## Qualification Pack

### HCS/Q5701: Carpet Weaver

#### Brief Job Description

A carpet weaver is a skilled artisan who intricately crafts carpets by hand or using looms, blending traditional techniques with creative designs to produce unique, high-quality textiles that enhance interior spaces.

#### Personal Attributes

A carpet weaver needs to be careful and creative, with plenty of patience and skill. This allows them to create detailed designs while ensuring their work is high-quality and reflects cultural traditions.

#### Applicable National Occupational Standards (NOS)

##### Compulsory NOS:

1. [HCS/N8522: Entrepreneurship skills for Carpet weaver](#)
2. [HCS/N9929: Working in a team](#)
3. [HCS/N9931: Maintain health and safety at workplace](#)
4. [HCS/N9934: Managing Personal Sanitation](#)
5. [DGT/VSQ/N0101: Employability Skills \(30 Hours\)](#)

##### Electives (mandatory to select at least one):

##### Elective 1: Carry out the process of knotted carpet weaving

Knotted carpet weaving is the process of tying individual yarn knots onto a loom to create intricate designs and textures, resulting in durable carpets that often reflect cultural heritage.

1. [HCS/N5708: Install loom for knotted carpet weaving](#)
2. [HCS/N5709: Prepare warp structure for knotted carpet weaving and fix into the loom](#)
3. [HCS/N5710: Perform advanced knotted carpet weaving](#)

##### Elective 2: Carry out the process of tufted carpet weaving

Tufted carpet weaving involves inserting yarn into a backing material using a tufting gun or hand tools to create loops or cut piles, resulting in soft, durable carpets with intricate designs.

1. [HCS/N5705: Perform tufted carpet weaving as per given design](#)

## Qualification Pack

### Elective 3: Carry out the process of hand loom weaving

Hand loom weaving is the process of interlacing threads on a manually operated loom to create fabric. The weaver carefully controls the tension and pattern, resulting in unique, high-quality textiles that often showcase traditional designs.

#### 1. [HCS/N5415: Operate the handloom efficiently](#)

### HCS/N8522: Entrepreneurship skills for Carpet weaver

#### Description

This NOS outlines the competencies required to develop entrepreneurial skills for individuals involved in the carpet weaving industry. It focuses on practical knowledge, business planning, financial management, and market-driven strategies necessary to operate a successful carpet weaving enterprise.

#### Scope

The scope covers the following :

- Develop a Business Plan
- Manage Resources and Production
- Financial Management
- Marketing and Sales Strategies
- Innovation and Sustainability

#### Elements and Performance Criteria

##### *Develop a Business Plan*

To be competent, the user/individual on the job must be able to:

- PC1.** Identify business goals and objectives for carpet weaving, considering market demand and personal skillset.
- PC2.** Research target markets, customer preferences, and competitor activities in the carpet industry.
- PC3.** Establish a pricing model based on raw material costs, labor, and competitive market rates.

##### *Manage Resources and Production*

To be competent, the user/individual on the job must be able to:

- PC4.** Select appropriate raw materials (wool, silk, cotton) that meet design and quality standards.
- PC5.** Plan and organize production processes to ensure timely completion of carpet orders.
- PC6.** Maintain and operate weaving tools and equipment efficiently to minimize downtime.

##### *Financial Management*

To be competent, the user/individual on the job must be able to:

- PC7.** Keep accurate financial records, including costs, sales, and profits, for the carpet weaving business.
- PC8.** Prepare a budget and monitor expenses to ensure financial sustainability of the business.
- PC9.** Analyze financial statements to evaluate business performance and make necessary adjustments.

##### *Marketing and Sales Strategies*

To be competent, the user/individual on the job must be able to:

- PC10.** Develop a brand identity that reflects the uniqueness and craftsmanship of the woven carpets.
- PC11.** Create a marketing strategy that includes online and offline promotion, leveraging e-commerce platforms and social media.

## Qualification Pack

**PC12.** Establish a network with retail partners, interior designers, and direct customers to boost sales.

### *Innovation and Sustainability*

To be competent, the user/individual on the job must be able to:

**PC13.** Explore new design ideas and techniques to create innovative carpet patterns that cater to current trends.

**PC14.** Implement eco-friendly production methods by using sustainable materials and reducing waste.

### *Legal and Regulatory Compliance*

To be competent, the user/individual on the job must be able to:

**PC15.** Ensure the business is legally registered, and obtain all necessary licenses to operate.

**PC16.** Protect unique carpet designs through trademarks or design patents.

## Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

**KU1.** Principles of carpet weaving, including different techniques like knotting, tufting, and flat weaving.

**KU2.** Knowledge of raw materials (wool, cotton, silk), their properties, and how to source them sustainably.

**KU3.** Understanding of tools and equipment used in carpet weaving and their maintenance.

**KU4.** Basic concepts of entrepreneurship, including business planning, financial management, and marketing strategies.

**KU5.** Methods for calculating production costs, setting prices, and maintaining profitability.

**KU6.** Legal requirements for running a carpet weaving business, including intellectual property rights and trade regulations.

**KU7.** Understanding of market dynamics, including customer preferences and competition in the carpet industry.

**KU8.** Knowledge of effective customer relationship management techniques for generating repeat business and maintaining brand loyalty.

**KU9.** Awareness of emerging trends in carpet design and sustainable weaving practices.

**KU10.** Knowledge of eco-friendly materials and processes that contribute to a greener business model.

## Generic Skills (GS)

User/individual on the job needs to know how to:

**GS1.** Ability to communicate clearly with customers, suppliers, and team members.

**GS2.** Identifying challenges in production, supply chain, or marketing and developing solutions.

**GS3.** Handling customer complaints and feedback to improve product quality and service.

**GS4.** Prioritizing tasks such as production deadlines, marketing campaigns, and sales.

**GS5.** Ensuring timely delivery of orders without compromising on quality.

### HCS/N9929: Working in a team

#### Description

This NOS describes the communication and coordination skills and knowledge to work with colleagues and supervisor to achieve a smooth and hazard-free workflow.

#### Scope

The scope covers the following :

- interact with supervisor or superior
- work as a team by coordinating with colleagues within and outside the department and include
- inputs on PwD & Gender Sensitisation
- report and Document

#### Elements and Performance Criteria

##### *Interact with supervisor or superior*

To be competent, the user/individual on the job must be able to:

- PC1.** comply with health, safety gender, and PwD (People with disability) related instructions applicable to the workplace
- PC2.** actively participate in mock drills/ evacuation procedures; group discussions, training sensitization programs for gender, and PwD awareness organized at the workplace.
- PC3.** receive job orders and instructions from reporting supervisor and receive feedback on work standards.
- PC4.** understand the work output requirements, targets, performance indicators and incentives.
- PC5.** deliver quality work on time and report any anticipated reasons for delays and handover completed work to supervisor
- PC6.** report on any grievances, production defects and any potential hazards.

##### *Work as a team by coordinating with colleagues within and outside the department and include inputs on PwD & Gender Sensitisation*

To be competent, the user/individual on the job must be able to:

- PC7.** communicate maintenance and repair schedule proactively to the supervisor
- PC8.** interact and clarify doubts on design, usage of materials & tools, quality & standards compliance, etc.

##### *Report and Document*

To be competent, the user/individual on the job must be able to:

- PC9.** report in time for shortage or need of raw materials
- PC10.** communicate with colleagues from within and other departments, clearly and effectively on all aspects to carry out the work among the team
- PC11.** maintain the etiquette, use polite language, demonstrate responsible and disciplined behavior towards colleagues.
- PC12.** put team over individual goals and multi-task or share work where necessary supporting the colleagues.

## Qualification Pack

**PC13.** document all the details accurately relating to ones role as required.

### Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** knowledge about the importance of gender equality being followed in the organization and policies for reporting any harassment or inappropriate behavior
- KU2.** knowledge about how to accommodate employees with disabilities etiquette to adhere to and proper language and terminology
- KU3.** knowledge about how to communicate, offer help, respecting space, parking etc. for people with disabilities or special needs
- KU4.** knowledge about promoting a safe, accessible and healthy workplace for disabled employees
- KU5.** company's policies on preferred language of communication, incentives, quality standards, personnel management, reporting and escalation matrix policy.
- KU6.** company's standard operating procedure (sop) and the risk and impact of not following them.
- KU7.** procedures for working with colleagues, his/her role and responsibilities in relation to this
- KU8.** organizational hierarchy and the line of reporting structure and work target and review mechanism
- KU9.** procedures to report employment related issues and to deal with conflicts
- KU10.** importance of the individuals role in the organizational workflow and details of the individual responsibilities
- KU11.** tools and equipment handling procedure and common potential hazards in the work place and the procedures to deal with them
- KU12.** effective communication with various categories of people and the different departments in the organization
- KU13.** to document the job activity as required like the check sheets, history sheets, etc
- KU14.** expressing and addressing grievances appropriately, deal with difficult work relationships and manage the internal conflicts effectively

### Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** create a positive and inclusive workplace atmosphere without any kind of bias/discrimination towards any employee
- GS2.** actively take part in any discussion/workshop organized for gender sensitization training
- GS3.** read and comprehend written instructions related to gender equality issues in the organization
- GS4.** identify and report any harassment or inappropriate behavior towards any employee
- GS5.** create a positive and inclusive workplace atmosphere without any kind of bias/discrimination towards any employee with disability or special needs
- GS6.** actively take part in any discussion/workshop organized for disability sensitization training.

## Qualification Pack

- GS7.** read and comprehend written instructions related to equality issues in the organization related to disabled persons
- GS8.** read job sheets, design sheet and information displayed at the workplace
- GS9.** read and understand manuals, health and safety instructions, memos etc
- GS10.** fill up documentation to ones role
- GS11.** communicate effectively with supervisor
- GS12.** contribute to quality of team work and achieve smooth workflow
- GS13.** improve work processes by interacting with others and adopting best practices

### HCS/N5708: Install loom for knotted carpet weaving

#### Description

This unit prepares the learner to install and commission vertical loom for knotted carpet weaving. The loom is usually made of wood, and its width depends on the desired width of the carpet to be produced.

#### Scope

The scope covers the following :

- Work safely
- Organize for and take care of loom installation tools and materials
- Prepare for installing the loom for knotted carpet weaving
- Install the loom for knotted carpet weaving
- Check and ensure that the loom is secure and aligned correctly

#### Elements and Performance Criteria

##### *Work safely*

To be competent, the user/individual on the job must be able to:

- PC1.** use adequate footwear to save from stepping on sharp objects
- PC2.** state the name and location of people responsible for health and safety in the workplace
- PC3.** identify job-site hazardous work and state possible causes of risk or accident in the workplace Hazards: Balancing of the loom that can be heavy, using sharp or heavy tools and nails, working in confined spaces, etc.
- PC4.** carry out safe working practices while dealing with hazards to ensure the safety of self and others

##### *Organize for and take care of warp making tools and materials*

To be competent, the user/individual on the job must be able to:

- PC5.** identify various tools and materials used in installing a loom for knotted carpet weaving
- PC6.** prepare the tools appropriately for usage Appropriately: e.g. safely, cleanly, using right accessories, ensuring all parts are well maintained and functional, right sharpness, etc.
- PC7.** identify any damage or malfunctioning of the tools
- PC8.** use appropriate care procedures for routine maintenance or for troubleshooting

##### *Prepare for installing the loom*

To be competent, the user/individual on the job must be able to:

- PC9.** receive the packaged loom from a valid source along with picture guide for installation
- PC10.** extract key information from the picture guide for installation of the loom
- PC11.** cross check that all the parts as mentioned in the guide have been received
- PC12.** check that all the parts are intact and not damaged in any way
- PC13.** communicate to the contact person as per the contact person details mentioned in the order description in case there is a discrepancy

##### *Install the loom for knotted carpet weaving*

## Qualification Pack

To be competent, the user/individual on the job must be able to:

- PC14.** assemble the parts of the loom as per instructions provided in the picture guide
- PC15.** setup the loom and fix it securely as per instructions
- PC16.** fix the interlocking mechanism correctly
- PC17.** check alignment using plumb and level
- PC18.** make a few inches of warp and fix the warp structure correctly on the loom
- PC19.** perform a sample weft and interlocking weaving and adjust the parts to ensure that there are no problems in weaving
- PC20.** handle problems with respect to loom installation or alignment during weaving

## Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** legislation, standards, policies, and procedures followed in the company relevant to own employment and performance conditions
- KU2.** relevant health and safety requirements applicable in the work place
- KU3.** importance of following health, hygiene, safety and quality standards and the impact of not following the standards on consumers and the business
- KU4.** own job role and responsibilities and sources for information pertaining to employment terms, compensation, job role and responsibilities
- KU5.** relevant people and their responsibilities within the work area
- KU6.** who to approach for support in order to obtain work related instructions, clarifications and support
- KU7.** various categories of people that one is required to communicate and coordinate with in the organization
- KU8.** documentation and related procedures applicable in the context of employment and work
- KU9.** various types of knotted weaving loom
- KU10.** parts of a knotted weaving loom and their functions
- KU11.** assembly sequence for assembling a knotted weaving loom
- KU12.** importance of checking alignment
- KU13.** precautions to be taken while installing a loom
- KU14.** importance of securing the equipment during and after work and keeping the work area tidy and clutter free

## Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** fill logs, forms and formats in local or english language for recording production figures, quality related information, tool and material care and maintenance related information, etc.
- GS2.** take notes in any language of instructions received from supervisor
- GS3.** read to differentiate the various types of yarn and their colour codes

## Qualification Pack

- GS4.** read the terminology provided in the design document in local or english language
- GS5.** read and correctly interpret simple instructions from supervisor provided in local or english language
- GS6.** read and correctly interpret own notes written in any language
- GS7.** inform supervisor or team members of discrepancies; non-standard output; design document or tools and material related issues; or any problems in any language understood locally
- GS8.** take instructions completely so that no instruction is missed or misunderstood
- GS9.** seek clarification and understanding where instructions are not clear in any language understood locally
- GS10.** use common knotted carpet related terms and jargons where required
- GS11.** when faced with difficult decisions seek clarification from the supervisor and understand the parameters used by the supervisor to arrive at the decision
- GS12.** plan and organize own work in a way that all activities are completed in time and as per specifications
- GS13.** interpret contractor or clients work requirements and other weaving related specifications correctly
- GS14.** provide contractor or client with all relevant weaving information including delivery timelines, work requirements, feasibility and available support
- GS15.** deliver quality output and maintain long term business relationship with contractors or clients
- GS16.** determine timely correction of errors to overcome redoing of work

## Qualification Pack

### Assessment Criteria

| Assessment Criteria for Outcomes                                                                                                                                                                                                     | Theory Marks | Practical Marks | Project Marks | Viva Marks |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|-----------------|---------------|------------|

## Qualification Pack

### HCS/N5709: Prepare warp structure for knotted carpet weaving and fix into the loom

#### Description

This unit prepares the learner to make a warp structure for knotted carpet weaving as per the requirements such as dimensions of the carpet, knots per inch required, type of yarn to be used, etc. which the learner will have to identify and make the warp accordingly from the design document and then fix it and align it with the loom.

#### Scope

The scope covers the following :

- Work safely
- Organize for and take care of warp making tools and materials
- Prepare for warp making
- Make the warp structure as per the design
- Check and ensure that the dimensions of the warp is as per the design
- Fix the and align warp to the loom

#### Elements and Performance Criteria

##### *Work safely*

To be competent, the user/individual on the job must be able to:

- PC1.** use protective mask for protection from inhaling cotton and wool dust and adequate footwear to save from stepping on sharp objects,
- PC2.** state the name and location of people responsible for health and safety in the workplace
- PC3.** identify job-site hazardous work and state possible causes of risk or accident in the workplace Hazards: Inhaling cotton and wool dust, awkward positions, poorly designed tools, repetitive movements, and stressful working conditions including insufficient rest periods, inadequate lighting and poor temperature control, sharp/pointed tools like the knife or wooden comb
- PC4.** carry out safe working practices while dealing with hazards to ensure the safety of self and others

##### *Organize for and take care of warp making tools and materials*

To be competent, the user/individual on the job must be able to:

- PC5.** identify various tools and materials used in carpet weaving
- PC6.** prepare the tools appropriately for usage Appropriately: e.g. safely, cleanly, using right accessories, ensuring all parts are well maintained and functional, right sharpness, etc.
- PC7.** identify any damage or malfunctioning of the tools
- PC8.** use appropriate care procedures for routine maintenance or for troubleshooting

##### *Prepare for warp making*

To be competent, the user/individual on the job must be able to:

## Qualification Pack

- PC9.** receive order pack containing processed and dyed raw material, design and description of the work from a valid source
- PC10.** extract key information from the design graph and order description Key information: Dimensions of the carpet, type of tana to be built(8 or 12 or 16 threads per inch etc.)
- PC11.** read and interpret the terminology used on the design map in local language or English Terminology: e.g. warp (tana), knot, weft (thera), start point (kanni), etc
- PC12.** read and extract key information in order description in local language and English Key Information: e.g. timelines, contact person details, etc
- PC13.** check the map for any inconsistency or missing information
- PC14.** cross check the raw material given with the description given in the order pack and coding given in the design map
- PC15.** communicate to the contact person as per the contact person details mentioned in the order description in case there is a discrepancy or doubt in the map or raw material received
- PC16.** spool the warp yarn neatly into easily unwindable spools

*Make the warp structure as per the specifications of the design*

To be competent, the user/individual on the job must be able to:

- PC17.** select the warp yarn as per the requirement of the order
- PC18.** determine the yardage of yarn required from the dimension details and threads per inch mentioned in the order design and check availability
- PC19.** mark the start and end point on the loom structure as per the dimensions of the carpet to be woven leaving an allowance of
- PC20.** wind the warp yarn on the warp frame for a standing loom as per strings per inch indicated in the design document Strings per inch range: 8 to 24 strings
- PC21.** count no of warp strings and ensure accuracy as per requirement calculated from order design intermittently and in the end

*Check and ensure that the dimensions of the warp is as per the design*

To be competent, the user/individual on the job must be able to:

- PC22.** check and ensure that the dimensions of the warp are as per the design
- PC23.** perform corrections in case of errors that can be rectified without redoing the warp structure
- PC24.** unravel and redo warp in case error can be rectified by redoing the warp structure
- PC25.** inform senior or supervisor in case of error that cannot be rectified at own level

*Fix and align the warp to the loom*

To be competent, the user/individual on the job must be able to:

- PC26.** fix the warp structure on the loom safely and securely
- PC27.** check vertical alignment using a plumb and adjust accordingly
- PC28.** check horizontal alignment using a chalk and thread and adjust accordingly
- PC29.** insert 2 weft yarns as a precautionary measure before starting the weaving part

## Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

## Qualification Pack

- KU1.** legislation, standards, policies, and procedures followed in the company relevant to own employment and performance conditions
- KU2.** relevant health and safety requirements applicable in the work place
- KU3.** importance of following health, hygiene, safety and quality standards and the impact of not following the standards on consumers and the business
- KU4.** own job role and responsibilities and sources for information pertaining to employment terms, compensation, job role and responsibilities
- KU5.** relevant people and their responsibilities within the work area
- KU6.** who to approach for support in order to obtain work related instructions, clarifications and support
- KU7.** various categories of people that one is required to communicate and coordinate with in the organization
- KU8.** documentation and related procedures applicable in the context of employment and work
- KU9.** various types of materials used in warp making of knotted carpet weaving and their handling process
- KU10.** various tools used in warp making of knotted carpet weaving and their functions
- KU11.** care procedures for routine maintenance or for troubleshooting
- KU12.** valid sources of receiving the design order
- KU13.** various features in the design map
- KU14.** how to use a design map
- KU15.** information available in the design map
- KU16.** terminology used in the design map
- KU17.** importance of checking the map and cross-checking raw material before starting work
- KU18.** what to check in the map
- KU19.** purpose of warp and its features
- KU20.** the process of building the warp structure for a standing loom
- KU21.** difference in process for building the warp structure for a vertical or flat loom
- KU22.** how to determine the number of rows of warp threads with the help of the carpet dimensions and strings per inch mentioned in the order design
- KU23.** how to calculate the length of warp yarn required
- KU24.** precautions to be taking while making the warp structure
- KU25.** importance of checking dimensions intermittently and in the end of the weaving
- KU26.** precautions to be taken while checking
- KU27.** how to ensure that the warp is secure and upright while fixing it on the loom
- KU28.** importance of securing the equipment during and after work and keeping the work area tidy and clutter free

## Generic Skills (GS)

User/individual on the job needs to know how to:

## Qualification Pack

- GS1.** fill logs, forms and formats in local, hindi or english language for recording production figures, quality related information, tool and material care and maintenance related information, etc.
- GS2.** take notes in any language of instructions received from supervisor
- GS3.** read to differentiate the various types of yarn and their colour codes
- GS4.** read the terminology provided in the design document in local, hindi or english language
- GS5.** read and correctly interpret simple instructions from supervisor provided in local, hindi or english language
- GS6.** read and correctly interpret own notes written in any language
- GS7.** inform supervisor or team members of discrepancies; non-standard output; design document or tools and material related issues; or any problems in any language understood locally
- GS8.** take instructions completely so that no instruction is missed or misunderstood
- GS9.** seek clarification and understanding where instructions are not clear in any language understood locally
- GS10.** use common knotted carpet related terms and jargons where required
- GS11.** use the quality parameters to take decisions on whether to redo or rectify errors during warp making
- GS12.** when faced with difficult decisions seek clarification from the supervisor and understand the parameters used by the supervisor to arrive at the decision
- GS13.** plan and organize own work in a way that all activities are completed in time and as per specifications
- GS14.** interpret contractor or clients work requirements and other weaving related specifications correctly
- GS15.** provide contractor or client with all relevant weaving information including delivery timelines, work requirements, feasibility and available support
- GS16.** deliver quality output and maintain long term business relationship with contractors or clients
- GS17.** determine timely correction of errors to overcome redoing of work

## Qualification Pack

### Assessment Criteria

| Assessment Criteria for Outcomes                                                                                                                                                                                                                                                                                                                                                                 | Theory Marks | Practical Marks | Project Marks | Viva Marks |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|-----------------|---------------|------------|
| <i>Work safely</i>                                                                                                                                                                                                                                                                                                                                                                               | <b>4</b>     | <b>14</b>       | -             | -          |
| <b>PC1.</b> use protective mask for protection from inhaling cotton and wool dust and adequate footwear to save from stepping on sharp objects,                                                                                                                                                                                                                                                  | 1            | 4               | -             | -          |
| <b>PC2.</b> state the name and location of people responsible for health and safety in the workplace                                                                                                                                                                                                                                                                                             | 1            | 3               | -             | -          |
| <b>PC3.</b> identify job-site hazardous work and state possible causes of risk or accident in the workplace<br>Hazards: Inhaling cotton and wool dust, awkward positions, poorly designed tools, repetitive movements, and stressful working conditions including insufficient rest periods, inadequate lighting and poor temperature control, sharp/pointed tools like the knife or wooden comb | 1            | 3               | -             | -          |
| <b>PC4.</b> carry out safe working practices while dealing with hazards to ensure the safety of self and others                                                                                                                                                                                                                                                                                  | 1            | 4               | -             | -          |
| <i>Organize for and take care of warp making tools and materials</i>                                                                                                                                                                                                                                                                                                                             | <b>2</b>     | <b>9</b>        | -             | -          |
| <b>PC5.</b> identify various tools and materials used in carpet weaving                                                                                                                                                                                                                                                                                                                          | -            | 2               | -             | -          |
| <b>PC6.</b> prepare the tools appropriately for usage<br>Appropriately: e.g. safely, cleanly, using right accessories, ensuring all parts are well maintained and functional, right sharpness, etc.                                                                                                                                                                                              | -            | 2               | -             | -          |
| <b>PC7.</b> identify any damage or malfunctioning of the tools                                                                                                                                                                                                                                                                                                                                   | 1            | 2               | -             | -          |
| <b>PC8.</b> use appropriate care procedures for routine maintenance or for troubleshooting                                                                                                                                                                                                                                                                                                       | 1            | 3               | -             | -          |
| <i>Prepare for warp making</i>                                                                                                                                                                                                                                                                                                                                                                   | <b>4</b>     | <b>21</b>       | -             | -          |
| <b>PC9.</b> receive order pack containing processed and dyed raw material, design and description of the work from a valid source                                                                                                                                                                                                                                                                | -            | 3               | -             | -          |

## Qualification Pack

| Assessment Criteria for Outcomes                                                                                                                                                                | Theory Marks | Practical Marks | Project Marks | Viva Marks |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|-----------------|---------------|------------|
| <b>PC10.</b> extract key information from the design graph and order description Key information: Dimensions of the carpet, type of tana to be built(8 or 12 or 16 threads per inch etc.)       | -            | 3               | -             | -          |
| <b>PC11.</b> read and interpret the terminology used on the design map in local language or English Terminology: e.g. warp (tana), knot, weft (thera), start point (kanni), etc                 | 1            | 2               | -             | -          |
| <b>PC12.</b> read and extract key information in order description in local language and English Key Information: e.g. timelines, contact person details, etc                                   | 1            | 2               | -             | -          |
| <b>PC13.</b> check the map for any inconsistency or missing information                                                                                                                         | 1            | 3               | -             | -          |
| <b>PC14.</b> cross check the raw material given with the description given in the order pack and coding given in the design map                                                                 | 1            | 3               | -             | -          |
| <b>PC15.</b> communicate to the contact person as per the contact person details mentioned in the order description in case there is a discrepancy or doubt in the map or raw material received | -            | 3               | -             | -          |
| <b>PC16.</b> spool the warp yarn neatly into easily unwindable spools                                                                                                                           | -            | 2               | -             | -          |
| <i>Make the warp structure as per the specifications of the design</i>                                                                                                                          | <b>7</b>     | <b>13</b>       | -             | -          |
| <b>PC17.</b> select the warp yarn as per the requirement of the order                                                                                                                           | 1            | 2               | -             | -          |
| <b>PC18.</b> determine the yardage of yarn required from the dimension details and threads per inch mentioned in the order design and check availability                                        | 1            | 3               | -             | -          |
| <b>PC19.</b> mark the start and end point on the loom structure as per the dimensions of the carpet to be woven leaving an allowance of                                                         | 2            | 3               | -             | -          |

### Qualification Pack

| Assessment Criteria for Outcomes                                                                                                                                       | Theory Marks | Practical Marks | Project Marks | Viva Marks |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|-----------------|---------------|------------|
| <b>PC20.</b> wind the warp yarn on the warp frame for a standing loom as per strings per inch indicated in the design document Strings per inch range: 8 to 24 strings | 1            | 2               | -             | -          |
| <b>PC21.</b> count no of warp strings and ensure accuracy as per requirement calculated from order design intermittently and in the end                                | 2            | 3               | -             | -          |
| <i>Check and ensure that the dimensions of the warp is as per the design</i>                                                                                           | <b>2</b>     | <b>11</b>       | -             | -          |
| <b>PC22.</b> check and ensure that the dimensions of the warp are as per the design                                                                                    | 1            | 2               | -             | -          |
| <b>PC23.</b> perform corrections in case of errors that can be rectified without redoing the warp structure                                                            | -            | 3               | -             | -          |

## Qualification Pack

### HCS/N5710: Perform advanced knotted carpet weaving

#### Description

This unit prepares the learner to weave knotted carpets using Persian (Sennah) and Turkish knotted techniques using single weft or double weft as per the requirements of the design document received from proper authorities along with the consumables like cotton, wool or silk warp yarn and weaving yarn, etc. After weaving, the woven carpet is given to the relevant team for further processing.

#### Scope

The scope covers the following :

- Work safely
- Organize for and take care of knotted carpet weaving tools and materials
- Prepare for knotted carpet weaving
- Perform Knotted weaving using various techniques as per the design
- Jointly perform knotted weaving as per the design
- Check and ensure that the dimensions and design of the carpet is as per the design
- Remove the woven carpet material from the warp structure and hand over to relevant people

#### Elements and Performance Criteria

##### *Work safely*

To be competent, the user/individual on the job must be able to:

- PC1.** use protective mask for protection from inhaling cotton and wool dust and adequate footwear to save from stepping on sharp objects,
- PC2.** state the name and location of people responsible for health and safety in the workplace
- PC3.** identify job-site hazardous work and state possible causes of risk or accident in the workplace Hazards: Inhaling cotton and wool dust, awkward positions, poorly designed tools, repetitive movements, and stressful working conditions including insufficient rest periods, inadequate lighting and poor temperature control, sharp/pointed tools like the knife or wooden comb
- PC4.** carry out safe working practices while dealing with hazards to ensure the safety of self and others Safe working practices: Use of mouth mask; correct posture; availability of adequate natural light and cross ventilation; care for hygiene and sanitation; adequate resting periods(approx.. half hour break after every 3 hours of work); correct and safe use of tools; etc.

##### *Organize for and take care of knotted carpet weaving tools and materials*

To be competent, the user/individual on the job must be able to:

- PC5.** identify various tools and materials used in carpet weaving Tools: Iron screw/chain to tighten or roll warp or weft; specialized knife to cut pile; specialized scissors that cuts fixed pile height; simple scissors; wooden comb tool(panja) as per the quality of carpet and user strength for knocking threads into place; inch tape to measure dimensions, chalk and thread to check horizontal alignment; plumb or level to check vertical alignment; lever to roll the carpet down

## Qualification Pack

- PC6.** prepare the tools appropriately for usage Appropriately: e.g. safely, cleanly, using right accessories, ensuring all parts are well maintained and functional, right sharpness, etc.
- PC7.** identify any damage or malfunctioning of the tools
- PC8.** use appropriate care procedures for routine maintenance or for simple troubleshooting

### *Prepare for knotted carpet weaving*

To be competent, the user/individual on the job must be able to:

- PC9.** receive order pack containing processed and dyed raw material, design and description of the work from a valid source
- PC10.** extract key information from the design graph and order description Key information: Colour/raw material code; where to start; dimensions of the carpet; type of design (simple/complex, repeat patterns/single pattern, geometrical/traditional/modern, etc.); repeat parts; type of tana (8 threads per inch, 16 threads per inch etc.)
- PC11.** read and interpret the terminology used on the design map in local language or English Terminology: e.g Warp(Tana), Knot, Weft (Thera), Start point (Kanni), etc
- PC12.** read and extract key information in order description in local language and English Key Information: e.g. timelines, contact person details, etc
- PC13.** check the map for any inconsistency or missing information
- PC14.** cross check the raw material given with the description given in the order pack and coding given in the design map
- PC15.** communicate to the contact person as per the contact person details mentioned in the order description in case there is a discrepancy or doubt in the map or raw material received

### *Perform Knotted weaving using various techniques as per the design*

To be competent, the user/individual on the job must be able to:

- PC16.** perform checks on all equipment before starting the weaving Checks: e.g. check the warp to ensure that it is neither too loose nor too tight; cross check dimensions of the warp and threads per inch as per the design requirements; check loom alignment using plumb and chalk and thread; check curved knife have right sharpness, etc.
- PC17.** rectify problems that are within own's control and seek help if unable to resolve the problem Problem rectification: e.g. adjust the warp to right tightness; redo the warp (partially or completely as the case may be), is there is any error that cannot be corrected otherwise; adjust the loom to correct position and uprightness; Sharpen knife if blunt, etc
- PC18.** wind the yarn into spools or rolls that can easily unwind
- PC19.** set the yarn spools or rolls on the spool rack attached to the warp structure in the form of a beam or rope to keep them from getting tangled or stuck
- PC20.** sit comfortably on the bench and position self in such a way that the weaving can be done without straining oneself
- PC21.** tie knots using various knotting techniques on the warp threads with the correct yarn and in the correct sequence as per a range of designs Knotting techniques: persian (sennah), turkish knot, single weft weaving, double weft weaving, single warp weaving, double warp weaving, open on the left, open on the right Range of designs: Modern, traditional (medallion, flower, border, field), geometric, intricate motifs, using upto 10 colours
- PC22.** insert thicker yarn as a weft (thera) horizontally over each row of knots
- PC23.** use the interlocking beam that causes the front and back threads of the warp structure to get interchanged after every weft

## Qualification Pack

- PC24.** knock the three rows together (row of knots, weft and interlocking) with the help of a wooden comb tool (panja) to set them tightly
- PC25.** weave uptill 16x16 knots per square inch with a minimum tolerance level of 1 knot per 50 square inches
- PC26.** perform knotted weaving using cotton, wool or silk yarn
- PC27.** join threads neatly and tightly when broken
- PC28.** roll the woven area downwards after around 1 feet of weaving in order to keep the last woven row at accessible height
- PC29.** weave weft and interlocking rows at the beginning and end of the weaving as required by the design

### *Jointly perform Persian knotted weaving as per the design*

To be competent, the user/individual on the job must be able to:

- PC30.** weave simultaneously with other weavers on the same warp and design by dividing up the design
- PC31.** convert design into verbal instructions that can be recited (chalta-front, bachcha-back, dhal-up, the colour code or as per an equivalent of the taalim)
- PC32.** recite the design verbally when working simultaneously on a repetitive pattern
- PC33.** provide feedback and solutions to junior weavers when they are faced with weaving related problems
- PC34.** identify errors in weaving and suggest remedial measures where possible

### *Check and ensure that the dimensions and design of the carpet is as per the design*

To be competent, the user/individual on the job must be able to:

- PC35.** check and ensure that the dimensions and design of the carpet weaving is as per the design
- PC36.** perform corrections in case of errors that can be rectified without redoing the weaving
- PC37.** unravel and redo weaving in case error can be rectified by redoing the last few rows of weaving
- PC38.** inform senior or supervisor in case of error that cannot be rectified at own level

### *Remove the woven carpet material from the warp structure and hand over to relevant people*

To be competent, the user/individual on the job must be able to:

- PC39.** cut and remove the woven carpet material from the warp frame without damaging or dirtying it
- PC40.** roll, pack and dispatch to the relevant authority as mentioned in the order description along with remaining raw material
- PC41.** secure the weaving equipment to keep it safe, dry and dirt free
- PC42.** keep the work area tidy and clutter free

## Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** relevant legislation, standards, policies, and procedures followed in the company relevant to own employment and performance conditions
- KU2.** relevant health and safety requirements applicable in the work place

## Qualification Pack

- KU3.** own job role and responsibilities and sources for information pertaining to employment terms, entitlements, job role and responsibilities
- KU4.** reporting structure, inter-dependent functions, lines and procedures in the work area
- KU5.** who to approach for support in order to obtain work related instructions, clarifications and support
- KU6.** importance of following health, hygiene, safety and quality standards and the impact of not following the standards on consumers and the business
- KU7.** relevant people and their responsibilities within the work area
- KU8.** escalation matrix and procedures for reporting work and employment related issues
- KU9.** documentation and related procedures applicable in the context of employment and work
- KU10.** various types of materials used in knotted carpet weaving and their handling process
- KU11.** various tools used in knotted carpet weaving and their functions
- KU12.** care procedures for routine maintenance or for troubleshooting
- KU13.** valid sources of receiving the design order, e.g. employer(with valid appointment letter or service agreement), contractor(with valid contract), client(with signed job order and advance payment as agreed), etc
- KU14.** various features in the design map
- KU15.** how to use a design map
- KU16.** design map information available in the
- KU17.** terminology used in the design map
- KU18.** importance of checking the map and cross checking raw material before starting work
- KU19.** what to check in the design map
- KU20.** what is warp and its function
- KU21.** how to determine the number of rows of warp threads with the help of the carpet dimensions and strings per inch mentioned in the order design
- KU22.** importance of each of the checks performed before starting and the consequences if the check is not performed
- KU23.** various types of carpet weaving and knotting techniques,
- KU24.** various knotting techniques and their characteristics
- KU25.** various design types and related terminologies
- KU26.** importance of referring to the design while knotting
- KU27.** how to weave a weft thread
- KU28.** how to make an interlocking
- KU29.** how to use the wooden comb tool to knocking the woven section tightly together
- KU30.** precautions to be taking while weaving
- KU31.** benefits of joint weaving,
- KU32.** when is joint weaving possible
- KU33.** how to convert a design into verbal instructions that can be recited
- KU34.** how to reciting the design (boli bolna, taalim padhna or its equivalent)
- KU35.** terminology used while reciting the design
- KU36.** care to be taking while joint weaving

## Qualification Pack

- KU37.** what to check (intermittently and in the end of the weaving)
- KU38.** types of common weaving errors and what can be done to minimize them or resolve them
- KU39.** importance of checking dimensions intermittently and in the end of the weaving
- KU40.** how to check the dimensions and design of the woven carpet material
- KU41.** precautions to be taken while checking
- KU42.** how to removing the woven material from the warp
- KU43.** importance of securing the equipment and keeping the work area tidy and clutter free

## Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** fill logs, forms and formats in local, hindi or english language for recording production figures, quality related information, tool and material care and maintenance related information, etc.
- GS2.** take notes in any language of instructions received from supervisor
- GS3.** read to differentiate the various types of yarn and their colour codes
- GS4.** read the terminology provided in the design document in local, hindi or english language
- GS5.** read and correctly interpret simple instructions from supervisor provided in local, hindi or english language
- GS6.** read and correctly interpret own notes written in any language
- GS7.** inform supervisor or team members of discrepancies; non-standard output; design document or tools and material related issues; or any problems in any language understood locally
- GS8.** take instructions completely so that no instruction is missed or misunderstood
- GS9.** seek clarification and understanding where instructions are not clear in any language understood locally
- GS10.** use common knotted carpet related terms and jargons where required
- GS11.** use the quality parameters to take decisions on whether to redo or rectify errors during weaving
- GS12.** when faced with difficult decisions seek clarification from the supervisor and understand the parameters used by the supervisor to arrive at the decision
- GS13.** plan and organize own work in a way that all activities are completed in time and as per specifications
- GS14.** interpret contractor or clients work requirements and other weaving related specifications correctly
- GS15.** provide contractor or client with all relevant weaving information including delivery timelines, work requirements, feasibility and available support
- GS16.** deliver quality output and maintain long term business relationship with contractors or clients
- GS17.** determine timely correction of errors to overcome redoing of work

## Qualification Pack

### Assessment Criteria

| Assessment Criteria for Outcomes                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | Theory Marks | Practical Marks | Project Marks | Viva Marks |

| <b>PC20.</b> sit comfortably on the bench and position self in such a way that the weaving can be done without straining oneself                                                                                                                                                                                                                                                                                                                                   | 1            | 2               | -             | -          |
| <b>PC21.</b> tie knots using various knotting techniques on the warp threads with the correct yarn and in the correct sequence as per a range of designs Knotting techniques: persian (sennah), turkish knot, single weft weaving, double weft weaving, single warp weaving, double warp weaving, open on the left, open on the right Range of designs: Modern, traditional (medallion, flower, border, field), geometric, intricate motifs, using upto 10 colours | 2            | 2               | -             | -          |
| <b>PC22.</b> insert thicker yarn as a weft (thera) horizontally over each row of knots                                                                                                                                                                                                                                                                                                                                                                             | 1            | 1               | -             | -          |
| <b>PC23.</b> use the interlocking beam that causes the front and back threads of the warp structure to get interchanged after every weft                                                                                                                                                                                                                                                                                                                           | -            | 2               | -             | -          |
| <b>PC24.</b> knock the three rows together (row of knots, weft and interlocking) with the help of a wooden comb tool (panja) to set them tightly                                                                                                                                                                                                                                                                                                                   | -            | 2               | -             | -          |

## Qualification Pack

| Assessment Criteria for Outcomes                                                                                                                                      | Theory Marks | Practical Marks | Project Marks | Viva Marks |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|-----------------|---------------|------------|
| <b>PC25.</b> weave uptill 16x16 knots per square inch with a minimum tolerance level of 1 knot per 50 square inches                                                   | 1            | 2               | -             | -          |
| <b>PC26.</b> perform knotted weaving using cotton, wool or silk yarn                                                                                                  | -            | 2               | -             | -          |
| <b>PC27.</b> join threads neatly and tightly when broken                                                                                                              | -            | 2               | -             | -          |
| <b>PC28.</b> roll the woven area downwards after around 1 feet of weaving in order to keep the last woven row at accessible height                                    | 1            | 1               | -             | -          |
| <b>PC29.</b> weave weft and interlocking rows at the beginning and end of the weaving as required by the design                                                       | 1            | 1               | -             | -          |
| <i>Jointly perform Persian knotted weaving as per the design</i>                                                                                                      | <b>3</b>     | <b>10</b>       | -             | -          |
| <b>PC30.</b> weave simultaneously with other weavers on the same warp and design by dividing up the design                                                            | -            | 2               | -             | -          |
| <b>PC31.</b> convert design into verbal instructions that can be recited (chalta-front, bachcha-back, dhal-up, the colour code or as per an equivalent of the taalim) | 1            | 2               | -             | -          |
| <b>PC32.</b> recite the design verbally when working simultaneously on a repetitive pattern                                                                           | 1            | 2               | -             | -          |
| <b>PC33.</b> provide feedback and solutions to junior weavers when they are faced with weaving related problems                                                       | -            | 2               | -             | -          |
| <b>PC34.</b> identify errors in weaving and suggest remedial measures where possible                                                                                  | 1            | 2               | -             | -          |
| <i>Check and ensure that the dimensions and design of the carpet is as per the design</i>                                                                             | <b>2</b>     | <b>8</b>        | -             | -          |
| <b>PC35.</b> check and ensure that the dimensions and design of the carpet weaving is as per the design                                                               | 1            | 2               | -             | -          |
| <b>PC36.</b> perform corrections in case of errors that can be rectified without redoing the weaving                                                                  | 1            | 2               | -             | -          |
| <b>PC37.</b> unravel and redo weaving in case error can be rectified by redoing the last few rows of weaving                                                          | -            | 2               | -             | -          |

## Qualification Pack

| Assessment Criteria for Outcomes                                                                                                       | Theory Marks | Practical Marks | Project Marks | Viva Marks |
|----------------------------------------------------------------------------------------------------------------------------------------|--------------|-----------------|---------------|------------|
| <b>PC38.</b> inform senior or supervisor in case of error that cannot be rectified at own level                                        | -            | 2               | -             | -          |
| <i>Remove the woven carpet material from the warp structure and hand over to relevant people</i>                                       | <b>1</b>     | <b>4</b>        | -             | -          |

## Qualification Pack

### HCS/N5705: Perform tufted carpet weaving as per given design

#### Description

This unit prepares the learner to manually weave tufted carpets as per instructions provided and under constant supervision using manual tufted weaving guns, or electric powered tufted weaving guns as per the requirements of the design document.

#### Scope

The scope covers the following :

- Apply safe and healthy work practices while carpet weaving
- Organise for and take care of tufted carpet weaving tools and materials
- Prepare for tufted carpet weaving
- Fix the primary fabric for tufted weaving as per the specifications of the design
- Prepare stencil and trace the design on the primary fabric
- Perform tufted carpet weaving as per the design

#### Elements and Performance Criteria

##### *Apply safe and healthy work practices while carpet weaving*

To be competent, the user/individual on the job must be able to:

- PC1.** use protective mask for protection from inhaling cotton and wool dust and adequate footwear to save from stepping on sharp objects,
- PC2.** state the name and location of people responsible for health and safety in the workplace
- PC3.** identify job-site hazardous work and state possible causes of risk or accident in the workplace Hazards: Inhaling cotton and wool dust, awkward positions, poorly designed tools, repetitive movements, and stressful working conditions including insufficient rest periods, inadequate lighting and poor temperature control, sharp/pointed tools like the tufted gun, scissors, etc.
- PC4.** carry out safe working practices while dealing with hazards to ensure the safety of self and others

##### *Organise for and take care of tufted carpet weaving tools and materials*

To be competent, the user/individual on the job must be able to:

- PC5.** identify various tools and materials used in carpet weaving Tools: Manual tufted weaving gun (loop and cut pile); power gun for tufted weaving (loop and cut pile), scissors, marking tools Materials: e.g. raw material (fabric, yarn), tracing paper, tracing colour/ink, etc
- PC6.** prepare the tools appropriately for usage Appropriately: e.g. safely, cleanly, using right accessories, ensuring all parts are well maintained and functional, right sharpness, etc.
- PC7.** identify any damage or malfunctioning of the tools
- PC8.** use appropriate care procedures for routine maintenance or for troubleshooting

##### *Prepare for tufted carpet weaving*

To be competent, the user/individual on the job must be able to:

- PC9.** receive order pack containing processed and dyed raw material, design and description of the work from a valid source

## Qualification Pack

- PC10.** extract key information from the design graph and order description Key information: Colour/raw material code; where to start; dimensions of the carpet; type of design (simple/complex, repeat patterns/single pattern, geometrical/traditional/modern, etc.); repeat parts; type of tana to be built (8 threads per inch, 16 threads per inch etc.)
- PC11.** read and interpret the terminology used on the design map in local language or english
- PC12.** read and extract key information in order description in local language and English Key Information: e.g. timelines; contact person details, etc.
- PC13.** check the map for any inconsistency or missing information
- PC14.** cross check the raw material given with the description given in the order pack and coding given in the design map
- PC15.** communicate to the contact person as per the contact person details mentioned in the order description in case there is a discrepancy or doubt in the map or raw material received

### *Fix the primary fabric for tufted weaving as per the specifications of the design*

To be competent, the user/individual on the job must be able to:

- PC16.** select the primary fabric as per the requirement of the order
- PC17.** determine the yardage of fabric required from the dimension details in the order design and check availability
- PC18.** stretch the primary fabric on the loom securely and without damage to the fabric as per the dimensions of the carpet to be woven

### *Prepare stencil and trace the design on the primary fabric*

To be competent, the user/individual on the job must be able to:

- PC19.** select equipment and material required for preparation of stencil and tracing on primary fabric
- PC20.** prepare and pin hole the stencil as per the design
- PC21.** trace the design from the stencil to the primary fabric accurately

### *Perform tufted carpet weaving as per the design*

To be competent, the user/individual on the job must be able to:

- PC22.** perform checks on all equipment before starting the weaving Checks: e.g. check the primary fabric to ensure that it is neither too loose nor too tight; cross check dimensions of the primary fabric and design tracing for accuracy as per the design document; check loom: should not be bent or tilted; check the tufting tool, should be well greased and should have right sharpness, etc.
- PC23.** rectify problems that are within own's control and seek help if unable to resolve the problem Problem rectification: e.g. adjust the primary fabric to right tightness; redo the fabric (partially or completely as the case may be), if there is any error that cannot be corrected otherwise; if there is an error in design, turn the fabric around and redo the tracing; adjust the loom to correct position and uprightness; grease and/or sharpen knife if required; etc.
- PC24.** wind the yarn into spools or rolls that can easily unwind
- PC25.** set the yarn spools or rolls on the spool rack attached to the warp structure in the form of a beam or rope to keep them from getting tangled or stuck
- PC26.** select the correct tufting gun and adjust its setting as per the requirement which includes loop or cut pile; size of the pile; etc.
- PC27.** load the yarn end on the tufting gun

## Qualification Pack

- PC28.** sit comfortably and position self in such a way that the weaving can be done without straining oneself
- PC29.** perform the tufted weaving stitch with neatness and accuracy as per the design
- PC30.** join yarn neatly and securely when broken

## Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** relevant health and safety requirements applicable in the work place
- KU2.** own job role and responsibilities and sources for information pertaining to employment terms, entitlements, job role and responsibilities
- KU3.** reporting structure, inter-dependent functions, lines and procedures in the work area
- KU4.** escalation matrix and procedures for reporting work and employment related issues
- KU5.** documentation and related procedures applicable in the context of employment and work
- KU6.** health and safety hazards commonly present in the work environment and related precautions
- KU7.** possible causes of risk, hazard or accident in the workplace and why risk and/or accidents are possible
- KU8.** possible causes of risk and accident Possible causes of risk and accident: Physical actions; reading; listening to and giving instructions; inattention; sickness and incapacity (such as drunkenness); health hazards (such as untreated injuries and contagious illness)
- KU9.** importance of using protective clothing/equipment while working
- KU10.** various causes of fire Causes of fires: Heating of metal; spontaneous ignition; sparking;
- KU11.** different materials used for extinguishing fire Materials: Sand, water, foam, CO<sub>2</sub>, dry powder, moist leaves
- KU12.** rescue techniques applied during a fire hazard
- KU13.** some common types of safety signs and what they mean
- KU14.** importance of securing the equipment and keeping the work area tidy and clutter free
- KU15.** various types of materials used in tufted carpet weaving and their handling process
- KU16.** various tools used in tufted carpet weaving and their functions
- KU17.** care procedures for routine maintenance or for troubleshooting
- KU18.** valid sources of receiving the design order, e.g. employer(with valid appointment letter or service agreement); contractor(with valid contract); client(with signed job order and advance payment as agreed), etc.
- KU19.** various features in the design map
- KU20.** how to use a design map
- KU21.** importance of checking the map and cross checking raw material before starting work
- KU22.** what is the primary fabric and its function
- KU23.** the process of fixing the primary backing on the loom for tufted carpet making
- KU24.** how to calculate the cloth yardage required
- KU25.** precautions to be taking while fixing the primary backing.
- KU26.** how to make the stencil

## Qualification Pack

- KU27.** how to trace the design from the stencil to the fabric
- KU28.** precautions to be taking while making the stencil and tracing the design
- KU29.** importance of each of the checks performed before starting and the consequences if the check is not performed
- KU30.** various types of tufted carpet weaving
- KU31.** how to use a manual tufting tool
- KU32.** precautions to be taking while tufted weaving
- KU33.** how to fix the secondary backing after weaving
- KU34.** how to remove the woven material from the loom
- KU35.** importance of securing the equipment and keeping the work area tidy and clutter free

## Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** fill logs, forms and formats in local, hindi or english language for recording production figures, quality related information, tool and material care and maintenance related information, etc.
- GS2.** take notes in any language of instructions received from supervisor
- GS3.** read to differentiate the various types of yarn and their colour codes
- GS4.** read the terminology provided in the design document in local, hindi or english language
- GS5.** read and correctly interpret simple instructions from supervisor provided in local, hindi or english language
- GS6.** read and correctly interpret own notes written in any language
- GS7.** inform supervisor or team members of discrepancies; non-standard output; design document or tools and material related issues; or any problems in any language understood locally
- GS8.** take instructions completely so that no instruction is missed or misunderstood
- GS9.** seek clarification and understanding where instructions are not clear in any language understood locally
- GS10.** use common tufted carpet related terms and jargons where required
- GS11.** use the quality parameters to take decisions during tufted carpet weaving
- GS12.** when faced with difficult decisions seek clarification from the supervisor and understand the parameters used by the supervisor to arrive at the decision
- GS13.** plan and organize own work in a way that all activities are completed in time and as per specifications
- GS14.** interpret contractor or clients work requirements and other weaving related specifications correctly
- GS15.** provide contractor or client with all relevant weaving information including delivery timelines, work requirements, feasibility and available support
- GS16.** deliver quality output and maintain long term business relationship with contractors or clients

## Qualification Pack

### Assessment Criteria

| Assessment Criteria for Outcomes                                                                                                                                                                                                                                                                                                                                                                       | Theory Marks | Practical Marks | Project Marks | Viva Marks |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|-----------------|---------------|------------|
| <i>Apply safe and healthy work practices while carpet weaving</i>                                                                                                                                                                                                                                                                                                                                      | <b>4</b>     | <b>14</b>       | -             | -          |
| <b>PC1.</b> use protective mask for protection from inhaling cotton and wool dust and adequate footwear to save from stepping on sharp objects,                                                                                                                                                                                                                                                        | 1            | 4               | -             | -          |
| <b>PC2.</b> state the name and location of people responsible for health and safety in the workplace                                                                                                                                                                                                                                                                                                   | 1            | 3               | -             | -          |
| <b>PC3.</b> identify job-site hazardous work and state possible causes of risk or accident in the workplace<br>Hazards: Inhaling cotton and wool dust, awkward positions, poorly designed tools, repetitive movements, and stressful working conditions including insufficient rest periods, inadequate lighting and poor temperature control, sharp/pointed tools like the tufted gun, scissors, etc. | 1            | 3               | -             | -          |
| <b>PC4.</b> carry out safe working practices while dealing with hazards to ensure the safety of self and others                                                                                                                                                                                                                                                                                        | 1            | 4               | -             | -          |
| <i>Organise for and take care of tufted carpet weaving tools and materials</i>                                                                                                                                                                                                                                                                                                                         | <b>2</b>     | <b>9</b>        | -             | -          |
| <b>PC5.</b> identify various tools and materials used in carpet weaving<br>Tools: Manual tufted weaving gun (loop and cut pile); power gun for tufted weaving (loop and cut pile), scissors, marking tools<br>Materials: e.g. raw material (fabric, yarn), tracing paper, tracing colour/ink, etc                                                                                                      | -            | 2               | -             | -          |

### HCS/N5415: Operate the handloom efficiently

#### Description

This unit provides performance criteria, knowledge & understanding and skills & abilities required to operate handloom at optimal speed, attending to warp & weft breakages, minimizing downtime and safeguarding damage to surroundings/environment.

#### Scope

The scope covers the following :

- Prepare the Handloom for Operation
- Operate the Handloom
- Perform Basic Maintenance and Troubleshooting
- Ensure Quality and Productivity

#### Elements and Performance Criteria

##### *Prepare the Handloom for Operation*

To be competent, the user/individual on the job must be able to:

- PC1.** Perform pre-operational checks of the handloom components for proper functionality and alignment.
- PC2.** Load the warp beam with the required warp yarns, ensuring alignment and even distribution.
- PC3.** Insert and adjust the weft yarn in the shuttle to ensure smooth operation.
- PC4.** Verify that all required tools and accessories (heddles, reeds, etc.) are in proper working condition.

##### *Operate the Handloom*

To be competent, the user/individual on the job must be able to:

- PC5.** Start the handloom according to operational guidelines and safety standards.
- PC6.** Monitor the weaving process to ensure continuous production without interruptions.
- PC7.** Adjust the shed formation, picking, and beating mechanisms for consistent weaving quality.
- PC8.** Maintain a steady rhythm and speed while operating the handloom to ensure productivity.

##### *Perform Basic Maintenance and Troubleshooting*

To be competent, the user/individual on the job must be able to:

- PC9.** Inspect and lubricate moving parts of the handloom regularly to prevent wear and tear.
- PC10.** Replace damaged or worn-out components such as reeds, heddles, or shuttles.
- PC11.** Identify common weaving defects such as uneven tension, skipped threads, or misaligned patterns.
- PC12.** Troubleshoot and fix issues related to warp and weft yarns, including breakage and entanglement.

##### *Ensure Quality and Productivity*

To be competent, the user/individual on the job must be able to:

- PC13.** Inspect the woven fabric at regular intervals to identify defects or inconsistencies.

## Qualification Pack

- PC14.** Ensure that the weaving pattern and color scheme match the customer or design requirements.
- PC15.** Record daily production output and compare it with the set targets.
- PC16.** Report major quality issues or production delays to the supervisor for resolution.

## Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** the organization's policies and procedures.
- KU2.** potential hazards associated with the loom and tools used.
- KU3.** safety precautions.
- KU4.** contact person in case of queries on procedure or products and for resolving issues related to defective machines, tools, materials & equipments.
- KU5.** documentation and reporting formats.
- KU6.** work targets.
- KU7.** method of obtaining /giving feed back with respect to performance.
- KU8.** importance of team work and maintaining harmonious working relationships.
- KU9.** process for offering/obtaining work related assistance.
- KU10.** responsibilities under health, safety and environmental legislation.
- KU11.** quality standards for the product with respect to nature of permissible/non permissible defects.
- KU12.** fabric quality parameters such as colour, design, width, pattern etc.
- KU13.** quality of cotton used for warp and weft.
- KU14.** wrong drawing , wrong denting, lot mix, colour mix, wrong end, wrong pick, loose end, snarls, oil stain, colour / fibre migration, shade variation, wrong pattern, improper pile, loop size etc.
- KU15.** know the safety points for loom and equipments used & should ensure that the same are functional.
- KU16.** know about the functional operations of the machine.

## Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** prepare status and progress reports.
- GS2.** write memos and e-mail to co-workers, and vendors to provide them with work updates and to request appropriate information without english language errors regarding grammar or sentence construct.
- GS3.** keep abreast with the latest knowledge by reading brochures, pamphlets, and product information sheets.
- GS4.** discuss task lists, schedules, and work-loads with co-workers.
- GS5.** keep co-workers and supervisors informed about progress.

## Qualification Pack

- GS6.** make decisions pertaining to the concerned area of work.
- GS7.** plan and organize service feedback files/documents.
- GS8.** manage relationships with customers.
- GS9.** build customer relationships and use customer centric approach.
- GS10.** think through the problem, evaluate the possible solution(s) and suggest an optimum /best possible solution(s).
- GS11.** identify immediate or temporary solutions to resolve delays.
- GS12.** use the existing data to arrive at specific data points.
- GS13.** apply, analyze, and evaluate the information gathered from observation, experience, reasoning, or communication, as a guide to thought and action.
- GS14.** attend the weft break immediately.
- GS15.** check work is complete and product is free from defects.
- GS16.** should be able to weave fabric free from weaver oriented defects such as wrong drawing , wrong denting, wrong design, etc.

## Qualification Pack

### Assessment Criteria

| Assessment Criteria for Outcomes                                                                                   | Theory Marks | Practical Marks | Project Marks | Viva Marks |
|--------------------------------------------------------------------------------------------------------------------|--------------|-----------------|---------------|------------|
| <i>Prepare the Handloom for Operation</i>                                                                          | <b>8</b>     | <b>16</b>       | -             | -          |
| <b>PC1.</b> Perform pre-operational checks of the handloom components for proper functionality and alignment.      | 2            | 4               | -             | -          |
| <b>PC2.</b> Load the warp beam with the required warp yarns, ensuring alignment and even distribution.             | 2            | 4               | -             | -          |
| <b>PC3.</b> Insert and adjust the weft yarn in the shuttle to ensure smooth operation.                             | 2            | 4               | -             | -          |
| <b>PC4.</b> Verify that all required tools and accessories (heddles, reeds, etc.) are in proper working condition. | 2            | 4               | -             | -          |
| <i>Operate the Handloom</i>                                                                                        | <b>8</b>     | <b>16</b>       | -             | -          |
| <b>PC5.</b> Start the handloom according to operational guidelines and safety standards.                           | 2            | 4               | -             | -          |
| <b>PC6.</b> Monitor the weaving process to ensure continuous production without interruptions.                     | 2            | 4               | -             | -          |
| <b>PC7.</b> Adjust the shed formation, picking, and beating mechanisms for consistent weaving quality.             | 2            | 4               | -             | -          |
| <b>PC8.</b> Maintain a steady rhythm and speed while operating the handloom to ensure productivity.                | 2            | 4               | -             | -          |
| <i>Perform Basic Maintenance and Troubleshooting</i>                                                               | <b>8</b>     | <b>16</b>       | -             | -          |
| <b>PC9.</b> Inspect and lubricate moving parts of the handloom regularly to prevent wear and tear.                 | 2            | 4               | -             | -          |
| <b>PC10.</b> Replace damaged or worn-out components such as reeds, heddles, or shuttles.                           | 2            | 4               | -             | -          |
| <b>PC11.</b> Identify common weaving defects such as uneven tension, skipped threads, or misaligned patterns.      | 2            | 4               | -             | -          |

## Assessment Guidelines and Assessment Weightage

### Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

## Qualification Pack

### Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

### Minimum Passing % at NOS Level: 50

(Please note: A Trainee must score the minimum percentage for each NOS separately as well as on the QP as a whole.)

## Assessment Weightage

### Compulsory NOS

### Glossary

|                                              |                                                                                                                                                                                                                                                                                                  |
|----------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Sector</b>                                | Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.                                                                      |
| <b>Sub-sector</b>                            | Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.                                                                                                                                                                                     |
| <b>Occupation</b>                            | Occupation is a set of job roles, which perform similar/ related set of functions in an industry.                                                                                                                                                                                                |
| <b>Job role</b>                              | Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.                                                                                                                                                                                |
| <b>Occupational Standards (OS)</b>           | OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts. |
| <b>Performance Criteria (PC)</b>             | Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.                                                                                                                                                                    |
| <b>National Occupational Standards (NOS)</b> | NOS are occupational standards which apply uniquely in the Indian context.                                                                                                                                                                                                                       |
| <b>Qualifications Pack (QP)</b>              | QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.                                                                                                                       |
| <b>Unit Code</b>                             | Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'                                                                                                                                                                                                        |
| <b>Unit Title</b>                            | Unit title gives a clear overall statement about what the incumbent should be able to do.                                                                                                                                                                                                        |
| <b>Description</b>                           | Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.                                                                                                                   |
| <b>Scope</b>                                 | Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.                                                                                            |

## Qualification Pack

|                                         |                                                                                                                                                                                                                                                                                                                                                                        |
|-----------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Knowledge and Understanding (KU)</b> | Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.                                                                                                                                               |
| <b>Organisational Context</b>           | Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.                                                                                                                                                                       |
| <b>Technical Knowledge</b>              | Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.                                                                                                                                                                                                                                                               |
| <b>Core Skills/ Generic Skills (GS)</b> | Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles. |
| <b>Electives</b>                        | Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.                                                                            |
| <b>Options</b>                          | Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.                                                                                                                                                          |
| <b>Sector</b>                           | Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.                                                                                                                                            |
| <b>Sub-sector</b>                       | Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.                                                                                                                                                                                                                                                           |
| <b>Occupation</b>                       | Occupation is a set of job roles, which perform similar/ related set of functions in an industry.                                                                                                                                                                                                                                                                      |
| <b>Job role</b>                         | Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.                                                                                                                                                                                                                                                      |
| <b>Occupational Standards (OS)</b>      | OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.                                                                       |
| <b>Performance Criteria (PC)</b>        | Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.                                                                                                                                                                                                                                          |

## Qualification Pack

|                                       |                                                                                                                                                                                                                                                                                             |
|---------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>National Occupational Standard</b> | NOS are occupational standards which apply uniquely in the Indian context.                                                                                                                                                                                                                  |
| <b>Qualifications Pack (QP)</b>       | QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.                                                                                                                  |
| <b>Unit Code</b>                      | Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'                                                                                                                                                                                                   |
| <b>Unit Title</b>                     | Unit title gives a clear overall statement about what the incumbent should be able to do.                                                                                                                                                                                                   |
| <b>Description</b>                    | Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.                                                                                                              |
| <b>Scope</b>                          | Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.                                                                                       |
| <b>Knowledge and Understanding</b>    | Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.                                                                    |
| <b>Organisational Context</b>         | Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.                                                                                            |
| <b>Technical Knowledge</b>            | Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.                                                                                                                                                                                    |
| <b>Core Skills/ Generic Skills</b>    | Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. Occupational Standards are applicable both in the Indian and global contexts. |
| <b>Performance Criteria (PC)</b>      | Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.                                                                                                                                                                    |
| <b>National Occupational Standard</b> | NOS are occupational standards which apply uniquely in the Indian context.                                                                                                                                                                                                                       |
| <b>Qualifications Pack (QP)</b>       | QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.                                                                                                                       |
| <b>Unit Code</b>                      | Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'                                                                                                                                                                                                        |
| <b>Unit Title</b>                     | Unit title gives a clear overall statement about what the incumbent should be able to do.                                                                                                                                                                                                        |
| <b>Description</b>                    | Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.                                                                                                                   |
| <b>Scope</b>                          | Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.                                                                                            |
| <b>Knowledge and Understanding</b>    | Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.                                                                         |

## Qualification Pack

|                                    |                                                                                                                                                                                                                                                                                             |
|------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Organisational Context</b>      | Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.                                                                                            |
| <b>Technical Knowledge</b>         | Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.                                                                                                                                                                                    |
| <b>Core Skills/ Generic Skills</b> | Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.  |
| <b>Electives</b>                   | Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives. |
| <b>Options</b>                     | Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.                                                                               |
