HCS/Q1001: Quality Check Technician - Ceramics

Brief Job Description

A Quality Check Technician in ceramics is responsible for inspecting and testing ceramic products to ensure they meet established quality standards.

Personal Attributes

The Quality Check Technician in ceramics is meticulous and detail-oriented, with a strong analytical mindset to identify defects and inconsistencies. They possess excellent observational skills and a commitment to quality, ensuring that every product meets the highest standards before reaching the customer.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [HCS/N1007: Quality parameters for Raw Materials in Ceramics Manufacturing](#)
2. [HCS/N1008: Quality Inspection and Problem Resolution in Ceramics](#)

HCS/N1007: Quality parameters for Raw Materials in Ceramics Manufacturing

Description

This unit focuses on understanding, inspecting, and ensuring compliance with quality standards for raw materials and processes in ceramics manufacturing. It provides a comprehensive approach to the inspection and quality control of raw materials and production processes, ensuring the final ceramic products meet industry standards.

Scope

The scope covers the following :

- know the quality standards
- inspection of raw materials
- quality inspection during production

Elements and Performance Criteria

Know the Quality Standards

To be competent, the user/individual on the job must be able to:

- PC1.** learn about the international and national standards such as ISO 9001, ASTM, or BIS for ceramics manufacturing
- PC2.** discuss the specific quality requirements for raw materials like clay, feldspar, quartz, and additives
- PC3.** identify the raw materials meet the functional and aesthetic requirements of the final product (e.g., tiles, pottery, sanitary ware)

Inspection of Raw Materials

To be competent, the user/individual on the job must be able to:

- PC4.** verify the source and specifications of raw materials using supplier documentation
- PC5.** check for consistency in color, texture, and form
- PC6.** identify visible impurities like stones, debris, or organic matter
- PC7.** measure using moisture meters to ensure optimal levels for processing
- PC8.** conduct a plasticity test (e.g., rolling test) to evaluate workability
- PC9.** use sieve analysis or laser diffraction to ensure uniformity in particle size distribution
- PC10.** identify the presence of oxides and unwanted compounds through techniques like X-ray Fluorescence (XRF)
- PC11.** use a moisture meter to ensure raw materials like clay have optimal moisture levels for processing
- PC12.** verify supplier certifications and conduct batch inspections to ensure consistency

Quality Inspection during Production

To be competent, the user/individual on the job must be able to:

- PC13.** perform small-scale tests of the material mix before large-scale production

Qualification Pack

- PC14.** adjust compositions if necessary to achieve desired properties
- PC15.** check thermal stability and reactions at high temperatures
- PC16.** measure shrinkage during drying and firing to prevent defects
- PC17.** ensure the consistent mixing of raw materials
- PC18.** detect cracks, warping, or inconsistent density in products during interim checks
- PC19.** inspect for contamination introduced during processing
- PC20.** modify processing parameters like temperature, pressure, or timing based on real-time quality checks
- PC21.** examine the microstructure for uniformity
- PC22.** assess thermal properties of materials during firing
- PC23.** evaluate the strength of intermediate products

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** company's policies on: personnel management, relevant legislation, standards, policies, and procedures followed in the company
- KU2.** stay updated with international and local quality norms
- KU3.** company's policies related to dress code and etiquette
- KU4.** the locations where the materials are typically stored
- KU5.** the key product lines of the company
- KU6.** communicate standards effectively to suppliers and production teams
- KU7.** the qc techniques in ceramics industry
- KU8.** reporting formats
- KU9.** effective inter-team communication
- KU10.** quality parameters in the ceramic craft
- KU11.** managing his/her time to qc the products
- KU12.** appropriately scheduling qc so that there is sufficient time for recording the data
- KU13.** handling the ceramics products appropriately
- KU14.** ensuring that there is no mal handling/accidents due to improper handling of the products
- KU15.** applying basic arithmetic in the qc process
- KU16.** equipment, appliances used in qc process and their operation
- KU17.** different product lines and associated qc parameters
- KU18.** various stages of production
- KU19.** recurring challenges in qc
- KU20.** recording and documentation of quality check parameters

Generic Skills (GS)

User/individual on the job needs to know how to:

Qualification Pack

- GS1.** make note of industry practices in qc
- GS2.** write basic process notes
- GS3.** deduce information on analysis
- GS4.** read about various qc related information
- GS5.** interact with employees to work efficiently
- GS6.** interact with the supervisor
- GS7.** communicate the gaps in the process, if any to relevant colleagues
- GS8.** apply the qc parameters
- GS9.** make recording templates
- GS10.** schedule the qc appropriately
- GS11.** to prioritize and organise to achieve the daily targets
- GS12.** the customer preference, taste, etc and accordingly make crafts
- GS13.** to solve work related problems
- GS14.** how to analyse the material requirement
- GS15.** spot process disruptions and delays
- GS16.** report on any concerns to superiors without delay

Qualification Pack

Assessment Criteria

HCS/N1008: Quality Inspection and Problem Resolution in Ceramics

Description

This unit involves inspecting the finished ceramics, identifying any problems or defects, resolving issues effectively, and documenting the entire process for accountability and continuous improvement.

Scope

The scope covers the following :

- inspection of final product
- problem identification and resolution
- documentation and reporting

Elements and Performance Criteria

Inspection of Final Product

To be competent, the user/individual on the job must be able to:

- PC1.** technician performs detailed visual checks to detect surface defects like cracks, chips, discoloration, glaze imperfections, or inconsistencies in finish
- PC2.** check that the product conforms to design specifications, including size, shape, and alignment
- PC3.** use of tools like calipers, micrometers, or gauges to verify the dimensions of the product
- PC4.** test the product for strength (resistance to breaking or chipping) and other functional properties (e.g., water resistance, fireproofing for specific types of ceramics)
- PC5.** verify the weight of products to ensure that there are no significant variations in batch production that may indicate quality issues
- PC6.** measure the residual moisture content in the product to avoid issues like cracking during the drying or firing stages
- PC7.** identify the consistency of the ceramic's thickness to prevent uneven firing or brittleness
- PC8.** check for any defects like streaks, bubbles, or uneven coverage in the glaze

Problem Identification and Resolution

To be competent, the user/individual on the job must be able to:

- PC9.** identify the nature of common ceramic defects, such as cracks, warping, pinholes, uneven glaze, or surface imperfections
- PC10.** identify the root cause of these issues, whether they are due to raw material defects, improper firing, moisture imbalance, or handling errors
- PC11.** categorize defects as cosmetic or functional to determine the severity of the issue and the appropriate response
- PC12.** investigate the underlying cause of defects (e.g., insufficient drying time, improper kiln settings, poor raw material quality)
- PC13.** provide guidance to production staff or operators on correct procedures to avoid recurring issues, like controlling moisture levels or ensuring correct glazing techniques

Qualification Pack

PC14. implement corrective actions such as adjusting machine settings, modifying firing schedules, altering material ratios, or improving the production environment

PC15. propose better techniques or materials to eliminate defects or enhance product quality

Documentation and Reporting

To be competent, the user/individual on the job must be able to:

PC16. maintain detailed records of final product inspections, including the date, batch number, inspection outcomes, and any issues found

PC17. record the tools and methods used during inspections, along with specific details of the products tested

PC18. document all identified defects, their causes (if determined), and the corrective actions taken. This log helps track recurring issues and analyze trends over time

PC19. note whether products were reworked, rejected, or sent for further quality control checks

PC20. prepare regular reports summarizing the inspection results, issues identified, and actions taken for management review

PC21. report on overall production quality trends and making recommendations for process improvements based on data from inspections

PC22. ensure that all products meet industry-specific standards and documenting compliance with these standards

PC23. develop standard operating procedures (SOPs) based on lessons learned from previous issues

PC24. prepare reports required for audits, certifications, or external inspections from regulatory bodies

PC25. communicate with other departments, such as production and R&D, about recurring defects, the effectiveness of corrective actions, and potential product improvement

PC26. document and report on customer feedback related to product quality for further analysis

PC27. ensure that all inspection, defect, and resolution records are well-organized and accessible for future reference

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. understand the physical, aesthetic, and functional properties required for the final ceramic product. This includes factors like color, shape, texture, smoothness, and uniformity

KU2. familiarity with customer specifications and industry standards for finished products (e.g., resistance to wear, thermal conductivity, and strength)

KU3. using measurement tools like micrometers, calipers, or automated machines to ensure the final product conforms to the required dimensions

KU4. recognize the signs of issues from firing (e.g., uneven firing leading to warped shapes or discoloration)

KU5. differences between the desired and actual size of the product due to issues during molding, shaping, or firing

KU6. technician needs to understand the root causes of defects, which may arise from raw material issues, inconsistent production methods, improper handling, or machine malfunctions

Qualification Pack

- KU7.** importance of maintaining accurate records of inspection results, defects identified, and actions taken
- KU8.** Keeping records of supplier material quality, production conditions, and any deviations from the standard
- KU9.** participate in internal or external audits, providing required documentation and test results for verification

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** ability to analyze test results and detect patterns in defects. Technicians need to interpret the root causes of issues and propose solutions based on data
- GS2.** a keen eye for identifying minor defects or inconsistencies in the finished product, ensuring nothing is overlooked
- GS3.** capability to think critically and come up with effective solutions to identified problems. This may include adjusting processes, suggesting alternative materials, or recommending new equipment
- GS4.** clear communication with production teams, supervisors, and other departments to report issues, explain defects, and coordinate solutions
- GS5.** keeping track of large volumes of data from inspections, testing, and production, ensuring that records are well-organized and accessible for analysis and audits
- GS6.** collaborating with other technicians, engineers, and production teams to identify problems and implement solutions, ensuring smooth operations
- GS7.** adapting to new materials, techniques, or equipment as the industry and technology evolve. Being flexible enough to handle different types of products and defects
- GS8.** strong sense of responsibility for ensuring that every product meets the established quality standards, minimizing defects, and maximizing customer satisfaction

HCS/N8520: Entrepreneurship Skills for Ceramics Quality Check Technician

Description

In the role of a Quality Check Technician (Ceramics), entrepreneurial skills are essential for identifying opportunities for improvement, driving process efficiencies, and contributing to the overall success of the business. A technician's ability to manage quality control with an entrepreneurial mindset helps in building a competitive advantage for the organization, ensuring consistent product quality, and fostering innovation within the ceramics industry.

Scope

The scope covers the following :

- understanding of business and market needs
- problem identification and continuous improvement
- cost management and resource optimization
- effective communication and stakeholder management
- leadership and teamwork
- risk management and decision-making
- entrepreneurial thinking in quality control process
- legal and regulatory awareness

Elements and Performance Criteria

Understanding of Business and Market Needs

To be competent, the user/individual on the job must be able to:

- PC1.** discuss the role of a Quality Check Technician as both a quality control expert and an integral part of the business's entrepreneurial ecosystem
- PC2.** aware of the broader market trends in ceramics, customer expectations, and the demand for specific ceramic products (e.g., tiles, sanitary ware, or decorative items)
- PC3.** recognize that the quality of products directly impacts customer satisfaction and brand reputation
- PC4.** identify how quality control aligns with customer preferences, and how defects or inconsistencies affect market competitiveness
- PC5.** identify the ways to differentiate products by ensuring superior quality through meticulous inspection and problem resolution

Problem Identification and Continuous Improvement

To be competent, the user/individual on the job must be able to:

- PC6.** identify and analyze problems within the production process (e.g., defects in raw materials, processing, or firing) and understand their potential impact on the business
- PC7.** being proactive in adopting new technologies, equipment, or methods for inspection and quality assurance, which may lead to better efficiency or more accurate defect detection

Cost Management and Resource Optimization

Qualification Pack

To be competent, the user/individual on the job must be able to:

- PC8.** identify the relationship between quality control and production costs. For instance, the cost of raw material wastage due to defects, the impact of rework, or the long-term effects of poor quality on brand reputation
- PC9.** manage resources effectively by controlling inspection costs, reducing waste, and optimizing labor and equipment use during the quality check processes
- PC10.** identify areas where investment in better materials, equipment, or training could lead to long-term savings by reducing defects and improving product consistency

Effective Communication and Stakeholder Management

To be competent, the user/individual on the job must be able to:

- PC11.** build strong communication channels with other departments such as production, procurement, R&D, and sales
- PC12.** build and maintain the relationships with customers to understand their quality expectations and with suppliers to ensure raw materials meet the required standards
- PC13.** prepare and present detailed quality reports, identify trends, and make suggestions for improvements

Leadership and Teamwork

To be competent, the user/individual on the job must be able to:

- PC14.** take on leadership roles in overseeing specific aspects of quality control, ensuring team adherence to standards, and guiding others in proper inspection techniques
- PC15.** ability to mentor less experienced technicians or production workers in quality control processes, helping to build a knowledgeable and skilled team
- PC16.** encourage teamwork among quality assurance teams and other departments to meet common goals of maintaining high product standards and continuous improvement

Risk Management and Decision-Making

To be competent, the user/individual on the job must be able to:

- PC17.** identify the potential risks that poor-quality products pose to the company, including customer dissatisfaction, returns, damage to reputation, or increased production costs
- PC18.** identify the preventative measures or strategies to minimize quality-related risks, such as implementing stricter quality checks, revising quality standards, or improving employee training

Entrepreneurial Thinking in Quality Control Process

To be competent, the user/individual on the job must be able to:

- PC19.** encourage a sense of ownership and responsibility for product quality, similar to an entrepreneur managing their business
- PC20.** find the creative solutions to quality challenges within the production environment

Legal and Regulatory Awareness

To be competent, the user/individual on the job must be able to:

- PC21.** importance of complying with industry standards, safety regulations, and environmental laws in ceramics manufacturing
- PC22.** aware of the legal implications of selling defective products and the importance of quality certifications (e.g., ISO 9001) to ensure market acceptance

Knowledge and Understanding (KU)

Qualification Pack

The individual on the job needs to know and understand:

- KU1.** understand how raw material quality impacts production costs, and how defects and wastage increase costs
- KU2.** being able to identify areas where cost savings can be achieved, such as by reducing defective batches or improving material efficiency through quality control
- KU3.** recognize that minimizing defects during the inspection phase reduces costs related to returns, reprocessing, and customer dissatisfaction
- KU4.** ability to help optimize the use of resources-materials, time, and labor-by identifying inefficiencies in the production process
- KU5.** knowledge of the latest advancements in quality inspection tools and techniques (e.g., automated inspection systems, digital quality monitoring) and the ability to propose their adoption
- KU6.** focus on continuous improvement, where technicians identify recurring issues in product quality and suggest long-term solutions, like modifying production processes or upgrading equipment
- KU7.** use analytical skills to identify root causes of issues quickly and propose effective solutions
- KU8.** engage with suppliers to ensure that raw materials meet quality standards
- KU9.** knowledge of how product defects, rework, and returns impact the company's profitability
- KU10.** upholding ethical standards in the quality assurance process, ensuring transparency and honesty in reporting defects and quality issues
- KU11.** aware of the growing importance of sustainability in manufacturing processes, and recommending eco-friendly materials, methods, and recycling practices to reduce waste and energy consumption

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** ability to make informed decisions that balance quality, costs, and business needs, while considering long-term impacts
- GS2.** communicate quality-related issues clearly with team members, suppliers, and customers
- GS3.** negotiate with suppliers or contractors to secure the best prices for high-quality materials
- GS4.** manage time effectively to ensure quality checks are done in a timely manner while maintaining production schedules
- GS5.** demonstrate resourcefulness and creativity to overcome challenges, troubleshoot problems, and improve processes
- GS6.** basic understanding of financial principles such as budgeting, cost analysis, and resource allocation to ensure efficient and profitable operations
- GS7.** willingness to take calculated risks when introducing new quality control techniques or expanding product lines, while ensuring the business remains financially stable

HCS/N9901: Coordinate with colleagues and work as a team

Description

This NOS describes the communication and coordination skills and knowledge to work with colleagues and supervisor to achieve a smooth and hazard-free workflow.

Scope

The scope covers the following :

- interact with supervisor or superior
- work as a team by coordinating with colleagues within and outside the department and include inputs on PwD & Gender Sensitisation
- report and Document

Elements and Performance Criteria

Interact with supervisor or superior

To be competent, the user/individual on the job must be able to:

- PC1.** comply with health, safety gender, and PwD (People with disability) related instructions applicable to the workplace
- PC2.** actively participate in mock drills/ evacuation procedures; group discussions, training sensitization programs for gender, and PwD awareness organized at the workplace.
- PC3.** receive job orders and instructions from reporting supervisor and receive feedback on work standards.
- PC4.** understand the work output requirements, targets, performance indicators and incentives.
- PC5.** deliver quality work on time and report any anticipated reasons for delays and handover completed work to supervisor
- PC6.** report on any grievances, production defects and any potential hazards.

Work as a team by coordinating with colleagues within and outside the department and include inputs on PwD & Gender Sensitisation

To be competent, the user/individual on the job must be able to:

- PC7.** communicate maintenance and repair schedule proactively to the supervisor
- PC8.** interact and clarify doubts on design, usage of materials & tools, quality & standards compliance, etc.

Report and Document

To be competent, the user/individual on the job must be able to:

- PC9.** report in time for shortage or need of raw materials
- PC10.** communicate with colleagues from within and other departments, clearly and effectively on all aspects to carry out the work among the team
- PC11.** maintain the etiquette, use polite language, demonstrate responsible and disciplined behavior towards colleagues.
- PC12.** put team over individual goals and multi-task or share work where necessary supporting the colleagues.

Qualification Pack

PC13. document all the details accurately relating to ones role as required.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** knowledge about the importance of gender equality being followed in the organization and policies for reporting any harassment or inappropriate behavior
- KU2.** knowledge about how to accommodate employees with disabilities etiquette to adhere to and proper language and terminology
- KU3.** knowledge about how to communicate, offer help, respecting space, parking etc. for people with disabilities or special needs
- KU4.** knowledge about promoting a safe, accessible and healthy workplace for disabled employees
- KU5.** company's policies on preferred language of communication, incentives, quality standards, personnel management, reporting and escalation matrix policy.
- KU6.** company's standard operating procedure (sop) and the risk and impact of not following them.
- KU7.** procedures for working with colleagues, his/her role and responsibilities in relation to this
- KU8.** organizational hierarchy and the line of reporting structure and work target and review mechanism
- KU9.** procedures to report employment related issues and to deal with conflicts
- KU10.** importance of the individuals role in the organizational workflow and details of the individual responsibilities
- KU11.** tools and equipment handling procedure and common potential hazards in the work place and the procedures to deal with them
- KU12.** effective communication with various categories of people and the different departments in the organization
- KU13.** to document the job activity as required like the check sheets, history sheets, etc
- KU14.** expressing and addressing grievances appropriately, deal with difficult work relationships and manage the internal conflicts effectively

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** create a positive and inclusive workplace atmosphere without any kind of bias/discrimination towards any employee
- GS2.** actively take part in any discussion/workshop organized for gender sensitization training
- GS3.** read and comprehend written instructions related to gender equality issues in the organization
- GS4.** identify and report any harassment or inappropriate behavior towards any employee
- GS5.** create a positive and inclusive workplace atmosphere without any kind of bias/discrimination towards any employee with disability or special needs
- GS6.** actively take part in any discussion/workshop organized for disability sensitization training.

Qualification Pack

- GS7.** read and comprehend written instructions related to equality issues in the organization related to disabled persons
- GS8.** read job sheets, design sheet and information displayed at the workplace
- GS9.** read and understand manuals, health and safety instructions, memos etc
- GS10.** fill up documentation to ones role
- GS11.** communicate effectively with supervisor
- GS12.** contribute to quality of team work and achieve smooth workflow
- GS13.** improve work processes by interacting with others and adopting best practices

DGT/VSQ/N0102: Employability Skills (60 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Career Development & Goal Setting
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

- PC1.** identify employability skills required for jobs in various industries
- PC2.** identify and explore learning and employability portals

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

- PC3.** recognize the significance of constitutional values, including civic rights and duties, citizenship, responsibility towards society etc. and personal values and ethics such as honesty, integrity, caring and respecting others, etc.
- PC4.** follow environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

- PC5.** recognize the significance of 21st Century Skills for employment
- PC6.** practice the 21st Century Skills such as Self-Awareness, Behaviour Skills, time management, critical and adaptive thinking, problem-solving, creative thinking, social and cultural awareness, emotional awareness, learning to learn for continuous learning etc. in personal and professional life

Basic English Skills

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC7.** use basic English for everyday conversation in different contexts, in person and over the telephone
- PC8.** read and understand routine information, notes, instructions, mails, letters etc. written in English
- PC9.** write short messages, notes, letters, e-mails etc. in English

Career Development & Goal Setting

To be competent, the user/individual on the job must be able to:

- PC10.** understand the difference between job and career
- PC11.** prepare a career development plan with short- and long-term goals, based on aptitude

Communication Skills

To be competent, the user/individual on the job must be able to:

- PC12.** follow verbal and non-verbal communication etiquette and active listening techniques in various settings
- PC13.** work collaboratively with others in a team

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

- PC14.** communicate and behave appropriately with all genders and PwD
- PC15.** escalate any issues related to sexual harassment at workplace according to POSH Act

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

- PC16.** select financial institutions, products and services as per requirement
- PC17.** carry out offline and online financial transactions, safely and securely
- PC18.** identify common components of salary and compute income, expenses, taxes, investments etc

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

- PC20.** operate digital devices and carry out basic internet operations securely and safely
- PC21.** use e- mail and social media platforms and virtual collaboration tools to work effectively
- PC22.** use basic features of word processor, spreadsheets, and presentations

Entrepreneurship

To be competent, the user/individual on the job must be able to:

- PC23.** identify different types of Entrepreneurship and Enterprises and assess opportunities for potential business through research
- PC24.** develop a business plan and a work model, considering the 4Ps of Marketing Product, Price, Place and Promotion
- PC25.** identify sources of funding, anticipate, and mitigate any financial/ legal hurdles for the potential business opportunity

Customer Service

To be competent, the user/individual on the job must be able to:

- PC26.** identify different types of customers
- PC27.** identify and respond to customer requests and needs in a professional manner.

Qualification Pack

PC28. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC29. create a professional Curriculum vitae (Résumé)

PC30. search for suitable jobs using reliable offline and online sources such as Employment exchange, recruitment agencies, newspapers etc. and job portals, respectively

PC31. apply to identified job openings using offline /online methods as per requirement

PC32. answer questions politely, with clarity and confidence, during recruitment and selection

PC33. identify apprenticeship opportunities and register for it as per guidelines and requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills and different learning and employability related portals

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use English language for effective verbal (face to face and telephonic) and written communication in formal and informal set up

KU6. importance of career development and setting long- and short-term goals

KU7. about effective communication

KU8. POSH Act

KU9. Gender sensitivity and inclusivity

KU10. different types of financial institutes, products, and services

KU11. how to compute income and expenditure

KU12. importance of maintaining safety and security in offline and online financial transactions

KU13. different legal rights and laws

KU14. different types of digital devices and the procedure to operate them safely and securely

KU15. how to create and operate an e- mail account and use applications such as word processors, spreadsheets etc.

KU16. how to identify business opportunities

KU17. types and needs of customers

KU18. how to apply for a job and prepare for an interview

KU19. apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. read and write different types of documents/instructions/correspondence

GS2. communicate effectively using appropriate language in formal and informal settings

Qualification Pack

- GS3.** behave politely and appropriately with all
- GS4.** how to work in a virtual mode
- GS5.** perform calculations efficiently
- GS6.** solve problems effectively
- GS7.** pay attention to details
- GS8.** manage time efficiently
- GS9.** maintain hygiene and sanitization to avoid infection

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Qualification Pack

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
