HCS/N1307: Introduction and different types of Bangle making in India

Description

Bangle Maker introduces the core competencies and skills required for individuals engaged in the craft of bangle making. The knowledge, abilities, and practices necessary to excel in this esteemed occupation, blending traditional techniques with contemporary innovation.

Scope

The scope covers the following :

- introduction of Bangle making
- different types of Bangle making

Elements and Performance Criteria

Introduction of bangle making

To be competent, the user/individual on the job must be able to:

- PC1.** introduce the historical roots of bangle making in India, highlighting its centuries-old tradition and its role as a symbol of cultural identity and craftsmanship
- PC2.** in Indian society, bangles symbolize marital status, prosperity, and well-being. Married women often wear them as a sign of their union, while single women and girls also adorn them for cultural and aesthetic reasons
- PC3.** bangles have evolved from being solely traditional accessories to fashion statements, with contemporary designs catering to modern tastes

Different types of bangles making

To be competent, the user/individual on the job must be able to:

- PC4.** discuss how bangle making is practiced across different regions of India, each with its own distinct style, materials, and techniques.
- PC5.** traditional materials for making bangles include glass, metal, lac, and wood, showcasing the diversity of resources and skills across different regions.
- PC6.** bangle making involves skilled artisans shaping and crafting each bangle individually using traditional tools and techniques.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** understand various materials used in bangle making, including glass, metal, lac, and modern alternatives
- KU2.** learn about material properties, suitability for designs, and market availability
- KU3.** develop understanding of bangle design principles, aesthetics, and cultural motifs
- KU4.** learn to conceptualize and sketch designs, incorporating traditional and contemporary elements

Qualification Pack

- KU5.** familiarize with quality standards for materials and craftsmanship in bangle making
- KU6.** implement quality control measures to maintain product integrity and customer satisfaction
- KU7.** recognize symbolism in different regions and communities
- KU8.** stay informed about market trends, consumer preferences, and competitive dynamics
- KU9.** explore opportunities for innovation, diversification, and market expansion

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** commitment to ongoing learning, innovation, and professional development
- GS2.** understanding of business principles for managing a bangle-making venture
- GS3.** technical proficiency mastery in using specialized tools and equipment
- GS4.** quality assurance, implementation of practices to ensure consistent quality
- GS5.** inventory management is effective resource management to minimize wastage
- GS6.** customer service skills are engaging with clients and fulfilling their needs
- GS7.** acquire proficiency in techniques like glassblowing, molding, engraving, and stone setting
- GS8.** gain hands-on experience with specialized tools for each technique

DGT/VSQ/N0101: Employability Skills (30 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

PC1. understand the significance of employability skills in meeting the job requirements

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

PC2. identify constitutional values, civic rights, duties, personal values and ethics and environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

PC3. explain 21st Century Skills such as Self-Awareness, Behavior Skills, Positive attitude, self-motivation, problem-solving, creative thinking, time management, social and cultural awareness, emotional awareness, continuous learning mindset etc.

Basic English Skills

To be competent, the user/individual on the job must be able to:

PC4. speak with others using some basic English phrases or sentences

Communication Skills

To be competent, the user/individual on the job must be able to:

PC5. follow good manners while communicating with others

PC6. work with others in a team

Qualification Pack

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

PC7. communicate and behave appropriately with all genders and PwD

PC8. report any issues related to sexual harassment

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

PC9. use various financial products and services safely and securely

PC10. calculate income, expenses, savings etc.

PC11. approach the concerned authorities for any exploitation as per legal rights and laws

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

PC12. operate digital devices and use its features and applications securely and safely

PC13. use internet and social media platforms securely and safely

Entrepreneurship

To be competent, the user/individual on the job must be able to:

PC14. identify and assess opportunities for potential business

PC15. identify sources for arranging money and associated financial and legal challenges

Customer Service

To be competent, the user/individual on the job must be able to:

PC16. identify different types of customers

PC17. identify customer needs and address them appropriately

PC18. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC19. create a basic biodata

PC20. search for suitable jobs and apply

PC21. identify and register apprenticeship opportunities as per requirement

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use basic spoken English language

KU6. Do and dont of effective communication

KU7. inclusivity and its importance

KU8. different types of disabilities and appropriate communication and behaviour towards PwD

KU9. different types of financial products and services

Qualification Pack

- KU10.** how to compute income and expenses
- KU11.** importance of maintaining safety and security in financial transactions
- KU12.** different legal rights and laws
- KU13.** how to operate digital devices and applications safely and securely
- KU14.** ways to identify business opportunities
- KU15.** types of customers and their needs
- KU16.** how to apply for a job and prepare for an interview
- KU17.** apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate effectively using appropriate language
- GS2.** behave politely and appropriately with all
- GS3.** perform basic calculations
- GS4.** solve problems effectively
- GS5.** be careful and attentive at work
- GS6.** use time effectively
- GS7.** maintain hygiene and sanitisation to avoid infection

HCS/N1303: Carry out the process of making conch shell bangles

Description

This OS unit is about preparing raw materials of making conch shell bangles and ensuring the quality of the prepared bangles.

Scope

The scope covers the following :

- prepare required raw materials for bangle making
- perform bangle making process as per the standard procedures
- check bangle quality and productivity standards

Elements and Performance Criteria

prepare required raw materials for bangle making

To be competent, the user/individual on the job must be able to:

- PC1.** collect raw materials like conch shell, wax, coal etc. in prescribed quantities
- PC2.** place all raw materials at workplace for making bangles
- PC3.** separate various types of raw materials for bangle making
- PC4.** collect different tools like hammer, cutting machine, grinding machine and chisel etc. for bangle making
- PC5.** deliver remaining materials to the designated storage location

perform bangle making process as per the standard procedures

To be competent, the user/individual on the job must be able to:

- PC6.** remove the front area of the shell from the conch and separate the inner area of the shell and make a hole.
- PC7.** prepare a solution of water with some citric acid
- PC8.** clean the shell and dip it in prepared water solution for a couple of days to attain a soft texture to work on
- PC9.** dry the shells in hot sun and separate a perfect set of conch ,then broke it into two pieces from the middle.
- PC10.** broken piece came out in round shape, make it perfect using a grinding machine
- PC11.** polish the upper layer of the shell and cut it into several pieces, atleast in 2 to 5 bangles
- PC12.** engrave the designs and pattern on the plain white conch bangles using a chisel and designing machine
- PC13.** draw different motifs like flowers, leaves, animals, deities to historical images and embellish the bangle
- PC14.** polish the bangle by heating and applying nitric acid
- PC15.** repair any defective bangles by using lac, zinc oxide, coal, wax and wood

Check bangle quality and productivity standards

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC16.** inspect all the processes that it must be based on quality standard parameters to ensure appropriate separation of shells
- PC17.** identify different types of parameters required to ensure appropriate amount of inventory is being stored at the time of production
- PC18.** inspect quality of every materials before starting the process
- PC19.** maintain record of material used during bangle making
- PC20.** ensure that there is no wastage of materials
- PC21.** make a sample template to collect the information during inspection based while making bangles
- PC22.** ensure to achieve the periodical target set by the supervisor
- PC23.** ensure there is no delay in the process

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** personnel management, relevant legislation, standards, policies and procedures followed in the company
- KU2.** organizational structure
- KU3.** the key product lines of the company
- KU4.** basic chemical properties of various raw material used
- KU5.** appropriate drawing of motifs
- KU6.** appropriate mending/molding techniques
- KU7.** process of collecting sankh and converting them into bangles
- KU8.** shape and size of bangle to be prepared
- KU9.** have an eye for detailing and finishing
- KU10.** risk and impact of not following defined procedures/work instructions
- KU11.** the hierarchy for reporting identified problems
- KU12.** implications of delays in the process

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write down the process of cutting, drawing and other techniques
- GS2.** read and interpret symbols and reading
- GS3.** read about various cutting and bangle making related information
- GS4.** read and understand manuals, health and safety instructions, memos, reports and job cards
- GS5.** interact with employees to work efficiently
- GS6.** make decisions pertaining to the concerned area of workplace
- GS7.** communicate the gaps in the process, if any to supervisor
- GS8.** take the right raw materials according to the end products

Qualification Pack

- GS9.** detect problems in day-to-day tasks
- GS10.** maintain the working schedule appropriately in order to achieve the daily targets
- GS11.** interpret the customer preference, demand, etc. and accordingly make job sheet

HCS/N2207: Carry out the process of making glass bangles

Description

This OS unit is about preparing raw materials, making glass bangles, and ensuring the quality of the prepared bangle.

Scope

The scope covers the following :

- prepare required raw materials for bangle making
- perform bangle making process as per the standard procedures
- check bangle quality and productivity standards

Elements and Performance Criteria

prepare required raw materials for bangle making

To be competent, the user/individual on the job must be able to:

- PC1.** collect raw material like crushed glass, zari, hil, etc. in prescribed quantities
- PC2.** place raw materials at workplace for making bangle
- PC3.** differentiate between various types of raw material like crushed glass, zari, hil, etc. to make bangle
- PC4.** collect tools like iron rod, spindle, etc. for bangle making
- PC5.** prepare tank furnace and pakai bhatti, etc.
- PC6.** prepare glass mixture by crushing the glass pieces in tank furnace prior to the bangle making stage
- PC7.** preheat the tank furnace at around 1300 °C to 1400 °C and heat the glass mixture for 15 hours until becomes molten.
- PC8.** deliver remaining raw material to the designated storage locations

perform bangle making process as per the standard procedures

To be competent, the user/individual on the job must be able to:

- PC9.** carefully scoop out globs of molten glass using 8-9 feet long iron rod
- PC10.** beat and rotate the scooped out globs on a hot and flat surface
- PC11.** add colour on beaten glob
- PC12.** draw thin filament of glob on a coiling rod
- PC13.** loop molten glass around the rod to give the shape of bangle
- PC14.** cool the prepared glass spirals on a tray
- PC15.** separate the spiralled glass with the help of a diamond cutter
- PC16.** join the ends of prepared bangles by heating both the ends either by candle or on fire
- PC17.** decorate bangles with different types of decoration material like zari, polish, etc.

check bangle quality and productivity standards

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC18.** inspect the process based on the quality standard parameters to ensure appropriate melting of glass is achieved
- PC19.** ensure molten mix is prepared of right consistency
- PC20.** inspect scooped out glob is beaten and rotated with care and precision
- PC21.** monitor the quality of drawn filaments
- PC22.** ensure layered out glass filament is as per standards
- PC23.** maintain records of inspection results/tests during bangle making
- PC24.** ensure that there is no wastage of materials
- PC25.** prepare a sample template to collect information during inspection based on layed out glass filaments consistency, prepared bangle quality.
- PC26.** achieve periodical targets set by the supervisor

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** personnel management, relevant legislation, standards, policies, and procedures followed in the company
- KU2.** organisational structure
- KU3.** the key product lines of the company
- KU4.** basic chemical properties of various raw materials used
- KU5.** appropriate crushing techniques
- KU6.** appropriate melting techniques
- KU7.** process of laying glass filaments
- KU8.** size and shape of the bangle to be prepared
- KU9.** basic calculation methods required for calculating raw materials
- KU10.** handle the use of sharp tool and harmful material
- KU11.** ensuring that there is no mal handling/accidents due to improper handling of the raw materials
- KU12.** the recommended storage of the final product
- KU13.** risk and impact of not following defined procedures/work instructions
- KU14.** the hierarchy for reporting identified problems
- KU15.** implications of delays in the process

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write down crushing, molten making, and bangle making techniques
- GS2.** read and interpret symbols and readings
- GS3.** read about various crushing and melting related information
- GS4.** read and understand manuals, health and safety instructions, memos, reports, and job cards

Qualification Pack

- GS5.** interact with employees to work efficiently

HCS/N1302: Carry out the process of making hand carved wooden bangles

Description

This OS unit is about performing various tasks to make hand carved wooden bangles.

Scope

The scope covers the following :

- prepare required raw materials for bangle making
- perform bangle making process as per the standard procedures
- check bangle quality and productivity standards

Elements and Performance Criteria

prepare required raw materials for bangle making

To be competent, the user/individual on the job must be able to:

- PC1.** collect raw materials like acacia wood, colors, sandpaper, etc. in prescribed quantities
- PC2.** place all raw materials at workplace for making bangles
- PC3.** separate various types of raw materials for bangle making
- PC4.** collect different tools like a chisel, wood turner machine etc. for bangle making
- PC5.** deliver remaining materials to the designated storage location

perform bangle making process as per the standard procedures

To be competent, the user/individual on the job must be able to:

- PC6.** cut the wood through wood turner machine in required shape (shape of bangle)
- PC7.** give it the shape of a bangle while rotating on wood turner machine
- PC8.** rub the edges with sand paper and give it a smooth edge
- PC9.** take out the bangle and make designs by any marker or sketch
- PC10.** carve the marked designs through chisel and follow the design pattern
- PC11.** paint the carved bangles as per the required design

check bangle quality and productivity standards

To be competent, the user/individual on the job must be able to:

- PC12.** inspect all the processes that it must be based on quality standard parameters to ensure appropriate cutting of wood
- PC13.** identify different types of parameters required to ensure appropriate amount of inventory is being stored at the time of production
- PC14.** inspect quality of every material before starting the process
- PC15.** maintain record of material used during metal casting
- PC16.** ensure that there is no wastage of materials
- PC17.** make a sample template to collect the information during inspection based while making wood bangles

Qualification Pack

PC18. ensure to achieve the periodical target set by the supervisor

PC19. ensure there is no delay in the process

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. personnel management, relevant legislation, standards, policies and procedures followed in the company

KU2. organizational structure

KU3. the key product lines of the company

KU4. basic chemical properties of various raw material used

KU5. appropriate cleaning and cutting techniques

KU6. handling the equipment like cutting machines, grinding machines, etc.

KU7. process of collecting wood, converting them into shapes and making bangles

KU8. shape and size of bangle to be prepared

KU9. be precise and follow the intricacy of design

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. write down the process of cutting, edging, and other techniques

GS2. read and interpret symbols and reading

GS3. read about various cutting and bangle making related information

GS4. read and understand manuals, health and safety instructions, memos, reports, and job cards

GS5. interact with employees to work efficiently

GS6. make decisions pertaining to the concerned area of workplace

GS7. communicate the gaps in the process, if any to supervisor

GS8. take the right raw materials according to the end products

GS9. detect problems in day-to-day tasks

HCS/N1301: Carry out the process of making lac bangles

Description

This OS unit is about preparing raw materials and performing various tasks to make lac bangles.

Scope

The scope covers the following :

- prepare required raw materials for bangle making
- perform bangle making process as per the standard procedures
- check bangle quality and productivity standards

Elements and Performance Criteria

prepare required raw materials for bangle making

To be competent, the user/individual on the job must be able to:

- PC1.** collect raw materials like lac, coal burner, embellishments etc. in prescribed quantities
- PC2.** place all raw materials at workplace for making bangles
- PC3.** separate various types of raw materials like lac, embellishments, tweezer, lac sticks etc. for bangle making
- PC4.** collect different tools like round wooden tool, wooden flat tool etc. for bangle making
- PC5.** prepare coal burner and make it pre heated
- PC6.** deliver remaining materials to the designated storage location

perform bangle making process as per the standard procedures

To be competent, the user/individual on the job must be able to:

- PC7.** melt lac in a vessel and form lac sticks
- PC8.** mix color at the semi molten state of lac
- PC9.** make lac sticks softer by slightly burning it
- PC10.** after melting, press it with metal plate
- PC11.** cut the rolled lac with metal sheet to get the shape of bangle
- PC12.** join the two ends of the heated lac cut shape
- PC13.** place it on a wooden rod to give proper size and shape
- PC14.** place the aluminum bangle into the lac bangle
- PC15.** place pre heated aluminum bangle into lac bangle using wooden flat tool
- PC16.** give shape to the bangles
- PC17.** heat the bangle to hold the aluminum bangle tightly
- PC18.** decorate the bangle with different embellishments like beads, stones etc.

check bangle quality and productivity standards

To be competent, the user/individual on the job must be able to:

- PC19.** inspect all the processes that it must be based on quality standard parameters to ensure appropriate melting of bangles

Qualification Pack

- PC20.** identify different types of parameters required to ensure appropriate amount of inventory is being stored at the time of production
- PC21.** inspect quality of every material before starting the process
- PC22.** maintain record of material used during bangle making
- PC23.** ensure that there is no wastage of materials
- PC24.** make a sample template to collect the information during inspection based on standard parameters while making bangles
- PC25.** ensure to achieve the periodical target set by the supervisor

Qualification Pack

HCS/N1304: Carry out the process of making metal bangles

Description

This OS unit is about preparing raw materials for making metal bangles and ensuring the quality of the prepared bangles.

Scope

The scope covers the following :

- collect tools and raw material for making metal bangle
- perform the standard process of making metal bangle
- check bangle quality and productivity standards

Elements and Performance Criteria

collect tools and raw material for making metal bangle

To be competent, the user/individual on the job must be able to:

- PC1.** collect raw material such as raw wire (brass or any as per requirement), Sulphuric acid & nitric acid solution, etc.
- PC2.** place required material at workplace in a safe manner
- PC3.** collect tools such as marker, measuring scale, tapper (wooden hammer or light weight wooden tool), wire cutter, shaping rod, etc.
- PC4.** arrange machinery like shaping and alignment pressing machine, designing machine, and electric oven/furnace based on the properties of the raw metal used, etc.

perform the standard process of making metal bangle

To be competent, the user/individual on the job must be able to:

- PC5.** mark the wire to be cut into the required size using a marker and cut the wire with the help of a cutter in a safe manner
- PC6.** bend the wire in round shape using shaping rod and tapper
- PC7.** join the ends of the round-shaped wire by soldering, and put the soldered bangle in a solution of nitric acid and sulphate to derust and clean the soldered round shaped bangle
- PC8.** provide the required shape to the cleaned bangle using a shaping & alignment pressing machine or manually by using hand tools
- PC9.** design the bangle using designing machines or manually create different designs using hand tools, etc. in a careful manner
- PC10.** prepare a solution of sulphuric acid and nitric acid (solution may differ for different types of metal bangle) and soak the designed bangle for approx. two to five seconds to make them lustrous and rust free
- PC11.** place the coated bangles in an electric oven or furnace as per the properties of metal to dry them
- PC12.** pack the bangle using paper and cardboard boxes, etc. safely and in a delicate manner.

check bangle quality and productivity standards

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC13.** inspect all the processes that it must be based on quality standard parameters to ensure appropriate cutting of raw wire is done
- PC14.** identify different types of parameters required to ensure appropriate amount of inventory is being stored at the time of production
- PC15.** ensure tools and machinery required are functioning in required manner
- PC16.** inspect quality of every materials before starting the process
- PC17.** maintain record of material used during bangle making
- PC18.** ensure that there is no wastage of materials
- PC19.** ensure there is no delay in the process

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** personnel management, relevant legislation, standards, policies and procedures followed in the company
- KU2.** organizational structure
- KU3.** the key product lines of the company
- KU4.** basic chemical properties of various raw material used
- KU5.** appropriate measuring and wire cutting techniques
- KU6.** appropriate wire bending and tapping techniques to get desired round shape
- KU7.** process of shaping and aligning round-shaped wire using a shaping & alignment machine or manually
- KU8.** process of making bangles rust-free and lustrous
- KU9.** process of converting raw wire into beautiful wearable bangles
- KU10.** have an eye for detailing and finishing
- KU11.** risk and impact of not following defined procedures/work instructions
- KU12.** implications of delays in the process

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read and interpret symbols and reading
- GS2.** read about various wire cutting, shaping, and de-rusting related information
- GS3.** read and understand manuals, health and safety instructions, memos, reports and job cards
- GS4.** interact with employees to work efficiently
- GS5.** make decisions pertaining to the concerned area of workplace
- GS6.** read about latest designs in the market
- GS7.** detect problems in day to day tasks

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Qualification Pack

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Minimum Passing % at NOS Level: 50

(Please note: A Trainee must score the minimum percentage for each NOS separately as well as on the QP as a whole.)

Assessment Weightage

Compulsory NOS

National Occupational Standards	Theory Marks	Practical Marks	Project Marks	Viva Marks	Total Marks	Weightage

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
