HCS/Q7901: Agarbatti Maker

Brief Job Description

An Agarbatti Maker is a skilled worker who prepares incense sticks by mixing fragrant materials, rolling them onto bamboo sticks, and drying them for packaging. This traditional craft combines precision, scent blending, and manual dexterity.

Personal Attributes

An Agarbatti Maker should have good hand-eye coordination, attention to detail, and patience for repetitive tasks. A strong sense of smell and cleanliness are also important to maintain quality and consistency in fragrance and appearance.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [HCS/N7911: Raw material preparation using discarded flowers](#)
2. [HCS/N7912: Carry out the process of Rolling and Shaping of Agarbatti](#)
3. [HCS/N7914: Process of making Fragrance](#)
4. [HCS/N7913: Carry out the process of Quality control and Sustainable packaging](#)

HCS/N7911: Raw material preparation using discarded flowers

Description

This unit is about efficiently collecting, sorting, and preparing raw materials for the production of Agarbatti using discarded flowers.

Scope

The scope covers the following :

- Raw material Selection
- Use of Discarded flowers for making Agarbatti
- Mixing of ingredients

Elements and Performance Criteria

Raw Material Selection

To be competent, the user/individual on the job must be able to:

- PC1.** Ensure proper sourcing of discarded flowers from temples, ensuring that they are free from any toxic materials or pollutants.
- PC2.** Inspect flowers for freshness and separate usable flowers from any decayed or contaminated ones.
- PC3.** Choose high-quality bamboo sticks, charcoal powder, and natural adhesives to complement the flower powder.
- PC4.** Ensure that the selected materials meet industry standards for fragrance retention and quality.

Use of Discarded Flowers for Making Agarbatti

To be competent, the user/individual on the job must be able to:

- PC5.** Dry the selected flowers in sunlight or controlled drying equipment to remove all moisture content without affecting the aroma.
- PC6.** Grind the dried flowers into a fine powder suitable for mixing with other Agarbatti ingredients.
- PC7.** Ensure that the flower powder is uniform in texture and free from large particles or impurities.
- PC8.** Properly dispose of any non-usable flower waste in an environmentally responsible manner.

Mixing of Ingredients

To be competent, the user/individual on the job must be able to:

- PC9.** Accurately measure and mix the flower powder with other ingredients like charcoal powder, jigat (adhesive), and fragrance oils.
- PC10.** Maintain a proper ratio of flower powder to other materials to ensure a balanced aroma in the final product.
- PC11.** Adjust the mixture as needed to create a dough that adheres well to the bamboo sticks.
- PC12.** Continuously check the consistency of the mixture to ensure it is smooth and easy to apply to the sticks without being too dry or too sticky.

Qualification Pack

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Understand the different types of flowers (e.g., roses, marigolds, jasmine) and their potential for use in Agarbatti making.
- KU2.** Knowledge of how to identify flowers that are free from contamination, harmful chemicals, or decay, and the impact of these on the final product quality.
- KU3.** Understand proper procedures for handling and inspecting flowers, including checking for freshness and quality before processing.
- KU4.** Know the correct storage conditions to maintain the quality of flowers and prevent mold or spoilage.
- KU5.** Know other essential raw materials such as bamboo sticks, charcoal powder, natural adhesives (e.g., jigat), and essential oils, and their role in Agarbatti production.
- KU6.** Knowledge of appropriate drying techniques to remove moisture from discarded flowers without affecting their fragrance or quality.
- KU7.** Know the process of grinding dried flowers into fine powder, and how the particle size affects the quality and consistency of the Agarbatti.
- KU8.** Knowledge of eco-friendly methods for disposing of unusable flower waste, ensuring minimal environmental impact.
- KU9.** Understanding the correct ratio to create a balanced mixture for Agarbatti making.
- KU10.** Know the effect that different proportions of ingredients have on the fragrance, burning time, and quality of the final product.
- KU11.** Knowledge of proper mixing techniques to ensure a uniform and consistent dough that adheres well to the bamboo sticks.
- KU12.** Awareness of troubleshooting common issues in the mixing process, such as dryness, excessive stickiness, or poor adherence to bamboo sticks, and how to adjust the mixture accordingly.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Ability to effectively communicate with suppliers and workers regarding the sourcing and quality of discarded flowers and other raw materials.
- GS2.** Skill in performing basic arithmetic to measure and proportion ingredients accurately during the mixing process (e.g., calculating ratios of flower powder to charcoal or adhesive).
- GS3.** Ability to identify and resolve issues during the Agarbatti-making process, such as inconsistent ingredient mixing or subpar quality of raw materials.
- GS4.** Inspecting flowers thoroughly for freshness and contamination to ensure high-quality raw material selection.
- GS5.** Maintaining the proper texture and consistency of the mixture for uniform Agarbatti rolling.
- GS6.** Skill in efficiently managing time during the flower drying and material preparation processes to ensure timely production of Agarbatti.

Qualification Pack

- GS7.** Professional responsibility in adopting and promoting sustainable practices by utilizing discarded flowers and minimizing waste.
- GS8.** Ability to plan and schedule production tasks in coordination with the drying process and the availability of raw materials.
- GS9.** Maintain proper storage and drying procedures to prevent contamination.
- GS10.** Maintaining hygienic conditions throughout the Agarbatti-making process to ensure product safety and quality.

HCS/N7912: Carry out the process of Rolling and Shaping of Agarbatti

Description

This unit covers the competencies required to efficiently roll and shape agarbatti using prepared dough. The process involves hand-rolling or using a machine to achieve the desired shape, size, and consistency of incense sticks, ensuring uniformity and quality standards are met.

Scope

The scope covers the following :

- Hand Rolling or Machine Rolling
- Size and Weight consistency
- Proper drying techniques

Elements and Performance Criteria

Hand Rolling or Machine Rolling

To be competent, the user/individual on the job must be able to:

- PC1.** Apply the prepared incense dough or paste evenly onto bamboo sticks by hand, ensuring the mixture adheres smoothly along the stick without lumps.
- PC2.** Ensure uniformity in the thickness and even distribution of the paste along the entire length of each stick.
- PC3.** Operate Agarbatti rolling machines correctly, adjusting settings to ensure uniform coating of the dough on bamboo sticks.
- PC4.** Monitor machine operations for consistent rolling, ensuring the machine doesn't cause excessive breakage or uneven application of the paste.

Size and Weight Consistency

To be competent, the user/individual on the job must be able to:

- PC5.** Ensure that the length of each rolled Agarbatti is consistent, following specified product standards (e.g., 8-inch or 9-inch sticks).
- PC6.** Regularly measure the thickness of the incense sticks to ensure that they fall within acceptable tolerance levels.
- PC7.** Check the weight of the incense sticks after rolling, ensuring uniformity across batches. Adjust the dough application if weight inconsistencies are detected.
- PC8.** Make adjustments during the rolling process to maintain consistent weight and size across all sticks in a batch.

Proper Drying Techniques

To be competent, the user/individual on the job must be able to:

- PC9.** Arrange rolled Agarbatti sticks on drying racks in a well-ventilated space, ensuring even airflow around each stick for uniform drying.
- PC10.** Monitor temperature and humidity levels in the drying area to prevent moisture retention or cracking due to rapid drying.

Qualification Pack

- PC11.** Ensure that the Agarbatti sticks are dried for the recommended duration, depending on the climate and the type of dough mixture used.
- PC12.** Regularly inspect the sticks during the drying process to ensure they do not crack, bend, or break due to improper drying techniques.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Understand the correct hand-rolling techniques for applying dough evenly on bamboo sticks, ensuring smoothness and uniform thickness.
- KU2.** Know the traditional hand-rolling practices, including the amount of dough required for each stick and the pressure needed to avoid breakage.
- KU3.** Awareness of the benefits and challenges of hand rolling, such as maintaining consistency across a large batch.
- KU4.** Understand how to operate different types of Agarbatti rolling machines, including adjusting the machine settings for dough thickness and stick length.
- KU5.** Know the troubleshooting common machine issues, such as uneven rolling, machine malfunctions, or dough wastage.
- KU6.** Know the standard sizes for Agarbatti sticks (e.g., 8-inch, 9-inch) and how to maintain these dimensions consistently during production.
- KU7.** Know the importance of uniform stick thickness and the impact of deviations on burning quality, product appearance, and customer satisfaction.
- KU8.** Know the acceptable weight range for each Agarbatti stick and how to adjust dough application to meet these standards.
- KU9.** Knowledge of ideal drying conditions for Agarbatti, including temperature, humidity, and ventilation requirements to prevent moisture retention and cracking.
- KU10.** Know the different drying methods (e.g., sun drying, mechanical drying) and how to select the most suitable method based on environmental conditions and production scale.
- KU11.** Knowledge of optimal drying times for different types of dough mixtures and climate conditions to ensure that the Agarbatti sticks are fully dried before packaging.
- KU12.** Know the impact of over-drying or under-drying and how to avoid these issues.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Ability to clearly communicate with team members and supervisors to coordinate the rolling and shaping processes effectively, whether hand-rolling or using machines.
- GS2.** Skill in reporting any issues related to size or weight inconsistencies, machine malfunctions, or drying irregularities to the relevant personnel.
- GS3.** Ability to read and understand work instructions, machine settings, and quality standards related to the size, weight, and drying of Agarbatti.
- GS4.** Identify and address issues in the rolling process, such as uneven dough application, stick breakage, or improper drying techniques.

Qualification Pack

- GS5.** Work effectively in a team, particularly when collaborating with others in the hand-rolling process or operating machines.
- GS6.** Keen attention to detail when hand-rolling or operating machines to ensure that each Agarbatti stick meets the specified size, weight, and shape requirements.
- GS7.** Focus on inspecting the incense sticks during and after rolling to detect any irregularities in thickness, length, or coating.
- GS8.** Ability to monitor and manage drying times to ensure the Agarbatti sticks are properly dried within the required timeframe without over- or under-drying.
- GS9.** Performing quality checks on the size, weight, and consistency of the Agarbatti sticks after rolling and shaping, making necessary adjustments to improve product quality.
- GS10.** Ability to adapt to different production methods, such as switching between hand-rolling and machine-rolling techniques based on demand or production requirements.

HCS/N7914: Process of making Fragrance

Description

This NOS describes the skills, knowledge, and understanding required to create and apply fragrances specifically for Agarbatti.

Scope

The scope covers the following :

- Selection and Preparation of Raw Materials
- Formulation, Mixing and Aging
- Filtration, Quality control and Testing

Elements and Performance Criteria

Selection and Preparation of Raw Materials

To be competent, the user/individual on the job must be able to:

- PC1.** Select appropriate natural and synthetic ingredients such as essential oils, Rose, Sandalwood, Jasmine and Lavender for the desired scent profile (Musk, Amber, Citrus, Ocean Breeze, Lavender and Peach Blossom).
- PC2.** Ensure all materials meet quality standards and comply with safety and regulatory guidelines.
- PC3.** Measure and prepare ingredients according to the formulation recipe.

Formulation, Mixing, and Aging

To be competent, the user/individual on the job must be able to:

- PC4.** Accurately blend ingredients in correct ratios, ensuring uniform mixing.
- PC5.** Ensure the mixture is prepared in a contamination-free environment.
- PC6.** Store the scent mixture in dark, airtight containers for aging, allowing the fragrance to mature.
- PC7.** Monitor the aging process to ensure the fragrance's balance and harmony.

Filtration, Quality Control, and Testing

To be competent, the user/individual on the job must be able to:

- PC8.** Filter the scent solution to remove impurities and achieve a clear product.
- PC9.** Conduct quality control checks to ensure the scent matches the intended profile and chemical properties.
- PC10.** Ensure compliance with safety standards and conduct necessary allergen and dermatological tests.
- PC11.** Ensure even and consistent application of the fragrance solution to the Agarbatti sticks, either through dipping or spraying, to achieve uniform scent distribution.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

Qualification Pack

- KU1.** Understand the properties and quality indicators of different fragrance raw materials, including essential oils, absolutes, and aroma compounds.
- KU2.** Knowledge of sensory evaluation techniques to assess raw materials' aroma strength, consistency, and purity.
- KU3.** Familiarity with regulatory standards and industry guidelines for safe storage, handling, and transport of raw materials.
- KU4.** Importance of maintaining records for inventory management, traceability, and quality control.
- KU5.** Knowledge of environmental conditions (e.g., temperature and humidity) and their impact on fragrance stability and quality during mixing.
- KU6.** Importance of batch records for tracking adjustments and ensuring consistency across production runs.
- KU7.** Understanding of the chemical interactions between different fragrance components and how aging affects the final scent.
- KU8.** Awareness of quality control standards for monitoring mixture consistency, color, and other sensory attributes.
- KU9.** Knowledge of filtration techniques and equipment types suitable for different fragrance formulations.
- KU10.** Understanding of the purpose and procedures for removing particulates and impurities from fragrance mixtures.
- KU11.** Principles of olfactory testing to ensure the scent aligns with the intended formulation and product specifications.
- KU12.** Documentation practices for quality control, including recording any deviations and corrective actions.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Attention to detail in measuring and mixing raw materials to ensure consistency and accuracy in fragrance formulation.
- GS2.** Sensory acuity, especially in olfactory assessment, to detect variations in aroma strength and profile at different stages.
- GS3.** Technical expertise in using fragrance production tools and equipment, such as filtration apparatus, mixers, and testing instruments.
- GS4.** Competence in quality assurance methods, including filtration and olfactory testing, to uphold product standards.
- GS5.** Effective time management to ensure each stage, from raw material selection to aging, is completed within the required timeline.
- GS6.** Basic numeracy skills for calculating measurements, ratios, and percentages in formulation processes.
- GS7.** Proficiency in record-keeping to maintain clear documentation on batches, ingredients, and quality control results.
- GS8.** Critical thinking and problem-solving skills to address issues in scent balance, ingredient compatibility, or quality control.

Qualification Pack

- GS9.** Knowledge of regulatory and safety compliance to prevent contamination and ensure safe handling and storage of materials.
- GS10.** Adaptability to modify formulations and processes in response to quality testing outcomes or customer feedback.

HCS/N7913: Carry out the process of Quality control and Sustainable packaging

Description

This unit outlines the skills and knowledge required to implement quality control measures and sustainable packaging practices in the production of agarbattis.

Scope

The scope covers the following :

- Quality Standards of Agarbatti
- Sustainable packaging
- Documentation and Record Keeping

Elements and Performance Criteria

Quality Standards of Agarbatti

To be competent, the user/individual on the job must be able to:

- PC1.** Inspect the Agarbatti for uniform thickness, length, and weight, ensuring adherence to prescribed product standards.
- PC2.** Check for smooth and even application of incense dough on the sticks, without visible cracks, lumps, or uneven patches.
- PC3.** Conduct tests to verify the burning time of each batch of Agarbatti, ensuring consistency and quality in combustion.
- PC4.** Conduct sensory evaluations (sight, smell) to ensure that the Agarbatti meets aesthetic and olfactory expectations for consumers.
- PC5.** Measure the stick length and diameter using appropriate tools (e.g., rulers) to ensure conformity to specified dimensions.
- PC6.** Inspect for any foreign materials or contaminants that may compromise product quality and safety.

Sustainable Packaging

To be competent, the user/individual on the job must be able to:

- PC7.** Use eco-friendly and biodegradable packaging materials, such as recycled paper, cardboard, or cloth bags, to package Agarbatti sticks.
- PC8.** Ensure the packaging provides adequate protection to maintain the fragrance and quality of the Agarbatti during storage and transportation.
- PC9.** Label the packages with product details, including size, weight, fragrance, and eco-friendly certifications, ensuring clarity for consumers.
- PC10.** Verify that labels contain accurate information about the product's environmental impact, including certifications such as "biodegradable" or "recyclable."

Documentation and Record Keeping

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC11.** Create and maintain comprehensive records of all quality control inspections, including date, batch number, inspector name, and inspection results to ensure traceability and accountability.
- PC12.** Document the sourcing and specifications of sustainable packaging materials used, including supplier details and eco-certifications.
- PC13.** Maintain records of packaging processes, including the methods used, materials applied, and any changes made during the packaging phase to ensure consistency and compliance with sustainability standards.
- PC14.** Keep a log of consumer feedback regarding packaging to inform ongoing improvements and adjustments to packaging strategies.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Understand the essential quality standards for Agarbatti, including specifications for thickness, length, weight, and appearance to ensure product consistency.
- KU2.** Knowledge of sensory evaluation techniques used to assess the visual and olfactory qualities of Agarbatti, ensuring it meets consumer expectations.
- KU3.** Familiarity with industry standards and regulations regarding product safety and quality, including permissible limits for contaminants and harmful substances.
- KU4.** Comprehend the importance of uniform burning properties, including burn time, smoke production, and fragrance intensity, and their impact on consumer satisfaction.
- KU5.** Understanding the principles of sustainable packaging, including the importance of using biodegradable, recyclable, or reusable materials to reduce environmental impact.
- KU6.** Know the various packaging methods and technologies that protect product integrity while minimizing waste and environmental harm.
- KU7.** Know the labeling requirements for Agarbatti packaging, including necessary product information, regulatory compliance, and eco-friendly certifications.
- KU8.** Knowledge of consumer trends and preferences regarding sustainable packaging and their influence on purchasing decisions.
- KU9.** Accurate documentation in quality control processes, including the impact on traceability, accountability, and compliance.
- KU10.** Know the standard procedures for maintaining records related to quality inspections, packaging processes, and consumer feedback, ensuring organized and accessible information.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Ensure proper coordination with team members to maintain consistency in quality control and packaging processes.
- GS2.** Know how to identify and rectify deviations in product quality by applying critical thinking and problem-solving techniques.

Qualification Pack

- GS3.** Ensure efficient time management during the quality control process to maintain productivity while ensuring standards.
- GS4.** Ensure proper organization of records and documentation to facilitate audits, regulatory checks, and internal reviews.
- GS5.** Know how to communicate effectively with supervisors and team members regarding quality concerns and packaging improvements.
- GS6.** Quality inspection reports and document records accurately, maintaining compliance with standard operating procedures.
- GS7.** Attention to detail when conducting visual inspections, ensuring product quality aligns with industry standards.
- GS8.** Know the types of sustainable packaging materials available and how to source eco-friendly options that comply with sustainability goals.
- GS9.** Ensure the application of analytical skills to assess data trends in quality control records and packaging performance.
- GS10.** Know how to evaluate packaging methods to maintain product freshness, quality, and fragrance during transportation and storage.
- GS11.** Familiarity with compliance regulations for product safety, packaging standards, and eco-friendly certifications.
- GS12.** Know how to use digital tools for data management, streamlining the documentation and record-keeping process.

HCS/N7910: Entrepreneurship skills for Agarbatti maker

Description

This unit focuses on the entrepreneurship skills required for Agarbatti makers, enabling them to start, run, and grow their incense stick-making business sustainably.

Scope

The scope covers the following :

- Entrepreneurial Mindset
- Business Planning
- Marketing and Branding
- Legal Compliance

Elements and Performance Criteria

Entrepreneurial Mindset

To be competent, the user/individual on the job must be able to:

- PC1.** Identify new opportunities in the market.
- PC2.** Exhibit risk-taking behavior when exploring innovative products.
- PC3.** Ensure a steady supply of raw materials from reliable sources.

Business Planning

To be competent, the user/individual on the job must be able to:

- PC4.** Create a comprehensive business plan outlining production, sales, and financial goals.
- PC5.** Research competitors and position the business effectively in the market.

Marketing and Branding

To be competent, the user/individual on the job must be able to:

- PC6.** Build a recognizable brand identity with quality products and good packaging.
- PC7.** Maintain accurate records of transactions, profits, and expenses.
- PC8.** Engage with customers through promotions, loyalty programs, and exceptional service.

Legal Compliance

To be competent, the user/individual on the job must be able to:

- PC9.** Adhere to local, state, and national laws regarding business operations.
- PC10.** Understand the legal formalities required to start and operate an Agarbatti business, including registration, certifications, and licenses.
- PC11.** Stay updated on the compliance requirements related to labor laws, intellectual property, and taxation.
- PC12.** Understand environmental and safety regulations specific to the incense stick-making sector.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

Qualification Pack

- KU1.** Understanding of how to identify business opportunities in the incense-making sector.
- KU2.** Step-by-step understanding of the production process: from mixing raw materials to rolling, drying, and packaging Agarbattis
- KU3.** Organizational skills required to manage production, marketing, and sales.
- KU4.** Techniques for conducting market research specific to Agarbatti products.
- KU5.** Understanding customer preferences, buying patterns, and trends in the Agarbatti market.
- KU6.** Analysis of competitors and strategies to differentiate ones products.
- KU7.** Understanding the cost structure of Agarbatti production, including raw materials, labor, and overheads.
- KU8.** Know the Importance of packaging and product presentation in the incense market.
- KU9.** Understanding labor laws, environmental regulations, and health and safety norms applicable to the Agarbatti sector.
- KU10.** Know the Intellectual property laws related to branding, packaging, and innovation in Agarbatti production.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Ability to read and understand basic instructions, labels, invoices, and legal documents.
- GS2.** Proficiency in basic arithmetic for calculations related to raw materials, costs, sales, and profits.
- GS3.** Ability to prioritize tasks and manage time efficiently in the production and sales processes.
- GS4.** Ability to quickly adapt to changing market demands, customer preferences, and industry trends.
- GS5.** Creative thinking to overcome challenges such as supply shortages, machinery breakdowns, or financial constraints.
- GS6.** Developing a growth-oriented mindset focused on identifying new opportunities in the Agarbatti industry.
- GS7.** Ability to build strong relationships with customers by understanding their needs and preferences.
- GS8.** Ability to maintain high standards of quality during every stage of the Agarbatti production process.
- GS9.** Understanding of budgeting, pricing, and cost management to ensure profitability.
- GS10.** Understanding of branding techniques to create a distinct identity for the Agarbatti business.
- GS11.** Skills in exploring new product variations, such as eco-friendly, organic, or themed Agarbattis.
- GS12.** Skills to negotiate with suppliers for better prices and terms for raw materials.
- GS13.** Ability to train and mentor new team members, ensuring skill development and growth.
- GS14.** Understanding of sustainable business practices, such as using eco-friendly materials and recycling waste.

HCS/N9908: Working in a Team

Description

This unit is about working as part of a team in the process.

Elements and Performance Criteria

Commitment and trust

To be competent, the user/individual on the job must be able to:

- PC1.** Be accountable to ones own role in whole process.
- PC2.** Perform all roles with full responsibility.

Communication

To be competent, the user/individual on the job must be able to:

- PC3.** Report problems faced during the process.
- PC4.** Talk politely with other team members and colleagues.
- PC5.** Submit daily report of own performance.

Adaptability

To be competent, the user/individual on the job must be able to:

- PC6.** Adjust in different work situations.
- PC7.** Give due importance to others point of view.
- PC8.** Avoid conflicting situations.

Creative freedom

To be competent, the user/individual on the job must be able to:

- PC9.** Develop new ideas for work procedures
- PC10.** Improve upon the existing techniques to increase process efficiency

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** General rules and regulations in the sector.
- KU2.** Procedure followed to get the final output.
- KU3.** Safe working practices to be adopted.
- KU4.** Reporting to the supervisor or higher authority about any grievances faced.
- KU5.** Understanding the importance of the previous and next step of the process.
- KU6.** Process flow in the handicraft section.
- KU7.** Material sequence of flow.
- KU8.** Functions of different parts of product development.
- KU9.** Tools and equipments used.
- KU10.** Guidelines for operating the equipment.
- KU11.** Safety procedures to be followed as applicable.

Qualification Pack

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Prepare status and progress reports.
- GS2.** Write memos and e-mail to co-workers, and vendors to provide them with work updates and to request appropriate information without English language errors regarding grammar or sentence construct.
- GS3.** Keep abreast with the latest knowledge by reading brochures, pamphlets, and product information sheets.
- GS4.** Discuss task lists, schedules, and work-loads with co-workers.
- GS5.** Keep co-workers and supervisors informed about progress.
- GS6.** Make decisions pertaining to the concerned area of work.
- GS7.** Plan and organize service feedback files/documents.
- GS8.** Manage relationships with customers.
- GS9.** Build customer relationships and use customer centric approach.
- GS10.** Think through the problem, evaluate the possible solution(s) and suggest an optimum /best possible solution(s).
- GS11.** Identify immediate or temporary solutions to resolve delays.
- GS12.** Use the existing data to arrive at specific data points.
- GS13.** Apply, analyze, and evaluate the information gathered from observation, experience, reasoning, or communication, as a guide to thought and action.

DGT/VSQ/N0101: Employability Skills (30 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

PC1. understand the significance of employability skills in meeting the job requirements

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

PC2. identify constitutional values, civic rights, duties, personal values and ethics and environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

PC3. explain 21st Century Skills such as Self-Awareness, Behavior Skills, Positive attitude, self-motivation, problem-solving, creative thinking, time management, social and cultural awareness, emotional awareness, continuous learning mindset etc.

Basic English Skills

To be competent, the user/individual on the job must be able to:

PC4. speak with others using some basic English phrases or sentences

Communication Skills

To be competent, the user/individual on the job must be able to:

PC5. follow good manners while communicating with others

PC6. work with others in a team

Qualification Pack

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

PC7. communicate and behave appropriately with all genders and PwD

PC8. report any issues related to sexual harassment

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

PC9. use various financial products and services safely and securely

PC10. calculate income, expenses, savings etc.

PC11. approach the concerned authorities for any exploitation as per legal rights and laws

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

PC12. operate digital devices and use its features and applications securely and safely

PC13. use internet and social media platforms securely and safely

Entrepreneurship

To be competent, the user/individual on the job must be able to:

PC14. identify and assess opportunities for potential business

PC15. identify sources for arranging money and associated financial and legal challenges

Customer Service

To be competent, the user/individual on the job must be able to:

PC16. identify different types of customers

PC17. identify customer needs and address them appropriately

PC18. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC19. create a basic biodata

PC20. search for suitable jobs and apply

PC21. identify and register apprenticeship opportunities as per requirement

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use basic spoken English language

KU6. Do and dont of effective communication

KU7. inclusivity and its importance

KU8. different types of disabilities and appropriate communication and behaviour towards PwD

KU9. different types of financial products and services

Qualification Pack

- KU10.** how to compute income and expenses
- KU11.** importance of maintaining safety and security in financial transactions
- KU12.** different legal rights and laws
- KU13.** how to operate digital devices and applications safely and securely
- KU14.** ways to identify business opportunities
- KU15.** types of customers and their needs
- KU16.** how to apply for a job and prepare for an interview
- KU17.** apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate effectively using appropriate language
- GS2.** behave politely and appropriately with all
- GS3.** perform basic calculations
- GS4.** solve problems effectively
- GS5.** be careful and attentive at work
- GS6.** use time effectively
- GS7.** maintain hygiene and sanitisation to avoid infection

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Qualification Pack

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Minimum Passing % at NOS Level: 50

(Please note: A Trainee must score the minimum percentage for each NOS separately as well as on the QP as a whole.)

Assessment Weightage

Compulsory NOS

National Occupational Standards	Theory Marks	Practical Marks	Project Marks	Viva Marks	Total Marks	Weightage
HCS/N7911.Raw material preparation using discarded flowers	28	72	-	-	100	10
HCS/N7912.Carry out the process of Rolling and Shaping of Agarbatti	32	68	-	-	100	20
HCS/N7914.Process of making Fragrance	34	66	-	-	100	20
HCS/N7913.Carry out the process of Quality control and Sustainable packaging	28	72	-	-	100	10
HCS/N7910.Entrepreneurship skills for Agarbatti maker	28	72	-	-	100	10
HCS/N9908.Working in a Team	29	71	-	-	100	10

TVET	Technical and Vocational Education and Training

Qualification Pack

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
