relevant legislation, standards, policies, and procedures followed in the company

KU2. organisational structure

KU3. the locations where materials are typically stored

KU4. the key product lines of the company

KU5. basic chemical properties of various raw materials used

KU6. slurry making techniques

KU7. appropriate colour making techniques

KU8. appropriate sketching, painting techniques

KU9. process of applying slurry on khadi cotton cloth

KU10. size and shape of the khadi cotton cloth to be cut into

KU11. basic calculation methods required for calculating raw materials

KU12. handle the use of sharp tool

KU13. ensuring that there is no mal handling/accidents due to improper handling of the raw materials

KU14. the recommended storage of the final product

KU15. risk and impact of not following defined procedures/work instructions

KU16. the hierarchy for reporting identified problems

KU17. implications of delays in the process

Generic Skills (GS)

Qualification Pack

User/individual on the job needs to know how to:

- GS1.** write down observations (if any)
- GS2.** write down cutting, slurry making, colour making, and painting techniques
- GS3.** read and interpret symbols and readings
- GS4.** read about various coloring making and painting related information
- GS5.** read and understand manuals, health and safety instructions, memos, reports and job cards
- GS6.** interact with employees to work efficiently
- GS7.** make decisions pertaining to the concerned area of workplace
- GS8.** communicate the gaps in process, if any to supervisor
- GS9.** take the right raw materials according to the end product
- GS10.** detect problems in day to day tasks
- GS11.** maintain the working schedule appropriately in order to achieve the daily targets
- GS12.** interpret the customer preference, demand, etc. and accordingly make job sheet
- GS13.** follow instructions and work on areas of improvement identified
- GS14.** use reasoning skills to identify and resolve basic problems
- GS15.** analyze and detect any potential problems which could arise during operation

HCS/N8405: Carry out the process of making Phad painting

Description

This OS unit is about preparing raw materials, creating designs, and checking quality of painted canvas.

Scope

The scope covers the following :

- prepare required raw materials
- perform phad painting making process as per the standard procedures
- check painting quality and productivity standards

Elements and Performance Criteria

prepare required raw materials

To be competent, the user/individual on the job must be able to:

- PC1.** identify raw materials for making phad painting
- PC2.** collect raw material like hand-loomed coarse cotton cloth (sooti kapda), rice, wheat flour, moon stone pencil, etc. in prescribed quantities to prepare canvas
- PC3.** cut khadi cotton cloth prior to the processing stage using tools like, scissor, measuring scale, pencil, etc. into required shape
- PC4.** prepare and apply starch on cotton cloth to make it stiff for painting
- PC5.** ensure coated cloth is sun dried before smoothing
- PC6.** smoothen the surface of prepared cloth by rubbing moonstone
- PC7.** rub moonstone on prepared cloth to bring shine on the fabric for painting
- PC8.** collect raw material such as crushed stone, gum, etc. prescribed quantities
- PC9.** differentiate between various types of raw materials like rice, turmeric powder, kumkum powder, etc. to obtain colour
- PC10.** prepare colour by crushing stone, adding gum, etc.
- PC11.** mix tree gum in prepared colours in prescribed quantity to preserve colour and and make it a sticky paint
- PC12.** arrange raw materials carefully for further usage in making appropriate traditional painting
- PC13.** deliver remaining raw material to the designated storage locations

Perform phad painting making process as per the standard procedures

To be competent, the user/individual on the job must be able to:

- PC14.** sketch the outline of the painting with pen/pencil
- PC15.** fill prepared colours in outlined sketches with painting brush
- PC16.** make keen details such as eyes, hairlines, jewels with fine brushes
- PC17.** paint the canvas meticulously

Check painting quality and productivity standards

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC18.** inspect the process based on the quality standard parameters to ensure appropriate cutting of khadi cotton cloth is achieved
- PC19.** ensure starch is prepared and applied as per standards to make canvas stiff for painting
- PC20.** ensure colours are prepared in right consistency
- PC21.** inspect coated cloth is sun dried as per standards before creating sketch
- PC22.** monitor the quality of designs while making sketches and painting canvas
- PC23.** ensure painted canvas is dried as per standards
- PC24.** maintain records of inspection results/tests
- PC25.** ensure that there is no wastage of materials
- PC26.** prepare a sample template to collect information during inspection based on starch and colour's consistency, drying of cloth and painting quality
- PC27.** Achieve periodical targets set by the supervisor

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** personnel management, relevant legislation, standards, policies, and procedures followed in the company
- KU2.** organisational structure
- KU3.** the locations where materials are typically stored
- KU4.** the key product lines of the company
- KU5.** basic chemical properties of various raw materials used
- KU6.** starch applying techniques
- KU7.** appropriate colour making techniques
- KU8.** appropriate sketching, painting techniques
- KU9.** process of preparing cloth for making canvas
- KU10.** size and shape of the cloth to be cut into
- KU11.** basic calculation methods required for calculating raw materials
- KU12.** handle the use of sharp tool
- KU13.** ensuring that there is no mal handling/accidents due to improper handling of the raw materials
- KU14.** the recommended storage of the final product
- KU15.** risk and impact of not following defined procedures/work instructions
- KU16.** the hierarchy for reporting identified problems
- KU17.** implications of delays in the process

HCS/N8406: Carry out the process of making Miniature painting

Description

This OS unit is about preparing raw materials, creating designs, and checking quality of painted canvas.

Scope

The scope covers the following :

- prepare required raw materials
- perform miniature painting making process as per the standard procedures
- check painting quality and productivity standards

Elements and Performance Criteria

prepare required raw materials

To be competent, the user/individual on the job must be able to:

- PC1.** identify raw materials for making miniature painting
- PC2.** collect raw material like thin papers, khadiya mitti (chalk soil), gond (gum), water, etc. in prescribed quantities to prepare canvas
- PC3.** mix thin papers with starch to make it thick
- PC4.** ensure starch mixed papers are dried
- PC5.** prepare mixture of khadiya mitti by dipping khadiya mitti in water for 4-5 hrs
- PC6.** sieve dissolved mixture, mix with gond
- PC7.** dry the mixture and grind the hard lumps of dried mixture for further processing
- PC8.** apply prepared mixture of khadiya mitti on starch mix dried paper to give strength and appropriate surface to paper
- PC9.** collect raw material such as crushed stone, flowers, leaves, gum, etc. in prescribed quantities to prepare colour
- PC10.** differentiate between various types of raw materials like stones, flowers leaves, etc. to obtain colour
- PC11.** prepare colour by crushing stone, adding gum, etc.
- PC12.** arrange raw materials carefully for further usage in making appropriate traditional painting
- PC13.** deliver remaining raw material to the designated storage locations

Perform miniature painting making process as per the standard procedures

To be competent, the user/individual on the job must be able to:

- PC14.** sketch the outline of the painting with pencil
- PC15.** fill prepared colours in outlined sketches with painting brush
- PC16.** ensure keen details such as eyes, hairlines, jewels with utmost precision
- PC17.** paint the canvas meticulously
- PC18.** dry the painting in shade completely

Qualification Pack

- PC19.** • cover dried painting with butter paper and rub with burnishing stone bring smoothness and shine to canvas
•

Check painting quality and productivity standards

To be competent, the user/individual on the job must be able to:

- PC20.** inspect the process based on the quality standard parameters to ensure appropriate paper making is achieved
- PC21.** ensure mixture of khaidya mtti is prepared and applied as per standards to make canvas stiff for painting
- PC22.** ensure colours are prepare in right consistency
- PC23.** inspect coated paper is dried as per standards before creating sketch
- PC24.** monitor the quality of designs while making sketches and painting canvas
- PC25.** ensure painted canvas is dried as per standards
- PC26.** maintain records of inspection results/tests
- PC27.** ensure that there is no wastage of materials
- PC28.** prepare a sample template to collect information during inspection based on starch, khadiyan mitti mixture and colour's consistency, drying of paper and painting quality.
- PC29.** Achieve periodical targets set by the supervisor

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** personnel management, relevant legislation, standards, policies, and procedures followed in the company
- KU2.** organisational structure
- KU3.** the locations where materials are typically stored
- KU4.** the key product lines of the company
- KU5.** basic chemical properties of various raw materials used
- KU6.** starch applying techniques
- KU7.** application of khadiya mitti mixture
- KU8.** appropriate colour making techniques
- KU9.** appropriate sketching, painting techniques
- KU10.** process of preparing paper for making canvas
- KU11.** basic calculation methods required for calculating raw materials
- KU12.** ensuring that there is no mal handling/accidents due to improper handling of the raw materials
- KU13.** the recommended storage of the final product
- KU14.** risk and impact of not following defined procedures/work instructions
- KU15.** the hierarchy for reporting identified problems
- KU16.** implications of delays in the process

Generic Skills (GS)

Qualification Pack

User/individual on the job needs to know how to:

- GS1.** write down observations (if any)
- GS2.** write down starch making, mixture making, colour making, and painting techniques
- GS3.** read and interpret symbols and readings
- GS4.** read about various coloring making and painting related information
- GS5.** read and understand manuals, health and safety instructions, memos, reports and job cards
- GS6.** interact with employees to work efficiently
- GS7.** make decisions pertaining to the concerned area of workplace
- GS8.** communicate the gaps in process, if any to supervisor
- GS9.** take the right raw materials according to the end product
- GS10.** detect problems in day to day tasks
- GS11.** maintain the working schedule appropriately in order to achieve the daily targets
- GS12.** interpret the customer preference, demand, etc. and accordingly make job sheet
- GS13.** follow instructions and work on areas of improvement identified
- GS14.** use reasoning skills to identify and resolve basic problems
- GS15.** analyze and detect any potential problems which could arise during operation

HCS/N8407: Carry out the process of making Kalamkari Painting

Description

This OS unit is about preparing raw materials, creating designs, and checking quality of Kalamkari Painting.

Scope

The scope covers the following :

- The scope covers the following :
- prepare required raw materials
- perform Kalamkari painting making process as per the standard procedures
- check painting quality and productivity standards

Elements and Performance Criteria

Prepare and Collect Raw Materials and Tools

To be competent, the user/individual on the job must be able to:

- PC1.** Identify raw materials needed for making Kalamkari painting, including cotton or silk fabric, natural dyes, fixatives (alum), and other natural agents.
- PC2.** Collect raw materials like fabric, natural dyes (derived from vegetables, roots, and minerals), cow dung, natural detergents, and tamarind seed powder in prescribed quantities.
- PC3.** Collect tools such as kalam (bamboo or date palm pen), charcoal or natural ink for sketching, brushes, and containers for dyes.
- PC4.** Prepare the fabric prior to the painting process using tools like scissors, measuring tape, and water containers for soaking.
- PC5.** Prepare natural dyes using raw materials by boiling or grinding the ingredients and ensuring the right consistency of color.
- PC6.** Safely store any remaining raw materials in designated storage areas to maintain quality and prevent wastage.

Perform Kalamkari Painting Process as per the Standard Procedures

To be competent, the user/individual on the job must be able to:

- PC7.** Soak the fabric in a mixture of natural bleaching agents like cow dung or bleach for a specified number of days to remove starch and impurities.
- PC8.** Wash and dry the fabric under the sun to achieve a clean, pure base for painting.
- PC9.** Prepare the fabric with natural detergents to achieve the required softness and texture before painting.
- PC10.** Mix alum with water to act as a mordant for fixing the dyes onto the fabric.
- PC11.** Use a bamboo kalam (pen) to sketch designs on the prepared fabric using natural ink or charcoal.
- PC12.** Use a brush or kalam to apply the natural dyes onto the fabric, ensuring that the colors are evenly distributed and absorbed.
- PC13.** Ensure that the application of colors is in line with traditional Kalamkari motifs, ensuring adherence to historical and cultural accuracy.

Qualification Pack

- PC14.** Allow each layer of color to dry thoroughly before applying the next layer to avoid smudging or blending of colors.
- PC15.** Ensure final drying of the painted fabric under sunlight to achieve the desired vibrancy and finish of the painting.
- PC16.** Perform quality checks to ensure that the design, color application, and finish of the Kalamkari painting meet the required standards.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Knowledge of the history and cultural significance of Kalamkari painting, its traditional motifs, and how these influence design choices.
- KU2.** Awareness of the types of natural dyes and raw materials permitted in the production process according to traditional methods.
- KU3.** Familiarity with organizational policies, quality standards, and environmental guidelines related to the use of natural dyes and materials.
- KU4.** Understanding the health and safety standards for handling natural dyes, mordants, and tools used in Kalamkari painting.
- KU5.** Knowledge of storage protocols for raw materials to prevent deterioration and maintain quality.
- KU6.** Understanding the process of fabric preparation, including washing, soaking in bleaching agents (such as cow dung), and sun-drying to ensure a smooth base for painting.
- KU7.** Knowledge of the tools required for Kalamkari painting, including bamboo pens (kalam), charcoal for sketching, various brushes, and stones like khaddar and chikana for fabric treatment.
- KU8.** Awareness of the process of extracting and preparing natural dyes from plants, roots, and minerals, ensuring correct proportions for desired color outcomes.
- KU9.** Understanding the step-by-step process of preparing the fabric for painting, including pre-soaking, bleaching, applying alum as a fixative, and drying.
- KU10.** Knowledge of color theory and how to layer colors from light to dark to create depth and harmony in the painting.
- KU11.** Understanding the use of alum and other mordants to fix dyes onto the fabric, ensuring the colors remain vibrant and long-lasting.
- KU12.** Understanding the correct timing and consistency required for soaking the fabric in natural bleaching agents and alum mixtures.
- KU13.** Understanding the cultural and historical significance of maintaining traditional techniques in Kalamkari, ensuring authenticity.
- KU14.** Awareness of resource optimization, including minimizing waste of raw materials like dyes and fabric.

Generic Skills (GS)

User/individual on the job needs to know how to:

Qualification Pack

- GS1.** write down observations (if any)
- GS2.** write down cutting, colour making, and painting techniques
- GS3.** read and interpret symbols and readings
- GS4.** read about various coloring making and painting related information
- GS5.** read and understand manuals, health and safety instructions, memos, reports and job cards
- GS6.** interact with employees to work efficiently
- GS7.** make decisions pertaining to the concerned area of workplace
- GS8.** communicate the gaps in the process, if any to supervisor
- GS9.** take the right raw materials according to the end product
- GS10.** detect problems in day to day tasks
- GS11.** maintain the working schedule appropriately in order to achieve the daily targets
- GS12.** interpret the customer preference, demand, etc. and accordingly make job sheet
- GS13.** follow instructions and work on areas of improvement identified
- GS14.** use reasoning skills to identify and resolve basic problems
- GS15.** analyze and detect any potential problems which could arise during operation

Qualification Pack

Assessment Criteria

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
<i>Prepare and Collect Raw Materials and Tools</i>	12	24	-	-
PC1. Identify raw materials needed for making Kalamkari painting, including cotton or silk fabric, natural dyes, fixatives (alum), and other natural agents.	2	4	-	-
PC2. Collect raw materials like fabric, natural dyes (derived from vegetables, roots, and minerals), cow dung, natural detergents, and tamarind seed powder in prescribed quantities.	2	4	-	-
PC3. Collect tools such as kalam (bamboo or date palm pen), charcoal or natural ink for sketching, brushes, and containers for dyes.	2	4	-	-
PC4. Prepare the fabric prior to the painting process using tools like scissors, measuring tape, and water containers for soaking.	2	4	-	-
PC5. Prepare natural dyes using raw materials by boiling or grinding the ingredients and ensuring the right consistency of color.	2	4	-	-
PC6. Safely store any remaining raw materials in designated storage areas to maintain quality and prevent wastage.	2	4	-	-
<i>Perform Kalamkari Painting Process as per the Standard Procedures</i>	20	44	-	-
PC7. Soak the fabric in a mixture of natural bleaching agents like cow dung or bleach for a specified number of days to remove starch and impurities.	2	4	-	-
PC8. Wash and dry the fabric under the sun to achieve a clean, pure base for painting.	2	4	-	-
PC9. Prepare the fabric with natural detergents to achieve the required softness and texture before painting.	2	4	-	-
PC10. Mix alum with water to act as a mordant for fixing the dyes onto the fabric.	2	4	-	-

Qualification Pack

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
PC11. Use a bamboo kalam (pen) to sketch designs on the prepared fabric using natural ink or charcoal.	2	4	-	-
PC12. Use a brush or kalam to apply the natural dyes onto the fabric, ensuring that the colors are evenly distributed and absorbed.	2	4	-	-
PC13. Ensure that the application of colors is in line with traditional Kalamkari motifs, ensuring adherence to historical and cultural accuracy.	2	4	-	-
PC14. Allow each layer of color to dry thoroughly before applying the next layer to avoid smudging or blending of colors.	2	4	-	-
PC15. Ensure final drying of the painted fabric under sunlight to achieve the desired vibrancy and finish of the painting.	2	6	-	-
PC16. Perform quality checks to ensure that the design, color application, and finish of the Kalamkari painting meet the required standards.	2	6	-	-
NOS Total	32	68	-	-

HCS/N8408: Carry out the process of making Gond painting

Description

This OS unit is about preparing raw materials, creating designs, and checking quality of Gond Painting.

Scope

The scope covers the following :

- The scope covers the following :
- prepare required raw materials
- perform Kalamkari painting making process as per the standard procedures
- check painting quality and productivity standards

Elements and Performance Criteria

Collect required raw materials and Tools

To be competent, the user/individual on the job must be able to:

- PC1.** Identify and select the appropriate base materials for Gond painting, such as canvas, paper, or fabric.
- PC2.** Collect natural and synthetic paints, including pigments like charcoal, cow dung, colored soils, and natural dyes traditionally used in Gond art.
- PC3.** Gather painting tools, including brushes of different sizes, bamboo sticks for fine detailing, and containers for mixing colors.
- PC4.** Ensure the proper consistency and preparation of colors by mixing natural pigments with water, gum, or other binding agents as per traditional techniques.

Perform Gond painting process as per procedures

To be competent, the user/individual on the job must be able to:

- PC5.** Select a traditional theme or subject matter for the painting, drawing inspiration from nature, animals, folklore, or tribal mythology.
- PC6.** Create an initial outline or sketch using a pencil, chalk, or a bamboo stick to guide the painting process.
- PC7.** Apply the base colors to large areas of the painting, ensuring an even and smooth layer of color across the canvas.
- PC8.** Use fine brushes or bamboo sticks to create intricate patterns and lines, filling the painting with the characteristic Gond art motifs such as dots, dashes, and intricate detailing.
- PC9.** Ensure that the colors are applied in layers, allowing one layer to dry before applying the next to prevent smudging.
- PC10.** Maintain precision and consistency in the repetition of patterns and motifs, ensuring the design remains coherent and aesthetically balanced.
- PC11.** Apply additional detailing to enhance the visual appeal of the painting, ensuring the appropriate contrast between the background and the patterns.
- PC12.** Utilize traditional Gond color schemes, typically incorporating vibrant shades of red, yellow, blue, green, and black, while ensuring harmony between different elements of the painting.

Qualification Pack

PC13. Allow the completed painting to dry fully in a clean environment to prevent any smudging or damage.

Complete the Post-painting process

To be competent, the user/individual on the job must be able to:

PC14. Ensure proper storage of completed Gond paintings in designated areas, ensuring they are protected from dust, moisture, and light to prevent fading or damage.

PC15. Safely store unused materials such as paints, pigments, and brushes, ensuring they are properly sealed and stored for future use.

PC16. Clean and maintain all tools and brushes used during the painting process to ensure their longevity and readiness for the next use.

PC17. Package and prepare the Gond painting for display or sale, ensuring it is handled carefully to prevent any damage.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. Understanding the historical and cultural significance of Gond painting, including its origins in the Gond tribe and its traditional use of nature, animals, and folklore as themes.

KU2. Knowledge of the organizations standards, policies, and guidelines regarding the creation and presentation of Gond art.

KU3. Awareness of the quality standards for Gond painting, including the choice of materials, colors, and finishing techniques.

KU4. Understanding the health and safety regulations related to the handling of paints, pigments, and tools during the painting process.

KU5. Knowledge of sustainable practices in the sourcing of natural materials, such as pigments and binders, ensuring they are eco-friendly.

KU6. Knowledge of traditional Gond painting motifs and symbols, such as animals, trees, and abstract forms, and how these are used to convey cultural stories and beliefs.

KU7. Familiarity with the tools required for Gond painting, including various brushes, bamboo sticks for fine detailing, and tools for mixing and applying natural dyes.

KU8. Understanding the techniques for mixing natural and synthetic pigments, ensuring correct consistency for painting and binding agents.

KU9. Understanding how to create initial sketches or outlines to guide the painting process, including traditional methods using charcoal or bamboo sticks.

KU10. Expertise in applying base colors and layering additional colors while ensuring that colors do not smudge or mix unintentionally.

KU11. Understanding of color theory, particularly the traditional Gond color schemes (vibrant reds, yellows, blues, greens, and blacks) and how to create harmony and contrast in the artwork.

KU12. Familiarity with drying techniques to ensure that layers of paint dry completely before additional detailing, preventing smudging and color blending.

KU13. Understanding the different stages of Gond painting, including how to mix paints, layer colors, and apply intricate designs.

KU14. Familiarity with common issues such as smudging, uneven color application, or incomplete detailing, and how to correct these problems during the painting process.

Qualification Pack

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write down observations (if any)
- GS2.** write down cutting, colour making, and painting techniques
- GS3.** read and interpret symbols and readings
- GS4.** read about various coloring making and painting related information
- GS5.** read and understand manuals, health and safety instructions, memos, reports and job cards
- GS6.** interact with employees to work efficiently
- GS7.** make decisions pertaining to the concerned area of workplace
- GS8.** communicate the gaps in the process, if any to supervisor
- GS9.** take the right raw materials according to the end product
- GS10.** detect problems in day to day tasks
- GS11.** maintain the working schedule appropriately in order to achieve the daily targets
- GS12.** interpret the customer preference, demand, etc. and accordingly make job sheet
- GS13.** follow instructions and work on areas of improvement identified
- GS14.** use reasoning skills to identify and resolve basic problems
- GS15.** analyze and detect any potential problems which could arise during operation

HCS/N8409: Carry out the process of making Rogan Painting

Description

This OS unit is about preparing raw materials, creating designs, and checking quality of Rogan Painting.

Scope

The scope covers the following :

- The scope covers the following :
- prepare required raw materials
- perform Kalamkari painting making process as per the standard procedures
- check painting quality and productivity standards

Elements and Performance Criteria

Prepare required raw materials

To be competent, the user/individual on the job must be able to:

- PC1.** Identify and select the appropriate fabric or base material for Rogan painting, typically cotton, silk, or khadi.
- PC2.** Collect raw materials for making Rogan paint, including castor oil and natural pigments.
- PC3.** Heat castor oil to the required temperature, ensuring it thickens to the right consistency for the Rogan process.
- PC4.** Mix natural pigments into the thickened castor oil to create vibrant Rogan paints.
- PC5.** Collect traditional Rogan painting tools, such as metal styluses (Kalam) for freehand design work.
- PC6.** Prepare the fabric by stretching or securing it on a frame, ensuring the surface is flat and smooth.
- PC7.** Arrange Rogan paints and tools in an organized manner, ensuring easy access during the painting process.
- PC8.** Safely store any excess raw materials and paints in designated storage areas for future use.

Perform the process

To be competent, the user/individual on the job must be able to:

- PC9.** Select a traditional or contemporary design pattern for the painting, considering motifs such as peacocks, flowers, or geometric shapes.
- PC10.** Dip the stylus in Rogan paint and apply it to the fabric using freehand techniques, ensuring smooth, even lines.
- PC11.** Use the stylus skillfully to manipulate the Rogan paint and create intricate patterns, detailing, and motifs.
- PC12.** Ensure symmetry in the design by folding the fabric when necessary, allowing the Rogan paint to transfer and mirror the design on both sides.
- PC13.** Layer the Rogan paint carefully, ensuring that each color is applied precisely and without overlapping other elements of the design.

Qualification Pack

- PC14.** Regularly clean the stylus during the painting process to ensure clean and crisp lines in the artwork.
- PC15.** Allow the painted fabric to air dry fully, ensuring the Rogan paint sets without smudging or cracking.
- PC16.** Perform periodic quality checks to ensure the precision of the patterns and the even application of the Rogan paint across the fabric.
- PC17.** Inspect the completed Rogan painting for any irregularities, ensuring the motifs are consistent, and the paint is applied smoothly.
- PC18.** Retouch any areas of the design that may require additional detailing or corrections to meet high standards of craftsmanship.
- PC19.** Clean and maintain tools and equipment, ensuring the stylus and other materials are in good condition for future use.
- PC20.** Store the finished Rogan painting in a clean, dry environment to preserve its quality and prevent deterioration over time.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Understanding the cultural and historical significance of Rogan painting, particularly its origins in the Kutch region of Gujarat and its traditional use in creating decorative fabrics.
- KU2.** Knowledge of the organizations quality standards and best practices related to Rogan painting, including the proper handling of materials and the final presentation of artworks.
- KU3.** Familiarity with the guidelines on maintaining the traditional integrity of Rogan painting designs while incorporating innovation where necessary.
- KU4.** Awareness of health, safety, and environmental regulations related to the handling of Rogan paints, tools, and heated substances during the painting process.
- KU5.** Understanding the proper storage and preservation techniques for Rogan materials and completed artworks to maintain their quality and longevity.
- KU6.** Detailed knowledge of the raw materials used in Rogan painting, including castor oil, natural pigments, and fabric types like cotton, silk, or khadi.
- KU7.** Understanding the process of heating castor oil to the correct temperature to achieve the desired consistency for Rogan paint.
- KU8.** Knowledge of how to mix pigments into the castor oil to create vibrant Rogan colors, ensuring the correct proportions for the right thickness and texture.
- KU9.** Familiarity with the tools used in Rogan painting, particularly the stylus (Kalam), and how to use it to apply paint with precision and control.
- KU10.** Understanding the preparation of the fabric base, including how to stretch or secure the material to create a smooth surface for painting.
- KU11.** Techniques for freehand painting using the stylus, including how to create clean lines, intricate patterns, and precise detailing with Rogan paint.
- KU12.** Knowledge of the folding technique used to create symmetrical designs by transferring the Rogan paint from one side of the fabric to the other.
- KU13.** Techniques for checking the quality of Rogan paint application, ensuring smoothness, consistency, and precision in both the designs and colors used.

Qualification Pack

- KU14.** Familiarity with traditional Rogan painting standards, including the correct use of color schemes, motifs, and freehand techniques, while also incorporating modern innovations where applicable.
- KU15.** Understanding how to manage time effectively during the Rogan painting process, ensuring each stage (paint preparation, application, drying) is completed without rushing.
- KU16.** Awareness of how to plan and sequence different stages of the painting process, ensuring efficiency without compromising the quality of the work.
- KU17.** Familiarity with eco-friendly practices in sourcing natural pigments and disposing of waste materials to minimize environmental impact.
- KU18.** Awareness of proper ventilation and work area setup to ensure safety during the heating and mixing of materials used in Rogan painting.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write down observations (if any)
- GS2.** write down cutting, colour making, and painting techniques
- GS3.** read and interpret symbols and readings
- GS4.** read about various coloring making and painting related information
- GS5.** read and understand manuals, health and safety instructions, memos, reports and job cards

HCS/N8410: Carry out the process of making Mandala Art

Description

This OS unit is about preparing raw materials, creating designs, and checking quality of Mandala Art.

Scope

The scope covers the following :

- The scope covers the following :
- prepare required raw materials
- perform Kalamkari painting making process as per the standard procedures
- check painting quality and productivity standards

Elements and Performance Criteria

Prepare the required raw materials and tools

To be competent, the user/individual on the job must be able to:

- PC1.** Select an appropriate surface or medium for Mandala art, such as paper, canvas, or fabric, based on the project requirements.
- PC2.** Gather essential drawing tools like pencils, erasers, rulers, compasses, and protractors to create accurate geometric designs.
- PC3.** Choose coloring mediums such as fine-tip pens, colored pencils, markers, or paints that suit the surface and desired effect.
- PC4.** Ensure the availability of stencils or grids if needed to assist in constructing symmetrical and complex patterns.
- PC5.** Set up the workspace in an organized and comfortable manner, ensuring all materials are within easy reach for uninterrupted work.
- PC6.** Prepare the drawing surface by securing it on a stable, flat surface, and ensuring it is clean and ready for detailed work.

Execute the Mandala Art Creation Process

To be competent, the user/individual on the job must be able to:

- PC7.** Establish the center point on the drawing surface, which will serve as the focal point of the Mandala.
- PC8.** Use geometric tools (rulers, compasses, and protractors) to divide the surface into equal sections, ensuring accurate symmetry.
- PC9.** Draw concentric circles and radial lines starting from the center to create the foundational structure of the Mandala.
- PC10.** Add intricate patterns and motifs within each section of the Mandala, ensuring that all elements are proportional and balanced.
- PC11.** Maintain symmetry by ensuring all design elements are consistently spaced and reflect the intended geometry.
- PC12.** Refine the Mandala's details by adding layers of complex shapes, lines, and symbols according to the design concept.

Qualification Pack

- PC13.** Ink the design using fine-tipped pens, ensuring the lines are crisp, smooth, and free from smudging.
- PC14.** Apply colors meticulously, following a well-planned color palette, ensuring harmony and contrast between sections.
- PC15.** Use techniques such as shading, blending, and layering to add depth, texture, and a three-dimensional effect to the artwork.
- PC16.** Continuously check for precision, ensuring that the Mandala's design and color application remain balanced and cohesive.

Post-Creative and Finalization

To be competent, the user/individual on the job must be able to:

- PC17.** Review the completed Mandala to check for any inconsistencies, ensuring the design is accurate and the colors are applied evenly.
- PC18.** Ensure the artwork is properly dried or cured, especially if using paint or ink, before handling or packaging.
- PC19.** Protect the finished Mandala, ensuring its preservation and presentation quality.
- PC20.** Safely store completed Mandalas in a suitable environment, avoiding exposure to light, moisture, or dust to preserve their quality.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Understanding the cultural and spiritual significance of Mandala art across various traditions, including its use in meditation and symbolism.
- KU2.** Knowledge of the history and evolution of Mandala art, including its origins in ancient Indian culture and its adaptation in contemporary art.
- KU3.** Familiarity with different types of surfaces suitable for Mandala art, such as paper, canvas, and fabric, and their respective characteristics.
- KU4.** Understanding the variety of drawing tools available, including their specific uses (e.g., pencils for sketching, fine-tip pens for inking, rulers, and compasses for precision).
- KU5.** Knowledge of coloring mediums (markers, colored pencils, acrylic paints) and their properties, such as opacity, blendability, and drying time.
- KU6.** Knowledge of geometric principles and how to apply them to create symmetrical and intricate patterns in Mandala art.
- KU7.** Understanding the step-by-step process of creating a Mandala, from establishing the center to adding layers of detail and color.
- KU8.** Familiarity with various Mandala design elements, such as radial symmetry, concentric shapes, and thematic motifs (e.g., flowers, animals, abstract designs).
- KU9.** Techniques for applying color effectively, including blending, shading, and creating gradients to enhance visual depth.
- KU10.** Understanding the importance of balance and harmony in design and how to achieve it through color choices and pattern distribution.
- KU11.** Knowledge of how to correct mistakes in Mandala art without compromising the overall design integrity, including techniques for erasing or refining lines.

Qualification Pack

- KU12.** Familiarity with contemporary adaptations of Mandala art, including mixed media approaches and digital Mandala creation.
- KU13.** Awareness of the quality standards for Mandala art, including consistency in line work, color application, and overall design execution.
- KU14.** Understanding the significance of regular self-evaluation and peer feedback to improve artistic skills and refine techniques.
- KU15.** Knowledge of proper storage and handling techniques for finished Mandalas to prevent damage, such as using protective coverings or frames.
- KU16.** Understanding the environmental impact of materials used and awareness of eco-friendly alternatives for drawing and coloring supplies.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write down observations (if any)
- GS2.** write down cutting, colour making, and painting techniques
- GS3.** read and interpret symbols and readings
- GS4.** read about various coloring making and painting related information
- GS5.** read and understand manuals, health and safety instructions, memos, reports and job cards
- GS6.** interact with employees to work efficiently
- GS7.** make decisions pertaining to the concerned area of workplace
- GS8.** communicate the gaps in the process, if any to supervisor
- GS9.** take the right raw materials according to the end product
- GS10.** detect problems in day to day tasks
- GS11.** maintain the working schedule appropriately in order to achieve the daily targets
- GS12.** interpret the customer preference, demand, etc. and accordingly make job sheet
- GS13.** follow instructions and work on areas of improvement identified
- GS14.** use reasoning skills to identify and resolve basic problems
- GS15.** analyze and detect any potential problems which could arise during operation

HCS/N8411: Carry out the process of making Tanjore painting

Description

This OS unit is about preparing raw materials, creating designs, and checking quality of Tanjore painting.

Scope

The scope covers the following :

- The scope covers the following :
- prepare required raw materials
- perform Kalamkari painting making process as per the standard procedures
- check painting quality and productivity standards

Elements and Performance Criteria

Collect raw materials and tools

To be competent, the user/individual on the job must be able to:

- PC1.** Identify and select the appropriate base material for Tanjore painting, such as wooden boards or thick canvas.
- PC2.** Gather raw materials, including natural pigments, gold foil, and adhesive (gum or glue) suitable for Tanjore art.
- PC3.** Collect essential tools such as brushes of various sizes, palette knives, and a gold leaf application tool (or cotton swabs).
- PC4.** Prepare a suitable work area, ensuring a clean and well-lit space for detailed painting and gold foil application.
- PC5.** Arrange all materials systematically to ensure ease of access during the painting process.

Perform the creation process as per standards

To be competent, the user/individual on the job must be able to:

- PC6.** Create a preliminary sketch of the design on the base material, ensuring correct proportions and composition.
- PC7.** Prepare the background by applying a base coat of color to the board or canvas, allowing it to dry completely.
- PC8.** Mix natural pigments to create the desired colors for the painting, ensuring consistency in texture and tone.
- PC9.** Begin painting the main subjects and motifs of the Tanjore art, focusing on intricate details and vibrant color application.
- PC10.** Use layering techniques to build depth and richness in colors, ensuring smooth transitions between shades.
- PC11.** Apply gold foil to designated areas of the painting using the appropriate adhesive, ensuring precise placement and adherence.
- PC12.** Use brushes and tools to create textures and details, emphasizing elements such as clothing, jewelry, and background features.

Qualification Pack

- PC13.** Ensure that the gold foil is evenly applied and free from wrinkles or bubbles for a polished finish.
- PC14.** Conduct periodic checks for design accuracy and color application throughout the painting process.
- PC15.** Inspect the completed Tanjore painting for any imperfections, ensuring all details are refined and colors are vibrant.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Understanding the historical and cultural significance of Tanjore painting, including its origins in South India and its role in religious and decorative art.
- KU2.** Knowledge of the traditional themes and subjects commonly depicted in Tanjore paintings, such as deities, mythological scenes, and nature.
- KU3.** Familiarity with various types of base materials suitable for Tanjore painting, including wooden boards, canvas, and cloth.
- KU4.** Understanding the characteristics of natural pigments used in Tanjore art, including their opacity, lightfastness, and traditional sources.
- KU5.** Knowledge of gold foil application techniques, including the types of gold leaf available and their appropriate usage in enhancing artwork.
- KU6.** Awareness of the tools required for Tanjore painting, such as different sizes of brushes, palette knives, and tools for gold foil application.
- KU7.** Understanding the step-by-step process of creating Tanjore paintings, from initial sketching to the final application of gold leaf.
- KU8.** Knowledge of color mixing techniques to achieve desired hues and tones while ensuring color consistency.
- KU9.** Familiarity with layering techniques that contribute to the depth and richness of the painting, including the use of undercoats and glazing.
- KU10.** Understanding the importance of balance and harmony in Tanjore painting composition, ensuring all elements are proportionate and visually appealing.
- KU11.** Knowledge of how to refine details in Tanjore art, focusing on facial expressions, clothing, and ornamental designs to enhance the overall aesthetic.
- KU12.** Awareness of quality standards in Tanjore painting, including consistency in line work, color application, and the effective use of gold foil.
- KU13.** Understanding the significance of regular self-evaluation and peer feedback to enhance artistic skills and improve techniques.
- KU14.** Knowledge of proper storage and handling techniques for finished Tanjore paintings to prevent damage, including the use of protective coverings and framing.
- KU15.** Understanding how to effectively plan and allocate time for each stage of the Tanjore painting process to ensure quality work.

Generic Skills (GS)

User/individual on the job needs to know how to:

Qualification Pack

- GS1.** write down observations (if any)
- GS2.** write down cutting, colour making, and painting techniques
- GS3.** read and interpret symbols and readings
- GS4.** read about various coloring making and painting related information
- GS5.** read and understand manuals, health and safety instructions, memos, reports and job cards
- GS6.** interact with employees to work efficiently
- GS7.** make decisions pertaining to the concerned area of workplace
- GS8.** communicate the gaps in the process, if any to supervisor
- GS9.** take the right raw materials according to the end product
- GS10.** detect problems in day to day tasks
- GS11.** maintain the working schedule appropriately in order to achieve the daily targets
- GS12.** interpret the customer preference, demand, etc. and accordingly make job sheet
- GS13.** follow instructions and work on areas of improvement identified
- GS14.** use reasoning skills to identify and resolve basic problems
- GS15.** analyze and detect any potential problems which could arise during operation

HCS/N8412: carry out the process of making Bhil painting

Description

This OS unit is about preparing raw materials, creating designs, and checking quality of Bhil painting.

Scope

The scope covers the following :

- The scope covers the following :
- prepare required raw materials
- perform Kalamkari painting making process as per the standard procedures
- check painting quality and productivity standards

Elements and Performance Criteria

Preparation and Collection of Raw Materials and Tools

To be competent, the user/individual on the job must be able to:

- PC1.** Identify and select the appropriate base material for Bhil painting, such as handmade paper, cloth, or wooden surfaces.
- PC2.** Gather raw materials, including natural pigments (often derived from plants, minerals, and other organic sources) and adhesives.
- PC3.** Collect essential tools such as brushes of various sizes, stencils, and any additional tools needed for detailed work.
- PC4.** Prepare a suitable workspace that is clean, well-lit, and organized to facilitate the painting process.
- PC5.** Arrange all materials systematically, ensuring they are accessible during the painting process.

Execution of Bhil Painting Process According to Traditional Standards

To be competent, the user/individual on the job must be able to:

- PC6.** Create a preliminary sketch of the design on the chosen surface, ensuring adherence to traditional Bhil themes and motifs.
- PC7.** Prepare the background by applying a base coat of color, allowing it to dry completely before proceeding with details.
- PC8.** Mix natural pigments to create the desired colors, ensuring the correct consistency and brightness.
- PC9.** Begin painting the main subjects and motifs, focusing on the intricate patterns and bold colors characteristic of Bhil art.
- PC10.** Use layering techniques to build depth and vibrancy in the colors, ensuring that the painting reflects the traditional style.
- PC11.** Incorporate traditional symbols and motifs typical of Bhil art, such as animals, nature, and geometric designs.
- PC12.** Ensure that each element of the painting is clearly defined and contributes to the overall composition.

Qualification Pack

- PC13.** Conduct periodic checks for design accuracy and color application throughout the painting process.
- PC14.** Inspect the completed Bhil painting for any inconsistencies or areas needing refinement, ensuring a polished final product.
- PC15.** Allow the painting to dry completely before handling or displaying to avoid smudging or damage.
- PC16.** Safely store completed paintings in a protective manner to prevent exposure to dust, moisture, or light, preserving their quality.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Understanding the historical and cultural significance of Bhil painting, including its roots in the Bhil community and its role in traditional storytelling and folklore.
- KU2.** Knowledge of the common themes and motifs depicted in Bhil art, such as nature, animals, festivals, and daily life.
- KU3.** Familiarity with various types of base materials suitable for Bhil painting, including handmade paper, cloth, and wooden surfaces.
- KU4.** Understanding the characteristics of natural pigments used in Bhil art, including their sources (e.g., plants, minerals) and their properties (e.g., lightfastness, toxicity).
- KU5.** Awareness of the tools required for Bhil painting, such as different sizes of brushes, stencils, and other applicators.
- KU6.** Knowledge of traditional adhesives and binders used in the painting process and their proper application techniques.
- KU7.** Understanding the step-by-step process of creating Bhil paintings, from initial sketches to the final application of colors.
- KU8.** Knowledge of color mixing techniques to achieve vibrant hues and ensure consistency in color application.
- KU9.** Understanding the importance of symmetry and balance in the composition of Bhil art.
- KU10.** Knowledge of how to refine details in Bhil art, focusing on key elements such as patterns, lines, and textures to enhance visual appeal.
- KU11.** Understanding the significance of color symbolism in Bhil painting and how it can convey specific meanings or emotions.
- KU12.** Awareness of quality standards for Bhil paintings, including consistency in line work, color application, and overall design integrity.
- KU13.** Understanding the value of feedback and self-evaluation in improving artistic skills and refining techniques.
- KU14.** Knowledge of proper storage and handling techniques for completed Bhil paintings to prevent damage, including suitable framing and protective materials.
- KU15.** Awareness of eco-friendly practices in sourcing materials and minimizing waste during the painting process.
- KU16.** Understanding how to effectively plan and allocate time for each stage of the Bhil painting process to ensure high-quality outcomes.

HCS/N8413: Carry out the process of making Santhal painting

Description

This OS unit is about preparing raw materials, creating designs, and checking quality of Santhal painting.

Scope

The scope covers the following :

- The scope covers the following :
- prepare required raw materials
- perform Kalamkari painting making process as per the standard procedures
- check painting quality and productivity standards

Elements and Performance Criteria

Preparation and Collection of Materials and Tools

To be competent, the user/individual on the job must be able to:

- PC1.** Identify and select the appropriate base material for Santhal painting, such as cloth, paper, or wooden surfaces.
- PC2.** Gather raw materials, including natural pigments and adhesives.
- PC3.** Collect essential tools such as brushes of various sizes, palettes for mixing colors, and stencils if needed.
- PC4.** Prepare a suitable workspace that is clean, well-lit, and organized for the painting process.
- PC5.** Arrange all materials systematically to ensure they are accessible during the painting process.

Implementation of Santhal Painting Techniques

To be competent, the user/individual on the job must be able to:

- PC6.** Create a preliminary sketch of the design on the chosen surface, ensuring it aligns with traditional Santhal themes and motifs.
- PC7.** Prepare the background by applying a base coat of color, allowing it to dry completely before adding details.
- PC8.** Mix natural pigments to achieve the desired colors, ensuring consistency in texture and vibrancy.
- PC9.** Painting the main subjects and motifs, focusing on the distinct patterns and bold colors characteristic of Santhal art.
- PC10.** Use traditional techniques to layer colors and create depth, ensuring the artwork reflects the rich cultural heritage of the Santhal community.
- PC11.** Incorporate traditional symbols and motifs typical of Santhal art, such as depictions of nature, community life, and cultural rituals.
- PC12.** Ensure that each element of the painting is clearly defined and contributes to the overall composition.
- PC13.** Conduct periodic checks for design accuracy and color application throughout the painting process.

Qualification Pack

Finalization and Care of the Artwork

To be competent, the user/individual on the job must be able to:

- PC14.** Inspect the completed Santhal painting for any inconsistencies or areas needing refinement, ensuring a polished final product.
- PC15.** Allow the painting to dry completely before handling or displaying it to avoid smudging or damage.
- PC16.** Safely store completed paintings in a protective manner to prevent exposure to dust, moisture, or light, preserving their quality.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Understanding the historical and cultural significance of Santhal painting, including its roots in the Santhal community and its role in storytelling and cultural expression.
- KU2.** Knowledge of common themes and motifs depicted in Santhal art, such as nature, folklore, daily life, and rituals.
- KU3.** Familiarity with various types of base materials suitable for Santhal painting, including cloth, paper, and wooden surfaces.
- KU4.** Understanding the characteristics and sources of natural pigments used in Santhal art, including their properties and sustainability.
- KU5.** Knowledge of traditional adhesives and binders, including how to use them effectively in the painting process.
- KU6.** Awareness of the tools required for Santhal painting, such as different brush sizes, palettes, and stencils.
- KU7.** Understanding the step-by-step process of creating Santhal paintings, from sketching to final color application.
- KU8.** Knowledge of color mixing techniques to achieve the desired vibrancy and consistency.
- KU9.** Understanding the importance of balance and symmetry in Santhal art compositions.
- KU10.** Knowledge of how to refine details in Santhal art, focusing on patterns, lines, and textures to enhance visual appeal.
- KU11.** Understanding color symbolism in Santhal painting and how it conveys specific meanings or emotions.
- KU12.** Awareness of quality standards for Santhal paintings, including consistency in line work, color application, and overall design integrity.
- KU13.** Understanding how to effectively plan and allocate time for each stage of the Santhal painting process to ensure high-quality outcomes.
- KU14.** Knowledge of resource management, including optimizing the use of materials and minimizing waste throughout the project.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write down observations (if any)

Qualification Pack

- GS2.** write down cutting, colour making, and painting techniques

HCS/N8414: Carry out the process of making Manjusha painting

Description

This OS unit is about preparing raw materials, creating designs, and checking quality of Manjusha painting.

Scope

The scope covers the following :

- The scope covers the following :
- prepare required raw materials
- perform Kalamkari painting making process as per the standard procedures
- check painting quality and productivity standards

Elements and Performance Criteria

Preparation of Materials and Tools

To be competent, the user/individual on the job must be able to:

- PC1.** Identify and select the appropriate base material for Manjusha painting, such as handmade paper or cloth.
- PC2.** Gather raw materials, including natural pigments, gold or silver foil, and adhesives.
- PC3.** Collect essential tools such as brushes of various sizes, palettes for mixing colors, and stencils if necessary.
- PC4.** Prepare a suitable workspace that is clean, well-lit, and organized to facilitate the painting process.
- PC5.** Arrange all materials systematically to ensure they are easily accessible during the painting process.

Execution of Manjusha Painting Techniques

To be competent, the user/individual on the job must be able to:

- PC6.** Create a preliminary sketch of the design on the chosen surface, ensuring it aligns with traditional Manjusha themes and motifs.
- PC7.** Prepare the background by applying a base coat of color, allowing it to dry completely before adding details.
- PC8.** Mix natural pigments to achieve the desired colors, ensuring consistency in texture and vibrancy.
- PC9.** Begin painting the main subjects and motifs, focusing on the intricate patterns and bold colors characteristic of Manjusha art.
- PC10.** Use traditional techniques to layer colors and create depth, ensuring the artwork reflects the cultural heritage of Manjusha painting.
- PC11.** Incorporate traditional symbols and motifs, such as the depiction of folk tales, nature, and daily life, typical of Manjusha art.
- PC12.** Ensure that each element of the painting is clearly defined and contributes to the overall composition.

Qualification Pack

PC13. Conduct periodic checks for design accuracy and color application throughout the painting process.

Preservation of the Artwork

To be competent, the user/individual on the job must be able to:

PC14. Inspect the completed Manjusha painting for any inconsistencies or areas needing refinement, ensuring a polished final product.

PC15. Allow the painting to dry completely before handling or displaying it to avoid smudging or damage.

PC16. Safely store completed paintings in a protective manner to prevent exposure to dust, moisture, or light, preserving their quality.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. Understanding the historical and cultural significance of Manjusha painting, including its origins in the Santhal community and its role in storytelling and folk traditions.

KU2. Knowledge of common themes and motifs depicted in Manjusha art, such as nature, folklore, mythology, and daily life.

KU3. Familiarity with various types of base materials suitable for Manjusha painting, including handmade paper, cloth, and wooden surfaces.

KU4. Understanding the characteristics and sources of natural pigments and their application in Manjusha painting.

KU5. Knowledge of traditional adhesives and binders used in the painting process and their effective application techniques.

KU6. Awareness of the tools required for Manjusha painting, such as brushes of different sizes, palettes for mixing colors, and any additional applicators.

KU7. Understanding the step-by-step process of creating Manjusha paintings, from preliminary sketches to final color application.

KU8. Knowledge of color mixing techniques to achieve the desired vibrancy and consistency.

KU9. Familiarity with traditional Manjusha painting techniques, including layering, texturing, and detailing.

KU10. Understanding the importance of balance, symmetry, and composition in Manjusha art.

KU11. Knowledge of how to refine details in Manjusha art, focusing on key elements such as patterns, lines, and textures to enhance visual appeal.

KU12. Understanding color symbolism in Manjusha painting and how it conveys specific meanings or emotions.

KU13. Awareness of quality standards for Manjusha paintings, including consistency in line work, color application, and overall design integrity.

KU14. Understanding the significance of feedback and self-assessment in improving artistic skills and refining techniques.

KU15. Knowledge of proper storage and handling techniques for completed Manjusha paintings to prevent damage, including suitable framing and protective measures.

KU16. Awareness of environmentally friendly practices in sourcing materials and minimizing waste during the painting process.

Qualification Pack

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write down observations (if any)
- GS2.** write down cutting, colour making, and painting techniques
- GS3.** read and interpret symbols and readings

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Qualification Pack

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Minimum Passing % at NOS Level: 50

(Please note: A Trainee must score the minimum percentage for each NOS separately as well as on the QP as a whole.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
