HCS/Q1504: Inlay Artisan - Stonecraft

Brief Job Description

A stonecraft inlay artisan carefully places different stones together to create beautiful patterns and designs. Their work turns ordinary items into stunning pieces of art.

Personal Attributes

A stonecraft inlay artisan is patient and detail-oriented, with a strong eye for colour and design. Their creativity and precision enable them to craft beautiful, intricate patterns that bring surfaces to life.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [HCS/N1505: Create inlay work on marble](#)
2. [HCS/N1515: Create Inlay work on Sandstone](#)
3. [HCS/N1516: Create Inlay work on Black Marble](#)

Qualification Pack

HCS/N1505: Create inlay work on marble

Description

This unit is about understanding customers requirements of a decorative piece, planning of motif designs, setting its colour scheme and tonality followed by executing the plan to create the pattern on the marble.

Scope

The scope covers the following :

- understanding customer's requirements
- putting customer's design idea / concept on the paper
- selecting stones for the motif
- shaping semiprecious and precious stones as per the design
- engraving the marble
- polishing the marble with motif
- achieve productivity and quality standards

Elements and Performance Criteria

Understanding customer's requirements

To be competent, the user/individual on the job must be able to:

- PC1.** sit with the customer to understand the specific requirements related to the pattern, size and colour combination
- PC2.** capture customers idea of colour scheme and tonality of the design

Putting customers design idea / concept on the paper

To be competent, the user/individual on the job must be able to:

- PC3.** draw the pattern in symmetric sections using traditional geometric tools and create the final sketch of the design
- PC4.** trace the final sketch of the design on a brass sheet
- PC5.** cut out the brass sheet as per the design to make templates of every component of the design

Selecting stones for the motif

To be competent, the user/individual on the job must be able to:

- PC6.** select a variety of semiprecious and precious stones for the motif

Select stones for the motif

To be competent, the user/individual on the job must be able to:

- PC7.** select the base marble as per the required size on which the pattern is to be developed
- PC8.** choose various shades of these stones to give the right gradation and shading to the motif

Shaping semiprecious and precious stones as per the design

To be competent, the user/individual on the job must be able to:

- PC9.** operate the hand driven tool known as saan & kamaani having an emery wheel

Qualification Pack

PC10. hold piece of the gem stone in the fingertips and touch it repeatedly with the moving emery wheel in a specific pattern so as to give it shape as per the motif requirements

PC11. shape all the gem stones of different sizes and colours required for the motif

Engraving the marble

To be competent, the user/individual on the job must be able to:

PC12. place all the gem stones shaped as per the motif on the base marble

PC13. arrange them at specific positions according to the motif design

PC14. trace the contours of these stones one-by-one with a fine pointed chisel or a lead to get an outline of each element on the marble

PC15. remove these shaped gem stones from the base marble and keep them in a chronological order

PC16. engrave the marble using hand held chisels with great care to make grooves which correspond exactly with the shaped gem stones

PC17. inlay all the shaped gem stones into their corresponding grooves one-by-one using specially prepared glue

Polishing the marble with motif

To be competent, the user/individual on the job must be able to:

PC18. apply the modern wax or specially prepared mixture of polishing compounds on the marble with the final motif

Achieve productivity and quality standards

To be competent, the user/individual on the job must be able to:

PC19. accurately capture customers requirements for motif

PC20. create the design sketch precisely as per customers requirements

PC21. select semiprecious and precious stones properly to give the right gradation and shading to the motif as per customers specifications

PC22. shape the gem stones very precisely as per the motif design

PC23. engrave the marble such that all the grooves correspond exactly with the gemstones

PC24. inlay the gem stones in the marble with such accuracy that there is no visible gap between the edge of the gem stone and the marble

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. company's policies on human resource management, benefits and code of conduct

KU2. company's products with different stones and respective quality assurance

KU3. organisation culture and typical customer profile

KU4. company's reporting structure

KU5. company's documentation policy

KU6. the exquisite range of semi precious stones used to manufacture inlaid products

KU7. basic qualities of the gem stones

KU8. basic intricacy and complexities of the motifs

KU9. usage of saan & kamaani, variety of chisels and mallet

Qualification Pack

- KU10.** changing emery on wheels
- KU11.** maintenance and repair of saan & kamaani
- KU12.** handling different types of gem stones
- KU13.** different types of tools used for in-lay work

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read the design
- GS2.** read company policy documents
- GS3.** write the notes from the design
- GS4.** write notes on the job specification
- GS5.** seek customers specifications for the motif
- GS6.** seek out and listen to co-workers
- GS7.** express information, both technical and non-technical, to seniors and colleagues effectively
- GS8.** decide on the right shades and materials to be used
- GS9.** prioritize and organise to achieve the daily targets
- GS10.** communicate with customers / clients and understand their preferences
- GS11.** solve work related problems
- GS12.** analyse and communicate as per requirement
- GS13.** spot process disruptions and delays
- GS14.** report on any concerns to superiors without delay

HCS/N1515: Create Inlay work on Sandstone

Description

Inlay work on sandstone is a meticulous craft that involves embedding pieces of colored stones or materials into the surface of sandstone to create intricate designs and patterns.

Scope

The scope covers the following :

- Planning and Cutting on Brass Sheet
- Tracing the Design on the Base Stone
- Carving the Base Stone
- Shaping the Colored Stones
- Setting the Shaped Stones
- Smoothing the Surface
- Inspecting the Final Product

Elements and Performance Criteria

Planning and Cutting on Brass Sheet

To be competent, the user/individual on the job must be able to:

- PC1.** Plan a design and carefully cut out a brass sheet.
- PC2.** Design is cut out from a thin brass sheet using tools like a jeweler's saw.
- PC3.** Ensure that the intricate patterns are accurately replicated onto the stone.

Tracing the Design on the Base Stone

To be competent, the user/individual on the job must be able to:

- PC4.** Place the brass sheet template on the base sandstone.
- PC5.** Trace the design on the stone surface using a fine pencil or marker.

Carving the Base Stone

To be competent, the user/individual on the job must be able to:

- PC6.** Use chisels, a set-square, and other carving tools, the stone is carved along the traced lines to create recesses or grooves.
- PC7.** Depth and width of the grooves must be carefully controlled to match the thickness of the colored stones that will be inlaid.

Shaping the Colored Stones

To be competent, the user/individual on the job must be able to:

- PC8.** Select different color stones to fit into the carved grooves.
- PC9.** Cut the stones into small pieces that match the shapes needed for the design.
- PC10.** Use traditional tools like a diamond-tipped saw or water jet cutter, depending on the hardness and fragility of the sandstone.

Setting the Shaped Stones

To be competent, the user/individual on the job must be able to:

Qualification Pack

PC11. Grooves are further refined to ensure the shaped stones fit perfectly.

PC12. Apply an adhesive, such as epoxy resin or a stone-specific glue to the grooves, and the cut stones are carefully placed and press into them.

Smoothing the Surface

To be competent, the user/individual on the job must be able to:

PC13. Polish using abrasive materials, such as sandpaper or diamond pads, to smooth out the surface and level the inlay with the base sandstone.

PC14. Polish the edges of the inlay work to remove any sharpness and to enhance the visual appeal.

Inspecting the Final Product

To be competent, the user/individual on the job must be able to:

PC15. Check for any imperfections, such as gaps between the inlay pieces and the base stone, loose stones, or uneven surfaces.

PC16. Correction often by filling gaps or repolishing certain areas.

PC17. Ensure the finished product meets the desired standards and quality of the product.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. Organisation culture and typical customer profile

KU2. Basic properties of various raw materials used

KU3. Appropriate tracing techniques

KU4. Size and shape of the products to be prepared

KU5. Company's products with different stones and respective quality assurance

KU6. Basic qualities of the colored stones

KU7. Basic intricacy and complexities of the motifs

KU8. Diamond-tipped tools or saws are often used to cut the stones

KU9. Set-square helps maintain straight lines and angles, especially for geometric designs.

KU10. Outline of the design is traced onto the stone, typically using a pencil or chalk

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. Read company policy documents

GS2. Write the notes from the design

GS3. Write notes on the job specification

GS4. Express information, both technical and non-technical, to seniors and colleagues effectively

GS5. Make decisions pertaining to the concerned area of workplace

GS6. Take the right raw materials according to the end product

GS7. Analyse and communicate as per requirement

GS8. Seek out and listen to co-workers

HCS/N1516: Create Inlay work on Black Marble

Description

The process of inlay work on black marble, often referred to as Pietra Dura, is a traditional and exquisite craft that involves embedding colorful stones into the surface of black marble to create intricate designs.

Scope

The scope covers the following :

- Material and Tool Preparation
- Design Transfer and Planning
- Stone Cutting and Shaping
- Engraving and Embedding
- Finishing and Quality Check

Elements and Performance Criteria

Material and Tool Preparation

To be competent, the user/individual on the job must be able to:

- PC1.** Identify and source high-quality black marble and semi-precious stones as per design specifications.
- PC2.** Inspect and prepare tools such as chisels, grinders, and engraving tools for functionality and precision.
- PC3.** Clean and level the marble surface to ensure proper adherence for inlay work.
- PC4.** Ensure the availability of adhesives and polishing agents suitable for marble inlay.

Design Transfer and Planning

To be competent, the user/individual on the job must be able to:

- PC5.** Interpret the design requirements from sketches, blueprints, or client briefs.
- PC6.** Accurately transfer the design onto the black marble using stencils, tracing, or hand drawing.
- PC7.** Verify alignment, proportions, and dimensions of the design on the marble surface.
- PC8.** Modify the design layout, if necessary, to suit the marble's surface or client preferences.

Stone Cutting and Shaping

To be competent, the user/individual on the job must be able to:

- PC9.** Use cutting tools to shape semi-precious stones as per the design's intricate patterns.
- PC10.** Ensure that cut stones are of the correct size, shape, and smoothness for embedding.
- PC11.** Polish stones to achieve a glossy finish and enhance their visual appeal.
- PC12.** Follow safety protocols while cutting and shaping materials to prevent injuries.

Engraving and Embedding

To be competent, the user/individual on the job must be able to:

- PC13.** Engrave precise grooves into the black marble surface to match the design outline.
- PC14.** Ensure that the depth and width of engravings allow for a snug fit of inlay pieces.

Qualification Pack

PC15. Apply adhesives evenly to the grooves for securing inlay materials.

PC16. Embed each stone into its respective groove, ensuring proper alignment and tight fitting.

Finishing and Quality Check

To be competent, the user/individual on the job must be able to:

PC17. Smooth the marble surface and polish the completed inlay to achieve a flawless finish.

PC18. Remove excess adhesive and residue to ensure a clean, professional look.

PC19. Inspect the final product for defects, alignment, and overall aesthetic appeal.

PC20. Package the finished piece carefully to protect it from damage during storage or transport.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** personnel management, relevant legislation, standards, policies, and procedures followed in the company
- KU2.** organizational structure
- KU3.** the key product lines of the company
- KU4.** basic properties of various raw materials used
- KU5.** understanding the properties of black marble, such as its hardness, durability, and suitability for inlay work
- KU6.** familiarity with various stones used for inlay such as Gemstones, Semi-Precious Stones and Organic materials (Mother of pearl, abalone shell, coral, and tiger eye)
- KU7.** Knowledge of the types of adhesives suitable for securing stones in marble, including their drying times and durability
- KU8.** Understanding the steps involved in placing the stones and securing them properly to ensure they fit well within the carved areas
- KU9.** Mastery of carving techniques using chisels and tools
- KU10.** familiarity with the polishing techniques used to achieve a smooth, shiny finish, including the types of abrasives and tools used
- KU11.** understanding the principles of design, including symmetry, balance, and color theory
- KU12.** knowledge of traditional methods compared to contemporary practices, including the use of modern tools and materials

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read the design and pattern instructions
- GS2.** read company policy documents
- GS3.** understanding how to promote and sell inlay works
- GS4.** ability to communicate effectively with clients about custom designs and craftsmanship
- GS5.** write the notes from the design
- GS6.** prioritize and organise to achieve the daily targets

Qualification Pack

- GS7.** decide on the right shades and materials to be used
- GS8.** analyse and communicate as per requirement
- GS9.** spot process disruptions and delays
- GS10.** read and understand manuals, health and safety instructions, memos, reports and job cards

HCS/N8503: Entrepreneurship Skills for Stonecraft Inlay Artisan

Description

This unit focuses on the essential entrepreneurship skills required in the inlaying sector of stonecraft. It covers the technical mastery of stone inlay techniques, material knowledge, market understanding, and innovation. Additionally, it emphasizes business management, including budgeting, pricing, and marketing strategies, alongside ethical sourcing and networking opportunities. The unit equips entrepreneurs to balance craftsmanship with modern business practices to thrive in both traditional and contemporary markets.

Scope

The scope covers the following :

- Technical expertise in stone inlaying
- Market understanding and innovation
- Business and financial management
- Networking and partnership development
- Customer relationship management

Elements and Performance Criteria

Technical Expertise in Stone Inlaying

To be competent, the user/individual on the job must be able to:

- PC1.** Use the art and techniques involved in stone inlaying.
- PC2.** Identify the types of inlaying techniques such Pietra dura, marble inlay, or gemstone Inlay.
- PC3.** Identify the various stones and their properties and how to work with them (cutting, polishing, setting).
- PC4.** Identify the designing skills whether in traditional motifs or modern aesthetics.
- PC5.** Recognize the technical aspects of selecting and cutting stones, ensuring precision in fitting, and maintaining high-quality standards.

Market Understanding and Innovation

To be competent, the user/individual on the job must be able to:

- PC6.** Staying updated on market trends, such as preferences for specific materials (e.g., marble, semi-precious stones) or patterns.
- PC7.** Identify the potential export opportunities which help to expand the business.

Business and Financial Management

To be competent, the user/individual on the job must be able to:

- PC8.** Create a business plan, set clear goals, and outline strategies for scaling the business.
- PC9.** Need to efficiently manage costs, especially as inlay work involves precious and semi-precious stones.
- PC10.** Managing the procurement of stones and materials and ensuring ethical and sustainable sourcing practices.

Networking and Partnership Development

Qualification Pack

To be competent, the user/individual on the job must be able to:

- PC11.** Leverage government schemes that offer funding, training, or market access to local or international platforms.
- PC12.** Participate in trade fair and exhibitions to showcase craftsmanship, network, and attract more buyers.

Customer Relationship Management

To be competent, the user/individual on the job must be able to:

- PC13.** Communicating with clients, managing their expectations, and providing progress updates.
- PC14.** Identify the customer preferences, customizing products, and building strong relationships with clients—both B2B (business-to-business) and B2C (business-to-customer).

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Understanding the traditional methods of stone inlay work, which often involve intricate craftsmanship like engraving, cutting, and embedding stones.
- KU2.** Knowledge of different types of stones used in inlay work (e.g., marble, semi-precious stones) and their properties such as durability, polish, and aesthetic appeal.
- KU3.** Awareness of global and local markets for stonecraft.
- KU4.** Knowledge of sourcing raw materials, including types of stones, adhesives, and other tools necessary for inlaying.
- KU5.** Knowledge of different business models applicable to the stone inlay sector, such as direct sales, B2B and B2C.
- KU6.** Familiarity with pricing strategies that balance profitability with market competitiveness.
- KU7.** Knowledge of modern tools for designing to create complex inlay patterns.
- KU8.** Understanding of the cultural and historical significance of stone inlay work.
- KU9.** Ability to blend modern innovations with respect for traditional methods.
- KU10.** Understand the importance of quality control and maintaining high standards in each step of the crafting process.
- KU11.** Knowledge of maintaining long-term partnerships and build a reputation for trustworthiness and quality.
- KU12.** Understand the benefits of automation with the handcrafted appeal that often defines the uniqueness of stone inlay products.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Strong design capabilities to conceptualize and create unique, marketable products
- GS2.** Explore new ways to combine traditional inlaying techniques with modern trends
- GS3.** Properties of stones like hardness, color variation, etc.
- GS4.** Identify the target customers and understand their preferences for different styles and designs

Qualification Pack

GS5. Maintaining relationships with customers

HCS/N9929: Working in a team

Description

This NOS describes the communication and coordination skills and knowledge to work with colleagues and supervisor to achieve a smooth and hazard-free workflow.

Scope

The scope covers the following :

- interact with supervisor or superior
- work as a team by coordinating with colleagues within and outside the department and include
- inputs on PwD & Gender Sensitisation
- report and Document

Elements and Performance Criteria

Interact with supervisor or superior

To be competent, the user/individual on the job must be able to:

- PC1.** comply with health, safety gender, and PwD (People with disability) related instructions applicable to the workplace
- PC2.** actively participate in mock drills/ evacuation procedures; group discussions, training sensitization programs for gender, and PwD awareness organized at the workplace.
- PC3.** receive job orders and instructions from reporting supervisor and receive feedback on work standards.
- PC4.** understand the work output requirements, targets, performance indicators and incentives.
- PC5.** deliver quality work on time and report any anticipated reasons for delays and handover completed work to supervisor
- PC6.** report on any grievances, production defects and any potential hazards.

Work as a team by coordinating with colleagues within and outside the department and include inputs on PwD & Gender Sensitisation

To be competent, the user/individual on the job must be able to:

- PC7.** communicate maintenance and repair schedule proactively to the supervisor
- PC8.** interact and clarify doubts on design, usage of materials & tools, quality & standards compliance, etc.

Report and Document

To be competent, the user/individual on the job must be able to:

- PC9.** report in time for shortage or need of raw materials
- PC10.** communicate with colleagues from within and other departments, clearly and effectively on all aspects to carry out the work among the team
- PC11.** maintain the etiquette, use polite language, demonstrate responsible and disciplined behavior towards colleagues.
- PC12.** put team over individual goals and multi-task or share work where necessary supporting the colleagues.

Qualification Pack

PC13. document all the details accurately relating to ones role as required.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** knowledge about the importance of gender equality being followed in the organization and policies for reporting any harassment or inappropriate behavior
- KU2.** knowledge about how to accommodate employees with disabilities etiquette to adhere to and proper language and terminology
- KU3.** knowledge about how to communicate, offer help, respecting space, parking etc. for people with disabilities or special needs
- KU4.** knowledge about promoting a safe, accessible and healthy workplace for disabled employees
- KU5.** company's policies on preferred language of communication, incentives, quality standards, personnel management, reporting and escalation matrix policy.
- KU6.** company's standard operating procedure (sop) and the risk and impact of not following them.
- KU7.** procedures for working with colleagues, his/her role and responsibilities in relation to this
- KU8.** organizational hierarchy and the line of reporting structure and work target and review mechanism
- KU9.** procedures to report employment related issues and to deal with conflicts
- KU10.** importance of the individuals role in the organizational workflow and details of the individual responsibilities
- KU11.** tools and equipment handling procedure and common potential hazards in the work place and the procedures to deal with them
- KU12.** effective communication with various categories of people and the different departments in the organization
- KU13.** to document the job activity as required like the check sheets, history sheets, etc
- KU14.** expressing and addressing grievances appropriately, deal with difficult work relationships and manage the internal conflicts effectively

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** create a positive and inclusive workplace atmosphere without any kind of bias/discrimination towards any employee
- GS2.** actively take part in any discussion/workshop organized for gender sensitization training
- GS3.** read and comprehend written instructions related to gender equality issues in the organization
- GS4.** identify and report any harassment or inappropriate behavior towards any employee
- GS5.** create a positive and inclusive workplace atmosphere without any kind of bias/discrimination towards any employee with disability or special needs
- GS6.** actively take part in any discussion/workshop organized for disability sensitization training.

Qualification Pack

- GS7.** read and comprehend written instructions related to equality issues in the organization related to disabled persons
- GS8.** read job sheets, design sheet and information displayed at the workplace
- GS9.** read and understand manuals, health and safety instructions, memos etc
- GS10.** fill up documentation to ones role
- GS11.** communicate effectively with supervisor
- GS12.** contribute to quality of team work and achieve smooth workflow
- GS13.** improve work processes by interacting with others and adopting best practices

HCS/N9931: Maintain health and safety at workplace

Description

This unit provides Performance Criteria, Knowledge & Understanding, and Skills & Abilities required to comply with health, safety, and security requirements at the workplace and covers procedures to prevent, control, and minimize risk to self and others.

Scope

The scope covers the following :

- Comply with health, safety, and security requirements at work

Elements and Performance Criteria

Comply with health, safety, and security requirements at work

To be competent, the user/individual on the job must be able to:

- PC1.** comply with health and safety related instructions applicable to the workplace.
- PC2.** use and maintain personal protective equipment as per protocol.
- PC3.** carry out own activities in line with approved guidelines and procedures
- PC4.** maintain a healthy lifestyle and guard against dependency on intoxicants.
- PC5.** follow environment management system related procedures
- PC6.** store materials and tools in line with manufacturers and organisational requirements
- PC7.** safely handle and move waste and debris.
- PC8.** minimize health and safety risks to self and others due to own actions
- PC9.** seek clarifications, from supervisors or other authorized personnel in case of perceived risks
- PC10.** monitor the workplace and work processes for potential risks and threats.
- PC11.** carry out periodic walk-through to keep work area free from hazards and obstructions, if assigned
- PC12.** report hazards and potential risks/ threats to supervisors or other authorized personnel
- PC13.** participate in mock drills/ evacuation procedures organized at the workplace
- PC14.** undertake first aid, fire-fighting and emergency response training, if asked to do so
- PC15.** take action based on instructions in the event of fire, emergencies or accidents
- PC16.** follow organisation procedures for evacuation when required

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** health and safety related practices applicable at the workplace
- KU2.** potential hazards, risks and threats based on nature of operations
- KU3.** organizational procedures for safe handling of tools

Qualification Pack

- KU4.** potential risks due to own actions and methods to minimize these
- KU5.** environmental management system related procedures at the workplace.
- KU6.** layout of the plant and details of emergency exits, escape routes, emergency equipment and assembly points
- KU7.** potential accidents and emergencies and response to these scenarios
- KU8.** reporting protocol and documentation required
- KU9.** details of personnel trained in first aid, fire-fighting and emergency response
- KU10.** actions to take in the event of a mock drills/ evacuation procedures or actual accident, emergency or fire.
- KU11.** occupational health and safety risks and methods
- KU12.** personal protective equipment and method of use
- KU13.** identification, handling and storage of hazardous substances
- KU14.** proper disposal system for waste and by-products
- KU15.** signage related to health and safety and their meaning
- KU16.** importance of sound health, hygiene and good habits
- KU17.** ill-effects of alcohol, tobacco and drugs

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write in local language.
- GS2.** read measurement instructions
- GS3.** communicate orally with colleagues
- GS4.** follow organization rule-based decision making process
- GS5.** take decision with systematic course of actions and/or response
- GS6.** plan and organize your work to achieve targets and deadlines
- GS7.** manage relationships with customers
- GS8.** build customer relationships and use customer centric approach.
- GS9.** think through the problem, evaluate the possible solution(s) and suggest an optimum /best possible solutions
- GS10.** identify immediate or temporary solutions to resolve delays
- GS11.** analyze data and activities.
- GS12.** pass on relevant information to others
- GS13.** apply, analyze, and evaluate the information gathered from observation, experience, reasoning, or communication, as a guide to thought and action

HCS/N9934: Managing Personal Sanitation

Description

This NOS provides the abilities required for taking responsibility for their own health at the workplace and is about using the correct procedures to prevent, control and minimize risk to them and others at the workplace.

Scope

The scope covers the following :

- adopt healthy work practices
- achieve work productivity while maintaining health

Elements and Performance Criteria

Adopt healthy work practices

To be competent, the user/individual on the job must be able to:

- PC1.** always cover the mouth and nose with a dust mask while working and keep on changing when it gets blocked with dust
- PC2.** follow work instructions strictly to reduce the amount of pollution at the work place e.g. wet the rock / craft material before working on it
- PC3.** wear protective goggles over eyes and replace them when scratches on it obscure the vision
- PC4.** wear gloves as per the materials used for making handicraft to avoid blisters; scratches and cuts
- PC5.** undergo preventive health checkups at regular intervals
- PC6.** take prompt treatment from the doctor in case of illness

Achieve work productivity while maintaining health

To be competent, the user/individual on the job must be able to:

- PC7.** follow SOPs for dealing with blisters; scratches; accidental fires or any other type of emergencies at work
- PC8.** ensure the absence of no productivity loss or absenteeism from work due to illness
- PC9.** ensure no long term ill effect on the personal health

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** companys policies on personal health and occupational hazard management
- KU2.** companys hr policies
- KU3.** companys reporting structure
- KU4.** companys emergency evacuation procedure
- KU5.** health risks to the worker at the work place

Qualification Pack

- KU6.** healthy work practices
- KU7.** how to perform the duties in a way to minimize pollution at the work place
- KU8.** what personal protective equipments should be worn and how it is cared for
- KU9.** safe disposal methods for waste
- KU10.** how to provide the first aid treatment at workplace
- KU11.** emergency procedures to be followed in case of an mishap such as fire accidents etc.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read personal health instructions and manual
- GS2.** read the usage of various hand tools and personal protection equipments
- GS3.** take notes on descriptions and details of various personal health maintenance procedures
- GS4.** communicate with supervisor about the physical symptoms
- GS5.** receive instructions from doctor and supervisor on medical care
- GS6.** how to select appropriate hand tools and personal protection equipment
- GS7.** when to change personal protection equipment during work
- GS8.** how to identify first aid needs in case and of an injury
- GS9.** how to select appropriate hand tools and personal protection equipment
- GS10.** when to change personal protection equipment during work
- GS11.** how to use materials that does not affect customer health / make injury
- GS12.** improve work processes by adopting best safety practices
- GS13.** analyze the usage of appropriate tools and consumables
- GS14.** spot errors and any other disruptions and communicate with solutions

HCS/N9940: Managing people and Resources in Business

Description

This OS unit focuses on business planning, internal strategy, timelines.

Scope

The scope covers the following :

- people management
- product planning
- procurement of raw materials
- market interfacing
- financial management
- record keeping

Elements and Performance Criteria

People management

To be competent, the user/individual on the job must be able to:

- PC1.** arrange Interactive meetings of managers of sales and production teams and categorize the issues and feedbacks of both the teams
- PC2.** train the employees of his/her unit with the appropriate skills required to make market relevant and quality products
- PC3.** motivate the employees

Product planning

To be competent, the user/individual on the job must be able to:

- PC4.** compile a report based on old production reports
- PC5.** address the issues faced in previous productions and try to resolve them
- PC6.** gather and analyze the cues from the market
- PC7.** ascertain the customer preference
- PC8.** develop product range lines based on current market preference
- PC9.** develop product range lines that are unique and able to price high
- PC10.** price the products according to market trends
- PC11.** identify the competent marketing strategy for the product range

Procurement of raw materials

To be competent, the user/individual on the job must be able to:

- PC12.** list of the raw material s and prepare a B.O.M according to the product lines
- PC13.** ascertain the quantity and right price to procure the materials
- PC14.** identify the right locations/agents from where the raw materials can be procured
- PC15.** negotiate to get the best price
- PC16.** ensure quality materials are procured

Qualification Pack

PC17. ensure the procured materials are stored in appropriate conditions

PC18. compile a record of price quotations, POs, and bills of procurement for future reference

Market interfacing

To be competent, the user/individual on the job must be able to:

PC19. maintain a healthy and professional relationship with vendor

PC20. the competitive market falls in order with the company policies of best price, quality, and delivery parameters

PC21. analyze the prevalent price for product lines

PC22. decide on the most effective means to access the market

PC23. plan for cost-effective transportation to the market

PC24. position the product according to market requirements

PC25. identify and address the expectations of customer

Financial management

To be competent, the user/individual on the job must be able to:

PC26. analyze and ascertain the cost of production

PC27. maintain the book of accounts related to the business

PC28. maintain export documents like a letter of credit, custom clearance

PC29. identify cost-effective means of running the business

Record keeping

To be competent, the user/individual on the job must be able to:

PC30. identify various aspects of business that require recording

PC31. design formats for recording

PC32. compile various records of all aspects of the business

PC33. maintain these records with periodic updations

PC34. maintain necessary documents as per local government and regulatory requirements

PC35. reframe the procurement strategy according to local scenarios like weather conditions, transport strikes, affected prices, etc.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. interpersonal skills and communication with a cross-section of stakeholders

KU2. understanding of basics accounting so that he/she can monitor the transactions between company and vendor

KU3. knowledge of banking basics to keep the export process flawless

KU4. understanding of costing principles to calculate the cost of production with all the overheads and the actual price

KU5. product and craft knowledge including material and tools requirements

KU6. gathering market intelligence.

KU7. various transportation means and implications on costing

KU8. various product lines that can be created depending on the sector of operation

Qualification Pack

- KU9.** basic record-keeping techniques
- KU10.** basic laws, rules, regulations, etc. regarding business
- KU11.** vendor management and development
- KU12.** pricing techniques
- KU13.** business profitability assessment

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** analyse product range and keep abreast of market trends
- GS2.** document various aspects of the business
- GS3.** compile descriptions and details about investment, expenditures, and sales
- GS4.** interact with teams to work efficiently
- GS5.** communicate and manage vendors for cost-effective outsourcing and procurements
- GS6.** interface with fellow entrepreneurs to exchange ideas on the business
- GS7.** communicate with the customers for their feedback about the product
- GS8.** comprehend information shared by various stakeholders
- GS9.** plan and organize the product lines
- GS10.** fix the appropriate price.
- GS11.** hire employees with the appropriate skill set and experience
- GS12.** predict the profit margin to be achieved by the business
- GS13.** decide target segment of the market
- GS14.** schedule production cycles for better efficiency of resources
- GS15.** planning of production efficiency based on manpower and equipment available
- GS16.** schedule market visits for surveys and feedback
- GS17.** gather information on preference and taste of the customer
- GS18.** interact with various types of customers and understand the trends
- GS19.** analyze and solve conflicts and problems of the business.
- GS20.** ensure that the problems do not arise repeatedly.
- GS21.** anticipate various problems/challenges that can crop up
- GS22.** analyze the market for increasing sales
- GS23.** spot errors and any other disruptions and communicate with solutions

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Qualification Pack

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Minimum Passing % at NOS Level: 50

(Please note: A Trainee must score the minimum percentage for each NOS separately as well as on the QP as a whole.)

Assessment Weightage

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
