HCS/Q1101: Stringing/Beading Artisan - Fashion Jewellery

Brief Job Description

A Stringing/Beading Artisan in fashion jewellery makes beautiful pieces by carefully stringing together beads and other materials.

Personal Attributes

The Stringing/Beading Artisan is creative and detail-oriented, with a passion for design and craftsmanship. They have excellent hand-eye coordination and patience, allowing them to create intricate jewellery pieces with precision.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [HCS/N1101: Perform pre-stringing requirements](#)
2. [HCS/N1308: Different Types of Stringing/Beading Techniques](#)
3. [HCS/N1102: String the jewel](#)
4. [HCS/N8514: Entrepreneurship Skills for Stringing/Beading Artisan \(Fashion Jewellery\)](#)
5. [HCS/N9953: Work as a team](#)
6. [HCS/N9948: Maintain a healthy and safety work environment](#)
7. [DGT/VSQ/N0101: Employability Skills \(30 Hours\)](#)

HCS/N1101: Perform pre-stringing requirements

Description

This OS unit is about carrying out the pre-stringing requirements to string the beads, and finish the jewel as per design and requirements

Scope

The scope covers the following :

- understand design and work requirement
- gather and arrange the required raw materials
- prepare the materials to begin stringing
- Prepare the length and size of the jewel

Elements and Performance Criteria

Understand design and work requirement

To be competent, the user/individual on the job must be able to:

- PC1.** receive instructions on work requirement from the supervisor and comprehend them
- PC2.** receive the design from concerned person
- PC3.** identify the design requirements with respect to the raw materials to be used, colour combinations, size and shape of the jewel, type of jewel, etc.
- PC4.** plan the target and arrive at the on number of pieces to be completed

Gather and arrange the required raw materials

To be competent, the user/individual on the job must be able to:

- PC5.** ensure all the raw materials required such as beads, beading thread, wire, etc. are bought
- PC6.** collect and arrange the materials to begin the process
- PC7.** report on any shortage or defect in raw materials to the concerned person
- PC8.** ensure to stock the required materials in advance

Prepare the materials to begin stringing

To be competent, the user/individual on the job must be able to:

- PC9.** select the appropriate beads such as ceramic, glass, metal, bone, stone, horn, etc. as per design requirement
- PC10.** select the appropriate thread for the selected type of beads to be used and as per design specification
- PC11.** ensure the selected string will not cause the sharp edges of certain beads to break it
- PC12.** ream out the sharp-edged beads with a bead reamer giving the jewel better chances of not breaking
- PC13.** ensure the colour, shape and type of selected beads and the selected string are in line with the design and quality requirements and client specifications
- PC14.** ensure to use light and delicate pearls and beads on strings to ensure no breakage / chipping.

Qualification Pack

Prepare the length and size of the jewel

To be competent, the user/individual on the job must be able to:

- PC15.** check the design for length of the jewel.
- PC16.** cut the selected type of wire or thread to the appropriate length according to the design and as per the type of jewel.
- PC17.** ensure to have some extra wire / thread / string length cut, to tuck the wire inside beads to sit close or to tie knots in between.
- PC18.** bend and prepare the thread or wire or string to the shape requirement as per design - round, square, half round, twisted.
- PC19.** prepare the thread or wire or string for single or multiple layers as per requirement.
- PC20.** ensure the strand is sized shorter than the next for multiple strand jewels, so that it lays flat and does not interfere with each other when worn.
- PC21.** ensure the proportion of size of beads to the size of string is appropriate.
- PC22.** use a bead board to measure the length of the thread and to check the beads by placing on them for the jewel.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** company's policies on incentives, safety and hazards, personnel management and quality standards
- KU2.** workflow involved in jewellery making process of the company
- KU3.** importance of the individual's role in the work process
- KU4.** reporting structure in the company and specifically for the role assigned
- KU5.** documentation policy
- KU6.** customer profile
- KU7.** jewellery making process and types of jewellery
- KU8.** various kinds of raw materials involved in the process of making the jewel
- KU9.** various types of threads and wires used for stringing
- KU10.** various types of beads and pearls used for stringing
- KU11.** usage of sharp tools such as pliers, scissors, reamer, cutter, etc. for the process
- KU12.** the specifics of preparing raw materials according to the specific jewel requirement
- KU13.** the specifics of preparing the length and size of the jewel as per design
- KU14.** the processes for bending and shaping the wire
- KU15.** safety equipment and precautions to be taken while handling delicate beads and wires
- KU16.** market trend on latest fashion and customer preferences

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** understand the design and make notes about the design

Qualification Pack

- GS2.** read about jewellery making techniques, interpret them and make notes
- GS3.** interpret the design
- GS4.** read and understand company policy documents
- GS5.** interact with team members to work efficiently
- GS6.** communicate effectively with supervisor
- GS7.** identify and decide the critical tools and equipments for stringing
- GS8.** prioritize work or activities and organise to achieve daily targets
- GS9.** the customer preference, taste, etc and accordingly make crafts
- GS10.** solve work related problems
- GS11.** analyse material requirements
- GS12.** spot process disruptions and delays
- GS13.** report on any concerns to superiors without delay

HCS/N1308: Different Types of Stringing/Beading Techniques

Description

This unit covers various methods used to craft stylish, durable, and unique pieces. This unit explores key techniques, tools, and materials required for each style, emphasizing their versatility and application in different jewelry designs.

Scope

The scope covers the following :

- introduction to beading and stringing
- types of beading and stringing techniques
- tool and material overview
- design principles and applications
- advanced techniques
- quality control and finishing

Elements and Performance Criteria

Introduction to Beading and Stringing

To be competent, the user/individual on the job must be able to:

- PC1.** introduces beading and stringing as foundational techniques in jewelry making, focusing on threading beads onto different types of strings or wires to create necklaces, bracelets, and other accessories
- PC2.** helps artisans understand the significance of each technique and how it impacts the overall design, durability, and style of the jewelry piece

Types of Beading and Stringing Techniques

To be competent, the user/individual on the job must be able to:

- PC3.** single-strand stringing and the simplest method, involving threading beads onto a single string or wire. Ideal for beginner designs like simple necklaces or bracelets and using nylon or silk threads, elastic cords, and beading wires
- PC4.** multi-strand stringing use in multi-layered necklaces or complex bracelet designs and have durable cords or wires, crimps, and multi-strand clasps
- PC5.** knotting techniques involves adding knots between beads, commonly used in pearl jewelry and using silk thread, specialized knotting tools, and fine needles
- PC6.** wire wrapping and looping technique where beads are added to thin wire, which is then looped or twisted and suitable for creating more structured and geometric pieces like pendants or rings.
- PC7.** bead weaving techniques where beads are woven together using needle and thread, creating intricate patterns and ideal for more advanced projects such as woven necklaces, cuffs, or statement pieces.

Tool and Material Overview

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC8.** types of beads (glass, crystal, metal, wooden, semi-precious stones, etc.), sizes, colors, and finishes that suit different jewelry designs
- PC9.** detail explanation of pliers, cutters, crimping tools, bead stoppers, and tweezers
- PC10.** information on different string types (nylon, silk, leather, elastic) and wires, and when to use each based-on jewelry type
- PC11.** description of different types of clasps, jump rings, and crimps needed for securing the jewelry pieces

Design Principles and Applications

To be competent, the user/individual on the job must be able to:

- PC12.** cover basic design principles for arranging beads, color theory, and symmetry to create visually appealing pieces
- PC13.** explain of bead shapes, sizes, and materials (e.g., glass, stone, metal, pearls), and how they affect the stringing process and final look
- PC14.** includes how to secure beads, add clasps, and use crimps to create polished, durable pieces

Advanced Techniques

To be competent, the user/individual on the job must be able to:

- PC15.** techniques like bead weaving (e.g., peyote stitch, brick stitch) for intricate patterns and textures
- PC16.** using wire to wrap beads, create connectors, and add decorative elements
- PC17.** secure ends with crimp beads, creating adjustable clasps, and adding professional polish to make jewelry durable and wearable

Quality Control and Finishing

To be competent, the user/individual on the job must be able to:

- PC18.** ensure the jewelry piece is strong and durable
- PC19.** check symmetry, spacing, and visual balance
- PC20.** clean and present the finished jewelry, including tips on packaging for a professional look

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** introduces beading and stringing as foundational techniques in jewelry making
- KU2.** a single strand gives a clean, classic look but may lack the complexity and structure of more intricate designs
- KU3.** using multiple strands for creating layered and intricate designs, adding depth and complexity to the jewelry
- KU4.** how to wire-wrap beads and create loops for more structured and geometric jewelry designs
- KU5.** gain expertise in creating intricate patterns using needle and thread, suited for advanced designs like woven necklaces and cuffs
- KU6.** learn how to add knots between beads, especially in pearl jewelry, to protect beads and enhance durability
- KU7.** different types of beads (glass, crystal, metal, wooden, semi-precious stones) and their characteristics (size, color, finish) to choose the right one for each design

Qualification Pack

- KU8.** role of pliers, cutters, crimping tools, bead stoppers, and tweezers, and how to use them effectively
- KU9.** learn about the different types of strings (nylon, silk, leather, elastic) and wires, and how to select them based on the project (durability, flexibility, bead compatibility)
- KU10.** various clasps, jump rings, and crimps, and when and how to use them to secure jewelry pieces
- KU11.** basic design principles like color theory, symmetry, and bead arrangement to create visually appealing jewelry
- KU12.** learn how different bead shapes, sizes, and materials (e.g., glass, stone, metal) influence the stringing process and the final design
- KU13.** advanced weaving techniques like peyote stitch and brick stitch to create intricate textures and patterns
- KU14.** clean the jewelry and package it for a professional presentation, ensuring the piece is ready for display or sale

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** ensure beads are placed correctly, evenly spaced, and securely strung to achieve a polished, professional look
- GS2.** handle small beads, threads, and wires with precision, especially for techniques like knotting, wire wrapping, or bead weaving
- GS3.** use tools such as pliers, tweezers, and needles to manipulate materials accurately
- GS4.** identify and fix issues like broken threads, misaligned beads, or incorrect bead sizing during the creation process
- GS5.** manage time effectively to complete jewelry pieces within desired deadlines, balancing creativity with productivity
- GS6.** keep beads, tools, and materials organized, ensure they are easily accessible during the design and creation process
- GS7.** maintain a tidy workspace to reduce the risk of losing small beads or tools
- GS8.** effectively discussing designs, ideas, and requirements with clients or team members, especially in a collaborative setting
- GS9.** explain the choices made in a design, such as material selection or technique, to customers
- GS10.** using tools to verify the strength of the jewelry (like testing the durability of clasps, crimps, and knots)

HCS/N1102: String the jewel

Description

This OS unit is about stringing the jewel as per design requirements

Scope

The scope covers the following :

- string the beads or pearls to the thread
- prepare the clasp
- check for defects
- achieve quality standards

Elements and Performance Criteria

String the beads or pearls to the thread

To be competent, the user/individual on the job must be able to:

- PC1.** arrange the raw materials beads, string crystal beads, tassel, etc. in the order to be stringed and according to the colour specifications of the design
- PC2.** ensure to place the beads in a steady place and ascertain that they do not roll over / get mixed up or get damaged
- PC3.** tie the end of the thread to avoid the beads or pearl to fall out
- PC4.** slide the bead onto the string, then the crimping bead (if being used) and then another bead, until all beads are stringed according to the length of the thread
- PC5.** ensure to begin stringing with crimp bead
- PC6.** if using the threading technique, use the needle and insert the thread through the eye of the needle
- PC7.** slide the pearls or beads through the thread
- PC8.** ensure to leave adequate and appropriate spacing between the pearl or the beads as per requirement
- PC9.** use the pliers or other similar equipments to crimp the bead into place
- PC10.** knot the string after every bead or pearl if the design has specified gaps between each bead, or if multiple varieties of beads are to be used
- PC11.** glue the beads to the thread if required to ensure the beads stay on
- PC12.** ensure not to pull the stringing material too tight causing it to break
- PC13.** ensure the beads are stringed tight enough that the jewels look rigid and not keep moving and slinging

Prepare the clasp

To be competent, the user/individual on the job must be able to:

- PC14.** attach the closure loops such as spring ring, lobster, s hook, or toggle to one end of the string making up the clasp for the jewel
- PC15.** attach the crimp bead to the other end of the string for making the clasp

Qualification Pack

- PC16.** draw the beads next to the clasp
- PC17.** use pliers or other similar equipments if using fingers is difficult to slide the beads near the clasp
- PC18.** press hard the crimp and ensure it's tight enough to hold the final jewel together
- PC19.** once the clasp is fixed, check for the length of the jewel and if it matches the requirement.
- PC20.** if the length is not as per requirement, add more beads or remove excess beads as required
- PC21.** use sharp scissors to trim off the remaining thread or wire

Check for defects

To be competent, the user/individual on the job must be able to:

- PC22.** check the jewel after stringing, to see if it matches the design
- PC23.** test the strength of the crimp and ensure the crimp is hard enough and that it does not break through
- PC24.** make necessary adjustments if any to the length or number of beads
- PC25.** rectify and rework if any mistakes are found with respect to design specifications and requirements

Achieve quality standards

To be competent, the user/individual on the job must be able to:

- PC26.** ensure the target number of pieces are stringed and ready
- PC27.** ensure the jewel is according to the design prescribed and in accordance with customer or client requirement
- PC28.** ensure the output delivered is defect free and on time

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** company's policies on incentives, safety and hazards, personnel management and quality standards
- KU2.** workflow involved in jewellery making process of the company
- KU3.** importance of the individual's role in the work process
- KU4.** the company's reporting structure
- KU5.** documentation policy
- KU6.** customer profile
- KU7.** jewellery making process and types of jewellery
- KU8.** various kinds of raw materials involved in the process of making the jewel
- KU9.** various types of threads and wires used for stringing
- KU10.** various types of beads and pearls used for stringing
- KU11.** various methods and techniques of stringing and threading the beads to make the finished jewel
- KU12.** pearl knotting and other beadwork stitches
- KU13.** use of crimp beads and various types of clasps
- KU14.** the specifics of preparing raw materials according to the specific jewel requirement

Qualification Pack

- KU15.** the specifics of preparing the jewel with respect to its length and size as per design
- KU16.** various processes of bending and shaping the wire
- KU17.** use of sharp tools such as pliers, scissors, reamer, cutter, etc. for the process
- KU18.** safety equipments and precautions to be taken
- KU19.** market trend on latest fashion and customer preferences

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** understand the design and make notes about the design
- GS2.** read about jewellery making techniques, interpret them and make notes
- GS3.** interpret the design
- GS4.** read and understand company policy documents
- GS5.** interact with team members to work efficiently
- GS6.** communicate effectively with supervisor
- GS7.** identify and decide the critical tools and equipments for stringing
- GS8.** prioritize work or activities and organise to achieve daily targets
- GS9.** the customer preference, taste, etc and accordingly make crafts
- GS10.** solve work related problems
- GS11.** analyse material requirements
- GS12.** spot process disruptions and delays
- GS13.** report on any concerns to superiors without delay

Qualification Pack

HCS/N8514: Entrepreneurship Skills for Stringing/Beading Artisan (Fashion Jewellery)

Description

This unit focuses on entrepreneurship skills required to successfully start, manage, and grow a business in the handcrafted jewellery industry. Although this unit covers market research, product development, financial management, branding, and marketing and all the specific needs of artisans in the fashion jewellery sector.

Scope

The scope covers the following :

- understanding entrepreneurship
- market research and trend analysis
- product development and innovation
- branding and positioning
- sales and marketing strategies
- time management and organization

Elements and Performance Criteria

Understanding Entrepreneurship

To be competent, the user/individual on the job must be able to:

- PC1.** define and role of entrepreneurship particularly for small-scale artisans in the fashion jewellery industry
- PC2.** develop innovative product ideas and leveraging creativity to stand out in the competitive fashion jewellery market

Market Research and Trend Analysis

To be competent, the user/individual on the job must be able to:

- PC3.** conduct market research to identify popular materials, colours, and styles
- PC4.** learn to identify and segment target customers (e.g., based on demographics, fashion preferences, and purchasing power)

Product Development and Innovation

To be competent, the user/individual on the job must be able to:

- PC5.** experiment with different beading materials like glass, gemstones, crystals, and metals to create unique designs
- PC6.** understand the customer feedback and adapting designs to meet their needs
- PC7.** create a variety of products, from simple everyday jewellery to custom pieces for special occasions

Branding and Positioning

To be competent, the user/individual on the job must be able to:

- PC8.** define the brand's unique selling proposition (USP) that differentiates the one product from others

Qualification Pack

PC9. design attractive packaging and labels to create a memorable customer experience

PC10. establish a cohesive brand presence online and offline, through social media, websites, and craft fairs

Sales and Marketing Strategies

To be competent, the user/individual on the job must be able to:

PC11. develop an online presence through social media platforms like Instagram, Facebook, Pinterest, and Etsy to showcase the work

PC12. create engaging content, such as jewellery-making tutorials or behind-the-scenes videos, to attract an audience

PC13. participate in craft fairs, exhibitions, and pop-up markets to directly engage with customers

PC14. offer discounts, promotions, or custom services to encourage sales

Time Management and Organization

To be competent, the user/individual on the job must be able to:

PC15. plan and organize daily tasks to balance production, marketing, and sales efforts

PC16. set realistic deadlines for custom orders or large consignments to ensure timely delivery

PC17. efficient inventory management to ensure materials are available for production without overstocking

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. knowing what designs, materials, and styles are in demand. Fashion jewellery trends can shift rapidly, and staying updated on current market preferences helps artisans create products that appeal to their target audience

KU2. ability to design and develop unique and innovative jewellery pieces that stand out in a competitive market

KU3. understand the different beads, strings, and materials (e.g., glass beads, gemstones, metals)

KU4. recognize how the uniqueness or craftsmanship of a product can allow for premium pricing, especially in markets that value handmade and artistic products

KU5. learn how to create and manage a budget to track income and expenses

KU6. understand the importance of maintaining high customer satisfaction by offering quality products, on-time deliveries, and excellent customer service

KU7. principles of product design, including aesthetics, functionality, and market demand

KU8. various sales strategies, including direct sales, online sales, and participation in craft fairs and exhibitions

KU9. importance of building relationships with other artisans, suppliers, and local businesses for mutual growth and support

KU10. need to ensure compliance with local laws and regulations to protect their business and intellectual property

Generic Skills (GS)

User/individual on the job needs to know how to:

Qualification Pack

- GS1.** experiment with colour combinations, and selecting materials that enhance the aesthetic appeal of the jewellery
- GS2.** proficiency in the techniques used for stringing beads and assembling jewellery
- GS3.** various stringing techniques, knotting methods, and the use of tools like pliers, needles, and beading boards
- GS4.** read the manual on different materials, including types of beads and stringing materials (like wire or thread)
- GS5.** need to conduct market research to identify popular designs, materials, and pricing strategies
- GS6.** skill in customer service, including handling inquiries, responding to feedback, and creating personalized experiences
- GS7.** trained in effective selling techniques, such as building rapport with customers, understanding their needs, and providing excellent customer service

HCS/N9953: Work as a team

Description

This unit is about working as part of a team in the process.

Scope

The scope covers the following :

- commitment and trust
- communication
- adaptability
- creative freedom

Elements and Performance Criteria

Commitment and trust

To be competent, the user/individual on the job must be able to:

- PC1.** be accountable to one's role in the whole process
- PC2.** perform all roles with full

Communication

To be competent, the user/individual on the job must be able to:

- PC3.** report problems faced during the process
- PC4.** talk politely with other team members and colleagues
- PC5.** submit a daily report of own performance

Adaptability

To be competent, the user/individual on the job must be able to:

- PC6.** adjust in different work situations
- PC7.** give due importance to other's point of view
- PC8.** avoid conflicting situations

Creative freedom

To be competent, the user/individual on the job must be able to:

- PC9.** develop new ideas for work procedures
- PC10.** improve upon the existing techniques to increase process efficiency

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** general rules and regulations in the sector
- KU2.** procedure followed to get the final output
- KU3.** safe working practices to be adopted
- KU4.** to report the supervisor or higher authority about any grievances faced

Qualification Pack

- KU5.** understanding the importance of the previous and next step of the process
- KU6.** process flow in the handicraft section
- KU7.** material sequence of flow
- KU8.** functions of different parts of product development
- KU9.** tools and equipment used
- KU10.** guidelines for operating the equipment
- KU11.** safety procedures to be followed as applicable

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** prepare status and progress reports
- GS2.** write memos and e-mail to co-workers, and vendors to provide them with work updates and to request appropriate information without English language errors regarding grammar or sentence construct
- GS3.** keep abreast with the latest knowledge by reading brochures, pamphlets, and product information sheets
- GS4.** discuss task lists, schedules, and work-loads with co-workers
- GS5.** keep co-workers and supervisors informed about progress
- GS6.** make decisions pertaining to the concerned area of work
- GS7.** plan and organize service feedback files/documents
- GS8.** manage relationships with customers
- GS9.** build customer relationships and use customer centric approach
- GS10.** think through the problem, evaluate the possible solution(s) and suggest an optimum /best possible solution(s)
- GS11.** identify immediate or temporary solutions to resolve delays
- GS12.** use the existing data to arrive at specific data points
- GS13.** apply, analyze, and evaluate the information gathered from observation, experience, reasoning, or communication, as a guide to thought and action

HCS/N9948: Maintain a healthy and safety work environment

Description

This unit provides Performance Criteria, Knowledge & Understanding, and Skills & Abilities required to comply with health, safety, and security requirements at the workplace and covers procedures to prevent, control, and minimize risk to self and others.

Scope

The scope covers the following :

- Comply with health, safety, and security requirements at work

Elements and Performance Criteria

Comply with health, safety, and security requirements at work

To be competent, the user/individual on the job must be able to:

- PC1.** comply with health and safety related instructions applicable to the workplace.
- PC2.** use and maintain personal protective equipment as per protocol.
- PC3.** carry out own activities in line with approved guidelines and procedures
- PC4.** maintain a healthy lifestyle and guard against dependency on intoxicants.
- PC5.** follow environment management system related procedures.
- PC6.** store materials and tools in line with manufacturers and organisational requirements
- PC7.** safely handle and move waste and debris.
- PC8.** minimize health and safety risks to self and others due to own actions
- PC9.** seek clarifications, from supervisors or other authorized personnel in case of perceived risks
- PC10.** monitor the workplace and work processes for potential risks and threats.
- PC11.** carry out periodic walk-through to keep work area free from hazards and obstructions, if assigned
- PC12.** report hazards and potential risks/ threats to supervisors or other authorized personnel
- PC13.** participate in mock drills/ evacuation procedures organized at the workplace
- PC14.** undertake first aid, fire-fighting and emergency response training, if asked to do so
- PC15.** take action based on instructions in the event of fire, emergencies or accidents
- PC16.** follow organisation procedures for evacuation when required

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** health and safety related practices applicable at the workplace
- KU2.** potential hazards, risks and threats based on nature of operations
- KU3.** organizational procedures for safe handling of tools

Qualification Pack

- KU4.** potential risks due to own actions and methods to minimize these
- KU5.** environmental management system related procedures at the workplace.
- KU6.** layout of the plant and details of emergency exits, escape routes, emergency equipment and assembly points
- KU7.** potential accidents and emergencies and response to these scenarios
- KU8.** reporting protocol and documentation required
- KU9.** details of personnel trained in first aid, fire-fighting and emergency response
- KU10.** actions to take in the event of a mock drills/ evacuation procedures or actual accident, emergency or fire.
- KU11.** occupational health and safety risks and methods
- KU12.** personal protective equipment and method of use
- KU13.** identification, handling and storage of hazardous substances
- KU14.** proper disposal system for waste and by-products
- KU15.** signage related to health and safety and their meaning
- KU16.** importance of sound health, hygiene and good habits
- KU17.** ill-effects of alcohol, tobacco and drugs

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write in local language.
- GS2.** read measurement instructions
- GS3.** communicate orally with colleagues
- GS4.** follow organization rule-based decision making process
- GS5.** take decision with systematic course of actions and/or response
- GS6.** plan and organize your work to achieve targets and deadlines
- GS7.** manage relationships with customers
- GS8.** build customer relationships and use customer centric approach.
- GS9.** think through the problem, evaluate the possible solution(s) and suggest an optimum /best possible solution(s)
- GS10.** identify immediate or temporary solutions to resolve delays
- GS11.** analyze data and activities.
- GS12.** pass on relevant information to others
- GS13.** apply, analyze, and evaluate the information gathered from observation, experience, reasoning, or communication, as a guide to thought and action

DGT/VSQ/N0101: Employability Skills (30 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

PC1. understand the significance of employability skills in meeting the job requirements

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

PC2. identify constitutional values, civic rights, duties, personal values and ethics and environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

PC3. explain 21st Century Skills such as Self-Awareness, Behavior Skills, Positive attitude, self-motivation, problem-solving, creative thinking, time management, social and cultural awareness, emotional awareness, continuous learning mindset etc.

Basic English Skills

To be competent, the user/individual on the job must be able to:

PC4. speak with others using some basic English phrases or sentences

Communication Skills

To be competent, the user/individual on the job must be able to:

PC5. follow good manners while communicating with others

PC6. work with others in a team

Qualification Pack

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

PC7. communicate and behave appropriately with all genders and PwD

PC8. report any issues related to sexual harassment

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

PC9. use various financial products and services safely and securely

PC10. calculate income, expenses, savings etc.

PC11. approach the concerned authorities for any exploitation as per legal rights and laws

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

PC12. operate digital devices and use its features and applications securely and safely

PC13. use internet and social media platforms securely and safely

Entrepreneurship

To be competent, the user/individual on the job must be able to:

PC14. identify and assess opportunities for potential business

PC15. identify sources for arranging money and associated financial and legal challenges

Customer Service

To be competent, the user/individual on the job must be able to:

PC16. identify different types of customers

PC17. identify customer needs and address them appropriately

PC18. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC19. create a basic biodata

PC20. search for suitable jobs and apply

PC21. identify and register apprenticeship opportunities as per requirement

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use basic spoken English language

KU6. Do and dont of effective communication

KU7. inclusivity and its importance

KU8. different types of disabilities and appropriate communication and behaviour towards PwD

KU9. different types of financial products and services

Qualification Pack

- KU10.** how to compute income and expenses
- KU11.** importance of maintaining safety and security in financial transactions
- KU12.** different legal rights and laws
- KU13.** how to operate digital devices and applications safely and securely
- KU14.** ways to identify business opportunities
- KU15.** types of customers and their needs
- KU16.** how to apply for a job and prepare for an interview
- KU17.** apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate effectively using appropriate language
- GS2.** behave politely and appropriately with all
- GS3.** perform basic calculations
- GS4.** solve problems effectively
- GS5.** be careful and attentive at work
- GS6.** use time effectively
- GS7.** maintain hygiene and sanitisation to avoid infection

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Qualification Pack

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
