HCS/Q7705: Crochet Lace Tailor

Brief Job Description

A Crochet Lace Tailor is responsible for developing/ tailoring crochet lace products as per the given specifications/ instructions. A crochet lace tailor should be able to perform basic cutting and stitching operations for developing crochet products of different designs as per quality standards. This job requires the individual to have knowledge of measurements, sewing and finishing for making quality crochet lace products.

Personal Attributes

A Crochet Lace Tailor should have good eyesight, hand-eye coordination and, vision (which includes near vision, distance vision, colour vision, peripheral vision, depth perception and ability to change focus).

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [HCS/N7724: Introduction to Crochet Industry in India](#)
2. [HCS/N8510: Entrepreneurship skills for Crochet Lace Tailor](#)
3. [HCS/N9929: Working in a team](#)
4. [HCS/N9931: Maintain health and safety at workplace](#)
5. [HCS/N9934: Managing Personal Sanitation](#)
6. [DGT/VSQ/N0101: Employability Skills \(30 Hours\)](#)

Electives(mandatory to select at least one):

Elective 1: Handmade Crochet

Handmade crochet is a traditional craft involving the intricate looping of yarn with a hook to create decorative or functional items. Each piece reflects skilled artistry and careful attention to detail.

1. [HCS/N7725: Prepare for Hand crochet products making](#)
2. [HCS/N7730: Construct Hand Crochet products](#)
3. [HCS/N7731: Finishing and Packaging of Hand crochet products](#)

Elective 2: Machine-made Crochet

Qualification Pack

Machine-made crochet refers to crochet-style patterns produced using automated machinery, offering uniformity and faster production.

1. [HCS/N7726: Prepare for Machine crochet production](#)
2. [HCS/N7727: Operate and Monitor crochet machine during production](#)
3. [HCS/N7728: Conduct In-line and Post-production quality checks](#)
4. [HCS/N7729: Perform Finishing and Packaging of Machine-made crochet products](#)

HCS/N7724: Introduction to Crochet Industry in India

Description

The crochet industry in India combines traditional hand techniques with modern machine crochet, showcasing a rich heritage and innovative craftsmanship.

Scope

The scope covers the following :

- Understand the History and Evolution of crochet work in India
- Identify Types of Crochet work - Hand and Machine-made
- Understand the production process in Crochet Industry
- Explore Market trends and Employment opportunities
- Appreciate Sustainability and Cultural relevance

Elements and Performance Criteria

Understand the History and Evolution of crochet work in India

To be competent, the user/individual on the job must be able to:

- PC1.** Describe the origin and traditional significance of crochet in Indian households and communities.
- PC2.** Identify regional styles and traditional patterns unique to Indian crochet craftsmanship.
- PC3.** Explain the historical transition from traditional hand crochet to mechanised production.
- PC4.** List key milestones in the development of the crochet industry in India.

Identify Types of Crochet work – Hand and Machine-made

To be competent, the user/individual on the job must be able to:

- PC5.** Differentiate between hand crochet and machine-made crochet based on process and appearance.
- PC6.** Describe the tools and materials used in hand crochet (hooks, threads, needles, patterns).
- PC7.** Explain how machine-made crochet is produced using automated or semi-automated processes.
- PC8.** Recognise product categories made by hand and machine crochet (e.g., garments, home décor, accessories).

Understand the production process in Crochet Industry

To be competent, the user/individual on the job must be able to:

- PC9.** Outline the step-by-step process involved in hand crochet creation.
- PC10.** Explain the workflow in machine-made crochet production, including pre-production and finishing.
- PC11.** Identify common raw materials used in both methods, such as cotton, wool, synthetic yarns, etc.
- PC12.** Discuss the role of quality checks and finishing techniques in crochet work.

Explore Market trends and Employment opportunities

Qualification Pack

To be competent, the user/individual on the job must be able to:

- PC13.** Identify major domestic and export markets for Indian crochet products.
- PC14.** Describe consumer preferences and current trends in crochet design and colour.
- PC15.** List key employment opportunities in the crochet industry (artisan, assistant, machine operator, designer).
- PC16.** Recognise entrepreneurial and freelancing opportunities in crochet crafts and fashion.

Appreciate Sustainability and Cultural relevance

To be competent, the user/individual on the job must be able to:

- PC17.** Describe how crochet contributes to sustainable and slow fashion.
- PC18.** Explain the importance of preserving hand crochet techniques and artisan livelihoods.
- PC19.** Identify initiatives or organisations promoting handmade crochet work in India.
- PC20.** Highlight the role of women and rural communities in sustaining the crochet craft.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Knowledge of the history and origin of crochet, and its introduction to India during colonial times.
- KU2.** Understanding of how Indian artisans adapted crochet with local motifs and traditional designs.
- KU3.** Knowledge of different raw materials used in crochet, such as cotton, silk, wool, and eco-friendly fibres.
- KU4.** Knowledge of regional variations in crochet styles across different parts of India.
- KU5.** Understanding of the range of crochet products including garments, accessories, home decor, and gifts.
- KU6.** Understanding of the role of the crochet industry in providing livelihood, especially to women in rural and semi-urban areas.
- KU7.** Knowledge of current market trends favouring handcrafted, sustainable crochet products.
- KU8.** Understanding of challenges faced by crochet artisans, such as material access, market reach, and machine-made competition.
- KU9.** Knowledge of emerging opportunities through innovation, skill development, and online platforms.
- KU10.** Understanding of available support systems including government schemes, NGOs, and private sector initiatives.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Ability to communicate clearly with customers, suppliers, and team members.
- GS2.** Ability to read, interpret, and follow crochet patterns and design instructions.
- GS3.** Creativity to design unique and attractive crochet items.
- GS4.** Awareness of eco-friendly practices and sustainable material usage.

Qualification Pack

- GS5.** Proficiency in using various crochet tools, threads, and fibres.
- GS6.** Skill in creating consistent and high-quality crochet stitches and finishes.
- GS7.** Ability to customise designs based on customer preferences and trends.
- GS8.** Skill in sourcing high-quality raw materials at competitive prices.
- GS9.** Ability to collaborate with designers, retailers, and other artisans for business growth.
- GS10.** Ability to adapt to customer feedback and evolving market trends.

HCS/N8510: Entrepreneurship skills for Crochet Lace Tailor

Description

Entrepreneurship skills for a crochet lace tailor involve being creative with designs, managing money well, and knowing how to market products. Good communication and networking help build customer relationships and promote the brand. Being flexible and open to new ideas is also important for success in a competitive market.

Scope

The scope covers the following :

- Develop a business idea for crochet products
- Create a business plan for crochet product manufacturing
- Set up production and manufacturing process
- Manage Inventory and Materials
- Develop Marketing and Branding strategies for crochet products
- Sales and Customer service management
- Financial management for crochet product business
- Build business relationships and network

Elements and Performance Criteria

Develop a business idea for crochet products

To be competent, the user/individual on the job must be able to:

- PC1.** Identify niche markets for both hand-made and machine-made crochet products, such as custom lace garments, home décor items, and accessories.
- PC2.** Assess consumer demand for crochet products based on current trends, customer feedback, and market research.
- PC3.** Explore different crochet product categories, including fashion items (e.g., scarves, shawls), home décor (e.g., tablecloths, doilies), and accessories (e.g., bags, headbands).
- PC4.** Consider sustainable practices in sourcing yarn and materials, such as using organic cotton or recycled fibres.
- PC5.** Analyse competitors in the crochet industry, assessing their pricing, product variety, and marketing strategies.

Create a business plan for crochet product manufacturing

To be competent, the user/individual on the job must be able to:

- PC6.** Define clear business goals, such as increasing sales, expanding the product range, or entering new markets.
- PC7.** Develop a product portfolio that includes both hand-made and machine-made crochet items, identifying potential profit margins for each.
- PC8.** Identify the costs of production, including raw materials, tools, machine maintenance (if applicable), labour costs, and packaging.
- PC9.** Create a pricing strategy that ensures competitive pricing while covering production costs and generating profit.

Qualification Pack

PC10. Draft a marketing strategy to reach potential customers, focusing on both online (e.g., social media, e-commerce platforms) and offline channels (e.g., local craft fairs, pop-up shops).

Set up production and manufacturing process

To be competent, the user/individual on the job must be able to:

- PC11.** Organise the workspace for both hand-made and machine-made crochet production, ensuring sufficient lighting, ventilation, and ergonomic tools.
- PC12.** Source raw materials such as yarn, thread, and embellishments, ensuring quality and cost-effectiveness.
- PC13.** Set up machines (if applicable), ensuring they are properly calibrated for consistent stitch quality in machine-made crochet products.
- PC14.** Create a step-by-step workflow that includes both hand-made and machine-made crochet processes, ensuring efficiency in production.
- PC15.** Implement a system for quality control to monitor the consistency of stitches, thread tension, and overall product finish.

Manage Inventory and Materials

To be competent, the user/individual on the job must be able to:

- PC16.** Track the quantity and quality of yarn, thread, and tools required for crochet production.
- PC17.** Maintain an efficient inventory system to track raw material stock levels, avoiding shortages or overstock.
- PC18.** Establish relationships with reliable suppliers to source quality raw materials at competitive prices.
- PC19.** Store materials properly to prevent damage (e.g., keep yarn in cool, dry areas and ensure hooks and tools are organised and accessible).

Develop Marketing and Branding strategies for crochet products

To be competent, the user/individual on the job must be able to:

- PC20.** Develop a brand identity for the crochet business, including a unique logo, tagline, and product presentation that reflects the artisan nature of hand-made and machine-made crochet items.
- PC21.** Use digital marketing tools (e.g., Instagram, Pinterest, Etsy) to showcase crochet products through high-quality images and videos that highlight craftsmanship and product details.
- PC22.** Create an online store or participate in e-commerce platforms that support handmade and machine-made crochet products, ensuring an easy and secure shopping experience.
- PC23.** Attend craft fairs, pop-up shops, and local markets to promote products and build direct customer relationships.
- PC24.** Develop packaging that enhances the product's value, such as eco-friendly or personalised packaging that aligns with the brand.

Sales and Customer service management

To be competent, the user/individual on the job must be able to:

- PC25.** Offer excellent customer service by responding to enquiries, providing information on products, and addressing customer concerns promptly.
- PC26.** Establish a smooth order fulfilment process, including managing shipping, returns, and exchanges in a professional manner.
- PC27.** Offer personalised crochet products to meet specific customer requests, such as custom lace designs or size adjustments for garments.

Qualification Pack

PC28. Introduce loyalty programmes or discounts to retain customers and encourage repeat business.

Financial management for crochet product business

To be competent, the user/individual on the job must be able to:

PC29. Maintain accurate records of income, expenses, and profits to track financial performance.

PC30. Create a budget for both hand-made and machine-made crochet production, ensuring that expenses stay within limits and profitability is maximised.

PC31. Understand pricing strategies and margins for both hand-made and machine-made crochet products to ensure sustainability.

Build business relationships and network

To be competent, the user/individual on the job must be able to:

PC32. Network with other artisans, designers, and manufacturers in the crochet and textile industry to exchange ideas and collaborate on projects.

PC33. Establish strong relationships with suppliers to ensure consistent quality and timely delivery of materials.

PC34. Join craft associations or online crochet communities to stay updated on trends and participate in collaborations.

PC35. Build partnerships with retailers or wholesalers to distribute crochet products on a larger scale.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. Knowledge of the crochet lace industry, its history, and current market trends.

KU2. Understanding of customer preferences, seasonal demands, and fashion cycles related to lace products.

KU3. Knowledge of different types of crochet lace designs, patterns, and techniques.

KU4. Understanding of high-quality raw materials, such as threads, yarns, and eco-friendly options.

KU5. Knowledge of basic costing methods, pricing strategies, and profit margins for crochet lace products.

KU6. Understanding of how to prepare a basic business plan for a small crochet tailoring enterprise.

KU7. Knowledge of local, regional, and international markets for handcrafted lace products.

KU8. Awareness of branding techniques, including logo design, product labelling, and packaging.

KU9. Understanding of different sales channels, such as exhibitions, online marketplaces, boutique tie-ups, and direct sales.

KU10. Knowledge of effective marketing strategies, including the use of social media, digital platforms, and word-of-mouth promotion.

KU11. Understanding of customer service practices to maintain client satisfaction and loyalty.

KU12. Knowledge of quality control measures to ensure consistency, durability, and fine finishing of lace products.

Qualification Pack

- KU13.** Awareness of government schemes, artisan welfare programmes, and funding support available for entrepreneurs.
- KU14.** Understanding of basic bookkeeping, inventory management, and record-keeping for small businesses.
- KU15.** Knowledge of innovation and product diversification to meet changing market demands.
- KU16.** Understanding of sustainable business practices and the use of eco-friendly materials to appeal to conscious consumers.
- KU17.** Awareness of intellectual property rights related to original designs and handmade creations.
- KU18.** Knowledge of risk management practices to handle business uncertainties.
- KU19.** Understanding of teamwork and leadership skills needed for managing assistants or scaling up the enterprise.
- KU20.** Awareness of legal and regulatory requirements for running a home-based or small business (like registration, GST, etc.).

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** skills to analyze market trends, customer preferences, and competition to tailor products accordingly
- GS2.** Ability to communicate clearly with clients, suppliers, and team members.
- GS3.** Time management skills to complete lace projects within deadlines.
- GS4.** Basic numeracy skills for calculating material requirements, costing, and pricing.
- GS5.** Ability to read, interpret, and modify crochet lace patterns as per customer needs.
- GS6.** Problem-solving skills to address design errors, customer feedback, or production delays.
- GS7.** Creative thinking skills to develop new designs and product variations.
- GS8.** Ability to work independently with self-motivation and attention to detail.
- GS9.** Basic digital literacy to promote products online and maintain an online presence.
- GS10.** Awareness of eco-friendly practices and sustainable material sourcing.
- GS11.** Customer service skills to build strong client relationships and handle enquiries politely.
- GS12.** Proficiency in creating various crochet lace techniques and maintaining consistent quality.
- GS13.** Skill in customising crochet lace products based on customer requirements and market trends.
- GS14.** Ability to maintain high standards of workmanship, finishing, and durability.
- GS15.** Understanding of branding, packaging, and presenting products professionally.
- GS16.** Knowledge of quality control measures to ensure product excellence.
- GS17.** Ability to plan production schedules and manage small orders or bulk consignments.
- GS18.** Skills in basic bookkeeping, inventory management, and business record-keeping.
- GS19.** Ability to price products competitively while ensuring profitability.
- GS20.** Knowledge of participating in exhibitions, fairs, and online marketplaces for business growth.

HCS/N9929: Working in a team

Description

This NOS describes the communication and coordination skills and knowledge to work with colleagues and supervisor to achieve a smooth and hazard-free workflow.

Scope

The scope covers the following :

- interact with supervisor or superior
- work as a team by coordinating with colleagues within and outside the department and include
- inputs on PwD & Gender Sensitisation
- report and Document

Elements and Performance Criteria

Interact with supervisor or superior

To be competent, the user/individual on the job must be able to:

- PC1.** comply with health, safety gender, and PwD (People with disability) related instructions applicable to the workplace
- PC2.** actively participate in mock drills/ evacuation procedures; group discussions, training sensitization programs for gender, and PwD awareness organized at the workplace.
- PC3.** receive job orders and instructions from reporting supervisor and receive feedback on work standards.
- PC4.** understand the work output requirements, targets, performance indicators and incentives.
- PC5.** deliver quality work on time and report any anticipated reasons for delays and handover completed work to supervisor
- PC6.** report on any grievances, production defects and any potential hazards.

Work as a team by coordinating with colleagues within and outside the department and include inputs on PwD & Gender Sensitisation

To be competent, the user/individual on the job must be able to:

- PC7.** communicate maintenance and repair schedule proactively to the supervisor
- PC8.** interact and clarify doubts on design, usage of materials & tools, quality & standards compliance, etc.

Report and Document

To be competent, the user/individual on the job must be able to:

- PC9.** report in time for shortage or need of raw materials
- PC10.** communicate with colleagues from within and other departments, clearly and effectively on all aspects to carry out the work among the team
- PC11.** maintain the etiquette, use polite language, demonstrate responsible and disciplined behavior towards colleagues.
- PC12.** put team over individual goals and multi-task or share work where necessary supporting the colleagues.

Qualification Pack

PC13. document all the details accurately relating to ones role as required.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** knowledge about the importance of gender equality being followed in the organization and policies for reporting any harassment or inappropriate behavior
- KU2.** knowledge about how to accommodate employees with disabilities etiquette to adhere to and proper language and terminology
- KU3.** knowledge about how to communicate, offer help, respecting space, parking etc. for people with disabilities or special needs
- KU4.** knowledge about promoting a safe, accessible and healthy workplace for disabled employees
- KU5.** company's policies on preferred language of communication, incentives, quality standards, personnel management, reporting and escalation matrix policy.
- KU6.** company's standard operating procedure (sop) and the risk and impact of not following them.
- KU7.** procedures for working with colleagues, his/her role and responsibilities in relation to this
- KU8.** organizational hierarchy and the line of reporting structure and work target and review mechanism
- KU9.** procedures to report employment related issues and to deal with conflicts
- KU10.** importance of the individuals role in the organizational workflow and details of the individual responsibilities
- KU11.** tools and equipment handling procedure and common potential hazards in the work place and the procedures to deal with them
- KU12.** effective communication with various categories of people and the different departments in the organization
- KU13.** to document the job activity as required like the check sheets, history sheets, etc
- KU14.** expressing and addressing grievances appropriately, deal with difficult work relationships and manage the internal conflicts effectively

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** create a positive and inclusive workplace atmosphere without any kind of bias/discrimination towards any employee
- GS2.** actively take part in any discussion/workshop organized for gender sensitization training
- GS3.** read and comprehend written instructions related to gender equality issues in the organization
- GS4.** identify and report any harassment or inappropriate behavior towards any employee
- GS5.** create a positive and inclusive workplace atmosphere without any kind of bias/discrimination towards any employee with disability or special needs
- GS6.** actively take part in any discussion/workshop organized for disability sensitization training.

Qualification Pack

- GS7.** read and comprehend written instructions related to equality issues in the organization related to disabled persons
- GS8.** read job sheets, design sheet and information displayed at the workplace
- GS9.** read and understand manuals, health and safety instructions, memos etc
- GS10.** fill up documentation to ones role
- GS11.** communicate effectively with supervisor
- GS12.** contribute to quality of team work and achieve smooth workflow
- GS13.** improve work processes by interacting with others and adopting best practices

HCS/N9931: Maintain health and safety at workplace

Description

This unit provides Performance Criteria, Knowledge & Understanding, and Skills & Abilities required to comply with health, safety, and security requirements at the workplace and covers procedures to prevent, control, and minimize risk to self and others.

Scope

The scope covers the following :

- Comply with health, safety, and security requirements at work

Elements and Performance Criteria

Comply with health, safety, and security requirements at work

To be competent, the user/individual on the job must be able to:

- PC1.** comply with health and safety related instructions applicable to the workplace.
- PC2.** use and maintain personal protective equipment as per protocol.
- PC3.** carry out own activities in line with approved guidelines and procedures
- PC4.** maintain a healthy lifestyle and guard against dependency on intoxicants.
- PC5.** follow environment management system related procedures
- PC6.** store materials and tools in line with manufacturers and organisational requirements
- PC7.** safely handle and move waste and debris.
- PC8.** minimize health and safety risks to self and others due to own actions
- PC9.** seek clarifications, from supervisors or other authorized personnel in case of perceived risks
- PC10.** monitor the workplace and work processes for potential risks and threats.
- PC11.** carry out periodic walk-through to keep work area free from hazards and obstructions, if assigned
- PC12.** report hazards and potential risks/ threats to supervisors or other authorized personnel
- PC13.** participate in mock drills/ evacuation procedures organized at the workplace
- PC14.** undertake first aid, fire-fighting and emergency response training, if asked to do so
- PC15.** take action based on instructions in the event of fire, emergencies or accidents
- PC16.** follow organisation procedures for evacuation when required

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** health and safety related practices applicable at the workplace
- KU2.** potential hazards, risks and threats based on nature of operations
- KU3.** organizational procedures for safe handling of tools

Qualification Pack

- KU4.** potential risks due to own actions and methods to minimize these
- KU5.** environmental management system related procedures at the workplace.
- KU6.** layout of the plant and details of emergency exits, escape routes, emergency equipment and assembly points
- KU7.** potential accidents and emergencies and response to these scenarios
- KU8.** reporting protocol and documentation required
- KU9.** details of personnel trained in first aid, fire-fighting and emergency response
- KU10.** actions to take in the event of a mock drills/ evacuation procedures or actual accident, emergency or fire.
- KU11.** occupational health and safety risks and methods
- KU12.** personal protective equipment and method of use
- KU13.** identification, handling and storage of hazardous substances
- KU14.** proper disposal system for waste and by-products
- KU15.** signage related to health and safety and their meaning
- KU16.** importance of sound health, hygiene and good habits
- KU17.** ill-effects of alcohol, tobacco and drugs

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write in local language.
- GS2.** read measurement instructions
- GS3.** communicate orally with colleagues
- GS4.** follow organization rule-based decision making process
- GS5.** take decision with systematic course of actions and/or response
- GS6.** plan and organize your work to achieve targets and deadlines
- GS7.** manage relationships with customers
- GS8.** build customer relationships and use customer centric approach.
- GS9.** think through the problem, evaluate the possible solution(s) and suggest an optimum /best possible solutions
- GS10.** identify immediate or temporary solutions to resolve delays
- GS11.** analyze data and activities.
- GS12.** pass on relevant information to others
- GS13.** apply, analyze, and evaluate the information gathered from observation, experience, reasoning, or communication, as a guide to thought and action

HCS/N9934: Managing Personal Sanitation

Description

This NOS provides the abilities required for taking responsibility for their own health at the workplace and is about using the correct procedures to prevent, control and minimize risk to them and others at the workplace.

Scope

The scope covers the following :

- adopt healthy work practices
- achieve work productivity while maintaining health

Elements and Performance Criteria

Adopt healthy work practices

To be competent, the user/individual on the job must be able to:

- PC1.** always cover the mouth and nose with a dust mask while working and keep on changing when it gets blocked with dust
- PC2.** follow work instructions strictly to reduce the amount of pollution at the work place e.g. wet the rock / craft material before working on it
- PC3.** wear protective goggles over eyes and replace them when scratches on it obscure the vision
- PC4.** wear gloves as per the materials used for making handicraft to avoid blisters; scratches and cuts
- PC5.** undergo preventive health checkups at regular intervals
- PC6.** take prompt treatment from the doctor in case of illness

Achieve work productivity while maintaining health

To be competent, the user/individual on the job must be able to:

- PC7.** follow SOPs for dealing with blisters; scratches; accidental fires or any other type of emergencies at work
- PC8.** ensure the absence of no productivity loss or absenteeism from work due to illness
- PC9.** ensure no long term ill effect on the personal health

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** companys policies on personal health and occupational hazard management
- KU2.** companys hr policies
- KU3.** companys reporting structure
- KU4.** companys emergency evacuation procedure
- KU5.** health risks to the worker at the work place

Qualification Pack

- KU6.** healthy work practices
- KU7.** how to perform the duties in a way to minimize pollution at the work place
- KU8.** what personal protective equipments should be worn and how it is cared for
- KU9.** safe disposal methods for waste
- KU10.** how to provide the first aid treatment at workplace
- KU11.** emergency procedures to be followed in case of an mishap such as fire accidents etc.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read personal health instructions and manual
- GS2.** read the usage of various hand tools and personal protection equipments
- GS3.** take notes on descriptions and details of various personal health maintenance procedures
- GS4.** communicate with supervisor about the physical symptoms
- GS5.** receive instructions from doctor and supervisor on medical care
- GS6.** how to select appropriate hand tools and personal protection equipment
- GS7.** when to change personal protection equipment during work
- GS8.** how to identify first aid needs in case and of an injury
- GS9.** how to select appropriate hand tools and personal protection equipment
- GS10.** when to change personal protection equipment during work
- GS11.** how to use materials that does not affect customer health / make injury
- GS12.** improve work processes by adopting best safety practices
- GS13.** analyze the usage of appropriate tools and consumables
- GS14.** spot errors and any other disruptions and communicate with solutions

DGT/VSQ/N0101: Employability Skills (30 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

PC1. understand the significance of employability skills in meeting the job requirements

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

PC2. identify constitutional values, civic rights, duties, personal values and ethics and environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

PC3. explain 21st Century Skills such as Self-Awareness, Behavior Skills, Positive attitude, self-motivation, problem-solving, creative thinking, time management, social and cultural awareness, emotional awareness, continuous learning mindset etc.

Basic English Skills

To be competent, the user/individual on the job must be able to:

PC4. speak with others using some basic English phrases or sentences

Communication Skills

To be competent, the user/individual on the job must be able to:

PC5. follow good manners while communicating with others

PC6. work with others in a team

Qualification Pack

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

PC7. communicate and behave appropriately with all genders and PwD

PC8. report any issues related to sexual harassment

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

PC9. use various financial products and services safely and securely

PC10. calculate income, expenses, savings etc.

PC11. approach the concerned authorities for any exploitation as per legal rights and laws

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

PC12. operate digital devices and use its features and applications securely and safely

PC13. use internet and social media platforms securely and safely

Entrepreneurship

To be competent, the user/individual on the job must be able to:

PC14. identify and assess opportunities for potential business

PC15. identify sources for arranging money and associated financial and legal challenges

Customer Service

To be competent, the user/individual on the job must be able to:

PC16. identify different types of customers

PC17. identify customer needs and address them appropriately

PC18. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC19. create a basic biodata

PC20. search for suitable jobs and apply

PC21. identify and register apprenticeship opportunities as per requirement

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use basic spoken English language

KU6. Do and dont of effective communication

KU7. inclusivity and its importance

KU8. different types of disabilities and appropriate communication and behaviour towards PwD

KU9. different types of financial products and services

Qualification Pack

- KU10.** how to compute income and expenses
- KU11.** importance of maintaining safety and security in financial transactions
- KU12.** different legal rights and laws
- KU13.** how to operate digital devices and applications safely and securely
- KU14.** ways to identify business opportunities
- KU15.** types of customers and their needs
- KU16.** how to apply for a job and prepare for an interview
- KU17.** apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate effectively using appropriate language
- GS2.** behave politely and appropriately with all
- GS3.** perform basic calculations
- GS4.** solve problems effectively
- GS5.** be careful and attentive at work
- GS6.** use time effectively
- GS7.** maintain hygiene and sanitisation to avoid infection

HCS/N7725: Prepare for Hand crochet products making

Description

Preparation for hand crochet involves gathering materials, selecting patterns, and setting up a comfortable workspace to create beautiful, handcrafted items.

Scope

The scope covers the following :

- Select and prepare raw materials and tools
- Interpret design specifications and patterns

Elements and Performance Criteria

Select and prepare raw materials and tools

To be competent, the user/individual on the job must be able to:

- PC1.** Identify the correct type of yarn, thread, or lace material (e.g., cotton, linen, silk, or synthetic fibres) based on the product specifications and texture required for the crochet lace.
- PC2.** Select crochet hooks in the appropriate size and material (e.g., aluminum, wood, steel) to ensure smooth movement of yarn.
- PC3.** Gather additional tools such as scissors, measuring tape, stitch markers, yarn needles, and row counters for accurate work.
- PC4.** Ensure that all tools and materials are in good condition and fit for use. For example, ensuring crochet hooks are not bent, and threads are free from tangles.
- PC5.** Select appropriate embellishments or trims (e.g., beads, sequins, or ribbons) for added decoration to the finished crochet lace product.

Interpret design specifications and patterns

To be competent, the user/individual on the job must be able to:

- PC6.** Understand written or charted crochet lace patterns, ensuring familiarity with symbols, abbreviations, and stitch variations.
- PC7.** Clarify any unclear instructions related to stitch count, motif arrangement, or joining techniques with the supervisor or designer.
- PC8.** Select the correct motifs (e.g., floral lace, geometric patterns, scallops) and stitch types (e.g., filet crochet, Irish crochet, Bruges lace) as per product requirements.
- PC9.** Create a sample swatch to verify the correct gauge and tension before beginning the full project.
- PC10.** Plan the crochet pattern to ensure that the required product dimensions (e.g., for a lace tablecloth, lace curtain, lace edging, or lace shawl) are achieved.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

Qualification Pack

- KU1.** Knowledge of different crochet techniques and stitches required for making hand crochet products.
- KU2.** Understanding of the tools and materials needed, such as crochet hooks, yarn, threads, and needles.
- KU3.** Knowledge of the various types of yarn and their suitability for different crochet products (e.g., cotton, wool, silk, acrylic).
- KU4.** Awareness of the importance of selecting the right yarn thickness and texture for the desired product.
- KU5.** Understanding of the different types of crochet patterns (e.g., granny squares, lace, amigurumi) and when to use each.
- KU6.** Knowledge of basic measurements required for various crochet items, such as width, length, and stitch count.
- KU7.** Understanding of the importance of tension and how to maintain consistent stitch size.
- KU8.** Knowledge of how to read and interpret crochet patterns, charts, and instructions.
- KU9.** Understanding of the process of blocking and finishing crochet items to ensure they are shaped correctly.
- KU10.** Awareness of common mistakes and troubleshooting techniques to rectify issues such as uneven stitches or incorrect pattern execution.
- KU11.** Knowledge of the tools for measuring and counting stitches, including row counters and tape measures.
- KU12.** Understanding of how to join yarns, change colours, and create seamless transitions between sections.
- KU13.** Knowledge of safety and ergonomic practices while crocheting to avoid strain or injury.
- KU14.** Understanding of the importance of fabric care, including washing, storing, and handling crocheted products to maintain their quality.
- KU15.** Knowledge of various crochet techniques for creating decorative elements, such as fringes, borders, applique designs, etc.
- KU16.** Awareness of eco-friendly materials and their use in crochet products, as well as the benefits of sustainable crafting practices.
- KU17.** Knowledge of basic marketing strategies to showcase and sell handmade crochet products, both locally and online.
- KU18.** Understanding of pricing, cost estimation, and profitability analysis for crochet product making.
- KU19.** Awareness of customer needs and market trends, such as seasonal demands for specific crochet items (e.g., scarves in winter, accessories in summer).
- KU20.** Knowledge of legal considerations, such as copyrighting designs and product liability, when selling hand-crocheted goods.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Ability to communicate effectively with clients, suppliers, and team members regarding product requirements.
- GS2.** Strong organisational skills to manage tools, materials, and work areas efficiently.

Qualification Pack

- GS3.** Ability to follow instructions and adapt crochet patterns to meet specific needs.
- GS4.** Basic numeracy skills to calculate yarn requirements, product dimensions, and pricing.
- GS5.** Attention to detail to ensure precision in stitching, pattern following, and product finishing.
- GS6.** Time management skills to ensure timely completion of crochet projects, particularly when working to deadlines.
- GS7.** Basic digital literacy to manage inventory, create product listings online, and promote products via social media.
- GS8.** Creative thinking to develop unique designs and add artistic value to crochet items.
- GS9.** Self-motivation and the ability to work independently with minimal supervision.
- GS10.** Customer service skills to interact professionally with customers, respond to enquiries, and address concerns effectively.
- GS11.** Knowledge of sustainable practices, such as using eco-friendly yarns and recycling materials.
- GS12.** Adaptability to changing market trends and customer preferences.
- GS13.** Proficiency in various crochet techniques, such as lace, amigurumi, and Tunisian crochet, ensuring high-quality outputs.
- GS14.** Ability to create and modify crochet patterns to suit customer specifications or personal designs.
- GS15.** Knowledge of crochet finishing techniques, such as blocking, stitching, and weaving in ends, to ensure professional presentation.
- GS16.** Skilled in selecting appropriate yarns, tools, and colours to create aesthetically pleasing products.
- GS17.** Strong product development skills, including the ability to expand from basic designs to more complex items.
- GS18.** Ability to manage production processes, ensuring consistency and maintaining high-quality standards.
- GS19.** Basic knowledge of business skills, such as pricing strategies, budgeting, and cost management.
- GS20.** Knowledge of quality control measures to monitor and ensure consistent product quality throughout the making process.
- GS21.** Ability to efficiently manage inventory and track material usage to minimise waste.
- GS22.** Professionalism in dealing with clients, including negotiating prices, setting timelines, and delivering products on schedule.
- GS23.** Understanding of the importance of branding, packaging, and presenting crochet products for retail or online sales.
- GS24.** Ability to participate in craft fairs, exhibitions, and markets to showcase and sell crochet products.
- GS25.** Knowledge of intellectual property rights to protect original crochet designs.

HCS/N7730: Construct Hand Crochet products

Description

Construct Hand Crochet products by using a crochet hook and yarn to create unique, handcrafted items, following patterns or original designs with attention to detail.

Scope

The scope covers the following :

- Execute crochet lace stitches and techniques
- Assemble and join lace components
- Produce different types of crochet lace products

Elements and Performance Criteria

Execute crochet lace stitches and techniques

To be competent, the user/individual on the job must be able to:

- PC1.** Execute lace stitches accurately, including chain stitches, slip stitches, double crochet, and treble crochet, using proper tension for lacework.
- PC2.** Master specialised in lace stitches, such as picot, shell stitch, and cluster stitch, to create decorative elements in lace designs.
- PC3.** Apply techniques like increasing, decreasing, and working in the round or rows as per the design requirements.
- PC4.** Ensure consistent stitch size and uniformity in lacework to maintain the desired visual appeal of the final product.
- PC5.** Adjust hook size or yarn tension where necessary to maintain the correct scale and structure of the lace pattern.

Assemble and join lace components

To be competent, the user/individual on the job must be able to:

- PC6.** Join separate lace motifs or panels using appropriate joining techniques, such as whip stitch, slip stitch, or the invisible joining method.
- PC7.** Attach decorative lace edgings to finished products like tablecloths, bedspreads, or garments (e.g., lace collars, cuffs).
- PC8.** Work lace edges with precision, ensuring smooth curves and even stitch placement.
- PC9.** Combine lace motifs with non-lace elements (e.g., fabric, beads, or sequins) where required, using a seamless approach.

Produce different types of crochet lace products

To be competent, the user/individual on the job must be able to:

- PC10.** Create lace garments such as lace tops, shawls, and cardigans using various crochet lace techniques (e.g., filet lace, pineapple lace, or shell lace).
- PC11.** Construct lace home décor items, including lace table runners, curtains, doilies, and cushions.
- PC12.** Make lace accessories like scarves, handbags, or lace-trimmed items.

Qualification Pack

- PC13.** Design and produce lace edgings for garments and household textiles, such as pillowcases, napkins, or towels.
- PC14.** Incorporate fine lacework into delicate pieces like lace collars, lace gloves, or lace jewellery.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Knowledge of various crochet methods, including single crochet, double crochet, slip stitch, and more advanced techniques such as Tunisian crochet or filet lace.
- KU2.** Understanding of different types of yarn, their textures, weights, and suitability for different crochet products, including natural fibres (e.g., cotton, wool) and synthetic fibres (e.g., acrylic, nylon).
- KU3.** Understanding the range of crochet hooks and tools, such as ergonomic hooks, stitch markers, and yarn needles, and their appropriate usage for different projects.
- KU4.** Knowledge of how to read and interpret written and charted crochet patterns, symbols, and abbreviations.
- KU5.** Understanding how to shape crochet products through increases, decreases, and joining techniques to form items like blankets, garments, or accessories.
- KU6.** Awareness of how to maintain consistent tension, stitch size, and uniformity throughout the entire project to ensure the finished product looks professional.
- KU7.** Knowledge of finishing techniques such as weaving in ends, blocking, and adding embellishments to enhance the appearance and longevity of the product.
- KU8.** Knowledge of standard measurements for different crochet items and the ability to adjust patterns to suit specific sizes (e.g., for garments, home decor items).
- KU9.** Understanding how to manage yarn effectively, including joining yarns, avoiding tangles, and ensuring smooth transitions when changing colours or threads.
- KU10.** Understanding how to assemble individual crochet components, such as sewing together different pieces of a garment or item, ensuring a seamless and professional finish.
- KU11.** Knowledge of how to add decorative elements, such as fringe, pom-poms, buttons, or applique, to create unique and personalised products.
- KU12.** Understanding the importance of ergonomic techniques to prevent hand and wrist strain during long crochet sessions.
- KU13.** Understanding how to make products durable and how to properly care for crocheted items, including washing instructions, storage, and handling.
- KU14.** Knowledge of how to customise crochet products based on customer requirements or trends, including colour variations, sizing adjustments, and design alterations.
- KU15.** Knowledge of quality control methods to check for mistakes in stitches, uneven edges, or imperfections before completing a product.
- KU16.** Understanding how to choose sustainable materials, such as organic yarns, and implement eco-friendly practices in the crochet process.

Generic Skills (GS)

User/individual on the job needs to know how to:

Qualification Pack

- GS1.** Ability to discuss project requirements clearly with clients or team members.
- GS2.** Ability to plan and manage time effectively to meet deadlines.
- GS3.** Ensuring precision in stitching, pattern execution, and product finishing.
- GS4.** Developing unique crochet designs and incorporating trends or customer preferences.
- GS5.** Addressing issues such as uneven stitches or pattern mistakes and finding effective solutions.
- GS6.** Working independently to complete projects without constant supervision.
- GS7.** Providing professional interactions with clients and addressing concerns or requests promptly.
- GS8.** Adjusting to changing customer needs, trends, and challenges in crochet work.
- GS9.** Mastery of various crochet techniques and stitches for different products.
- GS10.** Ability to adjust patterns and designs based on client needs or personal creativity.
- GS11.** Applying professional techniques like blocking, weaving in ends, and adding decorative touches.
- GS12.** Ensuring high standards of workmanship and consistency in crochet products.
- GS13.** Assembling components like crochet pieces or embellishments into a cohesive final product.
- GS14.** Managing pricing, cost calculations, and inventory for a crochet business.
- GS15.** Promoting crochet products effectively through digital platforms, social media, or exhibitions.
- GS16.** Building and maintaining strong relationships with customers, addressing custom requests, and handling feedback.

HCS/N7731: Finishing and Packaging of Hand crochet products

Description

Finishing and packaging hand crochet products involves carefully trimming any excess yarn, weaving in ends, and ensuring each item is neat and presentable. Once finished, products are gently folded or rolled, placed in eco-friendly packaging, and labeled to highlight their handmade nature, ready for delivery to customers.

Scope

The scope covers the following :

- Conduct finishing and quality control
- Package and label crochet lace products for sale

Elements and Performance Criteria

Conduct finishing and quality control

To be competent, the user/individual on the job must be able to:

- PC1.** Secure all loose yarn ends by weaving them neatly into the crochet work using a tapestry needle.
- PC2.** Trim excess threads and yarn to ensure a polished, professional finish, with no loose ends visible on the final product.
- PC3.** Block the finished crochet lace product using a steam iron or wet-blocking technique to shape and set the lace.
- PC4.** Inspect the product for defects such as uneven tension, missed stitches, or incorrect pattern execution.
- PC5.** Perform corrective actions, such as fixing broken stitches or re-shaping parts of the lace, to meet the required quality standards.
- PC6.** Ensure that the finished product is soft, flexible, and maintains its lace-like quality without becoming stiff or misshapen.

Package and label crochet lace products for sale

To be competent, the user/individual on the job must be able to:

- PC7.** Choose appropriate packaging materials that protect the crochet lace product while also reflecting the product's quality, such as acid-free tissue paper or eco-friendly packaging.
- PC8.** Fold or roll delicate lace items (e.g., shawls, tablecloths) in a way that minimises creasing and preserves the shape.
- PC9.** Attach product tags with essential details, including product name, care instructions (e.g., "hand wash only," "lay flat to dry"), material composition (e.g., cotton, silk), and the artisan's name or brand.
- PC10.** • PC10. Store finished products in a clean, dry, and well-ventilated space to avoid any damage from moisture or dust.
 - NOS Total

Knowledge and Understanding (KU)

Qualification Pack

The individual on the job needs to know and understand:

- KU1.** Knowledge of how to properly finish crochet items, including weaving in loose ends, blocking, and ensuring the product maintains its shape.
- KU2.** Ability to ensure that edges and seams are neat, secure, and aesthetically pleasing through techniques such as slip stitches, whip stitches, or decorative borders.
- KU3.** Knowledge of the process of wet or steam blocking to shape crochet items and enhance stitch definition.
- KU4.** Understanding how to add final decorative touches such as beads, buttons, fringes, or applique, ensuring they are securely attached.
- KU5.** Awareness of how to check for imperfections, including uneven stitches or missed spots, and rectifying these issues before final packaging.
- KU6.** Knowledge of how to care for the crochet products, such as washing instructions, fabric softeners, and how to maintain yarn texture.
- KU7.** Understanding of different packaging materials (e.g., tissue paper, fabric bags, cardboard boxes) and their appropriateness for protecting crochet products during storage and transport.
- KU8.** Knowledge of sustainable packaging options, such as biodegradable wraps or reusable bags, to align with eco-conscious business practices.
- KU9.** Knowledge of how to brand crochet products professionally, including the use of labels, tags, and care instructions to enhance customer experience.
- KU10.** Understanding the importance of how products are displayed or presented in packaging to create a visually appealing, high-quality image for the customer.
- KU11.** Knowledge of how to store finished crochet products before they are sold or shipped, ensuring that they remain in top condition.
- KU12.** Awareness of legal requirements for labelling, including product descriptions, ingredients (if applicable), and safety information on the packaging.
- KU13.** Knowledge of how to prepare pricing labels, invoices, or receipts to accompany crochet products, ensuring transparency for customers.
- KU14.** Ability to create custom packaging solutions based on the specific needs of the product, such as the inclusion of personalised messages or gift packaging.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Ensuring that the final crochet product is flawless and free from imperfections before packaging.
- GS2.** Efficiently completing the finishing process and packaging within a reasonable timeframe to meet customer expectations or deadlines.
- GS3.** Addressing issues like uneven stitching or incomplete finishes and finding solutions before final packaging.
- GS4.** Designing unique and appealing packaging solutions that enhance the crochet products presentation.
- GS5.** Understanding the importance of providing customers with a high-quality finished product that is well-presented and secure during delivery.

Qualification Pack

- GS6.** Managing multiple crochet items, ensuring that each is properly finished and packed in an organised manner.
- GS7.** Effectively communicating with suppliers for packaging materials and with clients about the packaging options or delivery details.
- GS8.** Knowledge of eco-friendly materials and practices that reduce the environmental impact of packaging.
- GS9.** Consistently checking crochet products for defects, ensuring they meet high standards before packaging.
- GS10.** Applying advanced crochet finishing methods such as blocking, adding embellishments, and securing loose ends to ensure a polished product.
- GS11.** Selecting and applying appropriate packaging materials to protect and enhance the products presentation.
- GS12.** Designing and placing product labels and tags that communicate key information and reinforce brand identity.
- GS13.** Using professional packaging methods to make products visually appealing, ensuring that customers receive items that reflect quality craftsmanship.
- GS14.** Creating tailored packaging solutions based on the specific needs of the crochet product, enhancing customer experience.
- GS15.** Providing professional and personalised packaging options, such as gift wrapping or special instructions, to meet customer needs.
- GS16.** Ensuring safe handling of materials during the finishing and packaging process to prevent injury or damage to products.
- GS17.** Ensuring that all packaging meets legal requirements, such as providing necessary care instructions and product information on labels.
- GS18.** Managing packaging materials and finished products in a way that ensures stock is always ready for shipment or sale without overstocking or wastage.

HCS/N7726: Prepare for Machine crochet production

Description

Preparing for machine crochet production involves selecting the appropriate yarn and machine settings, creating or choosing designs, and setting up the workspace for efficient operation. This includes ensuring the machine is properly calibrated, testing stitch patterns, and organising materials for a smooth production process.

Scope

The scope covers the following :

- Select and prepare materials
- Machine setup and calibration
- Perform trial run and adjustment

Elements and Performance Criteria

Select and prepare materials

To be competent, the user/individual on the job must be able to:

- PC1.** Identify the appropriate yarn type (cotton, polyester, wool) based on design and texture.
- PC2.** Examine yarn for consistency in thickness and strength to prevent breaks during the weaving process.
- PC3.** Wind the yarn evenly onto bobbins and ensure correct tension for machine feeding.
- PC4.** Select suitable colour combinations based on the end product's design requirements (e.g., contrast for lace trims or matching tones for fashion accessories).

Machine setup and calibration

To be competent, the user/individual on the job must be able to:

- PC5.** Choose the appropriate crochet machine based on product type, such as Raschel for intricate designs or flatbed for simple laces.
- PC6.** Set the yarn feed system (manual or automatic) based on machine specifications.
- PC7.** Install the correct type of guide bars, crochet hooks, and tension discs per the machine's technical setup instructions.
- PC8.** Input the correct pattern settings or design data into the machine's programme or pattern card.
- PC9.** Calibrate the machine's stitch length, tension, and machine speed for optimum output.

Perform trial run and adjustment

To be competent, the user/individual on the job must be able to:

- PC10.** Conduct a small batch trial run, approximately 1-2 metres, to verify machine setup and yarn compatibility.
- PC11.** Inspect the trial product for pattern accuracy, stitch formation, and texture consistency.
- PC12.** Make adjustments to guide bar angle, stitch cams, and thread tension, if necessary, based on trial output.

Qualification Pack

PC13. Finalise machine settings for production by ensuring that the trial run meets all quality standards.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Knowledge of the specifications for the crochet items to be produced, including pattern design, yarn type, and finished product dimensions.
- KU2.** Knowledge of how to prepare crochet machines for production, including selecting the appropriate machine type (e.g., flatbed or circular), setting tension, and loading yarns or threads.
- KU3.** Understanding the properties of different yarns and materials, including their suitability for specific crochet patterns and machine compatibility.
- KU4.** Ability to prepare crochet patterns for machine production, including programming the machine with the correct stitch patterns, stitch counts, and repeat intervals.
- KU5.** Knowledge of how to set and adjust the yarn feed and tension mechanisms on the machine to ensure even stitching and consistent fabric quality.
- KU6.** Understanding how to calibrate the machine for different types of yarns, stitch patterns, and fabric thicknesses to ensure precision during production.
- KU7.** Knowledge of how to assess the volume of items required and plan machine operations accordingly to meet production deadlines and targets.
- KU8.** Awareness of how temperature, humidity, and workspace conditions can affect machine performance and yarn quality, and taking steps to optimise these factors.
- KU9.** Knowledge of safety protocols and precautions to ensure safe operation of machines, including understanding the correct use of protective equipment and safety features of the machine.
- KU10.** Understanding the need to check the availability of necessary materials (e.g., yarn, needles, machine parts) and ensure stock levels are adequate for the planned production run.
- KU11.** Familiarity with the steps to take before starting the machine, including inspecting the machine for wear and tear, ensuring components are working correctly, and addressing any issues before production begins.
- KU12.** Understanding how to adjust machine settings to optimise speed and efficiency while maintaining the quality of the crochet product.
- KU13.** Knowledge of the routine cleaning and maintenance tasks necessary to prepare the machine for smooth operation, including oiling and checking for any needed repairs.
- KU14.** Awareness of the standards of quality that need to be met in the final product and how to ensure that the machine is prepared to meet these requirements.
- KU15.** Understanding how to set up the workspace efficiently, ensuring that all necessary tools, materials, and instructions are easily accessible during the production process.

Generic Skills (GS)

User/individual on the job needs to know how to:

Qualification Pack

- GS1.** Carefully checking machine components, materials, and patterns before starting production to ensure everything is set up accurately.
- GS2.** Effectively planning and managing time during the setup process to ensure machines are ready for production without unnecessary delays.
- GS3.** Identifying and resolving any issues that arise during the preparation stage, such as yarn compatibility or machine setup errors.
- GS4.** Ensuring that the workspace is organised with all materials, tools, and instructions readily available for an efficient setup process.
- GS5.** Quickly adjusting to changes in production requirements or dealing with unexpected challenges such as material shortages or machine malfunctions.
- GS6.** Understanding and applying safety protocols to prevent accidents during machine setup and preparation, including handling materials and machinery correctly.
- GS7.** Effectively communicating with team members or supervisors regarding the machine setup process, material needs, and production goals.
- GS8.** Adjusting the workspace setup and machine settings to account for environmental conditions such as humidity or temperature that may affect production.
- GS9.** Using logical reasoning to assess the machine and material conditions and make informed decisions to improve production readiness.
- GS10.** Staying calm and focused when faced with tight deadlines or pressure to prepare machines for production runs.
- GS11.** Skilled in the setup, calibration, and preparation of crochet machines, ensuring they are ready for production with the correct settings and materials.
- GS12.** Proficient in selecting and preparing the appropriate yarns for the production run, ensuring compatibility with the machine and the intended pattern.
- GS13.** Ability to input and adjust crochet patterns on the machine, ensuring accuracy in stitch patterns, repeat intervals, and overall design.
- GS14.** Monitoring materials and machine setup to ensure that the production process will result in high-quality finished products.
- GS15.** Performing necessary pre-production maintenance, such as cleaning and checking for machine wear and tear, to ensure smooth operation.
- GS16.** Efficiently managing yarn, machine parts, and other materials to ensure they are available and ready for use during the production process.
- GS17.** Identifying potential problems with the machine or materials during the preparation stage and resolving them before production begins.
- GS18.** Optimising machine settings for maximum efficiency during the production run while maintaining high quality and minimal waste.
- GS19.** Ensuring that the setup process adheres to industry standards, environmental guidelines, and workplace safety regulations.
- GS20.** Working collaboratively with other team members to ensure all aspects of the production setup are aligned and ready for a smooth transition into the production phase.

HCS/N7727: Operate and Monitor crochet machine during production

Description

Operate and monitor the crochet machine during production by ensuring it runs smoothly and efficiently. This includes regularly checking the machine settings, observing the stitching process for consistency, and addressing any issues such as thread breaks or tension problems. Maintain a clean workspace and keep an eye on the yarn supply to prevent interruptions, ensuring high-quality output throughout the production run.

Scope

The scope covers the following :

- Understand the types of crochet in machine making
- Start and monitor the machine
- Address operational interruptions
- Maintain production efficiency

Elements and Performance Criteria

Understand the types of crochet in machine making

To be competent, the user/individual on the job must be able to:

- PC1.** Differentiate between various types of machine-made crochet, including flat-bed and circular crochet machines.
- PC2.** Describe the types of crochet stitches used in machine crochet, such as chain stitch, slip stitch, and double crochet.
- PC3.** Explain the distinction between fully automated and semi-automated crochet machines and their impact on production.
- PC4.** Explain the role of computerised crochet machines in modern manufacturing, including pattern programming and design customisation.
- PC5.** Discuss the advantages and challenges of machine-made crochet in terms of speed, consistency, and mass production compared to hand crochet.

Start and monitor the machine

To be competent, the user/individual on the job must be able to:

- PC6.** Start the machine and monitor the initial stages of production to ensure correct pattern repeat and smooth operation.
- PC7.** Check yarn feed regularly to avoid tangling or slipping from the yarn feeders.
- PC8.** Ensure that the machine runs at the prescribed speed, optimising production efficiency without compromising fabric quality.
- PC9.** Observe the initial output for any irregularities in stitch formation, gauge, or yarn tension.

Address operational interruptions

To be competent, the user/individual on the job must be able to:

- PC10.** Recognise signs of malfunction, such as thread breakage or machine jamming, and stop the machine immediately.

Qualification Pack

- PC11.** Correct thread breaks by re-threading the machine or adjusting the tension.
- PC12.** Fix any needle or hook issues, such as misalignment or wear, and ensure machine operation resumes without defects.
- PC13.** Regularly check the lubricating system to prevent machine overheating or excessive wear, and perform minor maintenance if necessary.

Maintain production efficiency

To be competent, the user/individual on the job must be able to:

- PC14.** Ensure the machine runs at an optimal speed to meet production targets while maintaining fabric quality.
- PC15.** Adjust operational parameters like yarn tension, machine speed, or pattern settings to address any inefficiencies.
- PC16.** Conduct routine checks to monitor waste levels, ensuring that any excess yarn or fabric is kept to a minimum.
- PC17.** Record machine downtime, reasons for stoppages, and overall production output at regular intervals.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Knowledge of how to set up, operate, and maintain different types of crochet machines used in the production process, such as flatbed or circular crochet machines.
- KU2.** Familiarity with the key parts of a crochet machine (e.g., needles, hooks, thread guides, tension mechanisms) and how each part contributes to the overall machine operation.
- KU3.** Knowledge of how to load and manage yarn or thread on the machine, ensuring proper tension and smooth feeding to avoid jams or breakages.
- KU4.** Understanding how to input and adjust crochet patterns or designs on digital machines, including modifying stitch types, stitch counts, and pattern repeat intervals.
- KU5.** Ability to observe and assess machine performance during operation, identifying any irregularities or potential issues such as thread tension problems, machine speed adjustments, or stitch misalignments.
- KU6.** Knowledge of common problems that may occur during production (e.g., thread breakage, machine malfunction) and the ability to troubleshoot and resolve these issues efficiently.
- KU7.** Understanding of routine maintenance tasks such as cleaning, oiling, and checking machine components to prevent wear and tear, ensuring optimal functioning.
- KU8.** Awareness of safety guidelines and precautions when operating crochet machines, including the safe handling of machinery and personal protective equipment (PPE) to prevent accidents.
- KU9.** Knowledge of how to monitor the quality of the crochet fabric during production, ensuring that the final output meets required standards for consistency, stitch formation, and texture.
- KU10.** Ability to calibrate machines to adjust settings for different crochet patterns, fabric thicknesses, or yarn types, ensuring precise results.
- KU11.** Ability to oversee the production process, ensuring that machines are operating within the specified parameters and output levels.

Qualification Pack

- KU12.** Knowledge of how to evaluate the machines output speed and adjust production parameters to optimise efficiency without compromising product quality.
- KU13.** Awareness of yarn consumption rates, tracking material usage, and ensuring that the necessary supplies are always available to prevent production delays.
- KU14.** Understanding how temperature, humidity, and other environmental factors can affect machine performance and the quality of the crocheted fabric.
- KU15.** Knowledge of how to document machine performance, production rates, and any issues encountered, providing reports for performance analysis and continuous improvement.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Monitoring machine output closely to ensure consistent quality in the crocheted product, with attention to stitch accuracy and fabric consistency.
- GS2.** Identifying and resolving operational issues, such as thread breakage or machine malfunctions, promptly to minimise downtime.
- GS3.** Effectively managing time during production to ensure machines operate efficiently and meet production targets.
- GS4.** Adjusting machine settings based on the production requirements, including yarn type or pattern changes, and adapting to any unforeseen issues during production.
- GS5.** Effectively communicating with colleagues, supervisors, or technicians to report on machine performance, issues, and production progress.
- GS6.** Ensuring the machine operates in compliance with safety standards and following correct safety procedures to prevent accidents or injuries.
- GS7.** Collaborating with other team members to ensure smooth machine operations, sharing information about maintenance needs, and assisting in troubleshooting when necessary.
- GS8.** Using analytical skills to evaluate machine performance data and assess whether any adjustments need to be made for optimal output.
- GS9.** Keeping the work area tidy and managing tools, materials, and machine settings in an organised way to enhance efficiency.
- GS10.** Maintaining a calm and composed approach during high-pressure production periods, managing any machine-related issues that may arise without affecting the workflow.
- GS11.** Skilled in operating crochet machines, including setting them up for different production runs, adjusting settings, and loading yarn.
- GS12.** Proficient in performing routine maintenance tasks such as cleaning, oiling, and inspecting machines to ensure they run smoothly.
- GS13.** Ability to diagnose and troubleshoot common machine issues (e.g., thread breakage, stitch errors) and implement solutions without disrupting production.
- GS14.** Skilled in monitoring the quality of crocheted fabric and ensuring it meets the required standards for consistency, stitch quality, and durability.
- GS15.** Ability to optimise machine settings to increase production speed while maintaining high quality and reducing waste.
- GS16.** Knowledge of how to collect and interpret machine data, production rates, and performance logs to identify areas for improvement.

Qualification Pack

- GS17.** Strong understanding of machine mechanics and programming, allowing the operator to make adjustments or work with technical support when necessary.
- GS18.** Ability to track and manage yarn and other materials, ensuring they are used efficiently without excess waste, and maintaining inventory levels.
- GS19.** Skilled in overseeing the entire production process, ensuring that crochet machines are running smoothly and meeting output goals.
- GS20.** Knowledge of industry standards, environmental considerations, and legal regulations regarding machine operation, safety, and product quality.

Qualification Pack

Assessment Criteria

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
<i>Understand the types of crochet in machine making</i>	10	15	-	-
PC1. Differentiate between various types of machine-made crochet, including flat-bed and circular crochet machines.	2	3	-	-
PC2. Describe the types of crochet stitches used in machine crochet, such as chain stitch, slip stitch, and double crochet.	2	3	-	-
PC3. Explain the distinction between fully automated and semi-automated crochet machines and their impact on production.	2	3	-	-
PC4. Explain the role of computerised crochet machines in modern manufacturing, including pattern programming and design customisation.	2	3	-	-
PC5. Discuss the advantages and challenges of machine-made crochet in terms of speed, consistency, and mass production compared to hand crochet.	2	3	-	-
<i>Start and monitor the machine</i>	8	12	-	-
PC6. Start the machine and monitor the initial stages of production to ensure correct pattern repeat and smooth operation.	2	3	-	-
PC7. Check yarn feed regularly to avoid tangling or slipping from the yarn feeders.	2	3	-	-
PC8. Ensure that the machine runs at the prescribed speed, optimising production efficiency without compromising fabric quality.	2	3	-	-
PC9. Observe the initial output for any irregularities in stitch formation, gauge, or yarn tension.	2	3	-	-
<i>Address operational interruptions</i>	8	15	-	-
PC10. Recognise signs of malfunction, such as thread breakage or machine jamming, and stop the machine immediately.	2	3	-	-

Qualification Pack

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
PC11. Correct thread breaks by re-threading the machine or adjusting the tension.	2	4	-	-
PC12. Fix any needle or hook issues, such as misalignment or wear, and ensure machine operation resumes without defects.	2	4	-	-
PC13. Regularly check the lubricating system to prevent machine overheating or excessive wear, and perform minor maintenance if necessary.	2	4	-	-
<i>Maintain production efficiency</i>	10	22	-	-
PC14. Ensure the machine runs at an optimal speed to meet production targets while maintaining fabric quality.	2	4	-	-
PC15. Adjust operational parameters like yarn tension, machine speed, or pattern settings to address any inefficiencies.	2	6	-	-
PC16. Conduct routine checks to monitor waste levels, ensuring that any excess yarn or fabric is kept to a minimum.	3	6	-	-
PC17. Record machine downtime, reasons for stoppages, and overall production output at regular intervals.	3	6	-	-

HCS/N7728: Conduct In-line and Post-production quality checks

Description

Conduct in-line and post-production quality checks to ensure the highest standards are met. In-line checks involve monitoring the crochet process for consistency in stitch quality, tension, and design accuracy during production. Post-production checks include inspecting finished products for defects, verifying measurements, and ensuring that items meet design specifications. Document any issues and implement corrective actions as needed to maintain product quality.

Scope

The scope covers the following :

- Perform In-line quality checks
- Conduct Post-production inspection
- Communication and documentation of quality records

Elements and Performance Criteria

Perform In-line quality checks

To be competent, the user/individual on the job must be able to:

- PC1.** Ensure that the pattern repeat is consistent and that no mistakes have occurred in stitching or alignment.
- PC2.** Measure fabric width and stitch density using rulers or dedicated measuring tools to verify that the product conforms to the design specification.
- PC3.** Inspect finished portions of the lace or trim for flaws such as skipped stitches, gaps, or unevenness.
- PC4.** Check for any irregularities in the yarn feeding process, including breaks, snags, or tangles that may affect pattern execution.

Conduct post-production inspection

To be competent, the user/individual on the job must be able to:

- PC5.** Use light boards or magnification tools to spot defects such as yarn inconsistencies, missed stitches, or errors in pattern formation.
- PC6.** Perform additional testing, such as stretch, durability, and shrinkage tests, to ensure the final product meets quality standards.
- PC7.** Separate defective items and initiate necessary repairs or re-processing for reusability.
- PC8.** Maintain a quality record, documenting all products inspected, defects found, and corrective actions taken.

Communication and documentation of quality records

To be competent, the user/individual on the job must be able to:

- PC9.** Record and report recurring quality issues to senior operators or machine maintenance teams for further troubleshooting.
- PC10.** Maintain a traceable log of all inspected batches, noting the machine ID, inspector code, and quality status.

Qualification Pack

- PC11.** Ensure that all quality reports and defect logs are stored accurately for internal audits and regulatory purposes.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Knowledge of industry-specific quality standards and product specifications for crochet items, including acceptable variations in stitch formation, texture, and overall appearance.
- KU2.** Understanding of in-line quality control checks during the production process, such as inspecting stitches, yarn tension, and machine settings to ensure the product is within quality limits.
- KU3.** Knowledge of the methods used to assess the final product after production, ensuring it meets all the required specifications before packaging or distribution.
- KU4.** Ability to identify defects such as irregular stitch formation, broken threads, uneven tension, or colour inconsistencies during the quality checks.
- KU5.** Understanding how to use measuring tools (e.g., rulers, calipers) to check the size and dimensions of the crochet fabric, ensuring it meets the design requirements.
- KU6.** Knowledge of how to assess the quality of the crocheted fabric for flaws such as holes, loose stitches, or uneven areas, and the techniques to address or mark these issues.
- KU7.** Ability to inspect the yarn for consistency in thickness, colour, and texture, ensuring the material used is appropriate for the intended crochet item.
- KU8.** Understanding how to adjust machine settings (e.g., tension, speed, yarn feed) based on feedback from quality checks to prevent future defects.
- KU9.** Knowledge of methods to test the durability of the crochet product, including evaluating its ability to withstand wear, tear, and washing without significant damage.
- KU10.** Understanding the final steps of post-production quality checks, including evaluating finishing elements such as stitching edges, colour fastness, and overall presentation of the product.
- KU11.** Knowledge of how to document quality checks, including recording findings, any corrective actions taken, and overall product assessments for quality assurance purposes.
- KU12.** Understanding how to ensure that crochet products comply with local and international regulations, including safety, labelling, and packaging requirements.
- KU13.** Ability to report quality issues promptly to the appropriate departments, ensuring that defects are documented, addressed, and rectified before the product reaches the customer.
- KU14.** Understanding how to perform root cause analysis when recurring defects are identified, to pinpoint underlying issues in materials, machine operation, or the production process.
- KU15.** Awareness of how consistent quality checks impact customer satisfaction, focusing on producing products that meet or exceed customer expectations in terms of appearance, durability, and functionality.

Generic Skills (GS)

User/individual on the job needs to know how to:

Qualification Pack

- GS1.** Carefully inspecting the crochet products for any defects or inconsistencies during both in-line and post-production checks to ensure they meet quality standards.
- GS2.** Using analytical skills to assess the quality of the product, determine the root cause of defects, and take appropriate corrective actions.
- GS3.** Quickly identifying quality issues during production and determining the most effective solution to address defects, such as adjusting machine settings or changing materials.
- GS4.** Efficiently conducting quality checks without causing delays in the production schedule, ensuring that both in-line and post-production inspections are completed promptly.
- GS5.** Effectively communicating with production teams, supervisors, and quality assurance staff regarding the findings of quality checks and suggesting improvements.
- GS6.** Making informed decisions based on quality assessments, such as determining whether a product is fit for further processing, needs repairs, or should be discarded.
- GS7.** Adjusting to changes in production requirements, materials, or machine settings, and ensuring quality control measures remain effective under varying conditions.
- GS8.** Maintaining clear documentation of quality check results, including any issues found and corrective actions taken, to ensure consistency and traceability in quality control.
- GS9.** Working collaboratively with machine operators, designers, and other team members to address quality concerns and ensure high standards throughout the production process.
- GS10.** Handling the pressure of maintaining high-quality standards while meeting tight production deadlines, ensuring both quality and efficiency are maintained.
- GS11.** Proficient in conducting thorough in-line and post-production quality checks, using appropriate tools and techniques to assess the crochet products against required standards.
- GS12.** Skilled in detecting defects such as stitch irregularities, colour inconsistencies, yarn issues, or machine malfunctions during the production process, and resolving them effectively.
- GS13.** Knowledge of industry-specific quality standards, regulations, and best practices to ensure that all crochet products meet required specifications and legal requirements.
- GS14.** Ability to adjust machine settings based on quality check feedback, such as modifying tension, stitch patterns, or yarn feed to resolve issues.
- GS15.** Expertise in conducting tests to assess the durability of the crochet products, including evaluating their resistance to wear, tear, and laundering.
- GS16.** Skilled in documenting findings from quality checks, including defect types, corrective actions, and overall product quality status, for tracking and accountability.
- GS17.** Ability to analyse recurring defects, perform root cause analysis, and implement corrective measures to prevent future issues in production.
- GS18.** Understanding how quality checks impact customer satisfaction and ensuring that all products meet the standards expected by customers.
- GS19.** Applying feedback from quality checks to continuously improve production processes, materials, and machine settings for better product quality and efficiency.
- GS20.** Proficient in using tools such as measuring devices, colour checkers, and fabric testers to accurately assess product quality during inspections.

HCS/N7729: Perform Finishing and Packaging of Machine-made crochet products

Description

Perform finishing and packaging of machine-made crochet products by inspecting each item for quality, trimming any loose threads, and folding or rolling them neatly. Package the products in eco-friendly materials, ensuring labels highlight their machine-made nature. Make sure the packaging is secure and visually appealing, ready for distribution.

Scope

The scope covers the following :

- Perform product finishing
- Execute appropriate packaging
- Store and dispatch finished goods

Elements and Performance Criteria

Perform product finishing

To be competent, the user/individual on the job must be able to:

- PC1.** Carefully trim excess yarn threads and uneven edges, ensuring the product is neat and ready for finishing.
- PC2.** Use steam finishers or heat presses to treat the product, setting the shape and reducing shrinkage.
- PC3.** Reinspect the fabric after steaming or pressing to confirm no colour bleeding, shrinkage, or distortion has occurred.
- PC4.** Perform any necessary quality checks, such as testing for fastness in colour and overall durability.

Execute appropriate packaging

To be competent, the user/individual on the job must be able to:

- PC5.** Roll or fold the finished lace or crochet products according to buyer requirements, ensuring that the product is not damaged during handling.
- PC6.** Use eco-friendly materials to pack the products, such as biodegradable plastic or cotton bags, to enhance the product's market appeal.
- PC7.** Label each package with essential details such as the batch number, fabric type, colour, and manufacturing date.

Store and dispatch finished goods

To be competent, the user/individual on the job must be able to:

- PC8.** Store the finished products in clean, dry areas to avoid contamination, shrinkage, or mildew.
- PC9.** Follow FIFO (First In, First Out) dispatch methods to ensure that older stock is shipped first to maintain product freshness.
- PC10.** Ensure that dispatch records are maintained for every batch, detailing shipment details and destination.

Qualification Pack

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Understanding various methods to finish crochet products, such as trimming threads and reinforcing seams for a polished look.
- KU2.** Knowledge of maintaining neat edges, consistent stitching, and clean finishes to meet aesthetic standards.
- KU3.** Ensuring all crochet items are free from defects like loose threads or uneven edges during the finishing stage.
- KU4.** Knowledge of selecting the right packaging materials to protect and present the product effectively.
- KU5.** Understanding how to package products based on size and weight, ensuring they are secure and well-presented.
- KU6.** Awareness of the importance of correct labeling, including care instructions and branding for consumer clarity.
- KU7.** Ability to include accurate care instructions with each product for proper maintenance.
- KU8.** Understanding the use of branded or decorative packaging elements to enhance the product's appeal.
- KU9.** Familiarity with eco-friendly packaging materials and practices to reduce environmental impact.
- KU10.** Conducting a final inspection of products to ensure they meet quality standards before packaging.
- KU11.** Knowledge of optimising the finishing and packaging process to maintain efficiency and meet deadlines.
- KU12.** Understanding how automated packaging systems can enhance consistency and efficiency in packing.
- KU13.** Ensuring products are safely packed with protective materials to avoid damage during shipping.
- KU14.** Preparing products for retail display, making sure they look appealing and professional.
- KU15.** Awareness of packaging regulations, ensuring all products comply with legal standards.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Ensuring the crochet product is free from defects like loose threads and inconsistencies before finishing.
- GS2.** Efficiently managing the finishing and packaging process without causing delays in production timelines.
- GS3.** Addressing any issues that arise during the finishing or packaging process, such as incorrect sizing or defects in the product.
- GS4.** Keeping the workspace organised to ensure smooth handling and packaging of products.
- GS5.** Communicating effectively with team members to ensure consistency and quality during finishing and packaging.

Qualification Pack

- GS6.** Making quick decisions about whether a product is ready for packaging or requires further attention.
- GS7.** Adjusting to changes in packaging requirements or finishing techniques to accommodate new designs or product lines.
- GS8.** Managing time and tasks efficiently to maintain product quality while meeting deadlines.
- GS9.** Using hands skillfully to perform detailed tasks such as stitching, folding, or packaging with precision.
- GS10.** Ensuring the products presentation meets customer expectations and aligns with market demands.
- GS11.** Performing thorough checks to ensure products meet the required quality standards before packaging.
- GS12.** Proficient in choosing the right packaging materials and techniques to protect the product while making it appealing for retail.
- GS13.** Understanding the industry-specific requirements for product presentation and packaging, ensuring compliance with regulations.
- GS14.** Applying accurate labels, including care instructions and branding, to enhance the products marketability.
- GS15.** Conducting inspections to detect any defects in the product and taking appropriate actions to resolve them.
- GS16.** Implementing eco-friendly packaging options and sustainable materials where possible.
- GS17.** Working effectively with other team members to ensure the efficient and smooth execution of finishing and packaging tasks.
- GS18.** Proficient in using any automated packaging systems or tools to streamline the packaging process.
- GS19.** Creating a visually appealing final product that is ready for retail display, maintaining consistency in the presentation.
- GS20.** Ensuring that packaging complies with legal standards, including product safety and consumer information.

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Qualification Pack

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Qualification Pack

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
