HCS/Q7001: Assistant Wood Craft (Engraving/ Carving/ Etching Assistant)

Brief Job Description

An Assistant Wood Craft (Engraving/Carving/Etching) independently creates intricate designs on wood using various techniques. They skillfully carve, etch, and engrave, transforming raw materials into beautiful, detailed artworks.

Personal Attributes

An Assistant Wood Craft (Engraving/Carving/Etching) is creative and meticulous, with a keen eye for detail. Their passion for craftsmanship drives them to produce high-quality, artistic woodwork.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [HCS/N7001: Select suitable wood and work according to the design requirement](#)
2. [HCS/N7002: Perform the Engraving, Carving and Etching operations](#)
3. [HCS/N6610: The art of Rattan woodwork](#)
4. [HCS/N6611: Entrepreneurship skills for Engraving/ Carving/ Etching Assistant \(Wooden Handicrafts\)](#)
5. [HCS/N9952: Working together as a team](#)
6. [HCS/N9946: Managing workplace safety](#)
7. [DGT/VSQ/N0101: Employability Skills \(30 Hours\)](#)

Qualification Pack

HCS/N7001: Select suitable wood and work according to the design requirement

Description

This unit is about dealing with finalization of wood species and wood work according to the different designs and final product required under supervision.

Scope

The scope covers the following :

- select suitable type of wood
- plan wood work for carving, engraving and etching

Elements and Performance Criteria

Select suitable type of wood

To be competent, the user/individual on the job must be able to:

- PC1.** summarise different types of wood work to be done on different wood types and quantities involved.
- PC2.** correlate advantages and disadvantages of various wood types for carrying out the required wood work with design requirements.
- PC3.** diagnose the quality of wood visually whether it is suitable for the type of wood work that is to be done.
- PC4.** diagnose the wood finishing needs before carving.
- PC5.** ensure the required finish is achieved before carving, engraving and etching.
- PC6.** interpret the design specifications appropriately to assess nature of woodwork required.
- PC7.** finalise and select the wood quality that gives the best finish to the specific design requirement as per supervisor instructions or specifications.

Plan wood work for carving, engraving and etching

To be competent, the user/individual on the job must be able to:

- PC8.** identify the sequence of operations required for achieving the carving, engraving and etching requirements as per design and instructions.
- PC9.** identify and obtain the necessary tools for carving, engraving and etching operations.
- PC10.** use mathematical calculations and techniques to carry out measurements, calculate area and estimate other material requirements.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Organization's policies on product making, safety measures, various categories of the wood work, quality of artistic work and quality standards accepted.
- KU2.** Work flow involved in product designing and the production process.

Qualification Pack

- KU3.** Importance of the individual's role in the production process of the organization.
- KU4.** the formal reporting and operating structure of the organization.
- KU5.** documentation and recording policies of the organizationthe extent and categories of the different market areas targeted by the organization.
- KU6.** type and properties of different wood quality.
- KU7.** wood designing process.
- KU8.** wood carving, etching and engraving process.
- KU9.** wood carving, engraving and etching tools.
- KU10.** various categories of wooden products.
- KU11.** basic geometric shapes and arithmetic calculations.
- KU12.** density, hardness, moisture and its impact on carving, engraving and etching operations.
- KU13.** various relevant carving, engraving and etching techniques available in the industry.
- KU14.** various technical developments in the field of wood designing and carving.
- KU15.** various kinds of raw materials used in the production process according to the final product finish required.
- KU16.** defects and possible errors involved in the production process.
- KU17.** quality of wood and other raw material used to achieve the right finish.
- KU18.** safety equipment and precautions to be taken.
- KU19.** market trend of the latest product range and customer preferences.
- KU20.** quality standards to be followed.
- KU21.** the procedure and importance of the documentation and categorization of different product designs.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read basic terms and terminologies to accurately interpret design documents, supervisor instructions in the local language.
- GS2.** read and interpret accurate information from various relevant logs and records.
- GS3.** read production schedules and operation manuals to derive accurate information from these.
- GS4.** read the organization's policy documents pertaining to employee work rules and regulations to derive accurate information from these.
- GS5.** write the raw material requirement for operational requirements with complete detailing in the local language.
- GS6.** write basic numbers, quantities and messages for operational requirements in the local language.
- GS7.** interact with the supervisor appropriately (correct protocol and manner of speaking) in order to understand the basic requirements of the product, production plans and other associated requirements.
- GS8.** display active listening skills while interacting with co-workers and other in the workplace.
- GS9.** identify and list variables in the operational process that impact achievement and quality.

Qualification Pack

- GS10.** consider time, safety and quality as parameters to escalate issues to supervisor or modify work schedules.
- GS11.** importance of appropriate planning of carving and etching operations to maintain a smooth production schedule under supervision.
- GS12.** list the key benefits that customers seek in products that may lead to customer satisfaction.
- GS13.** work with co-workers and supervisors to resolve any issues that threaten disruption, increase risk, cause delays or under-achievement of quality and targets as per the planned schedule.

Qualification Pack

HCS/N7002: Perform the Engraving, Carving and Etching operations

Description

It also performs the functions of engraving and carving according to the design sketch drawn.

Scope

The scope covers the following :

- prepare for wood carving operations
- perform wood engraving, etching and carving
- achieve productivity, quality and safety standards as per company's policy

Elements and Performance Criteria

Prepare for wood carving operations

To be competent, the user/individual on the job must be able to:

- PC1.** use safe handling procedures for equipment and materials, including use of personal protective equipment.
- PC2.** select appropriate tool for performing the wood carving, engraving and etching operations as per the predefined criteria and instructions.
- PC3.** check the selected tools for sharpness, safety and usability as per work requirements and organization standards.
- PC4.** rectify or refer to qualified persons tools that require maintenance or repair.

Perform wood engraving, etching and carving

To be competent, the user/individual on the job must be able to:

- PC5.** use supporting and holding tools and equipment to hold the wooden piece in required position for carving operations.
- PC6.** carry out the carving, engraving and etching operations in the correct sequence to ensure optimal result, minimal wastage and least chance of errors or damage.
- PC7.** diagnose the strength and steadiness of the board to work on it.
- PC8.** calculate the force with which to work on the boards and apply force accordingly to achieve results as per product specifications.
- PC9.** perform the operations without causing damage to the boards and minimize wastage.

Achieve productivity, quality and safety standards as per company's policy

To be competent, the user/individual on the job must be able to:

- PC10.** plan and work to achieve 100% target of daily production.
- PC11.** plan and work to achieve zero errors as per the company's standards.
- PC12.** record any defects/inadequacies noted during the engraving and carving process.
- PC13.** maintaining the uniformity and consistency in the work throughout the whole production batch.
- PC14.** maintain safety standards as per company policy.
- PC15.** clear the work area and remove waste as per approved procedures.

Qualification Pack

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** organization's policies on product making, safety measures, artistic wood work and quality standards accepted.
- KU2.** work flow involved in product designing and the production process.

HCS/N6610: The art of Rattan woodwork

Description

This unit is about dealing with the finalization of rattan work according to different designs and final product requirements under supervision.

Scope

The scope covers the following :

- Understanding and mastering rattan woodwork
- Material knowledge, design principles, crafting techniques, finishing processes, quality control, safety standards, market trends, and collaboration skills

Elements and Performance Criteria

Material Understanding

To be competent, the user/individual on the job must be able to:

- PC1.** Accurately identify and select appropriate rattan based on their physical properties (flexibility, strength, and aesthetic qualities) for specific projects.
- PC2.** Demonstrate knowledge of sustainable sourcing practices for rattan.

Design Interpretation

To be competent, the user/individual on the job must be able to:

- PC3.** Analyze and interpret design specifications to determine the appropriate types, sizes, and quantities of rattan required for various products.
- PC4.** Collaborate effectively with designers or clients to finalize design concepts.

Preparation Techniques

To be competent, the user/individual on the job must be able to:

- PC5.** Prepare rattan materials by cutting, soaking, or steaming to enhance flexibility and ease of use.
- PC6.** Ensure all rattan strips are free from defects and meet quality standards before assembly.

Crafting Techniques

To be competent, the user/individual on the job must be able to:

- PC7.** Utilize appropriate tools (e.g., knives, scissors, steamers) for cutting and shaping rattan effectively.
- PC8.** Apply various weaving, lashing, and binding techniques to construct products according to specified designs.
- PC9.** Assemble rattan components accurately and securely, ensuring alignment with design specifications.
- PC10.** Demonstrate skill in creating complex shapes and patterns through effective construction methods.

Finishing Techniques

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC11.** Implement finishing processes (e.g., sanding, varnishing, oiling) to enhance the aesthetic appeal and durability of the final product.
- PC12.** Ensure that all surfaces are smooth, visually appealing, and protected from environmental damage.
- PC13.** Conduct inspections of completed rattan work to ensure adherence to design specifications and overall quality standards.
- PC14.** Identify and rectify any flaws, such as structural weaknesses or aesthetic imperfections, prior to final delivery.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Familiarize yourself with different species of rattan, such as Calamus and Daemonorops, and their specific characteristics.
- KU2.** Recognize how the properties of each species (flexibility, strength, and weight) affect usability and suitability for specific projects.
- KU3.** Understand the importance of selecting sustainably harvested rattan to minimize environmental impact.
- KU4.** Differentiate between locally sourced and imported rattan, considering quality and cost implications.
- KU5.** Learn about the moisture content, tensile strength, and elasticity of rattan.
- KU6.** Understand the longevity of rattan products and best practices for care and maintenance.
- KU7.** Explore various design styles and trends in rattan woodwork, including contemporary and traditional approaches.
- KU8.** Analyze how design choices impact both the functionality and visual appeal of rattan products.
- KU9.** Master techniques for cutting rattan to desired lengths and soaking it to enhance flexibility.
- KU10.** Familiarize yourself with common weaving techniques, such as plain weaving, diagonal weaving, and herringbone patterns.
- KU11.** Understand various joining methods for assembling rattan furniture and crafts.
- KU12.** Explore methods such as sanding, staining, and sealing to enhance the appearance and longevity of rattan items.
- KU13.** Learn about different finishes that can protect rattan from moisture and wear.
- KU14.** Develop criteria for evaluating the quality of rattan products, including craftsmanship, durability, and design fidelity.
- KU15.** Implement processes for receiving and integrating feedback to improve product quality.
- KU16.** Understand health and safety standards relevant to rattan woodwork, including safe handling of tools and materials.
- KU17.** Stay updated on market trends in rattan design, including eco-friendly practices and consumer preferences.
- KU18.** Explore the various applications of rattan in furniture, home decor, and functional items.

Generic Skills (GS)

Qualification Pack

User/individual on the job needs to know how to:

- GS1.** Ability to notice small imperfections and intricacies in rattan material.
- GS2.** Ensuring high-quality craftsmanship by focusing on precision throughout the design and production process.
- GS3.** Creative problem-solving when faced with material constraints or design challenges.
- GS4.** Precise control over hand tools and weaving techniques to maintain the quality and accuracy of rattan crafts.
- GS5.** Efficiently organizing tasks to meet project deadlines while maintaining quality standards.
- GS6.** Balancing multiple projects or stages of work, from material preparation to finishing.
- GS7.** Understanding measurements and dimensions for cutting and assembling materials accurately.
- GS8.** Ability to calculate material quantities and proportions for larger projects.
- GS9.** Tackling unforeseen challenges, such as material defects or design issues, with innovative and practical solutions.
- GS10.** Adjusting techniques as needed for unique design requirements or customer specifications.
- GS11.** Skill in choosing the right materials for each project to ensure durability, functionality, and aesthetics.
- GS12.** Ability to experiment with patterns and styles to create unique, high-quality rattan items.

HCS/N6611: Entrepreneurship skills for Engraving/ Carving/ Etching Assistant (Wooden Handicrafts)

Description

This unit focuses on equipping artisans with essential entrepreneurial skills to successfully manage and grow their woodcraft business. This includes the ability to identify opportunities, develop business plans, maintain high-quality craftsmanship, and manage operations efficiently.

Scope

The scope covers the following :

- Market Research and Trend Analysis
- Business Planning and Strategy Development
- Budgeting, Cost Estimation, and Pricing
- Marketing and Branding
- Quality Control and Assurance
- Legal and Regulatory Compliance

Elements and Performance Criteria

Market Research and Trend Analysis

To be competent, the user/individual on the job must be able to:

- PC1.** Conducting research on current design trends and consumer preferences in the wooden carving and etching industry.
- PC2.** Identifying potential niche markets and product innovations based on demand analysis.

Business Planning and Strategy Development

To be competent, the user/individual on the job must be able to:

- PC3.** Understanding the essential elements of a business plan, including defining vision, mission, objectives, and financial forecasts.
- PC4.** Developing sound business strategies through SWOT analysis, identifying strengths, weaknesses, opportunities, and threats.

Budgeting, Cost Estimation, and Pricing

To be competent, the user/individual on the job must be able to:

- PC5.** Estimating costs associated with materials, tools, labor, and production time for woodcraft projects.
- PC6.** Setting pricing strategies that balance affordability with profitability, while ensuring high-quality output.

Marketing and Branding

To be competent, the user/individual on the job must be able to:

- PC7.** Applying both traditional and digital marketing techniques to promote products.
- PC8.** Developing a unique brand identity that highlights craftsmanship, sustainability, and heritage value of wooden engravings.

Quality Control and Assurance

Qualification Pack

To be competent, the user/individual on the job must be able to:

- PC9.** Ensuring high standards of craftsmanship through quality control frameworks at different stages of production.
- PC10.** Continuously improving processes based on inspection feedback to minimize defects and ensure product durability.
- PC11.** Implementing customer service best practices to improve satisfaction and loyalty.
- PC12.** Using feedback mechanisms such as reviews, surveys, and direct communication to enhance product quality and service.

Legal and Regulatory Compliance

To be competent, the user/individual on the job must be able to:

- PC13.** Understanding legal requirements for running a woodcraft business, including labor laws, trade regulations, and environmental standards.
- PC14.** Complying with intellectual property laws and protecting unique designs through registration and trademarks.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Familiarity with different types of business models such as B2B (business to business), B2C (business to consumer), and direct-to-consumer, specific to the woodcraft and artisan industries.
- KU2.** Understanding the vision, mission, and long-term goals of the woodcraft business, aligning personal contributions to overall business objectives.
- KU3.** Knowledge of the end-to-end production process, including raw material procurement, production techniques, quality checks, packaging, and delivery.
- KU4.** Awareness of sustainable practices within the wooden engraving, carving, and etching sector, including sourcing of materials, eco-friendly finishes, and minimizing waste.
- KU5.** Understanding of quality standards and expectations within the industry, ensuring products meet both market and organizational standards.
- KU6.** Ability to conduct market research and analyze current trends in the wooden craft sector.
- KU7.** Understanding pricing strategies that balance profitability with market demand and competitiveness.
- KU8.** Exploring ways to differentiate products by incorporating new techniques, designs, and materials.
- KU9.** Knowledge of customer service theories and tools to improve customer satisfaction.
- KU10.** Understanding of quality control frameworks to ensure consistent product quality, including stages of inspection, defect identification, and improvement strategies.
- KU11.** Understanding labor laws, trade regulations, and environmental standards relevant to the woodcraft industry to ensure compliance with local and international regulations.
- KU12.** Knowledge of intellectual property rights and the importance of design protection to safeguard unique designs from unauthorized reproduction.

Generic Skills (GS)

Qualification Pack

User/individual on the job needs to know how to:

- GS1.** Ability to communicate effectively with clients, suppliers, and team members.
- GS2.** Apply analytical thinking to solve challenges in production, design innovation, and business strategy.
- GS3.** Ability to adjust to changing trends in design, customer preferences, and market conditions.
- GS4.** Prioritize tasks efficiently to meet production deadlines and manage business operations smoothly.
- GS5.** Ability to perform basic calculations for budgeting, cost estimation, pricing, and financial analysis.
- GS6.** Develop an entrepreneurial mindset to identify market opportunities and innovate in product design and marketing.
- GS7.** Implement quality control procedures to maintain high standards of craftsmanship.
- GS8.** Build and maintain positive relationships with customers by providing excellent service, addressing their needs, and encouraging repeat business.
- GS9.** Efficiently manage budgets, track costs, and apply sound financial practices for pricing, investment, and profit maximization.
- GS10.** Develop and execute effective marketing strategies, including online and offline promotion, to increase visibility and sales.
- GS11.** Ensure compliance with labor laws, environmental regulations, and intellectual property protection for products and designs.
- GS12.** Stay informed of trade regulations, especially for international sales and exports.

HCS/N9952: Working together as a team

Description

This unit is about working as part of a team in the process.

Scope

The scope covers the following :

- commitment and trust
- communication
- adaptability
- creative freedom

Elements and Performance Criteria

Commitment and trust

To be competent, the user/individual on the job must be able to:

- PC1.** be accountable to one's role in the whole process
- PC2.** perform all roles with full

Communication

To be competent, the user/individual on the job must be able to:

- PC3.** report problems faced during the process
- PC4.** talk politely with other team members and colleagues
- PC5.** submit a daily report of own performance

Adaptability

To be competent, the user/individual on the job must be able to:

- PC6.** adjust in different work situations
- PC7.** give due importance to other's point of view
- PC8.** avoid conflicting situations

Creative freedom

To be competent, the user/individual on the job must be able to:

- PC9.** develop new ideas for work procedures
- PC10.** improve upon the existing techniques to increase process efficiency

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** general rules and regulations in the sector
- KU2.** procedure followed to get the final output
- KU3.** safe working practices to be adopted
- KU4.** to report the supervisor or higher authority about any grievances faced

Qualification Pack

- KU5.** understanding the importance of the previous and next step of the process
- KU6.** process flow in the handicraft section
- KU7.** material sequence of flow
- KU8.** functions of different parts of product development
- KU9.** tools and equipment used
- KU10.** guidelines for operating the equipment
- KU11.** safety procedures to be followed as applicable

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** prepare status and progress reports
- GS2.** write memos and e-mail to co-workers, and vendors to provide them with work updates and to request appropriate information without English language errors regarding grammar or sentence construct
- GS3.** keep abreast with the latest knowledge by reading brochures, pamphlets, and product information sheets
- GS4.** discuss task lists, schedules, and work-loads with co-workers
- GS5.** keep co-workers and supervisors informed about progress
- GS6.** make decisions pertaining to the concerned area of work
- GS7.** plan and organize service feedback files/documents
- GS8.** manage relationships with customers
- GS9.** build customer relationships and use customer centric approach
- GS10.**
 - think through the problem, evaluate the possible solution(s) and suggest an optimum /best
 - possible solution(s)
- GS11.** identify immediate or temporary solutions to resolve delays
- GS12.** use the existing data to arrive at specific data points
- GS13.**
 - apply, analyze, and evaluate the information gathered from observation, experience,
 - reasoning, or communication, as a guide to thought and action

HCS/N9946: Managing workplace safety

Description

This unit provides Performance Criteria, Knowledge & Understanding, and Skills & Abilities required to comply with health, safety, and security requirements at the workplace and covers procedures to prevent, control, and minimize risk to self and others.

Scope

The scope covers the following :

- Comply with health, safety, and security requirements at work

Elements and Performance Criteria

Comply with health, safety, and security requirements at work

To be competent, the user/individual on the job must be able to:

- PC1.** comply with health and safety related instructions applicable to the workplace.
- PC2.** use and maintain personal protective equipment as per protocol.
- PC3.** carry out own activities in line with approved guidelines and procedures
- PC4.** maintain a healthy lifestyle and guard against dependency on intoxicants.
- PC5.** follow environment management system related procedures.
- PC6.** store materials and tools in line with manufacturers and organisational requirements
- PC7.** safely handle and move waste and debris.
- PC8.** minimize health and safety risks to self and others due to own actions
- PC9.** seek clarifications, from supervisors or other authorized personnel in case of perceived risks
- PC10.** monitor the workplace and work processes for potential risks and threats.
- PC11.** carry out periodic walk-through to keep work area free from hazards and obstructions, if assigned
- PC12.** report hazards and potential risks/ threats to supervisors or other authorized personnel
- PC13.** participate in mock drills/ evacuation procedures organized at the workplace
- PC14.** undertake first aid, fire-fighting and emergency response training, if asked to do so
- PC15.** take action based on instructions in the event of fire, emergencies or accidents
- PC16.** follow organisation procedures for evacuation when required

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** health and safety related practices applicable at the workplace
- KU2.** potential hazards, risks and threats based on nature of operations
- KU3.** organizational procedures for safe handling of tools

Qualification Pack

- KU4.** potential risks due to own actions and methods to minimize these
- KU5.** environmental management system related procedures at the workplace
- KU6.** layout of the plant and details of emergency exits, escape routes, emergency equipment and assembly points
- KU7.** potential accidents and emergencies and response to these scenarios
- KU8.** reporting protocol and documentation required
- KU9.** details of personnel trained in first aid, fire-fighting and emergency response
- KU10.** actions to take in the event of a mock drills/ evacuation procedures or actual accident, emergency or fire.
- KU11.** occupational health and safety risks and methods
- KU12.** personal protective equipment and method of use
- KU13.** identification, handling and storage of hazardous substances
- KU14.** proper disposal system for waste and by-products
- KU15.** signage related to health and safety and their meaning
- KU16.** importance of sound health, hygiene and good habits
- KU17.** ill-effects of alcohol, tobacco and drugs

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write in local language.
- GS2.** read measurement instructions
- GS3.** communicate orally with colleagues
- GS4.** follow organization rule-based decision making process
- GS5.** take decision with systematic course of actions and/or response
- GS6.** plan and organize your work to achieve targets and deadlines
- GS7.** manage relationships with customers
- GS8.** build customer relationships and use customer centric approach.
- GS9.** think through the problem, evaluate the possible solution(s) and suggest an optimum /best possible solution(s)
- GS10.** identify immediate or temporary solutions to resolve delays
- GS11.** analyze data and activities.
- GS12.** pass on relevant information to others
- GS13.** apply, analyze, and evaluate the information gathered from observation, experience, reasoning, or communication, as a guide to thought and action

Qualification Pack

DGT/VSQ/N0101: Employability Skills (30 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

PC1. understand the significance of employability skills in meeting the job requirements

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

PC2. identify constitutional values, civic rights, duties, personal values and ethics and environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

PC3. explain 21st Century Skills such as Self-Awareness, Behavior Skills, Positive attitude, self-motivation, problem-solving, creative thinking, time management, social and cultural awareness, emotional awareness, continuous learning mindset etc.

Basic English Skills

To be competent, the user/individual on the job must be able to:

PC4. speak with others using some basic English phrases or sentences

Communication Skills

To be competent, the user/individual on the job must be able to:

PC5. follow good manners while communicating with others

PC6. work with others in a team

Qualification Pack

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

PC7. communicate and behave appropriately with all genders and PwD

PC8. report any issues related to sexual harassment

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

PC9. use various financial products and services safely and securely

PC10. calculate income, expenses, savings etc.

PC11. approach the concerned authorities for any exploitation as per legal rights and laws

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

PC12. operate digital devices and use its features and applications securely and safely

PC13. use internet and social media platforms securely and safely

Entrepreneurship

To be competent, the user/individual on the job must be able to:

PC14. identify and assess opportunities for potential business

PC15. identify sources for arranging money and associated financial and legal challenges

Customer Service

To be competent, the user/individual on the job must be able to:

PC16. identify different types of customers

PC17. identify customer needs and address them appropriately

PC18. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC19. create a basic biodata

PC20. search for suitable jobs and apply

PC21. identify and register apprenticeship opportunities as per requirement

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use basic spoken English language

KU6. Do and dont of effective communication

KU7. inclusivity and its importance

KU8. different types of disabilities and appropriate communication and behaviour towards PwD

KU9. different types of financial products and services

Qualification Pack

- KU10.** how to compute income and expenses
- KU11.** importance of maintaining safety and security in financial transactions
- KU12.** different legal rights and laws
- KU13.** how to operate digital devices and applications safely and securely
- KU14.** ways to identify business opportunities
- KU15.** types of customers and their needs
- KU16.** how to apply for a job and prepare for an interview
- KU17.** apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate effectively using appropriate language
- GS2.** behave politely and appropriately with all
- GS3.** perform basic calculations
- GS4.** solve problems effectively
- GS5.** be careful and attentive at work
- GS6.** use time effectively
- GS7.** maintain hygiene and sanitisation to avoid infection

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Qualification Pack

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Minimum Passing % at NOS Level: 50

(Please note: A Trainee must score the minimum percentage for each NOS separately as well as on the QP as a whole.)

Assessment Weightage

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
