HCS/Q6902: Assembly Machine Operator (Woodware)

Brief Job Description

The individual is responsible for all the assembly operations by putting all discrete wood pieces together as per fit to replicate the sample.

Personal Attributes

The job requires the individual to be fit, confident with machines, have an eye for detail and be willing to work in a physically demanding environment.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [HCS/N6902: Plan assembly operations](#)
2. [HCS/N6904: Carry out uninterrupted operations as per requirements organization standards](#)
3. [HCS/N6903: Assemble wooden pieces as per design](#)
4. [HCS/N6608: Use basic health and safety practices in a wood working environment](#)
5. [DGT/VSQ/N0102: Employability Skills \(60 Hours\)](#)

HCS/N6902: Plan assembly operations

Description

This unit covers planning all kinds of assembly operations for producing wooden products, considering the work flow and dispatch schedules.

Scope

The scope covers the following :

- interpret the work requirement
- plan a suitable activity schedule
- achieve productivity, quality and safety standards as per company's policy
- work safely

Elements and Performance Criteria

Interpret the work requirement

To be competent, the user/individual on the job must be able to:

- PC1.** interact with the supervisor in order to accurately interpret and calculate the day's production requirement
- PC2.** interact with the supervisor to accurately interpret the delivery schedules of the batch being prepared
- PC3.** ensure that all machines and equipment used in the production process are in safe working condition

Plan a suitable activity schedule

To be competent, the user/individual on the job must be able to:

- PC4.** plan the day's production activities based on the feedback obtained from supervisor
- PC5.** use appropriate job instructions or work manuals to scope the work accurately
- PC6.** ensure smooth assembly operations to enable timely delivery of assembled pieces to other departments for further processing
- PC7.** ensure that the activity plan is in accordance of the urgency of delivery of any batch for further processing
- PC8.** obtain the right amount of supplies, machinery, tools and equipment required for carrying out assembly operations

Achieve productivity, quality and safety standards as per company's policy

To be competent, the user/individual on the job must be able to:

- PC9.** work, plan and achieve 100% target of daily production
- PC10.** work, plan and achieve 100% of planned work scheduled on or before time
- PC11.** work, plan and achieve zero errors as per the company's standards
- PC12.** record any defects/inadequacies noted during the assembly process
- PC13.** maintain safety standards as per company policy

Work safely

Qualification Pack

To be competent, the user/individual on the job must be able to:

PC14. keep flow of activities in such a manner as to create a working environment

PC15. keep work area managed, clean and organised

PC16. ensure safety and health of the workers

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. organization's policies on product making, safety measures, and quality standards accepted

KU2. work flow involved in product designing assembly and other components of the production process

KU3. importance of the individual's role in the production process of the organization

KU4. the formal reporting and operating structure of the organization

KU5. documentation and recording policies of the organization

KU6. the extent and categories of the different market areas targeted by the organization

KU7. safety and quality standards followed in the organization

KU8. type and properties of different wood quality

KU9. wood assembly process

KU10. various categories of wooden products

KU11. different assembly techniques and procedures for different kinds of wooden products

KU12. various technical developments in the field of wood assembling

KU13. defects and possible errors involved in the assembly process

KU14. quality of wood and other raw material used to achieve the right assembly output

KU15. safety equipments and precautions to be taken

KU16. quality standards to be followed

KU17. the procedure and importance of the documentation and categorization of different product designs

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. read and write the size of the wooden planks

GS2. read basic terms and terminologies to accurately interpret supervisor instructions in the local language

GS3. read and interpret accurate information from various relevant logs and records

GS4. read and interpret safety warnings, signage and labels

GS5. write the raw material requirement for operational requirements with complete detailing in the local language

GS6. write basic numbers, quantities and messages for operational requirements in the local language

Qualification Pack

- GS7.** interact with the supervisor appropriately (correct protocol and manner of speaking) in order to understand the basic requirements of the job, work plans and other associated requirements
- GS8.** give clear instructions to co-workers about the type of output required, health & safety matters, and answer queries
- GS9.** display active listening skills while interacting with co-workers and other in the workplace
- GS10.** identify and list variables in the operational process that impact achievement and quality
- GS11.** state rules in order to make adjustments to work plan based on variables
- GS12.** consider time, safety and quality as parameters to escalate issues to supervisor or modify work schedules
- GS13.** use correct sequencing and time planning techniques to carry out operational tasks in the time allocated correctly and effectively
- GS14.** use checklists to ensure all actions are taken before, during and after work operations as required according to company procedures and job requirements
- GS15.** explain the importance of customer satisfaction for company and personal success
- GS16.** explain the concept of internal and external customers
- GS17.** list the key benefits that customers seek in products that may lead to customer satisfaction
- GS18.** work with co-workers and supervisor to resolve any issues that threaten disruption, increase risk, cause delays or under-achievement of quality and targets as per the planned schedule
- GS19.** anticipate and work towards reducing the possible errors that can emerge in the chemical treatment process
- GS20.** improvise on the work process using safe and acceptable methods in order to ensure achievement of targets or improvements in productivity and output
- GS21.** identify any problem leading to production output delay or disruption
- GS22.** report any concern to the relevant authorities where there is risk to men, materials, tools and equipment or achievement

HCS/N6904: Carry out uninterrupted operations as per requirements organization standards

Description

This unit involves ensuring that the assembled final product is as per the design specification. It is also involved in maintaining productivity of the process and machine.

Scope

The scope covers the following :

- check and ensure that the work after every assembly cycle is complete
- undertake corrective and preventive measures on the machine
- achieve productivity and quality standards

Elements and Performance Criteria

Check and ensure that the work after every assembly cycle is complete

To be competent, the user/individual on the job must be able to:

- PC1.** carry out work tasks to achieve the specification requirement of the final product as provided through supervisor instructions, product sample or design documents
- PC2.** check the output of every cycle to make sure it is in accordance with the set standards
- PC3.** diagnose and reject the discrepancies, if any, in the final output
- PC4.** maintain a uniformity in the final output of every cycle

Undertake corrective and preventive measures on the machine

To be competent, the user/individual on the job must be able to:

- PC5.** maintain machine to avoid downtime by regular cleaning, usage as per guidelines and following preventive maintenance schedule
- PC6.** perform regular cleaning and maintenance operations to enable smooth flow of activities
- PC7.** diagnose any loopholes in the assembly operations while on the machine
- PC8.** take corrective measures immediately to avoid any damages or losses

Achieve productivity and quality standards

To be competent, the user/individual on the job must be able to:

- PC9.** plan and achieve 100% target of daily production
- PC10.** plan and achieve achieve 100% of planned work scheduled on or before time
- PC11.** plan and achieve achieve zero errors as per the company's standards
- PC12.** record any defects/inadequacies noted during the assembly process
- PC13.** maintain safety standards as per company policy

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

Qualification Pack

- KU1.** organization's policies on product making, safety measures, assembly operations and quality standards accepted.
- KU2.** work flow involved in assembly process of the organization
- KU3.** importance of the individual's role in the production process of the organization
- KU4.** the formal reporting and operating structure of the organization
- KU5.** documentation and recording policies of the organization
- KU6.** the extent and categories of the different market areas targeted by the organization
- KU7.** type and properties of different wood quality
- KU8.** wood assembly process
- KU9.** various categories of wooden products
- KU10.** various relevant assembly techniques available in the industry
- KU11.** various technical developments in the field of wood assembling
- KU12.** various kinds of raw materials used in the assembly process according to the final product finish required
- KU13.** defects and possible errors involved in the assembly process
- KU14.** quality of wood and other raw materials used to achieve the right finish
- KU15.** safety equipments and precautions to be taken
- KU16.** market trend of the latest product range and customer preferences
- KU17.** quality standards to be followed
- KU18.** the procedure and importance of the documentation and categorization of different product assembly operations

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read and write the size of the wooden planks
- GS2.** read basic terms and terminologies to accurately interpret supervisor instructions in the local language
- GS3.** read and interpret accurate information from various relevant logs and records
- GS4.** read and interpret safety warnings, signage and labels
- GS5.** write the raw material requirement for operational requirements with complete detailing in the local language

HCS/N6903: Assemble wooden pieces as per design

Description

This unit deals with the assembly of discrete wooden pieces (cut as per design) into the proper to make the finished product as per sample or design.

Scope

The scope covers the following :

- prepare the assembly machine
- feed the work pieces to assembly machine
- manual assembly
- final assembly

Elements and Performance Criteria

Prepare the assembly machine

To be competent, the user/individual on the job must be able to:

- PC1.** assess and quantify the assembly requirements of the day through production plans, supervisor instructions, etc.
- PC2.** compare the assembly requirements to capabilities and capacities of each part of the assembly machine to arrive at a feasible work plan that meets production requirements
- PC3.** plan the assembly tasks in a sequential manner taking into account the activity undertaken by the assembly machine at each stage
- PC4.** obtain raw materials, supplies and components based on production plan requirement and feed rate of the machine
- PC5.** ensure the machine is clean, safe and approved for usage

Feed the work pieces to assembly machine

To be competent, the user/individual on the job must be able to:

- PC6.** switch on and off the machine safely and as per work requirements
- PC7.** identify the time taken at each stage and the required flow of wood pieces to assembly machine for optimal productivity
- PC8.** maintain a desired flow of wooden pieces as per requirement of the machine
- PC9.** achieve the right balance between the wooden pieces and machine to avoid any damage/loss of material from overflow of material supply to the machine
- PC10.** use appropriate job instructions or work manuals to carry out the work
- PC11.** ensure the smooth assembly operations to enable timely delivery of assembled pieces to the other department for further processing
- PC12.** ensure that the activity plan is in accordance of the urgency of delivery of any batch for further processing

Manual Assembly

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC13.** ensure the product components are inspected for suitability against the target product specifications before assembly
- PC14.** conceptualise the assembly process for a product
- PC15.** ensure the joints are matched manually and a proper fit is achieved with no gaps, or misalignments
- PC16.** use sanding, planing and cutting options to ensure the product component is made fit for assembly
- PC17.** resend the product for reprocessing where it does not meet requirements
- PC18.** use manual measurement techniques, calipers and clamps to achieve correct positioning and check for proper fit

Final assembly

To be competent, the user/individual on the job must be able to:

- PC19.** ensure the final assembly output matches the target product specifications
- PC20.** ensure a uniform assembly operation for the similar variety of a product
- PC21.** conceptualise the assembly process for a product
- PC22.** ensure the uniformity in the output of the assembly operations
- PC23.** ensure minimum wastage or damage in the final assembly output

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** organization's policies on product making, safety measures, type of assembly output required and quality standards accepted
- KU2.** work flow involved in product assembly and the production process
- KU3.** importance of the individual's role in the production process of the organization
- KU4.** the formal reporting and operating structure of the organization
- KU5.** documentation and recording policies of the organization
- KU6.** type and properties of different wood quality
- KU7.** wood designing process
- KU8.** various categories of wooden products
- KU9.** various relevant assembly techniques available in the industry

HCS/N6608: Use basic health and safety practices in a wood working environment

Description

This unit covers health and safety procedures to be followed as required in a woodworking environment in the handicrafts and carpet sector. This include following health and safety measures as may be suggested by the organizations policies and documents.

Scope

The scope covers the following :

- general health and safety
- fire safety
- physical safety
- chemical safety
- electrical safety
- incident response

Elements and Performance Criteria

General health and safety

To be competent, the user/individual on the job must be able to:

- PC1.** use protective clothing/equipment for specific tasks and work conditions Protective clothing: Leather or asbestos gloves, aprons, trousers, footwear, helmets/hard hats, cap and shoulder covers, ear defenders/plugs, safety boots, particle masks, glasses/goggles/visors Equipment: Hand shields, machine guards, residual current devices, shields, dust sheets, respirator
- PC2.** state the name and location of people responsible for health and safety in the workplace
- PC3.** state the names and location of documents that refer to health and safety in the workplace
- PC4.** Identify job site of hazardous work and state possible causes of risk or accident in the workplace Hazards: Sharp edged and heavy tools; heated metals; oxyfuel and gas cylinders; hazardous surfaces(sharp, slippery, uneven, chipped, broken, etc.);hazardous substances(chemicals, gas, fumes, dust, etc.); physical hazards(working at heights, large and heavy objects and machines, sharp and piercing objects, tools and machines, intense light, load noise, obstructions in corridors, by doors, blind turns, noise, over stacked shelves and packages,etc.) electrical hazards (power supply and points, loose and naked cables and wires, electrical machines and appliances, etc.) Possible causes of risk and accident: physical actions; reading; listening to and giving instructions; inattention; sickness and incapacity (such as drunkenness); health hazards (such as untreated injuries and contagious illness) understand various health and safety measures that are important in the organizations functioning

Fire safety

To be competent, the user/individual on the job must be able to:

- PC5.** Carry out jobs which cause sparking in a safe manner, creating sufficient distance between flammable items and the sparking

Qualification Pack

- PC6.** Use fire extinguishers appropriately in accordance to the type of fire correctly. Types of fires:
Class A: eg. ordinary solid combustibles, such as wood, paper, cloth, plastic, charcoal, etc.;
Class B: flammable liquids and gases, such as gasoline, propane, diesel fuel, tar, cooking oil, and similar substances; Class C: eg. electrical equipment such as appliances, wiring, breaker panels, etc. (These categories of fires become Class A, B, and D fires when the electrical equipment that initiated the fire is no longer receiving electricity); Class D: combustible metals such as magnesium, titanium, and sodium (These fires burn at extremely high temperatures and require special suppression agents)
- PC7.** Demonstrate rescue techniques applied during fire hazard
- PC8.** Demonstrate good housekeeping in order to prevent fire hazards
- PC9.** Demonstrate the correct use of a fire extinguisher

Physical Safety

To be competent, the user/individual on the job must be able to:

- PC10.** Inspect for faults; set up and safely use steps and ladders in general use. Ladder faults: Corrosion of metal components, deterioration, splits and cracks timber components, imbalance, loose rungs, missing/ unfixed nuts or bolts, etc. Ladders set up: Firm/level base, clip/lash down, leaning at the correct angle, etc
- PC11.** Work safely in and around trenches, elevated places and confined areas
- PC12.** Lift heavy objects safely using correct procedures
- PC13.** Ensure that the machine guards are in place in order to ascertain safety when working with machines with sharp edges, blades, abrasive materials, etc.

Chemical Safety

To be competent, the user/individual on the job must be able to:

- PC14.** Identify different types of chemicals that are used in the wood finishing and treatment
- PC15.** Use chemicals as per prescribed levels for any type of chemical treatment and finishing of the wood
- PC16.** explain to others the harmful effects of any chemical in use in excess or in appropriate combination
- PC17.** Use safety equipments while using sprays and paints
- PC18.** Ensure adherence of proper limits while maintaining the edible level of colors and paints when used on toys and dolls

Electrical safety

To be competent, the user/individual on the job must be able to:

- PC19.** Ensure all electrical appliances are used in line with instructions and with the appropriate attachments in line with manufacturers guidelines
- PC20.** Spot and repair any frayed wires and insulation using appropriate and approved measures like insulation taping, replacing wires, etc.
- PC21.** Ensure all naked wires are covered with insulation
- PC22.** Wear insulated footwear while working with electrical appliances or equipment

Incident response

To be competent, the user/individual on the job must be able to:

- PC23.** Demonstrate how to free a person from electrocution
- PC24.** Administer appropriate first aid to victims where required eg. in case of bleeding, burns, choking, electric shock, poisoning etc.

Qualification Pack

- PC25.** Demonstrate basic techniques of bandaging
- PC26.** respond promptly and appropriately to an accident situation or medical emergency in real or simulated environments
- PC27.** Perform and organize required responses for loss minimization or rescue activity during an accident in real or simulated environments
- PC28.** Administer first aid responses to victims in case of a heart attack or cardiac arrest due to electric shock, before the arrival of emergency services in real or simulated cases
- PC29.** Demonstrate the artificial respiration and the CPR Process
- PC30.** Participate in emergency procedures
Emergency procedures: Raising alarm, safe/efficient, evacuation, correct means of escape, correct assembly point, roll call, correct return to work
- PC31.** Complete a written accident/incident report or dictate a report to another person, and send report to person responsible
Incident Report includes details of: Name, date/time of incident, date/time of report, location, environment conditions, persons involved, sequence of events, injuries sustained, damage sustained, actions taken, witnesses, supervisor/manager notified
- PC32.** Demonstrate correct methods to move injured people and others during an emergency

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Organization's policies on safety measures
- KU2.** importance of the individual's role and its importance with respect to daily operations of the organization
- KU3.** Formal reporting and operating structure of the organization
- KU4.** Documentation and recording policies of the organization
- KU5.** The extent and categories of the different market areas targeted by the organization
- KU6.** Type and properties of different wood quality
- KU7.** Quality of wood and other raw material used to achieve the right finish
- KU8.** Safety equipment and precautions to be taken
- KU9.** Meaning of hazards and risks
- KU10.** health and safety hazards commonly present in the work environment and related precautions
- KU11.** possible causes of risk and accident
Possible causes of risk and accident: Physical actions; inattention; sickness and incapacity (such as drunkenness); health hazards (such as untreated injuries and contagious illness)
- KU12.** Methods of accident prevention
Methods of accident prevention: Training in health and safety procedures; using health and safety procedures; use of equipment and working practices (such as safe carrying procedures); safety notices, advice; instruction from colleagues and supervisors
- KU13.** Safe working practices when working with tools and machines
- KU14.** Safe working practices while working at various hazardous sites
- KU15.** safe working practices while working at various hazardous sites
- KU16.** where to find all the general health and safety equipment in the workplace
- KU17.** various dangers associated with the use of electrical equipment

Qualification Pack

- KU18.** hazards and risks associated with working with wood Hazards and risks: Flammable nature of wood and wood shavings, weight of wood, sharp edges and wooden splinters, breakages, etc.
- KU19.** preventative and remedial actions to be taken in the case of exposure to toxic materials Exposure: Ingested, contact with skin, inhaled Preventative action: Ventilation, masks, protective clothing/ equipment; Remedial action: immediate first aid, report to supervisor Toxic materials: Solvents, lead, acid
- KU20.** importance of using protective clothing/equipment while working
- KU21.** precautionary activities to prevent the fire accident
- KU22.** various causes of fire Causes of fires: Heating of metal; spontaneous ignition; sparking; electrical heating; loose fires (smoking, welding, etc.); chemical fires; etc.
- KU23.** techniques of using the different fire extinguishers
- KU24.** different methods of extinguishing fire
- KU25.** different materials used for extinguishing fire Materials: sand, water, foam, CO2, dry powder

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read the organization's health and safety policy documents or notifications in the local language using assistance with difficult words, sentences and passages
- GS2.** read the safety manuals and/or instructions of various machines and tools being used in the organization using assistance with difficult words and passages
- GS3.** read and comprehend basic content to read labels, charts, permissible levels of use, signages
- GS4.** Write simple messages for communicating health and safety warnings or instructions in the local language clearly and coherently
- GS5.** Write quantities and names for materials and equipments for requisitioning, issuing and receiving purposes
- GS6.** Speak clearly in the local language to communicate basic health and safety instructions effectively
- GS7.** Use appropriate protocol (titles, courtesies, etc.) to communicate with different levels of co-workers
- GS8.** Display active listening skills while interacting with co-workers and other in the workplace
- GS9.** Give instructions to the workforce regarding the safe storage and handling of the chemicals and other related material in the organization
- GS10.** Consider time, safety and quality as parameters to escalate issues to supervisor or modify work schedules
- GS11.** Use correct sequencing and time planning techniques to carry out health and safety tasks in the time allocated correctly and effectively
- GS12.** Use checklists to ensure all health and safety actions are taken before, during and after work operations
- GS13.** Work with co-workers and supervisor to resolve any issues that threaten disruption or increase risk of health and safety

Qualification Pack

- GS14.** Anticipate and work towards reducing the possible risks that can emerge in a woodworking environment
- GS15.** Improvise practices and processes using safe and acceptable methods, in discussions with the supervisor in order to ensure improved safety and health practices
- GS16.** Diagnose any problem leading to production delay or disruption
- GS17.** Diagnose any problem in the machine handling or chemical handling while working and storage
- GS18.** Report any concern to the relevant authorities

Qualification Pack

Assessment Criteria

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
<i>General health and safety</i>	3	8	-	-
PC1. use protective clothing/equipment for specific tasks and work conditions Protective clothing: Leather or asbestos gloves, aprons, trousers, footwear, helmets/hard hats, cap and shoulder covers, ear defenders/plugs, safety boots, particle masks, glasses/goggles/visors Equipment: Hand shields, machine guards, residual current devices, shields, dust sheets, respirator	-	2	-	-
PC2. state the name and location of people responsible for health and safety in the workplace	1	2	-	-
PC3. state the names and location of documents that refer to health and safety in the workplace	1	2	-	-
PC4. Identify job site of hazardous work and state possible causes of risk or accident in the workplace Hazards: Sharp edged and heavy tools; heated metals; oxyfuel and gas cylinders; hazardous surfaces(sharp, slippery, uneven, chipped, broken, etc.);hazardous substances(chemicals, gas, fumes, dust, etc.); physical hazards(working at heights, large and heavy objects and machines, sharp and piercing objects, tolls and machines, intense light, load noise, obstructions in corridors, by doors, blind turns, noise, over stacked shelves and packages,etc.) electrical hazards (power supply and points, loose and naked cables and wires, electrical machines and appliances, etc.) Possible causes of risk and accident: physical actions; reading; listening to and giving instructions; inattention; sickness and incapacity (such as drunkenness); health hazards (such as untreated injuries and contagious illness)understand various health and safety measures that are important in the organizations functioning	1	2	-	-
<i>Fire safety</i>	1	13	-	-
PC5. Carry out jobs which cause sparking in a safe manner, creating sufficient distance between flammable items and the sparking	1	2	-	-

Qualification Pack

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
PC6. Use fire extinguishers appropriately in accordance to the type of fire correctly Types of fires: Class A: eg. ordinary solid combustibles, such as wood, paper, cloth, plastic, charcoal, etc.; Class B: flammable liquids and gases, such as gasoline, propane, diesel fuel, tar, cooking oil, and similar substances; Class C: eg. electrical equipment such as appliances, wiring, breaker panels, etc. (These categories of fires become Class A, B, and D fires when the electrical equipment that initiated the fire is no longer receiving electricity); Class D: combustible metals such as magnesium, titanium, and sodium (These fires burn at extremely high temperatures and require special suppression agents)	-	2	-	-
PC7. Demonstrate rescue techniques applied during fire hazard	-	3	-	-
PC8. Demonstrate good housekeeping in order to prevent fire hazards	-	3	-	-
PC9. Demonstrate the correct use of a fire extinguisher	-	3	-	-
<i>Physical Safety</i>	3	8	-	-
PC10. Inspect for faults; set up and safely use steps and ladders in general use Ladder faults: Corrosion of metal components, deterioration, splits and cracks timber components, imbalance, loose rungs, missing/unfixed nuts or bolts, etc. Ladders set up: Firm/level base, clip/lash down, leaning at the correct angle, etc	1	3	-	-
PC11. Work safely in and around trenches, elevated places and confined areas	-	2	-	-
PC12. Lift heavy objects safely using correct procedures	1	1	-	-
PC13. Ensure that the machine guards are in place in order to ascertain safety when working with machines with sharp edges, blades, abrasive materials, etc.	1	2	-	-
<i>Chemical Safety</i>	3	11	-	-
PC14. Identify different types of chemicals that are used in the wood finishing and treatment	1	2	-	-

Qualification Pack

Qualification Pack

DGT/VSQ/N0102: Employability Skills (60 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Career Development & Goal Setting
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

- PC1.** identify employability skills required for jobs in various industries
- PC2.** identify and explore learning and employability portals

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

- PC3.** recognize the significance of constitutional values, including civic rights and duties, citizenship, responsibility towards society etc. and personal values and ethics such as honesty, integrity, caring and respecting others, etc.
- PC4.** follow environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

- PC5.** recognize the significance of 21st Century Skills for employment
- PC6.** practice the 21st Century Skills such as Self-Awareness, Behaviour Skills, time management, critical and adaptive thinking, problem-solving, creative thinking, social and cultural awareness, emotional awareness, learning to learn for continuous learning etc. in personal and professional life

Basic English Skills

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC7.** use basic English for everyday conversation in different contexts, in person and over the telephone
- PC8.** read and understand routine information, notes, instructions, mails, letters etc. written in English
- PC9.** write short messages, notes, letters, e-mails etc. in English

Career Development & Goal Setting

To be competent, the user/individual on the job must be able to:

- PC10.** understand the difference between job and career
- PC11.** prepare a career development plan with short- and long-term goals, based on aptitude

Communication Skills

To be competent, the user/individual on the job must be able to:

- PC12.** follow verbal and non-verbal communication etiquette and active listening techniques in various settings
- PC13.** work collaboratively with others in a team

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

- PC14.** communicate and behave appropriately with all genders and PwD
- PC15.** escalate any issues related to sexual harassment at workplace according to POSH Act

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

- PC16.** select financial institutions, products and services as per requirement
- PC17.** carry out offline and online financial transactions, safely and securely
- PC18.** identify common components of salary and compute income, expenses, taxes, investments etc
- PC19.** identify relevant rights and laws and use legal aids to fight against legal exploitation

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

- PC20.** operate digital devices and carry out basic internet operations securely and safely
- PC21.** use e- mail and social media platforms and virtual collaboration tools to work effectively
- PC22.** use basic features of word processor, spreadsheets, and presentations

Entrepreneurship

To be competent, the user/individual on the job must be able to:

- PC23.** identify different types of Entrepreneurship and Enterprises and assess opportunities for potential business through research
- PC24.** develop a business plan and a work model, considering the 4Ps of Marketing Product, Price, Place and Promotion
- PC25.** identify sources of funding, anticipate, and mitigate any financial/ legal hurdles for the potential business opportunity

Customer Service

To be competent, the user/individual on the job must be able to:

- PC26.** identify different types of customers
- PC27.** identify and respond to customer requests and needs in a professional manner.

Qualification Pack

PC28. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC29. create a professional Curriculum vitae (Résumé)

PC30. search for suitable jobs using reliable offline and online sources such as Employment exchange, recruitment agencies, newspapers etc. and job portals, respectively

PC31. apply to identified job openings using offline /online methods as per requirement

PC32. answer questions politely, with clarity and confidence, during recruitment and selection

PC33. identify apprenticeship opportunities and register for it as per guidelines and requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills and different learning and employability related portals

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use English language for effective verbal (face to face and telephonic) and written communication in formal and informal set up

KU6. importance of career development and setting long- and short-term goals

KU7. about effective communication

KU8. POSH Act

KU9. Gender sensitivity and inclusivity

KU10. different types of financial institutes, products, and services

KU11. how to compute income and expenditure

KU12. importance of maintaining safety and security in offline and online financial transactions

KU13. different legal rights and laws

KU14. different types of digital devices and the procedure to operate them safely and securely

KU15. how to create and operate an e- mail account and use applications such as word processors, spreadsheets etc.

KU16. how to identify business opportunities

KU17. types and needs of customers

KU18. how to apply for a job and prepare for an interview

KU19. apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. read and write different types of documents/instructions/correspondence

GS2. communicate effectively using appropriate language in formal and informal settings

Qualification Pack

- GS3.** behave politely and appropriately with all
- GS4.** how to work in a virtual mode
- GS5.** perform calculations efficiently
- GS6.** solve problems effectively
- GS7.** pay attention to details
- GS8.** manage time efficiently
- GS9.** maintain hygiene and sanitization to avoid infection

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Qualification Pack

Minimum Aggregate Passing % at QP Level : 50

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Assessment Weightage

Qualification Pack

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
