HCS/Q1401: Stone Preparation Artisan

Brief Job Description

A stone preparation artisan expertly shapes and finishes stone materials for use in construction, sculpture, or decorative projects. Their skilled craftsmanship ensures that each piece is precisely cut and polished, highlighting the stone's natural beauty and durability.

Personal Attributes

A stone preparation artisan is meticulous and detail-oriented, with a deep appreciation for the natural qualities of stone. They possess strong manual skills and a creative mindset, enabling them to transform raw materials into stunning finished products.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [HCS/N1517: Finishing Touches and Tool Maintenance](#)
2. [HCS/N8502: Entrepreneurship skills for Stone preparation artisan](#)
3. [HCS/N9952: Working together as a team](#)
4. [HCS/N9946: Managing workplace safety](#)
5. [HCS/N9937: Maintain Cleanliness](#)
6. [HCS/N9941: Understanding Business Operations](#)
7. [DGT/VSQ/N0101: Employability Skills \(30 Hours\)](#)

Electives (mandatory to select at least one):

Elective 1: Stone chiseller operation

A stone chiseller operates specialised tools to carve and shape stone, creating intricate designs and structures for architectural or artistic purposes. Their expertise in manipulating various types of stone ensures precision and quality in every project.

1. [HCS/N1510: Receive raw slate stone and Work Instructions](#)
2. [HCS/N1402: Split slate stone into layers](#)

Elective 2: Drill machine operation

Qualification Pack

A drill machine operator in stone uses a drilling machine to make holes in different types of stone. They carefully set up the machine and choose the right drill bit to ensure the holes are accurate and the stone remains intact.

1. [HCS/N1511: Create cavity inside the flat Stone](#)

Elective 3: Stone cutting machine operation

A stone cutting machine operator uses specialised equipment to cut stone into specific shapes and sizes for construction or decorative purposes. They carefully set up the machine and monitor the cutting process to ensure precision and quality in the finished pieces.

1. [HCS/N1512: Cut Slab as per different product requirements](#)

Elective 4: Stone grinding machine operation

A stone grinding machine operator uses grinding equipment to smooth and polish stone surfaces, enhancing their appearance and finish. They carefully adjust the machine settings and monitor the grinding process to achieve the desired texture and shine while ensuring the stone remains intact.

1. [HCS/N1513: Shape the Hard stone slab](#)

Elective 5: Lathe machine operation

Lathe machine operation in stone involves using specialised lathes to precisely shape and turn stone materials, such as granite and marble, into various forms like columns and decorative pieces, ensuring smooth finishes and intricate designs.

1. [HCS/N1514: Prepare stone components on Lathe machine](#)

HCS/N1517: Finishing Touches and Tool Maintenance

Description

In this unit, the artisan focuses on applying finishing touches by smoothing, polishing, and sealing the stone surface for a refined and durable result. Tool maintenance involving regular sharpening, cleaning, lubrication, and proper storage. Together, these practices ensure high-quality craftsmanship and the longevity of both tools and finished works.

Scope

The scope covers the following :

- finishing touches in stone preparation
- tool maintenance in stone preparation

Elements and Performance Criteria

Finishing Touches in Stone Preparation

To be competent, the user/individual on the job must be able to:

- PC1.** using fine abrasives (e.g., sandpaper, water stones) for the final smoothing of the stone surface
- PC2.** using polishing compounds such as diamond paste or polishing powder to achieve a glossy finish
- PC3.** use smaller chisels or fine engraving tools to add intricate details or texture
- PC4.** apply a sealant to protect against water damage or staining
- PC5.** check for any imperfections like cracks and make necessary repairs

Tool Maintenance in Stone Preparation

To be competent, the user/individual on the job must be able to:

- PC6.** regular sharpen chisels, hammers, and other cutting tools to maintain precision
- PC7.** need lubrication for the moving parts of power tools to prevent wear and tear
- PC8.** check for any signs of wear or damage (like bent chisels, loose hammerheads) and repair or replace as needed
- PC9.** clean tools after use to remove stone dust and debris, which can dull edges and clog machinery
- PC10.** store tools in a dry environment to prevent rust or corrosion

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** familiar with techniques such as polishing, honing, sandblasting, and bush hammering to achieve the desired texture and aesthetic for the stone
- KU2.** different types of stones have unique physical characteristics such as hardness, grain, and porosity

Qualification Pack

- KU3.** knowledge of chiseling techniques or the use of rotary tools for carving fine details is crucial
- KU4.** understanding the types of sealants (penetrating vs. surface sealants) and how they interact with different stone types is essential
- KU5.** understanding of color and texture, including how different stones reflect light and how certain finishes can enhance or mute colors, and how the final appearance fits into the broader design context
- KU6.** understanding the correct angle for sharpening and the use of sharpening stones, grinders, or files is important
- KU7.** knowing the materials the tools are made from (e.g., steel, carbide) affects how they should be maintained
- KU8.** knowledge of how to maintain these tools (e.g., replacing blades, checking for motor wear, lubrication) is critical for both performance and safety
- KU9.** rust prevention techniques, including proper storage, applying protective coatings (e.g., oil or wax), and drying tools thoroughly after use
- KU10.** knowledge of proper safety procedures when using power tools (e.g., protective equipment, securing the stone, dust extraction) is critical to prevent accidents

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** understanding various stone types (e.g., granite, marble, limestone) and their unique properties
- GS2.** proper care, cleaning, sharpening, and repair of tools (e.g., chisels, grinders, polishers) to maintain optimal performance
- GS3.** identifying and addressing any defects or imperfections in the stone, making necessary adjustments
- GS4.** accurately marking guidelines for cutting and shaping, ensuring alignment with design specifications
- GS5.** using personal protective equipment (PPE) and following safety protocols to prevent accidents
- GS6.** familiarity with power tools such as saws, grinders, and polishers, ensuring precise and safe use

HCS/N8502: Entrepreneurship skills for Stone preparation artisan

Description

This unit aims to equip learners with the essential entrepreneurial skills required to succeed in the stone preparation industry. Participants will gain a holistic understanding of both the technical and business aspects of stone preparation, emphasizing the integration of innovative practices and sustainability.

Scope

The scope covers the following :

- industry knowledge
- business management skills
- entrepreneurial mindset
- customer relationship management
- sustainability practices

Elements and Performance Criteria

Industry Knowledge

To be competent, the user/individual on the job must be able to:

- PC1.** understanding different types of stones (e.g., granite, marble, limestone) and their properties
- PC2.** proficiency in using stone-cutting and finishing equipment (e.g., saws, polishers)
- PC3.** ability to assess stone quality and ensure products meet industry standards
- PC4.** awareness of trends in stone usage, design preferences, and sustainability practices

Business Management Skills

To be competent, the user/individual on the job must be able to:

- PC5.** skills in budgeting, pricing strategies, and cost control to ensure profitability
- PC6.** ability to create business plans, set goals, and develop strategies for growth and sustainability

Entrepreneurial Mindset

To be competent, the user/individual on the job must be able to:

- PC7.** ability to develop new products or processes that meet customer needs or improve efficiency
- PC8.** identifying potential risks and developing strategies to mitigate them
- PC9.** being flexible in response to market changes, customer preferences, and technological advancements

Customer Relationship Management

To be competent, the user/individual on the job must be able to:

- PC10.** understanding how to effectively communicate the value of products to potential customers
- PC11.** building relationships within the industry, including suppliers, customers, and other stakeholders

Sustainability Practices

To be competent, the user/individual on the job must be able to:

Qualification Pack

PC12. understanding the impact of stone extraction and processing on the environment and implementing sustainable practices

PC13. finding ways to minimize waste and promote recycling of materials

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** awareness of current trends in the stone industry, such as sustainable practices, technology integration, and design preferences
- KU2.** understanding customer needs and preferences, including artistic uses of stone products
- KU3.** knowledge of competitors and their offerings to identify market gaps and opportunities
- KU4.** understanding various stone preparation techniques, such as cutting, polishing and finishing
- KU5.** familiarity with the tools and machinery used in stone preparation, including safety measures and maintenance
- KU6.** knowledge of pricing models based on market demand, cost structure, and profit margins
- KU7.** knowledge of quality assurance practices to ensure product durability and aesthetics
- KU8.** knowledge of recycling stone waste and reusing materials in innovative ways

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read and write different types of documents/instructions/correspondence
- GS2.** behave politely and appropriately with all
- GS3.** skills in conflict resolution and performance management
- GS4.** skills in budgeting, forecasting, and managing cash flow
- GS5.** time management and team coordination
- GS6.** innovate in product design and processes to enhance efficiency

HCS/N9952: Working together as a team

Description

This unit is about working as part of a team in the process.

Scope

The scope covers the following :

- commitment and trust
- communication
- adaptability
- creative freedom

Elements and Performance Criteria

Commitment and trust

To be competent, the user/individual on the job must be able to:

- PC1.** be accountable to one's role in the whole process
- PC2.** perform all roles with full

Communication

To be competent, the user/individual on the job must be able to:

- PC3.** report problems faced during the process
- PC4.** talk politely with other team members and colleagues
- PC5.** submit a daily report of own performance

Adaptability

To be competent, the user/individual on the job must be able to:

- PC6.** adjust in different work situations
- PC7.** give due importance to other's point of view
- PC8.** avoid conflicting situations

Creative freedom

To be competent, the user/individual on the job must be able to:

- PC9.** develop new ideas for work procedures
- PC10.** improve upon the existing techniques to increase process efficiency

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** general rules and regulations in the sector
- KU2.** procedure followed to get the final output
- KU3.** safe working practices to be adopted
- KU4.** to report the supervisor or higher authority about any grievances faced

Qualification Pack

- KU5.** understanding the importance of the previous and next step of the process
- KU6.** process flow in the handicraft section
- KU7.** material sequence of flow
- KU8.** functions of different parts of product development
- KU9.** tools and equipment used
- KU10.** guidelines for operating the equipment
- KU11.** safety procedures to be followed as applicable

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** prepare status and progress reports
- GS2.** write memos and e-mail to co-workers, and vendors to provide them with work updates and to request appropriate information without English language errors regarding grammar or sentence construct
- GS3.** keep abreast with the latest knowledge by reading brochures, pamphlets, and product information sheets
- GS4.** discuss task lists, schedules, and work-loads with co-workers
- GS5.** keep co-workers and supervisors informed about progress
- GS6.** make decisions pertaining to the concerned area of work
- GS7.** plan and organize service feedback files/documents
- GS8.** manage relationships with customers
- GS9.** build customer relationships and use customer centric approach
- GS10.**
 - think through the problem, evaluate the possible solution(s) and suggest an optimum /best
 - possible solution(s)
- GS11.** identify immediate or temporary solutions to resolve delays
- GS12.** use the existing data to arrive at specific data points
- GS13.**
 - apply, analyze, and evaluate the information gathered from observation, experience,
 - reasoning, or communication, as a guide to thought and action

HCS/N9946: Managing workplace safety

Description

This unit provides Performance Criteria, Knowledge & Understanding, and Skills & Abilities required to comply with health, safety, and security requirements at the workplace and covers procedures to prevent, control, and minimize risk to self and others.

Scope

The scope covers the following :

- Comply with health, safety, and security requirements at work

Elements and Performance Criteria

Comply with health, safety, and security requirements at work

To be competent, the user/individual on the job must be able to:

- PC1.** comply with health and safety related instructions applicable to the workplace.
- PC2.** use and maintain personal protective equipment as per protocol.
- PC3.** carry out own activities in line with approved guidelines and procedures
- PC4.** maintain a healthy lifestyle and guard against dependency on intoxicants.
- PC5.** follow environment management system related procedures.
- PC6.** store materials and tools in line with manufacturers and organisational requirements
- PC7.** safely handle and move waste and debris.
- PC8.** minimize health and safety risks to self and others due to own actions
- PC9.** seek clarifications, from supervisors or other authorized personnel in case of perceived risks
- PC10.** monitor the workplace and work processes for potential risks and threats.
- PC11.** carry out periodic walk-through to keep work area free from hazards and obstructions, if assigned
- PC12.** report hazards and potential risks/ threats to supervisors or other authorized personnel
- PC13.** participate in mock drills/ evacuation procedures organized at the workplace
- PC14.** undertake first aid, fire-fighting and emergency response training, if asked to do so
- PC15.** take action based on instructions in the event of fire, emergencies or accidents
- PC16.** follow organisation procedures for evacuation when required

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** health and safety related practices applicable at the workplace
- KU2.** potential hazards, risks and threats based on nature of operations
- KU3.** organizational procedures for safe handling of tools

Qualification Pack

- KU4.** potential risks due to own actions and methods to minimize these
- KU5.** environmental management system related procedures at the workplace
- KU6.** layout of the plant and details of emergency exits, escape routes, emergency equipment and assembly points
- KU7.** potential accidents and emergencies and response to these scenarios
- KU8.** reporting protocol and documentation required
- KU9.** details of personnel trained in first aid, fire-fighting and emergency response
- KU10.** actions to take in the event of a mock drills/ evacuation procedures or actual accident, emergency or fire.
- KU11.** occupational health and safety risks and methods
- KU12.** personal protective equipment and method of use
- KU13.** identification, handling and storage of hazardous substances
- KU14.** proper disposal system for waste and by-products
- KU15.** signage related to health and safety and their meaning
- KU16.** importance of sound health, hygiene and good habits
- KU17.** ill-effects of alcohol, tobacco and drugs

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write in local language.
- GS2.** read measurement instructions
- GS3.** communicate orally with colleagues
- GS4.** follow organization rule-based decision making process
- GS5.** take decision with systematic course of actions and/or response
- GS6.** plan and organize your work to achieve targets and deadlines
- GS7.** manage relationships with customers
- GS8.** build customer relationships and use customer centric approach.
- GS9.** think through the problem, evaluate the possible solution(s) and suggest an optimum /best possible solution(s)
- GS10.** identify immediate or temporary solutions to resolve delays
- GS11.** analyze data and activities.
- GS12.** pass on relevant information to others
- GS13.** apply, analyze, and evaluate the information gathered from observation, experience, reasoning, or communication, as a guide to thought and action

HCS/N9937: Maintain Cleanliness

Description

This NOS provides the abilities required for taking responsibility for their own health at the workplace and is about using the correct procedures to prevent, control and minimize risk to them and others at the workplace.

Scope

The scope covers the following :

- adopt healthy work practices
- achieve work productivity while maintaining health

Elements and Performance Criteria

Adopt healthy work practices

To be competent, the user/individual on the job must be able to:

- PC1.** always cover the mouth and nose with a dust mask while working and keep on changing when it gets blocked with dust
- PC2.** follow work instructions strictly to reduce the amount of pollution at the work place e.g. wet the rock / craft material before working on it
- PC3.** wear protective goggles over eyes and replace them when scratches on it obscure the vision
- PC4.** wear gloves as per the materials used for making handicraft to avoid blisters; scratches and cuts
- PC5.** undergo preventive health checkups at regular intervals
- PC6.** take prompt treatment from the doctor in case of illness

Achieve work productivity while maintaining health

To be competent, the user/individual on the job must be able to:

- PC7.** follow SOPs for dealing with blisters; scratches; accidental fires or any other type of emergencies at work
- PC8.** ensure the absence of no productivity loss or absenteeism from work due to illness
- PC9.** ensure no long term ill effect on the personal health

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** companys policies on personal health and occupational hazard management
- KU2.** companys hr policies
- KU3.** companys reporting structure
- KU4.** companys emergency evacuation procedure
- KU5.** health risks to the worker at the work place

Qualification Pack

- KU6.** healthy work practices
- KU7.** how to perform the duties in a way to minimize pollution at the work place
- KU8.** what personal protective equipments should be worn and how it is cared for
- KU9.** safe disposal methods for waste
- KU10.** how to provide the first aid treatment at workplace
- KU11.** emergency procedures to be followed in case of an mishap such as fire accidents etc.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read personal health instructions and manual
- GS2.** read the usage of various hand tools and personal protection equipments
- GS3.** take notes on descriptions and details of various personal health maintenance procedures
- GS4.** communicate with supervisor about the physical symptoms
- GS5.** receive instructions from doctor and supervisor on medical care
- GS6.** how to select appropriate hand tools and personal protection equipment
- GS7.** when to change personal protection equipment during work
- GS8.** how to identify first aid needs in case and of an injury
- GS9.** how to select appropriate hand tools and personal protection equipment
- GS10.** when to change personal protection equipment during work
- GS11.** how to use materials that does not affect customer health / make injury
- GS12.** improve work processes by adopting best safety practices
- GS13.** analyze the usage of appropriate tools and consumables
- GS14.** spot errors and any other disruptions and communicate with solutions

Qualification Pack

HCS/N9941: Understanding Business Operations

Description

This OS unit focuses on business planning, internal strategy, timelines.

Scope

The scope covers the following :

- people management
- product planning
- procurement of raw materials
- market interfacing
- financial management
- record keeping

Elements and Performance Criteria

People management

To be competent, the user/individual on the job must be able to:

- PC1.** arrange Interactive meetings of managers of sales and production teams and categorize the issues and feedbacks of both the teams
- PC2.** train the employees of his/her unit with the appropriate skills required to make market relevant and quality products
- PC3.** motivate the employees

Product planning

To be competent, the user/individual on the job must be able to:

- PC4.** compile a report based on old production reports
- PC5.** address the issues faced in previous productions and try to resolve them
- PC6.** gather and analyze the cues from the market
- PC7.** ascertain the customer preference
- PC8.** develop product range lines based on current market preference
- PC9.** develop product range lines that are unique and able to price high
- PC10.** price the products according to market trends
- PC11.** identify the competent marketing strategy for the product range

Procurement of raw materials

To be competent, the user/individual on the job must be able to:

- PC12.** list of the raw material s and prepare a B.O.M according to the product lines
- PC13.** ascertain the quantity and right price to procure the materials
- PC14.** identify the right locations/agents from where the raw materials can be procured
- PC15.** negotiate to get the best price
- PC16.** ensure quality materials are procured

Qualification Pack

PC17. ensure the procured materials are stored in appropriate conditions

PC18. compile a record of price quotations, POs, and bills of procurement for future reference

Market interfacing

To be competent, the user/individual on the job must be able to:

PC19. maintain a healthy and professional relationship with vendor

PC20. the competitive market falls in order with the company policies of best price, quality, and delivery parameters

PC21. analyze the prevalent price for product lines

PC22. decide on the most effective means to access the market

PC23. plan for cost-effective transportation to the market

PC24. position the product according to market requirements

PC25. identify and address the expectations of customer

Financial management

To be competent, the user/individual on the job must be able to:

PC26. analyze and ascertain the cost of production

PC27. maintain the book of accounts related to the business

PC28. maintain export documents like a letter of credit, custom clearance

PC29. identify cost-effective means of running the business

Record keeping

To be competent, the user/individual on the job must be able to:

PC30. identify various aspects of business that require recording

PC31. design formats for recording

PC32. compile various records of all aspects of the business

PC33. maintain these records with periodic updations

PC34. maintain necessary documents as per local government and regulatory requirements

PC35. reframe the procurement strategy according to local scenarios like weather conditions, transport strikes, affected prices, etc.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. interpersonal skills and communication with a cross-section of stakeholders

KU2. understanding of basics accounting so that he/she can monitor the transactions between company and vendor

KU3. knowledge of banking basics to keep the export process flawless

KU4. understanding of costing principles to calculate the cost of production with all the overheads and the actual price

KU5. product and craft knowledge including material and tools requirements

KU6. gathering market intelligence

KU7. various transportation means and implications on costing

KU8. various product lines that can be created depending on the sector of operation

Qualification Pack

- KU9.** basic record-keeping techniques
- KU10.** basic laws, rules, regulations, etc. regarding business
- KU11.** vendor management and development
- KU12.** pricing techniques
- KU13.** business profitability assessment

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** analyse product range and keep abreast of market trends
- GS2.** document various aspects of the business
- GS3.** compile descriptions and details about investment, expenditures, and sales
- GS4.** interact with teams to work efficiently
- GS5.** communicate and manage vendors for cost-effective outsourcing and procurements
- GS6.** interface with fellow entrepreneurs to exchange ideas on the business
- GS7.** communicate with the customers for their feedback about the product
- GS8.** comprehend information shared by various stakeholders
- GS9.** plan and organize the product lines
- GS10.** fix the appropriate price.
- GS11.** hire employees with the appropriate skill set and experience
- GS12.** predict the profit margin to be achieved by the business
- GS13.** decide target segment of the market
- GS14.** schedule production cycles for better efficiency of resources
- GS15.** planning of production efficiency based on manpower and equipment available
- GS16.** schedule market visits for surveys and feedback
- GS17.** gather information on preference and taste of the customer
- GS18.** interact with various types of customers and understand the trends
- GS19.** analyze and solve conflicts and problems of the business.
- GS20.** ensure that the problems do not arise repeatedly.
- GS21.** anticipate various problems/challenges that can crop up
- GS22.** analyze the market for increasing sales
- GS23.** spot errors and any other disruptions and communicate with solutions

DGT/VSQ/N0101: Employability Skills (30 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

PC1. understand the significance of employability skills in meeting the job requirements

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

PC2. identify constitutional values, civic rights, duties, personal values and ethics and environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

PC3. explain 21st Century Skills such as Self-Awareness, Behavior Skills, Positive attitude, self-motivation, problem-solving, creative thinking, time management, social and cultural awareness, emotional awareness, continuous learning mindset etc.

Basic English Skills

To be competent, the user/individual on the job must be able to:

PC4. speak with others using some basic English phrases or sentences

Communication Skills

To be competent, the user/individual on the job must be able to:

PC5. follow good manners while communicating with others

PC6. work with others in a team

Qualification Pack

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

PC7. communicate and behave appropriately with all genders and PwD

PC8. report any issues related to sexual harassment

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

PC9. use various financial products and services safely and securely

PC10. calculate income, expenses, savings etc.

PC11. approach the concerned authorities for any exploitation as per legal rights and laws

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

PC12. operate digital devices and use its features and applications securely and safely

PC13. use internet and social media platforms securely and safely

Entrepreneurship

To be competent, the user/individual on the job must be able to:

PC14. identify and assess opportunities for potential business

PC15. identify sources for arranging money and associated financial and legal challenges

Customer Service

To be competent, the user/individual on the job must be able to:

PC16. identify different types of customers

PC17. identify customer needs and address them appropriately

PC18. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC19. create a basic biodata

PC20. search for suitable jobs and apply

PC21. identify and register apprenticeship opportunities as per requirement

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use basic spoken English language

KU6. Do and dont of effective communication

KU7. inclusivity and its importance

KU8. different types of disabilities and appropriate communication and behaviour towards PwD

KU9. different types of financial products and services

Qualification Pack

- KU10.** how to compute income and expenses
- KU11.** importance of maintaining safety and security in financial transactions
- KU12.** different legal rights and laws
- KU13.** how to operate digital devices and applications safely and securely
- KU14.** ways to identify business opportunities
- KU15.** types of customers and their needs
- KU16.** how to apply for a job and prepare for an interview
- KU17.** apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate effectively using appropriate language
- GS2.** behave politely and appropriately with all
- GS3.** perform basic calculations
- GS4.** solve problems effectively
- GS5.** be careful and attentive at work
- GS6.** use time effectively
- GS7.** maintain hygiene and sanitisation to avoid infection

HCS/N1510: Receive raw slate stone and Work Instructions

Description

This unit is about receiving the raw slate stone and work instructions from the supervisor for performing job duties.

Scope

The scope covers the following :

- receive raw slate stone
- Understand the work requirements
- achieve productivity and quality standards

Elements and Performance Criteria

Receive raw slate stone

To be competent, the user/individual on the job must be able to:

- PC1.** prepare the raw slate stones received from the supervisor.
- PC2.** follow standard operating procedure of the company and industry while handling raw slate stones
- PC3.** use necessary tools and protective gears while handling the slate stones
- PC4.** place slate stone in a way so that work flow is smooth and there is no damage to other raw stones
- PC5.** maintain records of the quantity of raw slate stones received.

Understand the work requirements

To be competent, the user/individual on the job must be able to:

- PC6.** categorise the stoneware products and models as per the day's work assigned
- PC7.** estimate daily targets.
- PC8.** understand the daily requirements of different sizes and shape of raw slate to be used and choose the right tools accordingly
- PC9.** get specific work-related instructions from supervisor, if required

Achieve productivity and quality standards

To be competent, the user/individual on the job must be able to:

- PC10.** understand what is required of him and ask relevant questions to supervisor to have clear understanding of the job requirement and expectations
- PC11.** achieve the level of quality and satisfaction on the work done, as required by the supervisor
- PC12.** ensure zero material defect while handling the stones
- PC13.** follow organisation's standard and procedure on material movement and stocking
- PC14.** achieve daily targets with minimum wastage of the material

Knowledge and Understanding (KU)

Qualification Pack

The individual on the job needs to know and understand:

- KU1.** company's policies on human resource management, benefits, and code of conduct
- KU2.** company's products with different stones and quality assurance
- KU3.** organisation's culture and typical customer profile
- KU4.** company's reporting structure
- KU5.** company's documentation policy
- KU6.** variety of stones and their basic quality
- KU7.** material movement procedures.
- KU8.** material stocking procedures
- KU9.** the usage of different tools and machines used for material movement and handling.
- KU10.** usage of necessary tools and protective gears while handling the slate stones
- KU11.** the process of stone crafting.
- KU12.** basics of inventory management.
- KU13.** different types of tools used in stoneware product making
- KU14.** quality and safety standards relating to raw material, processing and finishing
- KU15.** general documentation and record keeping procedures as followed in the industry

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read and interpret the daily targets and work requirement
- GS2.** read and comprehend the company's policy documents
- GS3.** maintain records / documents with respect to stones received from the supervisor
- GS4.** seek work instructions from the supervisor
- GS5.** listen to supervisor to know daily targets
- GS6.** seek out and listen to co-workers
- GS7.** share technical and non-technical information, with seniors and colleagues effectively
- GS8.** identify and decide the critical tools and protective gears for handling the slate stones
- GS9.** prioritize and organise tasks / work to achieve daily targets
- GS10.** communicate with customers / clients and understand their preferences
- GS11.** solve work related problems
- GS12.** analyse situations at work and communicate with the concerned personnel as per the requirement
- GS13.** spot process disruptions and delays
- GS14.** report on any work-related concerns to superiors without delay

HCS/N1402: Split slate stone into layers

Description

This unit is about slicing the slate stone into layers of different sizes.

Scope

The scope covers the following :

- soak raw slate stone in water
- split the slate stone into layers
- achieve productivity and quality standards

Elements and Performance Criteria

Soak raw slate stone in water

To be competent, the user/individual on the job must be able to:

- PC1.** place a tub / big container at the appropriate place in the working area and fill it with water
- PC2.** dip all the raw slate stones one by one in the water filled tub / big container and keep it there as per the standard operating procedure of the company and keep it soaked for the duration as required
- PC3.** bring raw slate stones out of the water filled tub / big container without any damage
- PC4.** ensure the raw slate stones is soaked well and suitable for the next process requirement

Split the slate stone into layers

To be competent, the user/individual on the job must be able to:

- PC5.** select the necessary and appropriate tools such as chisel and hammer required for splitting
- PC6.** use appropriate personal protective gear such as masks, gloves for splitting the slate stone
- PC7.** ensure that chisel has sharp and smooth edge
- PC8.** place the raw slate at suitable and stable position on ground
- PC9.** remove the raw unwanted layers from the slate stone with the help of chisel and hammer
- PC10.** split the slate stone along the layer lines as per the required sizes with the help of chisel and hammer
- PC11.** ensure that the raw stone is not damage while splitting
- PC12.** ensure no crack is formed in any part (crafting area) of the stone while splitting

Achieve productivity and quality standards

To be competent, the user/individual on the job must be able to:

- PC13.** cleanly split the slate stone into different sizes as per the requirements
- PC14.** ensure minimum wastage of raw slate stone
- PC15.** meet the periodical production targets
- PC16.** follow material movement, handling, quality and safety standards during the work and ensure no material or personal damage
- PC17.** split slates as per company desired dimension, thickness and sizes

Qualification Pack

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** companys policies on human resource management, benefits and code of conduct
- KU2.** companys products with different stones and quality assurance
- KU3.** organisation culture and typical customer profile
- KU4.** companys reporting structure
- KU5.** companys documentation policy
- KU6.** the grain / layer lines of the slate stone
- KU7.** variety of stones and their basic quality
- KU8.** handling of different types of stones
- KU9.** usage of chisel or splicing tools
- KU10.** tool maintenance
- KU11.** processes involved in stone crafting.
- KU12.** dimension/shape/size specifications in stones.
- KU13.** use variety of chisels and hammers for splitting the slate stone
- KU14.** maintenance and repair tools.
- KU15.** material handling and material movement procedures.
- KU16.** quality and safety standards to be followed in stone craft making.
- KU17.** precautionary measures to be taken during the work.
- KU18.** different types of tools / machines used in stoneware product making

HCS/N1511: Create cavity inside the flat Stone

Description

This unit is about receiving the flat stone slabs with design marking from the supervisor and then creating a cavity in them as per the product template with specifications for the product.

Scope

The scope covers the following :

- receiving flat slabs and work instructions
- operating drill machine to shape the flat stone
- achieve productivity and quality standards

Elements and Performance Criteria

Receiving flat slabs and work instructions

To be competent, the user/individual on the job must be able to:

- PC1.** receive flat slabs with product design marking from the supervisor
- PC2.** receive product template and work instructions from the supervisor
- PC3.** follow standard operating procedures while handling slabs
- PC4.** ensure to place slabs in a way so that work flow is smooth and there is no damage to other slabs
- PC5.** document the number of flat stone slabs received

Operating drill machine to shape the flat stone

To be competent, the user/individual on the job must be able to:

- PC6.** take one flat slab and place it on ground
- PC7.** place in a stable and safe position
- PC8.** plug in the handheld drill machine to connect it with electricity
- PC9.** switch on the machine and start making a hole inside the flat stone as per the product design
- PC10.** change rammer of the drill machine as per the shaping requirements of the product
- PC11.** create a hole with the help of rammer / repeatedly creating multiple holes in nearby areas to create a cavity inside the flat slab as per the product template
- PC12.** remove the remaining stone with the help of a chisel and hammer
- PC13.** smooth the cavity surface using different sizes of rammers on the drill machine
- PC14.** fill cracks or imperfections in marble with wax that matches the stone color
- PC15.** handover the product to supervisor for further processing

Achieving productivity and quality standards

To be competent, the user/individual on the job must be able to:

- PC16.** understand the product template and work instructions to create the cavity inside the flat stone slab

Qualification Pack

PC17. drill the flat slab cleanly without breaking / damaging it

PC18. achieve daily targets with no wastage of flat stone slabs

PC19. segregate and dispose off scrape as per the company's SOP

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** company's policies on human resource management, benefits and code of conduct.
- KU2.** company's products with different stones and respective quality requirements
- KU3.** organizational culture and typical customer profile
- KU4.** company's reporting structure
- KU5.** company's documentation policy
- KU6.** variety of stones and their characteristics
- KU7.** handling of different types of stones
- KU8.** different types of tools used in stoneware product making
- KU9.** different types of rammers of the drill machine
- KU10.** usage of drill machine and changing variety of rammers in the drilling machine
- KU11.** move controls to adjust, start or stop equipment during drilling
- KU12.** maintenance and repair of handheld stone drilling machine and its rammers
- KU13.** sharpening abrasive rammers using machines and hand tools
- KU14.** cleaning of drill machine and hand tools daily
- KU15.** how to load and adjust rammers on to drill machine
- KU16.** how to position drilling machine over surface
- KU17.** how to measure dimensions
- KU18.** sizes and shapes of work pieces, finishes specified and steps in finishing processes

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read the layout of work pieces in the drill machine and product templates
- GS2.** read the company's work instructions and guidelines
- GS3.** document the slabs received from the supervisor
- GS4.** document the number of variety of products shaped after drilling the flat stone slab
- GS5.** document the damage / wastage that happened during the drilling process
- GS6.** seek work instructions from the supervisor
- GS7.** listen to supervisor to know daily targets
- GS8.** seek out and listen to co-workers
- GS9.** express information, both technical and non-technical, to seniors and colleagues effectively
- GS10.** identify and decide the critical methods, tools and machines to be used for drilling
- GS11.** prioritize and organise to achieve the daily targets

Qualification Pack

- GS12.** organize all the necessary tools and equipment at the work place
- GS13.** communicate with customers / clients and understand their preferences
- GS14.** resolve problems / conflicts through proper communication
- GS15.** analyse and communicate as per the requirement
- GS16.** spot process disruptions and delays
- GS17.** report on any concerns to superiors without delay

Qualification Pack

HCS/N1512: Cut Slab as per different product requirements

Description

This unit is about receiving the slabs and work requirements from the supervisor and then cutting them into smaller slabs of different sizes as per the product requirements for further processing keeping in mind the final size and shape of the end product.

Scope

The scope covers the following :

- receiving slabs of hard stone
- understanding work requirements
- cut slab into different sizes
- achieve productivity and quality standards

Elements and Performance Criteria

Receive slabs of hard stones

To be competent, the user/individual on the job must be able to:

- PC1.** receive slabs of hard stones from the supervisor.
- PC2.** follow standard operating procedures for handling slabs.
- PC3.** place slabs in a way so that work flow is smooth and there is no damage to other slabs
- PC4.** document the quantity of slabs of hard stones received.

Understanding work requirements

To be competent, the user/individual on the job must be able to:

- PC5.** understand the stoneware products and models for which the day's work is assigned.
- PC6.** understand daily targets
- PC7.** understand daily requirements with respect to sizes and shapes.
- PC8.** get specific work related instructions from supervisor

Cut slab into different sizes

To be competent, the user/individual on the job must be able to:

- PC9.** set bricks at the working station as per the size of the slab
- PC10.** take one slab and put it horizontally over bricks
- PC11.** mark the cutting dimensions on the slab with the help of crayon and scale
- PC12.** place one bucket full of water near the working station
- PC13.** dip the one end of the small lumen water pipe in it and place the other end over the slab near the cutting area
- PC14.** plug in the handheld stone cutting machine to connect it with electricity
- PC15.** switch on the handheld stone cutting machine and start cutting the slab along the crayon marks as per work instructions amidst the continuous supply of water over the cutting area
- PC16.** cut the slab in required sizes and segregate the scrap

Qualification Pack

Achieve productivity and quality standards

To be competent, the user/individual on the job must be able to:

- PC17.** ask questions to supervisor to have clear understanding of the job requirement and expectations
- PC18.** cut slabs cleanly into the required sizes without breaking it
- PC19.** achieve daily targets with minimum wastage of big slabs
- PC20.** segregate and dispose of scrapes as per the companys sop.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** companys policies on human resource management, benefits and code of conduct
- KU2.** companys products with different stones and quality assurance
- KU3.** organisation culture and typical customer profile
- KU4.** companys reporting structure
- KU5.** companys documentation policy
- KU6.** variety of stones and their basic quality
- KU7.** handling of different types of stones
- KU8.** different types of tools used in stoneware product making.
- KU9.** how to place and position the slab in the working area so that there is no movement in the slab during the work.
- KU10.** usage of handheld stone cutting machine.
- KU11.** changing variety of cutting blades used in the machine.
- KU12.** maintenance and repair of handheld stone cutting machine and its blades.
- KU13.** how to mark the cutting dimensions as per the design
- KU14.** precautions to be taken while operating the machine and cutting the slab
- KU15.** how to create variety of stoneware shapes, designs of different sizes
- KU16.** segregating and disposing the scrap in environmentally friendly way

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read work instructions in local language.
- GS2.** read company policy documents in local language.
- GS3.** how to document the slabs received from the supervisor
- GS4.** seek work instructions from the supervisor.
- GS5.** listen to supervisor to know daily targets.
- GS6.** seek out and listen to co-workers.
- GS7.** express information, both technical and non-technical, to seniors and colleagues effectively.
- GS8.** identify and decide the critical tools and equipments to be used for cutting.

Qualification Pack

- GS9.** prioritize and organise in order to achieve daily targets.
- GS10.** communicate with customers / clients and understand their preferences.
- GS11.** solve work related problems.
- GS12.** analyse and communicate as per the requirement.
- GS13.** spot process disruptions and delays.
- GS14.** report on any concerns to superiors without delay.

HCS/N1513: Shape the Hard stone slab

Description

This unit is about receiving the hard stone slabs with design marking from the supervisor and then shaping them as per the product template for further processing as required for the end product.

Scope

The scope covers the following :

- receiving slabs of hard stone
- create product shape
- achieve productivity and quality standards

Elements and Performance Criteria

Receive slabs of hard stone

To be competent, the user/individual on the job must be able to:

- PC1.** collect slabs of hard stone with product design marking from the supervisor
- PC2.** follow standard operating procedure while handling slabs
- PC3.** place slabs for a smooth workflow and ensure other slabs do not get damaged.
- PC4.** document the quantity of slabs of hard stones received

Create product shape

To be competent, the user/individual on the job must be able to:

- PC5.** take one slab and place it on ground
- PC6.** rest it in comfortable and stable position
- PC7.** plug in the handheld stone grinding machine to connect it with electricity
- PC8.** switch on the machine and start cutting the hard stone slab partially along the crayon marks as per the product design
- PC9.** change the grinding blades as per shaping requirements of the product
- PC10.** shape the hard stone slab by grinding it as per product design using machine
- PC11.** smoothen the edges and surface of product using handheld grinding machine
- PC12.** fill cracks or imperfections in marble with wax that matches the stone color
- PC13.** handover the product to supervisor for further processing

Achieve productivity and quality standards

To be competent, the user/individual on the job must be able to:

- PC14.** understand the product design and grinding requirements to give the hard stone slab a proper shape for further processing
- PC15.** grind slab cleanly as per product specifications without breaking/damaging it
- PC16.** achieve daily targets with no wastage of hard stone slabs
- PC17.** segregate and dispose scrape as per the companys sop.

Qualification Pack

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** companys policies on human resource management, benefits and code of conduct
- KU2.** companys products with different stones and quality assurance
- KU3.** organisation culture and typical customer profile
- KU4.** companys reporting structure
- KU5.** companys documentation policy
- KU6.** variety of stones and their basic quality
- KU7.** handling of different types of stones
- KU8.** different types of tools used in stoneware product making
- KU9.** different types of abrasive wheels of the handheld stone grinder machine
- KU10.** how to load and adjust work pieces on to handheld stone grinder machine
- KU11.** how to position grinding machine over surface
- KU12.** usage of handheld stone grinding machine
- KU13.** usage of measure and mark equipment to ensure grinding standards are met
- KU14.** test work pieces in working machinery
- KU15.** changing variety of grinding blades in the machine
- KU16.** moving controls to adjust, start or stop equipment during grinding
- KU17.** maintenance and repair the handheld stone cutting machine and its blades
- KU18.** sharpen abrasive grinding tools using machines and hand tools
- KU19.** cleaning electric machine equipments and hand tools daily
- KU20.** how to trim and scrape stone
- KU21.** how to measure dimensions
- KU22.** sizes and shapes of work pieces, finishes specified and steps in finishing processes

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read the layout of work pieces and product templates
- GS2.** read the companys work instructions and guidelines
- GS3.** documents related to slabs received from the supervisor
- GS4.** documents related to the number of variety of products shaped after grinding the hard stone slab.
- GS5.** maintain records of damage / wastage that happened during the grinding process along with the reasons for that
- GS6.** seek work instructions from the supervisor.
- GS7.** listen to supervisor to know daily targets.
- GS8.** seek out and listen to co-workers
- GS9.** express information, both technical and non-technical, to seniors and colleagues effectively.

Qualification Pack

- GS10.** identify and decide the critical tools and machines to be used for grinding.
- GS11.** prioritize and organise to achieve the daily targets.
- GS12.** organize all the necessary tools and equipments at the work place.
- GS13.** communicate with customers / clients and understand their preferences
- GS14.** solve work related problems.
- GS15.** analyse and communicate as per the requirement
- GS16.** spot process disruptions and delays
- GS17.** report on any concerns to superiors without delay

HCS/N1514: Prepare stone components on Lathe machine

Description

This unit is about preparing the stone components on the lathe machine as per product specifications given by the supervisor/end-user

Scope

The scope covers the following :

- receiving the raw alabaster stone and work instructions
- prepare the stone for the lathe machine
- operating the lathe machine
- achieve productivity and quality standards

Elements and Performance Criteria

Receive the raw alabaster stone and work instructions

To be competent, the user/individual on the job must be able to:

- PC1.** receive raw alabaster stone from the supervisor
- PC2.** receive the information about the type and quantity of components of different products to be made in the day
- PC3.** receive specific work instructions from the supervisor
- PC4.** get daily production targets along with specific quality requirements from the supervisor

Prepare the stone for the lathe machine

To be competent, the user/individual on the job must be able to:

- PC5.** cut the stone into manageable size for lathe machine if required
- PC6.** cut off any large corners or any protrusions in the stone

Operate the lathe machine

To be competent, the user/individual on the job must be able to:

- PC7.** check the lathe machine and its settings
- PC8.** mounting the stone on the lathe machine
- PC9.** position the stone correctly on the machine
- PC10.** correctly set the range of work holding devices like chucks; drive plates; fixtures; magnetic or pneumatic devices etc
- PC11.** correctly set the range of cutting tools like turning, facing, boring, knurling, parting off, forming, central drill, twist drill, reamers etc
- PC12.** switch on the machine and operate it as per the operational manual
- PC13.** perform turning operations using various equipment to produce stone components with various shapes
- PC14.** change the position of the stone and slide
- PC15.** give back the shaped stone to the supervisor for further processing as per end product requirements.

Qualification Pack

Achieving productivity and quality standards

To be competent, the user/individual on the job must be able to:

- PC16.** give shape to the stone as per the product specifications
- PC17.** do the minimum wastage of the stone during the turning operations
- PC18.** shape the stone without damaging it for further processing

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** companys policies on human resource management, benefits and code of conduct
- KU2.** companys products with different stones and quality assurance
- KU3.** organisation culture and typical customer profile
- KU4.** companys reporting structure
- KU5.** companys documentation policy
- KU6.** types of stone and their basic qualities
- KU7.** how to cut the stone into manageable size for lathe machine
- KU8.** how to cut off the large corners or any protrusions without damaging the whole piece
- KU9.** usage of stone cutting machine, variety of chisels and hammer
- KU10.** changing relevant parts of the machine.
- KU11.** maintainence and repair of lathe machine.
- KU12.** how to mount the heavy stone on the lathe machine
- KU13.** what is the right position of the stone on the lathe machine to work upon
- KU14.** how to operate and monitor the lathe machine
- KU15.** how to change the parts of the lathe machine as per product requirements
- KU16.** how to set the tools and working parts on the machine
- KU17.** how to change the position of the stone on the lathe machine as per design requirements

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read the work requirements.
- GS2.** read company policy notes.
- GS3.** maintain documents related to the quantity of stones received from the supervisor.
- GS4.** seek work instructions from the supervisor.
- GS5.** listen to supervisor to know daily targets.
- GS6.** seek out and listen to co-workers.
- GS7.** express information, both technical and non-technical, to seniors and colleagues effectively.
- GS8.** decide the use of appropriate use of tools and machines
- GS9.** plan the work and organize all the tools and equipments required to perform the job.
- GS10.** communicate with customers / clients and understand their preferences.

Qualification Pack

- GS11.** solve work related problems.
- GS12.** analyse and communicate as per the requirement.
- GS13.** spot process disruptions and delays.
- GS14.** report on any concerns to superiors without delay.

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Qualification Pack

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Minimum Passing % at NOS Level: 50

(Please note: A Trainee must score the minimum percentage for each NOS separately as well as on the QP as a whole.)

Assessment Weightage

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
