Qualification Pack

HCS/Q7405: Jute Products Artisan

Brief Job Description

A jute products artisan crafts eco-friendly items from natural jute fibres, creating unique bags, home decor, accessories, etc. Their work blends traditional techniques with modern designs, highlighting the beauty and sustainability of jute.

Personal Attributes

A jute products artisan is creative and resourceful, with a strong appreciation for sustainability. They are skilled in handcrafting and have a keen eye for detail, ensuring each piece is both functional and aesthetically pleasing.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [HCS/N7418: Jute Processing and Preparation](#)
2. [HCS/N7419: Product Design and Development](#)
3. [HCS/N7420: Weaving and Crafting techniques](#)
4. [HCS/N7421: Packaging and Quality control](#)
5. [HCS/N8511: Entrepreneurship Skills for Jute Products Artisan](#)

Qualification Pack

HCS/N7418: Jute Processing and Preparation

Description

This unit involves the extraction, retting, and preparation of jute fibers for production. The process begins with harvesting the jute plant, followed by retting (soaking) to loosen the fibers. Afterward, fibers are stripped, washed, dried, and spun into threads. The prepared jute is then ready for weaving or further use in making products like bags, ropes, and textiles.

Scope

The scope covers the following :

- cultivation and harvesting
- retting and stripping
- washing and drying
- sorting and grading
- weaving or twisting
- finishing

Elements and Performance Criteria

Cultivation and Harvesting

To be competent, the user/individual on the job must be able to:

- PC1.** jute is primarily grown in warm, humid climates, with India and Bangladesh being major producers
- PC2.** jute plants are harvested when they are 4-6 months old, usually before the seedpods fully mature
- PC3.** sickle is commonly used to cut the jute stalks
- PC4.** plants are cut close to the ground or pulled out by hand
- PC5.** jute stalks are bundled together and prepared for the retting process, which separates the fibers from the woody stem

Retting and Stripping

To be competent, the user/individual on the job must be able to:

- PC6.** retting is the process of separating the jute fibers from the woody core of the plant. The harvested jute stalks are submerged in water (rivers, ponds, or canals) for 10 to 30 days, depending on water temperature and conditions
- PC7.** soft water is ideal for retting, and the quality of water impacts the fiber quality
- PC8.** after retting, the jute fibers become loosened and can be easily extracted
- PC9.** workers strip the outer layer of the jute stalk by hand, peeling the fibers away from the woody stem
- PC10.** use water to wash off any remaining plant material to get clean fibers

Washing and Drying

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC11.** wash stripped fibres thoroughly in clean water to remove dirt, impurities, and any residual bark or stem
- PC12.** excess water is squeezed out from the fibers by hand or using simple tools
- PC13.** check fibres for uniformity and cleanliness during this process
- PC14.** spread out washed fibres and hung in the sun to dry for a few days

Sorting and Grading

To be competent, the user/individual on the job must be able to:

- PC15.** fibers are sorted according to length, color, and strength
- PC16.** fibers are grade into different quality levels, with finer, longer fibers being more valuable
- PC17.** bundle jute fibers into bales for storage or transport to jute mills
- PC18.** align the fibers and then spun into yarns and threads

Weaving or Twisting

To be competent, the user/individual on the job must be able to:

- PC19.** weave jute yarn into fabric, which can be used for sacks, bags or textile
- PC20.** twist jute yarn into thicker strands like ropes or twines

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** understand the ideal growing conditions (climate, soil type) for jute
- KU2.** importance of sustainable farming practices to ensure soil health and fiber quality
- KU3.** different retting methods (water retting, dew retting, etc.) that separate fibers from the stem
- KU4.** techniques for stripping the retted jute to remove the outer bark and obtain the inner fibers
- KU5.** importance of careful handling to avoid damaging the fibers
- KU6.** procedures for washing the stripped fibers to remove impurities
- KU7.** awareness of drying techniques to prevent mold and decay (sun-drying is common)
- KU8.** role of proper drying in maintaining fiber strength and durability
- KU9.** criteria for sorting fibers based on length, color, and quality
- KU10.** importance of grading in determining the market value and potential uses of the fibers
- KU11.** spinning methods to convert jute fibers into yarn (hand-spinning vs. machine-spinning)
- KU12.** techniques for weaving or knitting jute yarn into fabric
- KU13.** applications of jute fabric in various products (bags, rugs, etc.) and its eco-friendly attributes
- KU14.** finishing processes such as dyeing, bleaching, or treating to enhance the fabric properties
- KU15.** significance of finishing in determining the aesthetic and functional qualities of jute products
- KU16.** standards for evaluating jute products, including tensile strength, colorfastness, and durability
- KU17.** role of quality control in maintaining product standards and consumer satisfaction
- KU18.** market demand for jute products and consumer trends toward sustainability
- KU19.** importance of promoting jute as an eco-friendly alternative to synthetic fibers and its role in supporting local economies

Qualification Pack

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** careful observation is required during harvesting, retting, and processing to ensure quality control and to prevent damage to the fibers
- GS2.** steps, like stripping and spinning, require good hand-eye coordination and fine motor skills to handle the fibers effectively
- GS3.** jute processing can be labor-intensive, requiring physical stamina to perform tasks such as harvesting and washing
- GS4.** identifying and addressing issues during the processing stages, such as retting times or drying conditions, is essential for producing high-quality fibers
- GS5.** properties of jute fibers and how they react during processing helps in making informed decisions to improve quality
- GS6.** processing steps are done in groups, so good communication and collaboration skills are vital for a smooth workflow
- GS7.** environmental impact of jute processing and adopting eco-friendly practices can enhance product appeal and marketability

HCS/N7419: Product Design and Development

Description

The unit on Product Design and Development focuses on equipping jute artisans with the necessary knowledge, skills, and techniques to design and develop marketable jute products. This unit covers all stages of the design and development process, from ideation and material selection to crafting, and final presentation.

Scope

The scope covers the following :

- understanding jute as a material
- perform research and ideation
- design jute products
- product development process

Elements and Performance Criteria

Understanding Jute as a Material

To be competent, the user/individual on the job must be able to:

- PC1.** use jute fibers to make sturdy products like bags, rugs, coasters, dolls and home decor items
- PC2.** learn about the properties, benefits, and limitations of jute fibers, including its durability, texture, eco-friendliness, and versatility in product design
- PC3.** select appropriate jute materials for different products
- PC4.** create how jute's natural qualities affect the design process

Perform Research and Ideation

To be competent, the user/individual on the job must be able to:

- PC5.** identify trends, consumer needs, and design opportunities by doing market research
- PC6.** develop creative product ideas by sketching and conceptualizing designs that meet both aesthetic and functional requirements
- PC7.** look at what other artisans and manufacturers are producing helps identify gaps or areas for innovation

Design Jute Products

To be competent, the user/individual on the job must be able to:

- PC8.** start by sketching initial ideas, deciding on the shape, size, style, and function of the product
- PC9.** select the appropriate type of jute fiber (coarser for rugs, finer for fashion accessories)
- PC10.** blend jute with other materials like cotton or leather can also enhance functionality or aesthetics
- PC11.** translate design concepts into physical prototypes using appropriate jute processing and crafting techniques
- PC12.** test and refine prototypes to ensure functionality, durability, and market readiness

Product Development Process

Qualification Pack

To be competent, the user/individual on the job must be able to:

- PC13.** use traditional and modern techniques, involve hand-weaving, stitching, dyeing, or finishing processes
- PC14.** use techniques like knotting, braiding, weaving, or embroidery with bright-colored threads or beads for decoration
- PC15.** use tools like handlooms, sewing machines, and manual weaving techniques
- PC16.** check the product meets quality standards, stitching, weaving patterns, and the overall structural integrity of the product

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** knowing the characteristics of jute fibers, such as strength, durability, biodegradability, and texture, helps artisans decide how to best utilize the material
- KU2.** different qualities of jute, from coarse to fine, and how these influence the final product (e.g., bags, rugs, textiles)
- KU3.** familiarity with how to treat, dye, weave, and finish jute fibers to ensure durability and aesthetic appeal
- KU4.** ability to design visually appealing products by combining colors, patterns, and textures that suit customer preferences and market trends
- KU5.** ensure that products, such as bags, rugs, or home decor, are practical, user-friendly, and meet consumer needs in terms of size, strength, and usability
- KU6.** design products that are comfortable and easy to use, such as handles on bags or soft-textured jute items
- KU7.** keep up with current design trends, as well as sustainable product trends, helps artisans develop contemporary, marketable products
- KU8.** create new products by experimenting with jute, combining it with other materials, or using different techniques (e.g., blending jute with cotton or adding embellishments)
- KU9.** techniques for dyeing jute to create vibrant colors while maintaining fiber integrity
- KU10.** various jute weaving techniques, such as plain, twill, or satin weave, and knowing which is best suited for specific products (e.g., twill weave for strength in bags)
- KU11.** familiarity with the tools and machinery used for cutting, stitching, and weaving jute products, as well as safety procedures in handling these tools
- KU12.** use sustainable methods in jute production, such as using natural dyes and reducing water consumption during processing
- KU13.** develop prototypes of new jute products for testing and refinement before mass production
- KU14.** ensure that jute products undergo testing for strength, durability, and functionality, particularly for items like bags and home textiles that require long-lasting performance
- KU15.** understand how to translate design sketches into tangible models

Generic Skills (GS)

User/individual on the job needs to know how to:

Qualification Pack

- GS1.** creative skills helps artisans think outside the box and experiment with different forms, patterns, or uses for jute
- GS2.** design a new type of eco-friendly jute backpack with unique features such as added pockets or customized prints.
- GS3.** properties of jute fibers (strength, durability, texture) is essential to create products that make the most of the material's natural characteristics
- GS4.** type of jute is best suited for sturdy floor mats versus decorative wall hangings
- GS5.** focus on details like patterns, finishing, and quality control
- GS6.** use market research to align their product designs with what consumers are looking for
- GS7.** Identify a growing trend for sustainable and developing a range of jute-based products such as bags, rugs, coasters or jute dolls
- GS8.** planning the product development timeline, coordinating between suppliers and production teams, and managing costs for materials and labor to ensure the project is completed efficiently

HCS/N7420: Weaving and Crafting techniques

Description

This unit focuses on the essential weaving and crafting techniques employed by jute products artisans to create high-quality, functional, and aesthetically pleasing items. It covers traditional and contemporary methods used in the production of various jute products, including bags, rugs, and more jute products.

Scope

The scope covers the following :

- introduction to jute fibers
- basic weaving techniques
- advanced weaving techniques
- crafting techniques
- finishing techniques

Elements and Performance Criteria

Introduction to Jute Fibers

To be competent, the user/individual on the job must be able to:

- PC1.** obtain jute fiber from the stem of the jute plant
- PC2.** learn about the properties of jute, including its strength, texture, and environmental benefits.
- PC3.** learn about the different types of jute fibers and their uses in various products
- PC4.** process of jute involves several stages, including harvesting, retting, stripping, washing, and drying

Basic Weaving Techniques

To be competent, the user/individual on the job must be able to:

- PC5.** learn about the fundamental method of weaving (plain weave), where the warp and weft threads alternate in a simple pattern
- PC6.** explore diagonal patterns (twill weave) that enhance texture and durability, ideal for bags and heavy-duty items
- PC7.** learn the techniques used for creating sturdy and textured surfaces

Advanced Weaving Techniques

To be competent, the user/individual on the job must be able to:

- PC8.** introduction to (Jacquard weaving) which is more complex patterns and designs that add visual interest to jute products
- PC9.** learn about the knotting techniques to create decorative and functional elements for jute products, enhancing their aesthetic appeal
- PC10.** create leno weave a strong and airy fabric by twisting pairs of warp threads around the weft
- PC11.** float the weft threads over several warp threads before going under one (Satin Weave), resulting in a smooth, glossy surface
- PC12.** weave two layers of fabric simultaneously (Double Weave), allowing for the creation of complex structures and designs

Qualification Pack

PC13. add decorative technique (tapestry weaving) where different colored threads are woven together to create images or patterns

Crafting Techniques

To be competent, the user/individual on the job must be able to:

PC14. add techniques for decorative elements such as embroidery, beads, or dye to enhance the visual appeal of jute products

PC15. use of sewing machines and hand stitching for assembling jute products, ensuring durability and strength

PC16. use macrame is a knotting technique used to create decorative patterns and textures in jute products

PC17. dye jute fibers using natural or synthetic dyes to add color and patterns to their product, techniques such as tie-dye or batik can create unique designs, making jute products more attractive to consumers and allowing for creative expression

PC18. use techniques of winding jute fibers together to form shapes or braiding multiple strands to create thicker structures

PC19. use coiling for making baskets and bowls, while plaiting is often applied in creating mats and decorative items

Finishing Techniques

To be competent, the user/individual on the job must be able to:

PC20. create techniques for finishing jute products, including trimming, edging, and sealing, to enhance durability and appearance

PC21. apply protective coatings or treatments to enhance the water resistance and longevity of jute products

PC22. iron of jute products helps remove wrinkles and creases, giving them a crisp appearance

PC23. add labels or tags to jute products helps provide information about the item, such as care instructions, brand identity, or eco-friendly certifications

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. various weaving methods, such as plain weave, twill weave, and basket weave

KU2. basket weave technique used for bags to provide durability and flexibility

KU3. knowing the properties of jute fibers, including their strength, texture, and flexibility

KU4. familiar with the tools and equipment used in jute weaving, such as looms, shuttle, and weaving needles

KU5. create intricate designs and ensuring precision in the weaving process

KU6. basic design principles, including balance, contrast, harmony, and rhythm, as they apply to woven products

KU7. create visually appealing patterns and structures in jute products, such as ensuring that color combinations complement each other

KU8. various crafting techniques beyond weaving, including knotting, braiding, and embellishing

KU9. techniques to add unique details to jute products, such as braided handles on bags or decorative knots that enhance aesthetics

Qualification Pack

- KU10.** finishing processes that improve the quality and durability of jute products, such as trimming, sealing, or dyeing
- KU11.** implement eco-friendly techniques, such as using organic dyes and minimizing waste during weaving and crafting to create environmentally sustainable products
- KU12.** understand the cultural and historical significance of jute weaving in different regions

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** mastery of various weaving methods, including plain weave, twill weave, and basket weave
- GS2.** choose the appropriate technique for different products, such as bags, mats, or decorative items
- GS3.** knowing how to prepare, condition, and handle jute fibers to prevent breakage and ensure uniformity in weaving
- GS4.** ability to create and interpret patterns for weaving
- GS5.** monitor tension, alignment, and symmetry in the weave to produce consistent and high-quality items
- GS6.** ability to innovate and incorporate unique designs into weaving
- GS7.** experiment with colors, textures, and shapes to create distinctive jute products that stand out in the market
- GS8.** address challenges that arise during the weaving process
- GS9.** work effectively with other artisans or team members in a collaborative environment
- GS10.** share the techniques, offering feedback, and learning from each other to improve overall craftsmanship and production efficiency
- GS11.** organize the weaving process to meet production deadlines
- GS12.** environmental impact of materials and processes in jute weaving

HCS/N7421: Packaging and Quality control

Description

This unit focuses on the essential processes involved in packaging and quality control within the jute products artisan role. It covers the methods and techniques used to protect jute products during transportation and presentation while ensuring that the final products meet established quality standards.

Scope

The scope covers the following :

- understand packaging principles
- select appropriate packaging
- implement quality control procedures
- conduct quality inspections
- document and report quality control findings

Elements and Performance Criteria

Understand Packaging Principles

To be competent, the user/individual on the job must be able to:

- PC1.** identify different types of packaging materials suitable for jute products, including eco-friendly options
- PC2.** describe the role of packaging in protecting products and enhancing visual appeal

Select Appropriate Packaging

To be competent, the user/individual on the job must be able to:

- PC3.** Choose materials that provide adequate protection while being compatible with jute products
- PC4.** evaluate packaging designs based on product type, size, and target market
- PC5.** demonstrate the ability to create effective packaging solutions that reflect brand identity
- PC6.** use colors, graphics, and typography that align with the product's style and appeal to consumer preferences

Implement Quality Control Procedures

To be competent, the user/individual on the job must be able to:

- PC7.** develop and apply quality control checklists to assess finished jute products for defects in craftsmanship, design, and functionality
- PC8.** identify and rectify common quality issues in jute products

Conduct Quality Inspections

To be competent, the user/individual on the job must be able to:

- PC9.** perform routine inspections at various stages of production, including after material preparation, during weaving or crafting, and before packaging
- PC10.** use measurement tools and techniques to verify product specifications
- PC11.** record the results of each inspection, noting any defects or areas for improvement

Document and Report Quality Control Findings

Qualification Pack

To be competent, the user/individual on the job must be able to:

- PC12.** maintain accurate records of quality control inspections and packaging processes
- PC13.** document specific details about each inspection, including the nature of any defects, their locations, and any patterns observed across multiple products
- PC14.** prepare summary reports that highlight key quality control metrics, such as the percentage of defective items, common defects, and improvements over time
- PC15.** share quality control findings with the production team and relevant stakeholder

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** various packaging materials available for jute products, including biodegradable options, recycled paper, and eco-friendly plastics
- KU2.** knowing how to package jute products to prevent damage during storage and transportation, such as moisture, crushing, or abrasion
- KU3.** using padding, dividers, or protective coverings to safeguard products, ensuring they arrive at their destination without defects
- KU4.** understand the role of packaging in branding and customer perception
- KU5.** design packaging that reflects the brand identity, utilizing colors, logos, and visuals that resonate with target customers while showcasing the unique characteristics of jute products
- KU6.** aware of regulations regarding labeling and packaging, including materials that must be disclosed
- KU7.** ensure that packaging meets legal standards for product information, safety, and environmental impact
- KU8.** recognize the importance of sustainable packaging practices in the context of environmental conservation
- KU9.** familiarity with industry standards for jute products, including durability, aesthetics, and functionality
- KU10.** understand the value of customer feedback in assessing product quality and areas for improvement

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** knowledge of different packaging materials and their properties
- GS2.** ability to design packaging that is visually appealing and functional
- GS3.** ensure that products are securely packaged, with no damage or misalignment, to maintain high quality
- GS4.** managing the packaging process efficiently
- GS5.** coordinate packaging activities, from material procurement to the final sealing of products, to streamline operations and minimize waste
- GS6.** efficiently managing the time taken for packaging processes

Qualification Pack

- GS7.** identify subtle defects or issues that could affect the product's functionality or appearance
- GS8.** ability to analyze quality data and feedback.
- GS9.** effectively communicating quality issues with team members

Qualification Pack

Assessment Criteria

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
<i>Understand Packaging Principles</i>	4	8	-	-
PC1. identify different types of packaging materials suitable for jute products, including eco-friendly options	2	4	-	-
PC2. describe the role of packaging in protecting products and enhancing visual appeal	2	4	-	-
<i>Select Appropriate Packaging</i>	8	20	-	-
PC3. Choose materials that provide adequate protection while being compatible with jute products	2	5	-	-
PC4. evaluate packaging designs based on product type, size, and target market	2	5	-	-
PC5. demonstrate the ability to create effective packaging solutions that reflect brand identity	2	5	-	-
PC6. use colors, graphics, and typography that align with the product's style and appeal to consumer preferences	2	5	-	-
<i>Implement Quality Control Procedures</i>	4	8	-	-
PC7. develop and apply quality control checklists to assess finished jute products for defects in craftsmanship, design, and functionality	2	4	-	-
PC8. identify and rectify common quality issues in jute products	2	4	-	-
<i>Conduct Quality Inspections</i>	6	14	-	-
PC9. perform routine inspections at various stages of production, including after material preparation, during weaving or crafting, and before packaging	2	4	-	-
PC10. use measurement tools and techniques to verify product specifications	2	5	-	-

HCS/N8511: Entrepreneurship Skills for Jute Products Artisan

Description

This unit describes the essential entrepreneurship skills required for individuals engaged in the production and sale of jute products. It emphasizes creativity, market awareness, business acumen, and customer engagement to ensure sustainable business practices.

Scope

The scope covers the following :

- creativity and design innovation
- market research and analysis
- brand development and marketing
- customer relationship management
- sustainability awareness

Elements and Performance Criteria

Creativity and Design Innovation

To be competent, the user/individual on the job must be able to:

- PC1.** ability to create unique and aesthetically pleasing jute products, incorporating innovative designs that meet market demands
- PC2.** develop original designs for various jute items (e.g., bags, home decor)
- PC3.** experiment with different textures, colors, and styles to enhance product appeal

Market Research and Analysis

To be competent, the user/individual on the job must be able to:

- PC4.** gather and analyze data on jute product sales and market demand
- PC5.** identify target customer segments and potential market gaps for new product development
- PC6.** identify opportunities for new products and areas for improvement in existing offerings

Brand Development and Marketing

To be competent, the user/individual on the job must be able to:

- PC7.** create a brand identity that reflects the values and uniqueness of jute products
- PC8.** develop and implement marketing campaigns using social media, websites, and local events

Customer Relationship Management

To be competent, the user/individual on the job must be able to:

- PC9.** address customer inquiries and complaints promptly and professionally
- PC10.** implement feedback mechanisms to improve products and services based on customer input

Sustainability Awareness

To be competent, the user/individual on the job must be able to:

- PC11.** use eco-friendly jute sourcing methods and minimize waste in production
- PC12.** promote the environmental benefits of jute products to customers

Qualification Pack

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** familiarity with different types of jute fibers, their properties, and how they affect product quality
- KU2.** knowing how to choose the right type of jute for various products, ensuring durability and aesthetic appeal
- KU3.** awareness of design trends in jute products, including bags, home decor, and accessories.
- KU4.** ability to innovate and create new designs that cater to consumer references while maintaining the unique qualities of jute
- KU5.** understand the sustainable sourcing and production methods that minimize environmental impact
- KU6.** familiarity with various weaving, sewing, and finishing techniques used in jute product creation
- KU7.** understand the role of branding, storytelling, and effective marketing techniques to engage customers and promote jute products

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read and write the characteristics of entrepreneurship skills
- GS2.** understand what customers want and identifying market trends
- GS3.** design unique and attractive jute products that stand out
- GS4.** organize time efficiently to balance production, marketing, and customer service
- GS5.** connect with other artisans, suppliers, and potential customers to create opportunities for collaboration

HCS/N9929: Working in a team

Description

This NOS describes the communication and coordination skills and knowledge to work with colleagues and supervisor to achieve a smooth and hazard-free workflow.

Scope

The scope covers the following :

- interact with supervisor or superior
- work as a team by coordinating with colleagues within and outside the department and include
- inputs on PwD & Gender Sensitisation
- report and Document

Elements and Performance Criteria

Interact with supervisor or superior

To be competent, the user/individual on the job must be able to:

- PC1.** comply with health, safety gender, and PwD (People with disability) related instructions applicable to the workplace
- PC2.** actively participate in mock drills/ evacuation procedures; group discussions, training sensitization programs for gender, and PwD awareness organized at the workplace.
- PC3.** receive job orders and instructions from reporting supervisor and receive feedback on work standards.
- PC4.** understand the work output requirements, targets, performance indicators and incentives.
- PC5.** deliver quality work on time and report any anticipated reasons for delays and handover completed work to supervisor
- PC6.** report on any grievances, production defects and any potential hazards.

Work as a team by coordinating with colleagues within and outside the department and include inputs on PwD & Gender Sensitisation

To be competent, the user/individual on the job must be able to:

- PC7.** communicate maintenance and repair schedule proactively to the supervisor
- PC8.** interact and clarify doubts on design, usage of materials & tools, quality & standards compliance, etc.

Report and Document

To be competent, the user/individual on the job must be able to:

- PC9.** report in time for shortage or need of raw materials
- PC10.** communicate with colleagues from within and other departments, clearly and effectively on all aspects to carry out the work among the team
- PC11.** maintain the etiquette, use polite language, demonstrate responsible and disciplined behavior towards colleagues.
- PC12.** put team over individual goals and multi-task or share work where necessary supporting the colleagues.

Qualification Pack

PC13. document all the details accurately relating to ones role as required.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** knowledge about the importance of gender equality being followed in the organization and policies for reporting any harassment or inappropriate behavior
- KU2.** knowledge about how to accommodate employees with disabilities etiquette to adhere to and proper language and terminology
- KU3.** knowledge about how to communicate, offer help, respecting space, parking etc. for people with disabilities or special needs
- KU4.** knowledge about promoting a safe, accessible and healthy workplace for disabled employees
- KU5.** company's policies on preferred language of communication, incentives, quality standards, personnel management, reporting and escalation matrix policy.
- KU6.** company's standard operating procedure (sop) and the risk and impact of not following them.
- KU7.** procedures for working with colleagues, his/her role and responsibilities in relation to this
- KU8.** organizational hierarchy and the line of reporting structure and work target and review mechanism
- KU9.** procedures to report employment related issues and to deal with conflicts
- KU10.** importance of the individuals role in the organizational workflow and details of the individual responsibilities
- KU11.** tools and equipment handling procedure and common potential hazards in the work place and the procedures to deal with them
- KU12.** effective communication with various categories of people and the different departments in the organization
- KU13.** to document the job activity as required like the check sheets, history sheets, etc
- KU14.** expressing and addressing grievances appropriately, deal with difficult work relationships and manage the internal conflicts effectively

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** create a positive and inclusive workplace atmosphere without any kind of bias/discrimination towards any employee
- GS2.** actively take part in any discussion/workshop organized for gender sensitization training
- GS3.** read and comprehend written instructions related to gender equality issues in the organization
- GS4.** identify and report any harassment or inappropriate behavior towards any employee
- GS5.** create a positive and inclusive workplace atmosphere without any kind of bias/discrimination towards any employee with disability or special needs
- GS6.** actively take part in any discussion/workshop organized for disability sensitization training.

Qualification Pack

- GS7.** read and comprehend written instructions related to equality issues in the organization related to disabled persons
- GS8.** read job sheets, design sheet and information displayed at the workplace
- GS9.** read and understand manuals, health and safety instructions, memos etc
- GS10.** fill up documentation to ones role
- GS11.** communicate effectively with supervisor
- GS12.** contribute to quality of team work and achieve smooth workflow
- GS13.** improve work processes by interacting with others and adopting best practices

HCS/N9931: Maintain health and safety at workplace

Description

This unit provides Performance Criteria, Knowledge & Understanding, and Skills & Abilities required to comply with health, safety, and security requirements at the workplace and covers procedures to prevent, control, and minimize risk to self and others.

Scope

The scope covers the following :

- Comply with health, safety, and security requirements at work

Elements and Performance Criteria

Comply with health, safety, and security requirements at work

To be competent, the user/individual on the job must be able to:

- PC1.** comply with health and safety related instructions applicable to the workplace.
- PC2.** use and maintain personal protective equipment as per protocol.
- PC3.** carry out own activities in line with approved guidelines and procedures
- PC4.** maintain a healthy lifestyle and guard against dependency on intoxicants.
- PC5.** follow environment management system related procedures
- PC6.** store materials and tools in line with manufacturers and organisational requirements
- PC7.** safely handle and move waste and debris.
- PC8.** minimize health and safety risks to self and others due to own actions
- PC9.** seek clarifications, from supervisors or other authorized personnel in case of perceived risks
- PC10.** monitor the workplace and work processes for potential risks and threats.
- PC11.** carry out periodic walk-through to keep work area free from hazards and obstructions, if assigned
- PC12.** report hazards and potential risks/ threats to supervisors or other authorized personnel
- PC13.** participate in mock drills/ evacuation procedures organized at the workplace
- PC14.** undertake first aid, fire-fighting and emergency response training, if asked to do so
- PC15.** take action based on instructions in the event of fire, emergencies or accidents
- PC16.** follow organisation procedures for evacuation when required

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** health and safety related practices applicable at the workplace
- KU2.** potential hazards, risks and threats based on nature of operations
- KU3.** organizational procedures for safe handling of tools

Qualification Pack

- KU4.** potential risks due to own actions and methods to minimize these
- KU5.** environmental management system related procedures at the workplace.
- KU6.** layout of the plant and details of emergency exits, escape routes, emergency equipment and assembly points
- KU7.** potential accidents and emergencies and response to these scenarios
- KU8.** reporting protocol and documentation required
- KU9.** details of personnel trained in first aid, fire-fighting and emergency response
- KU10.** actions to take in the event of a mock drills/ evacuation procedures or actual accident, emergency or fire.
- KU11.** occupational health and safety risks and methods
- KU12.** personal protective equipment and method of use
- KU13.** identification, handling and storage of hazardous substances
- KU14.** proper disposal system for waste and by-products
- KU15.** signage related to health and safety and their meaning
- KU16.** importance of sound health, hygiene and good habits
- KU17.** ill-effects of alcohol, tobacco and drugs

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write in local language.
- GS2.** read measurement instructions
- GS3.** communicate orally with colleagues
- GS4.** follow organization rule-based decision making process
- GS5.** take decision with systematic course of actions and/or response
- GS6.** plan and organize your work to achieve targets and deadlines
- GS7.** manage relationships with customers
- GS8.** build customer relationships and use customer centric approach.
- GS9.** think through the problem, evaluate the possible solution(s) and suggest an optimum /best possible solutions
- GS10.** identify immediate or temporary solutions to resolve delays
- GS11.** analyze data and activities.
- GS12.** pass on relevant information to others
- GS13.** apply, analyze, and evaluate the information gathered from observation, experience, reasoning, or communication, as a guide to thought and action

HCS/N9934: Managing Personal Sanitation

Description

This NOS provides the abilities required for taking responsibility for their own health at the workplace and is about using the correct procedures to prevent, control and minimize risk to them and others at the workplace.

Scope

The scope covers the following :

- adopt healthy work practices
- achieve work productivity while maintaining health

Elements and Performance Criteria

Adopt healthy work practices

To be competent, the user/individual on the job must be able to:

- PC1.** always cover the mouth and nose with a dust mask while working and keep on changing when it gets blocked with dust
- PC2.** follow work instructions strictly to reduce the amount of pollution at the work place e.g. wet the rock / craft material before working on it
- PC3.** wear protective goggles over eyes and replace them when scratches on it obscure the vision
- PC4.** wear gloves as per the materials used for making handicraft to avoid blisters; scratches and cuts
- PC5.** undergo preventive health checkups at regular intervals
- PC6.** take prompt treatment from the doctor in case of illness

Achieve work productivity while maintaining health

To be competent, the user/individual on the job must be able to:

- PC7.** follow SOPs for dealing with blisters; scratches; accidental fires or any other type of emergencies at work
- PC8.** ensure the absence of no productivity loss or absenteeism from work due to illness
- PC9.** ensure no long term ill effect on the personal health

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** companys policies on personal health and occupational hazard management
- KU2.** companys hr policies
- KU3.** companys reporting structure
- KU4.** companys emergency evacuation procedure
- KU5.** health risks to the worker at the work place

Qualification Pack

- KU6.** healthy work practices
- KU7.** how to perform the duties in a way to minimize pollution at the work place
- KU8.** what personal protective equipments should be worn and how it is cared for
- KU9.** safe disposal methods for waste
- KU10.** how to provide the first aid treatment at workplace
- KU11.** emergency procedures to be followed in case of an mishap such as fire accidents etc.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read personal health instructions and manual
- GS2.** read the usage of various hand tools and personal protection equipments
- GS3.** take notes on descriptions and details of various personal health maintenance procedures
- GS4.** communicate with supervisor about the physical symptoms
- GS5.** receive instructions from doctor and supervisor on medical care
- GS6.** how to select appropriate hand tools and personal protection equipment
- GS7.** when to change personal protection equipment during work
- GS8.** how to identify first aid needs in case and of an injury
- GS9.** how to select appropriate hand tools and personal protection equipment
- GS10.** when to change personal protection equipment during work
- GS11.** how to use materials that does not affect customer health / make injury
- GS12.** improve work processes by adopting best safety practices
- GS13.** analyze the usage of appropriate tools and consumables
- GS14.** spot errors and any other disruptions and communicate with solutions

DGT/VSQ/N0102: Employability Skills (60 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Career Development & Goal Setting
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

- PC1.** identify employability skills required for jobs in various industries
- PC2.** identify and explore learning and employability portals

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

- PC3.** recognize the significance of constitutional values, including civic rights and duties, citizenship, responsibility towards society etc. and personal values and ethics such as honesty, integrity, caring and respecting others, etc.
- PC4.** follow environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

- PC5.** recognize the significance of 21st Century Skills for employment
- PC6.** practice the 21st Century Skills such as Self-Awareness, Behaviour Skills, time management, critical and adaptive thinking, problem-solving, creative thinking, social and cultural awareness, emotional awareness, learning to learn for continuous learning etc. in personal and professional life

Basic English Skills

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC7.** use basic English for everyday conversation in different contexts, in person and over the telephone
- PC8.** read and understand routine information, notes, instructions, mails, letters etc. written in English
- PC9.** write short messages, notes, letters, e-mails etc. in English

Career Development & Goal Setting

To be competent, the user/individual on the job must be able to:

- PC10.** understand the difference between job and career
- PC11.** prepare a career development plan with short- and long-term goals, based on aptitude

Communication Skills

To be competent, the user/individual on the job must be able to:

- PC12.** follow verbal and non-verbal communication etiquette and active listening techniques in various settings
- PC13.** work collaboratively with others in a team

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

- PC14.** communicate and behave appropriately with all genders and PwD
- PC15.** escalate any issues related to sexual harassment at workplace according to POSH Act

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

- PC16.** select financial institutions, products and services as per requirement
- PC17.** carry out offline and online financial transactions, safely and securely
- PC18.** identify common components of salary and compute income, expenses, taxes, investments etc
- PC19.** identify relevant rights and laws and use legal aids to fight against legal exploitation

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

- PC20.** operate digital devices and carry out basic internet operations securely and safely
- PC21.** use e- mail and social media platforms and virtual collaboration tools to work effectively
- PC22.** use basic features of word processor, spreadsheets, and presentations

Entrepreneurship

To be competent, the user/individual on the job must be able to:

- PC23.** identify different types of Entrepreneurship and Enterprises and assess opportunities for potential business through research
- PC24.** develop a business plan and a work model, considering the 4Ps of Marketing Product, Price, Place and Promotion
- PC25.** identify sources of funding, anticipate, and mitigate any financial/ legal hurdles for the potential business opportunity

Customer Service

To be competent, the user/individual on the job must be able to:

- PC26.** identify different types of customers
- PC27.** identify and respond to customer requests and needs in a professional manner.

Qualification Pack

PC28. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC29. create a professional Curriculum vitae (Résumé)

PC30. search for suitable jobs using reliable offline and online sources such as Employment exchange, recruitment agencies, newspapers etc. and job portals, respectively

PC31. apply to identified job openings using offline /online methods as per requirement

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Qualification Pack

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
