Qualification Pack

HCS/Q5206: Namda Craft Artisan

Brief Job Description

In making a patterned Namda, the craftsmen need to felt in the design into the Namda fibre itself. This involves a dual process of felting. First, a pattern is laid on the grass or jute mat which is then surfaced with wool spread evenly with the help of a broom locally called manzyen. Then the same process of sprinkling soap water and rolling of the mat is again carried out. On untying, it reveals a beautiful Namda drawn over with colorful patterns.

Personal Attributes

A Namda Craft Maker should have good eyesight, hand-eye coordination, motor skills and vision. The person should have basic mathematical skills, particularly making calculations and measurement. He/she should be patient and tenacious for long hours of work. He/she should be imaginative, creative and analytic.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [HCS/N5207: Collect tools and materials required for Namda craft and perform felting](#)
2. [HCS/N5208: Carry out the Process involved in making Namda](#)
3. [HCS/N5209: Carry out the process involved in making Cut Work Namda](#)
4. [HCS/N9030: Carry out the process of making Namda products](#)
5. [HCS/N8501: Entrepreneurship Skills in the Namda Sector](#)
6. [HCS/N9908: Working in a Team](#)
7. [HCS/N9945: Maintaining workplace health and safety](#)
8. [HCS/N9935: Maintain Personal Cleanliness](#)
9. [HCS/N9904: Basic Business Management](#)
10. [DGT/VSQ/N0101: Employability Skills \(30 Hours\)](#)

Qualification Pack

HCS/N5207: Collect tools and materials required for Namda craft and perform felting

Description

The unit discuss in details about the preparation of raw materials before beginning the production processes. It informs about performance criteria, knowledge and understanding, and skills required to become a Namda craft - Artisan.

Scope

The scope covers the following :

- arrange raw materials and tools
- carry out the felting of wool

Elements and Performance Criteria

arrange raw materials and tools

To be competent, the user/individual on the job must be able to:

- PC1.** identify the raw materials required as per product specifications
- PC2.** select the type of wool in an appropriate quantity as per the product specification
- PC3.** analyze the quantity and quality of wool for processing further as per the job specification pattern
- PC4.** arrange the suitable dyes and colors as per the product requirement required for coloring the wool
- PC5.** place the appropriate amount of fitkari required for making the Namda Craft
- PC6.** ensure the appropriate size of “dhoon” is used for cleaning the wool based on the quantity of wool is used
- PC7.** identify the use of punjah required for flatten out the puffed wool
- PC8.** arrange the standard tools such as maazan, rod, lud, nurd, dabba, razz and dukard required for processing the Namda craft
- PC9.** arrange buhri tath and mooza of appropriate size and dimensions required for shaping the wool
- PC10.** place the basic embroidery tools such as needle, design pattern, scissors and others required for embroidery work on the finished product

carry out the felting of wool

To be competent, the user/individual on the job must be able to:

- PC11.** apply the dhonun process for cleaning the wool required for segregation based on feel, fibre, strength and color
- PC12.** demonstrate the felting process in order to analyze an enmeshing layers for further processing
- PC13.** perform the standard operating procedures to clean wool fibers with the help of moisture, soap and mechanical pressure, often applied with a tool called Pinjra

Qualification Pack

- PC14.** identify the suitable sack or weed mat required for making the base on which wool is going to spread
- PC15.** arrange the mat for rolled tightly and tied up with a rope and compressed by way of rolling to and fro on the floor with the help of hands and feet

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** organization's choice of market and the reason behind the same
- KU2.** policies pertaining to procurement of raw materials
- KU3.** different processes related to processing of raw materials for making Namda craft products
- KU4.** safety protocols followed within the organization
- KU5.** organisational hierarchical system and their respective roles
- KU6.** product line of the organisation
- KU7.** different properties of the raw materials to be used
- KU8.** procedures to follow, specific to different raw materials
- KU9.** use of the different tools and equipment for processing raw materials
- KU10.** different methods used for processing raw materials for creating different products

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write product specifications as per customer's demand or market demand
- GS2.** write design specifications in detailed organisational formats
- GS3.** write requirements of raw materials and tools in detail with respect to specific products
- GS4.** read product specifications correctly to gather all the required information for product creation
- GS5.** communicate properly while speaking, enabling him to grasp all required information for product creation
- GS6.** pass desired information effectively to others while speaking about it
- GS7.** choose the appropriate process for processing the raw materials as per product specification
- GS8.** identify and eliminate the variables that may impact the processing of the raw materials
- GS9.** carry out the different processes involved in the creation of grass craft products
- GS10.** capture and utilise customer's specifications during the production of the product
- GS11.** identify faults in the processing of raw materials
- GS12.** resolve defects that may arise during the processing of raw materials
- GS13.** anticipate customer needs and priorities with respect to the product
- GS14.** evaluate market trends to innovate prospective products for the future in accordance with customer demands
- GS15.** anticipate limitations to raw material processing, if there may be any

HCS/N5208: Carry out the Process involved in making Namda

Description

The unit discuss in details about the identifying the requirements of raw materials, tools, making process, etc. with respect to the product or design specifications. It informs about performance criteria, knowledge and understanding, and skills required by a Namda craft maker to carry out the activity.

Scope

The scope covers the following :

- understand design specifications and prepare for the production process
- coloring of wool as per the product and design requirements
- carry out the process of making furma for patterned Namda

Elements and Performance Criteria

understand design specifications and prepare for the production process

To be competent, the user/individual on the job must be able to:

- PC1.** identify the tools to be used for the preparation of the product in accordance to the specifications provided
- PC2.** identify the suitable process to be used for the production of any specific product
- PC3.** define the amount of prepared raw materials required with respect to the design specifications
- PC4.** arrange the required tools, equipment and raw materials in the work area
- PC5.** select the color pattern and design pattern from the design shade card based on the job specification

coloring of wool as per the product and design requirements

To be competent, the user/individual on the job must be able to:

- PC6.** select the correct dyeing vessel and chemicals/colors for dyeing the required wool slivers as per specifications
- PC7.** identify the appropriate quantity of soap water is sprayed with the help of kettle and a bush broom
- PC8.** demonstrate the process of wattun or rolling required for rolling the wet wool onto a pipe or stick
- PC9.** perform rolling the wool process depends upon the position of the frame
- PC10.** apply the standard operating procedure required for re-soaping is water sprayed on front and backsides
- PC11.** place the wet wool in the sunlight for drying
- PC12.** perform the process of dyeing the wool also adding appropriate amount of acid and alum for preparing the solution
- PC13.** place the diluted dye onto the traditional dhaan or chulah to an appropriate temperature in order to achieve the desired color

carry out the process of making furma for patterned Namda

Qualification Pack

To be competent, the user/individual on the job must be able to:

- PC14.** arrange the suitable amount of color threads that are required for embroidery work on finished product
- PC15.** demonstrate the standard operating procedures for cutting the base into an appropriate number of strips
- PC16.** place the dyed wool onto the strips of the Namda base based on the job specification
- PC17.** demonstrate the rolling, finishing and drying process in order to clean and making the surface smooth for further embroidery process
- PC18.** perform the traditional Kashmiri Aari Embroidery on the Namda base for making them more attractive
- PC19.** demonstrate the rolling, washing and cleaning processes again on the final product
- PC20.** analyze the finished product if in case any finishing work is being required
- PC21.** perform the standard operating procedures in order to check the proper trimming of corners and edges and other defects

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** policies pertaining to the use of tools and equipment within the organisation
- KU2.** organizational procedures for preparing to use processes raw materials
- KU3.** different procedural steps involved prior to following any specific process for the production of the desired product
- KU4.** organizational processes for preparing the production area prior to beginning production activities
- KU5.** usage of raw materials as per the product and design
- KU6.** need for dyeing of wool and matts etc.
- KU7.** different dyes and colors used for preparing dye bath
- KU8.** usage and role of the dyeing bleaching agents and chemicals in the process
- KU9.** step by step process of dyeing
- KU10.** importance of the duration of dip for the required concentration of colors
- KU11.** safety measure and proper handling of the chemicals
- KU12.** drying and arranging the wool

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write required steps to be followed while preparing for the production process
- GS2.** write about processes related to maintaining tools and equipment
- GS3.** write about maintaining the processed raw materials before starting the production process
- GS4.** read instructions related to preparing work area for production process
- GS5.** read instructions on the usage and safety precautions related to tools

Qualification Pack

- GS6.** read instructions related to respective production process
- GS7.** communicate with responsible personnel to convey desired message most efficiently
- GS8.** approach meeting pre-production preparation requirements
- GS9.** meet raw material requirement for production
- GS10.** facilitate production process requirements
- GS11.** ensure the use of tools and equipments to their optimum efficiency
- GS12.** extract procedural requirements with respect to customer specifications
- GS13.** resolve any faults that may arise during this pre-production process
- GS14.** develop innovative techniques to meet product requirements faster with desired quality
- GS15.** avoid any drawback in this pre-production process

HCS/N5209: Carry out the process involved in making Cut Work Namda

Description

This unit discuss in details about the Cut Work Namda is a type of Namda where designs are created by cutting out shapes from felted wool. These cut-out pieces are then either layered on top of the base wool or stitched to create patterns.

Scope

The scope covers the following :

- preparing the base felt
- cutting and creating the cut work design
- dyeing the wool and layering the pattern
- sprinkling soap solution and felting together

Elements and Performance Criteria

Preparing the Base Felt

To be competent, the user/individual on the job must be able to:

PC1. thick base of felted wool is created through the standard Namda felting process (cleaning, layering, felting, and drying wool)

Cutting and creating the cut work design

To be competent, the user/individual on the job must be able to:

PC2. transfer the design onto the wool felt base using a fabric marker or chalk

PC3. carefully cut out the areas of the design that will be removed by using sharp blade and scissor

Dyeing the wool and layering the pattern

To be competent, the user/individual on the job must be able to:

PC4. dye the felted wool by using natural dyes

PC5. layer the cut out wool pieces on top of a different coloured base felt to make the design stand out

Sprinkling soap solution and felting together

To be competent, the user/individual on the job must be able to:

PC6. Warm soap water is sprayed with the help of a kettle and a bush broom

PC7. wet wool is then rolled onto a pipe or a stick. This process is called the Wattun

PC8. layers are pressed and felted together to ensure that the design stays intact. This can be done using hand rolling or machine pressing.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. different procedural steps involved prior to following any specific process for the production of the desired product

Qualification Pack

- KU2.** layering the pattern by using dyeing felted wool
- KU3.** organizational processes for preparing the production area prior to beginning production activities
- KU4.** usage of raw materials as per the product and design
- KU5.** different dyes and colors used for preparing coloured wool
- KU6.** safety measure and proper handling of the chemicals

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write about maintaining the processed raw materials before starting the production process
- GS2.** read instructions related to preparing work area for production process
- GS3.** read instructions on the usage and safety precautions related to tools
- GS4.** communicate with responsible personnel to convey desired message most efficiently
- GS5.** resolve any faults that may arise during this pre-production process
- GS6.** read and understand manuals, health and safety instructions, memos etc
- GS7.** contribute to quality of team work and achieve smooth workflow

HCS/N9030: Carry out the process of making Namda products

Description

This unit focuses on the traditional craft of making Namda products, specifically cushion covers and dining mats. Participants will learn the complete process, from selecting and preparing wool to designing, felting, and finishing the products. Emphasizing both creativity and technical skills, this unit aims to preserve cultural heritage while equipping learners with practical abilities in textile arts. The hands-on approach will enhance understanding of material properties, design principles, and the importance of craftsmanship.

Scope

The scope covers the following :

- Process of making Namda Cushion Covers
- Process of Making Namda Dining Mats

Elements and Performance Criteria

Process of Making Namda Cushion Covers

To be competent, the user/individual on the job must be able to:

- PC1.** select high-quality wool in various colors for design and texture.
- PC2.** use a sturdy cotton or felt fabric as the base for the cushion cover.
- PC3.** draw unique patterns or motifs for the cushion cover, drawing inspiration from nature or traditional designs
- PC4.** choose colors that complement each other and align with the intended aesthetic
- PC5.** cut wool into strips or pieces according to the design
- PC6.** dye the wool strips using natural dyes to achieve vibrant colors
- PC7.** cut the base fabric to the desired size of the cushion cover
- PC8.** sew the edges of the base fabric to prevent fraying
- PC9.** lay wool strips in a layered fashion on the base fabric, ensuring they cover the entire area
- PC10.** use moisture and pressure (rolling or beating) to mat the wool fibers together, creating a cohesive felt layer
- PC11.** trim excess wool and shape the cover as needed
- PC12.** add zippers or buttons for easy removal and washing

Process of Making Namda Dining Mats

To be competent, the user/individual on the job must be able to:

- PC13.** choose durable wool and cotton fabric for the dining mats
- PC14.** gather natural dyes for the coloring wool
- PC15.** choose geometric or floral patterns that can be repeated across the mat
- PC16.** use a strong base fabric, such as canvas or felt, to support the wool
- PC17.** cut the base fabric into desired sizes for dining mats
- PC18.** lay wool strips on the base fabric, ensuring an even distribution

Qualification Pack

- PC19.** use warm soapy water and agitation to felt the wool fibers together, forming a dense mat
- PC20.** use a felting needle to create intricate designs and textures on the surface
- PC21.** sew additional wool shapes onto the mat for added design elements
- PC22.** sew around the edges to create a neat finish and prevent fraying
- PC23.** add a non-slip backing for better stability when placed on tables
- PC24.** check for loose threads, secure all embellishments, and ensure the mat is evenly felted
- PC25.** clean the finished product to remove any residues from the felting process

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** understand the properties of wool, which is commonly used in Namda making
- KU2.** knowledge of natural dyes and their effects on the final product can enhance the aesthetics of the cushion covers and dining mats.
- KU3.** clean the wool to remove impurities. This helps in achieving vibrant colors during dyeing
- KU4.** understand the importance of wool preparation for effective felting
- KU5.** familiarity with dyeing techniques, such as cold dyeing or heat dyeing, can lead to different textures and shades
- KU6.** color theory can aid in selecting complementary colors for design
- KU7.** awareness of traditional motifs and patterns enhances cultural significance in the designs
- KU8.** knowledge of felting techniques, such as using bubble wrap or nets to assist in the process, can create different textures
- KU9.** understanding how different cutting techniques affect the final look and usability of the products
- KU10.** knowledge of sewing techniques can enhance the quality and durability of the final products

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** ability to conceptualize unique patterns and designs that stand out
- GS2.** understanding of color theory and textile design principles
- GS3.** proficiency in felting techniques and knowledge of the tools involved
- GS4.** careful execution of designs and patterns to ensure precision
- GS5.** quality control skills to inspect finished products for defects
- GS6.** understanding the properties of different types of wool and dyes

HCS/N8501: Entrepreneurship Skills in the Namda Sector

Description

This unit aims to equip participants with essential entrepreneurship skills specifically tailored for the Namda sector, focusing on the traditional craft of felt-making. Participants will learn about market dynamics, product development, financial management, marketing strategies, and sustainable practices while gaining hands-on experience in creating Namda products.

Scope

The scope covers the following :

- introduction to the namda sector
- market awareness and customer insights
- creativity and design skills
- business planning
- financial management
- marketing and sales strategies
- sustainability in the namda sector
- legal and regulatory framework

Elements and Performance Criteria

Introduction to the Namda Sector

To be competent, the user/individual on the job must be able to:

- PC1.** overview of Namda craftsmanship and its cultural significance
- PC2.** current trends and market opportunities in the textile and home decor industry

Market Awareness and Customer Insights

To be competent, the user/individual on the job must be able to:

- PC3.** research techniques to identify target markets and customer preferences
- PC4.** identify customer preferences, such as styles, colors, and functionalities of Namda products

Creativity and Design Skills

To be competent, the user/individual on the job must be able to:

- PC5.** develop unique and appealing designs for Namda products like rugs, cushion covers, and mats
- PC6.** blend traditional motifs with contemporary designs to attract modern consumers

Business Planning

To be competent, the user/individual on the job must be able to:

- PC7.** create a solid business plan that includes market analysis, operational plans, and financial forecasts
- PC8.** establish clear short-term and long-term goals for business growth and product development

Financial Management

To be competent, the user/individual on the job must be able to:

Qualification Pack

PC9. develop a budget that includes costs for materials, labor, marketing, and other operational expenses

PC10. determine competitive pricing that reflects the quality and uniqueness of Namda products while ensuring profitability

Marketing and Sales Skills

To be competent, the user/individual on the job must be able to:

PC11. create a strong brand identity that reflects the craftsmanship and cultural heritage of Namda products

PC12. utilize social media, online marketplaces, and websites to promote products and reach a wider audience

PC13. develop effective sales strategies, including storytelling and personal engagement to attract customers

Sustainability in the Namda Sector

To be competent, the user/individual on the job must be able to:

PC14. incorporate sustainable practices in sourcing materials and production processes

PC15. market products emphasizing eco-friendly aspects to attract environmentally conscious consumers

Legal and Regulatory Framework

To be competent, the user/individual on the job must be able to:

PC16. overview of legal requirements for running a Namda business

PC17. intellectual property rights and their significance in protecting designs

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. awareness of current trends in home decor, fashion, and sustainability can help artisans tailor their Namda products (like mats and cushion covers) to meet consumer demands

KU2. knowing who the potential customers are (e.g., homeowners, decorators, environmentally conscious consumers) allows for effective marketing strategies

KU3. a deep understanding of the types of wool, dyeing processes, and traditional Namda-making techniques is crucial for producing high-quality products

KU4. familiarity with quality control measures ensures that the final products meet customer expectations and industry standards

KU5. knowledge of budgeting, pricing strategies, and cost analysis is essential for managing expenses and maximizing profits

KU6. understand the importance of engaging with the local community to build goodwill and support for the Namda sector

KU7. knowledge of design principles and the ability to innovate while maintaining traditional craftsmanship can attract diverse customers

KU8. understanding the significance of using sustainable materials and processes in production can appeal to environmentally conscious consumers

KU9. understanding local business regulations, including licenses and permits, is essential for legal compliance

Qualification Pack

KU10. learn to collect and analyze feedback from customers to make informed decisions about product improvements

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** mastery of traditional and modern felt-making techniques, including carding, felting, and dyeing wool
- GS2.** skills in using tools and equipment necessary for production, ensuring quality and precision
- GS3.** ability to identify market gaps and opportunities for innovation and new product development
- GS4.** proficiency in the techniques of making Namda, including felt-making and sewing
- GS5.** ability to identify gaps in the market for Namda products
- GS6.** skills in handling feedback and complaints constructively.
- GS7.** commitment to promoting sustainable practices within the Namda sector
- GS8.** skills in leading and motivating a team of artisans or employees

HCS/N9908: Working in a Team

Description

This unit is about working as part of a team in the process.

Elements and Performance Criteria

Commitment and trust

To be competent, the user/individual on the job must be able to:

- PC1.** Be accountable to one's own role in whole process.
- PC2.** Perform all roles with full responsibility.

Communication

To be competent, the user/individual on the job must be able to:

- PC3.** Report problems faced during the process.
- PC4.** Talk politely with other team members and colleagues.
- PC5.** Submit daily report of own performance.

Adaptability

To be competent, the user/individual on the job must be able to:

- PC6.** Adjust in different work situations.
- PC7.** Give due importance to others point of view.
- PC8.** Avoid conflicting situations.

Creative freedom

To be competent, the user/individual on the job must be able to:

- PC9.** Develop new ideas for work procedures
- PC10.** Improve upon the existing techniques to increase process efficiency

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** General rules and regulations in the sector.
- KU2.** Procedure followed to get the final output.
- KU3.** Safe working practices to be adopted.
- KU4.** Reporting to the supervisor or higher authority about any grievances faced.
- KU5.** Understanding the importance of the previous and next step of the process.
- KU6.** Process flow in the handicraft section.
- KU7.** Material sequence of flow.
- KU8.** Functions of different parts of product development.
- KU9.** Tools and equipments used.
- KU10.** Guidelines for operating the equipment.
- KU11.** Safety procedures to be followed as applicable.

Qualification Pack

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Prepare status and progress reports.
- GS2.** Write memos and e-mail to co-workers, and vendors to provide them with work updates and to request appropriate information without English language errors regarding grammar or sentence construct.
- GS3.** Keep abreast with the latest knowledge by reading brochures, pamphlets, and product information sheets.
- GS4.** Discuss task lists, schedules, and work-loads with co-workers.
- GS5.** Keep co-workers and supervisors informed about progress.
- GS6.** Make decisions pertaining to the concerned area of work.
- GS7.** Plan and organize service feedback files/documents.
- GS8.** Manage relationships with customers.
- GS9.** Build customer relationships and use customer centric approach.
- GS10.** Think through the problem, evaluate the possible solution(s) and suggest an optimum /best possible solution(s).
- GS11.** Identify immediate or temporary solutions to resolve delays.
- GS12.** Use the existing data to arrive at specific data points.
- GS13.** Apply, analyze, and evaluate the information gathered from observation, experience, reasoning, or communication, as a guide to thought and action.

HCS/N9945: Maintaining workplace health and safety

Description

This unit provides Performance Criteria, Knowledge & Understanding, and Skills & Abilities required to comply with health, safety, and security requirements at the workplace and covers procedures to prevent, control, and minimize risk to self and others.

Scope

The scope covers the following :

- Comply with health, safety, and security requirements at work

Elements and Performance Criteria

Comply with health, safety, and security requirements at work

To be competent, the user/individual on the job must be able to:

- PC1.** comply with health and safety related instructions applicable to the workplace.
- PC2.** use and maintain personal protective equipment as per protocol.
- PC3.** carry out own activities in line with approved guidelines and procedures
- PC4.** maintain a healthy lifestyle and guard against dependency on intoxicants.
- PC5.** follow environment management system related procedures.
- PC6.** store materials and tools in line with manufacturers and organisational requirements
- PC7.** safely handle and move waste and debris.
- PC8.** minimize health and safety risks to self and others due to own actions
- PC9.** seek clarifications, from supervisors or other authorized personnel in case of perceived risks
- PC10.** monitor the workplace and work processes for potential risks and threats.
- PC11.** carry out periodic walk-through to keep work area free from hazards and obstructions, if assigned
- PC12.** report hazards and potential risks/ threats to supervisors or other authorized personnel
- PC13.** participate in mock drills/ evacuation procedures organized at the workplace
- PC14.** undertake first aid, fire-fighting and emergency response training, if asked to do so
- PC15.** conduct routine checks on gas cylinders and furnaces for leaks or damage
- PC16.** store gas cylinders upright in a designated, secure area away from heat sources
- PC17.** conduct regular safety training sessions for employees on handling gas and operating furnaces safely
- PC18.** take action based on instructions in the event of fire, emergencies or accidents
- PC19.** follow organisation procedures for evacuation when required

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

Qualification Pack

- KU1.** health and safety related practices applicable at the workplace
- KU2.** potential hazards, risks and threats based on nature of operations
- KU3.** organizational procedures for safe handling of tools
- KU4.** potential risks due to own actions and methods to minimize these
- KU5.** environmental management system related procedures at the workplace.
- KU6.** layout of the plant and details of emergency exits, escape routes, emergency equipment and assembly points
- KU7.** potential accidents and emergencies and response to these scenarios
- KU8.** reporting protocol and documentation required
- KU9.** details of personnel trained in first aid, fire-fighting and emergency response
- KU10.** actions to take in the event of a mock drills/ evacuation procedures or actual accident, emergency or fire.
- KU11.** occupational health and safety risks and methods
- KU12.** personal protective equipment and method of use
- KU13.** identification, handling and storage of hazardous substances
- KU14.** proper disposal system for waste and by-products
- KU15.** signage related to health and safety and their meaning
- KU16.** importance of sound health, hygiene and good habits
- KU17.** ill-effects of alcohol, tobacco and drugs

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write in local language.
- GS2.** read measurement instructions
- GS3.** communicate orally with colleagues
- GS4.** follow organization rule-based decision making process
- GS5.** take decision with systematic course of actions and/or response
- GS6.** plan and organize your work to achieve targets and deadlines
- GS7.** manage relationships with customers
- GS8.** build customer relationships and use customer centric approach
- GS9.** think through the problem, evaluate the possible solution(s) and suggest an optimum /best possible solution(s)
- GS10.** identify immediate or temporary solutions to resolve delays
- GS11.** analyze data and activities.
- GS12.** pass on relevant information to others
- GS13.** apply, analyze, and evaluate the information gathered from observation, experience, reasoning, or communication, as a guide to thought and action

HCS/N9935: Maintain Personal Cleanliness

Description

This NOS provides the abilities required for taking responsibility for their own health at the workplace and is about using the correct procedures to prevent, control and minimize risk to them and others at the workplace.

Scope

The scope covers the following :

- adopt healthy work practices
- achieve work productivity while maintaining health

Elements and Performance Criteria

Adopt healthy work practices

To be competent, the user/individual on the job must be able to:

- PC1.** always cover the mouth and nose with a dust mask while working and keep on changing when it gets blocked with dust
- PC2.** follow work instructions strictly to reduce the amount of pollution at the work place e.g. wet the rock / craft material before working on it
- PC3.** wear protective goggles over eyes and replace them when scratches on it obscure the vision
- PC4.** wear gloves as per the materials used for making handicraft to avoid blisters; scratches and cuts
- PC5.** undergo preventive health checkups at regular intervals
- PC6.** take prompt treatment from the doctor in case of illness

Achieve work productivity while maintaining health

To be competent, the user/individual on the job must be able to:

- PC7.** follow SOPs for dealing with blisters; scratches; accidental fires or any other type of emergencies at work
- PC8.** ensure the absence of no productivity loss or absenteeism from work due to illness
- PC9.** ensure no long term ill effect on the personal health

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** companys policies on personal health and occupational hazard management
- KU2.** companys hr policies
- KU3.** companys reporting structure
- KU4.** companys emergency evacuation procedure
- KU5.** health risks to the worker at the work place

Qualification Pack

- KU6.** healthy work practices
- KU7.** how to perform the duties in a way to minimize pollution at the work place
- KU8.** what personal protective equipments should be worn and how it is cared for
- KU9.** safe disposal methods for waste
- KU10.** how to provide the first aid treatment at workplace
- KU11.** emergency procedures to be followed in case of an mishap such as fire accidents etc.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read personal health instructions and manual
- GS2.** read the usage of various hand tools and personal protection equipments
- GS3.** take notes on descriptions and details of various personal health maintenance procedures
- GS4.** communicate with supervisor about the physical symptoms
- GS5.** receive instructions from doctor and supervisor on medical care
- GS6.** how to select appropriate hand tools and personal protection equipment
- GS7.** when to change personal protection equipment during work
- GS8.** how to identify first aid needs in case and of an injury
- GS9.** how to select appropriate hand tools and personal protection equipment
- GS10.** when to change personal protection equipment during work
- GS11.** how to use materials that does not affect customer health / make injury
- GS12.** improve work processes by adopting best safety practices
- GS13.** analyze the usage of appropriate tools and consumables
- GS14.** spot errors and any other disruptions and communicate with solutions

HCS/N9904: Basic Business Management

Description

This OS unit focuses on business planning, internal strategy, timelines.

Scope

The scope covers the following :

- people management
- product planning
- procurement of raw materials
- market interfacing
- financial management
- record keeping

Elements and Performance Criteria

People management

To be competent, the user/individual on the job must be able to:

- PC1.** arrange Interactive meetings of managers of sales and production teams and categorize the issues and feedbacks of both the teams
- PC2.** train the employees of his/her unit with the appropriate skills required to make market relevant and quality products
- PC3.** motivate the employees

Product planning

To be competent, the user/individual on the job must be able to:

- PC4.** compile a report based on old production reports
- PC5.** address the issues faced in previous productions and try to resolve them
- PC6.** gather and analyze the cues from the market
- PC7.** ascertain the customer preference
- PC8.** develop product range lines based on current market preference
- PC9.** develop product range lines that are unique and able to price high
- PC10.** price the products according to market trends
- PC11.** identify the competent marketing strategy for the product range

Procurement of raw materials

To be competent, the user/individual on the job must be able to:

- PC12.** list of the raw material s and prepare a B.O.M according to the product lines
- PC13.** ascertain the quantity and right price to procure the materials
- PC14.** identify the right locations/agents from where the raw materials can be procured
- PC15.** negotiate to get the best price
- PC16.** ensure quality materials are procured

Qualification Pack

PC17. ensure the procured materials are stored in appropriate conditions

PC18. compile a record of price quotations, POs, and bills of procurement for future reference

Market interfacing

To be competent, the user/individual on the job must be able to:

PC19. maintain a healthy and professional relationship with vendor

PC20. the competitive market falls in order with the company policies of best price, quality, and delivery parameters

PC21. analyze the prevalent price for product lines

PC22. decide on the most effective means to access the market

PC23. plan for cost-effective transportation to the market

PC24. position the product according to market requirements

PC25. identify and address the expectations of customer

Financial management

To be competent, the user/individual on the job must be able to:

PC26. analyze and ascertain the cost of production

PC27. maintain the book of accounts related to the business

PC28. maintain export documents like a letter of credit, custom clearance

PC29. identify cost-effective means of running the business

Record keeping

To be competent, the user/individual on the job must be able to:

PC30. identify various aspects of business that require recording

PC31. design formats for recording

PC32. compile various records of all aspects of the business

PC33. maintain these records with periodic updations

PC34. maintain necessary documents as per local government and regulatory requirements

PC35. reframe the procurement strategy according to local scenarios like weather conditions, transport strikes, affected prices, etc.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. interpersonal skills and communication with a cross-section of stakeholders

KU2. understanding of basics accounting so that he/she can monitor the transactions between company and vendor

KU3. knowledge of banking basics to keep the export process flawless

KU4. understanding of costing principles to calculate the cost of production with all the overheads and the actual price

KU5. product and craft knowledge including material and tools requirements

KU6. gathering market intelligence.

KU7. various transportation means and implications on costing

KU8. various product lines that can be created depending on the sector of operation

Qualification Pack

- KU9.** basic record-keeping techniques
- KU10.** basic laws, rules, regulations, etc. regarding business
- KU11.** vendor management and development
- KU12.** pricing techniques
- KU13.** business profitability assessment

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** analyse product range and keep abreast of market trends
- GS2.** document various aspects of the business
- GS3.** compile descriptions and details about investment, expenditures, and sales
- GS4.** interact with teams to work efficiently
- GS5.** communicate and manage vendors for cost-effective outsourcing and procurements
- GS6.** interface with fellow entrepreneurs to exchange ideas on the business
- GS7.** communicate with the customers for their feedback about the product
- GS8.** comprehend information shared by various stakeholders
- GS9.** plan and organize the product lines
- GS10.** fix the appropriate price.
- GS11.** hire employees with the appropriate skill set and experience
- GS12.** predict the profit margin to be achieved by the business
- GS13.** decide target segment of the market
- GS14.** schedule production cycles for better efficiency of resources
- GS15.** planning of production efficiency based on manpower and equipment available
- GS16.** schedule market visits for surveys and feedback
- GS17.** gather information on preference and taste of the customer
- GS18.** interact with various types of customers and understand the trends
- GS19.** analyze and solve conflicts and problems of the business.
- GS20.** ensure that the problems do not arise repeatedly.
- GS21.** anticipate various problems/challenges that can crop up
- GS22.** analyze the market for increasing sales
- GS23.** spot errors and any other disruptions and communicate with solutions

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Qualification Pack

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Minimum Passing % at NOS Level: 50

(Please note: A Trainee must score the minimum percentage for each NOS separately as well as on the QP as a whole.)

Assessment Weightage

Compulsory NOS

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
