HCS/Q8101: Coir Fibre Artisan

Brief Job Description

A Coir Fibre Artisan combines traditional skills with a modern touch, creating environmentally friendly products. They are meticulous, innovative, and dedicated to quality, blending age-old techniques with contemporary design. Their work reflects both cultural heritage and modern aesthetic sensibilities.

Personal Attributes

A Coir Fibre Artisan is meticulous and innovative, blending traditional craftsmanship with modern design sensibilities. They are patient, detail-oriented, and adaptable, committed to producing high-quality, sustainable products that meet contemporary market demands.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [HCS/N8105: Carry out the process of Making Coir fibre](#)
2. [HCS/N8106: Carry out the Process of making Coir products](#)

Qualification Pack

HCS/N8105: Carry out the process of Making Coir fibre

Description

The unit focuses on arranging raw materials, producing coir fibre, and ensuring the quality of the prepared coir fibre.

Scope

The scope covers the following :

- Collection and Preparation of Raw Materials and Tools
- Coir Fibre Extraction Using Traditional Methods
- Coir Fibre Extraction Using Modern Machines
- Spinning and Twisting of Coir Fibre
- Tool Maintenance and Workplace Safety
- Quality Control and Record Maintenance

Elements and Performance Criteria

Collection and preparation of raw materials and tools

To be competent, the user/individual on the job must be able to:

- PC1.** Gather raw materials such as coconuts and husk for coir fibre production.
- PC2.** Gather traditional tools, such as iron rods and hand-beaters, as well as modern machines such as Dehusking machines, Defibering machines, and Refining machines.
- PC3.** Organise and arrange raw materials and tools at the workplace, ensuring accessibility and safety.
- PC4.** Transport any extra materials to the designated storage area to maintain workplace order.

Coir fibre extraction using traditional methods

To be competent, the user/individual on the job must be able to:

- PC5.** Dry coconut shells under sunlight for several days to aid in husk separation.
- PC6.** Soak dried coconut shells in water for over six months to soften the husk.
- PC7.** Remove the coconuts from the water and repeatedly beat them with an iron rod to remove the fibres.
- PC8.** Manually peel off the outer layer to separate the husk.
- PC9.** Bundle the husk and soak it again for further softening.
- PC10.** Use husk bundles in a water tank for two to four days for refinement.
- PC11.** Extract fibres by manually beating the soaked husk or using traditional tools.

Coir fibre extraction using modern machines

To be competent, the user/individual on the job must be able to:

- PC12.** Put the dried coconut shells into a Dehusking machine to separate the husk.
- PC13.** Transfer the husk to a Defibering machine to break it down into finer fibres.
- PC14.** Use a refining machine, locally known as 'kudu,' to remove unwanted particles and extract clean coir fibres.

Qualification Pack

PC15. Roll the refined fibres into bundles for easy handling and transportation.

Spinning and Twisting of Coir fibre

To be competent, the user/individual on the job must be able to:

PC16. Strengthen fibres by twisting two strands together using a traditional spinning wheel or a mechanised spinning machine.

PC17. Extend the fibre length by joining twine ends through friction or using a mechanised splicing tool.

PC18. Bundle the spun coir fibres and prepare large spools for further product manufacturing.

Tool maintenance and workplace safety

To be competent, the user/individual on the job must be able to:

PC19. Regularly clean traditional tools such as iron rods and hand-beaters to prevent rusting.

PC20. Perform routine checks on modern machines such as Dehusking and Defibering machines to ensure optimal performance.

PC21. Lubricate moving parts of machines to minimise wear and tear.

PC22. Report any mechanical issues immediately to avoid production delays.

PC23. Follow safety protocols, such as wearing protective gear and ensuring proper machine handling practices.

Quality control and record maintenance

To be competent, the user/individual on the job must be able to:

PC24. Inspect raw materials to ensure they meet quality standards before processing.

PC25. Monitor each stage of the production process to maintain consistent quality.

PC26. Record the quantity of materials used and fibres produced to track productivity.

PC27. Minimise wastage through careful handling and efficient processing techniques.

PC28. Prepare inspection reports and submit them to the supervisor for review.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. Understand the types and quality of coconuts used for coir fibre production.

KU2. Recognise the significance of soaking time and conditions required for husk softening.

KU3. Understand traditional methods like manual beating and peeling of husk.

KU4. Gain knowledge of modern machinery such as Dehusking machines, Defibering machines, refining machines (kudu), and spinning machines.

KU5. Comprehend each step in the coir fibre extraction process, from drying and soaking to spinning and bundling.

KU6. Understand the importance of fibre refinement and methods for achieving better quality.

KU7. Identify the correct usage of tools like iron rods, hand-beaters, and spinning wheels.

KU8. Learn the proper handling, maintenance, and troubleshooting of modern machines to prevent breakdowns.

KU9. Understand quality parameters for assessing coir fibres, such as strength, texture, and colour.

KU10. Understand safety protocols when handling sharp tools and operating machinery.

Qualification Pack

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Communicate effectively with team members and supervisors.
- GS2.** Perform basic calculations related to raw material quantities and production outputs.
Estimate soaking times and monitor processing durations.
- GS3.** Organise the workspace for smooth workflow and safety.
- GS4.** Follow the production process methodically, ensuring consistency.
- GS5.** Conduct quality checks at each stage of the process.
- GS6.** Identify defects in fibres and take corrective measures.
- GS7.** Clean and store traditional tools properly after use.
- GS8.** Perform regular maintenance checks on machines and report malfunctions promptly.
- GS9.** Ensure emergency equipment is accessible in case of accidents.
- GS10.** Maintain accurate records of material usage, production outputs, and inspection reports.

HCS/N8106: Carry out the Process of making Coir products

Description

This unit covers the process of crafting coir products from raw fibre to finished goods, ensuring quality and sustainability at every stage.

Scope

The scope covers the following :

- Preparing the Coir Fibres
- Spinning and Yarn Making
- Weaving and Braiding Techniques
- Product Shaping and Assembly
- Product Specification in Coir Product Making
- Product Detailing and Design Enhancement
- Quality Check and Finishing Touches
- Tool Maintenance and Upkeep

Elements and Performance Criteria

Preparing the Coir Fibres

To be competent, the user/individual on the job must be able to:

- PC1.** Select coir fibres based on the product type, ensuring suitable colour, texture, and durability.
- PC2.** Clean the fibres to remove impurities and unwanted remains and Soften the fibres through soaking and proper drying to improve flexibility.
- PC3.** Separate fibres into uniform strands for consistency in product production.

Spinning and Yarn Making

To be competent, the user/individual on the job must be able to:

- PC4.** Spin coir fibres into yarn using a traditional hand spindle or mechanised spinning wheel. Make sure that even twisting and tension while spinning to create a strong, uniform thread.
- PC5.** Test yarn strength and elasticity to ensure durability for different product applications. Wind the finished yarn into spools for quick handling during product construction.

Weaving and Braiding Techniques

To be competent, the user/individual on the job must be able to:

- PC6.** Select the appropriate weaving technique (handloom, power loom, or manual braiding) based on product design.
- PC7.** Set up the loom or workstation, ensuring that the fibres and tools are properly connected. Interlace coir fibres are designed to create even, tight weaves, ensuring strength and durability.
- PC8.** Maintain tension across the weave to prevent sagging or loose areas. Examine the weave periodically to ensure uniformity and address any irregularities.

Product Shaping and Assembly

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC9.** Measure and cut coir yarn to the required dimensions for specific products (e.g., mats, ropes, decors).
- PC10.** Create product components by binding, stitching, or knotting fibres securely.
- PC11.** Shape the product according to the design, using moulds or frames if required.
- PC12.** Enhance high-stress areas with additional fibre layers to enhance durability.
- PC13.** Maintain structural stability by securing joints and tightening weaves.

Product Specification in Coir Product Making

To be competent, the user/individual on the job must be able to:

- PC14.** Home décor making in coir involves crafting items like planters, show piece, wall hangings, etc. by shaping quality fibres, adding decorative touches, and ensuring durability.
- PC15.** Coir doormat making involves selecting sturdy fibres, weaving them into a tight, durable mat, adding patterns or borders, and ensuring quality for long-lasting use.
- PC16.** Coir rope weaving involves twisting strong fibres into sturdy strands, providing uniform thickness and durability for various applications.
- PC17.** Coir brush making involves bundling stiff fibres, securing them to a handle, trimming for uniformity, and ensuring durability for effective cleaning.

Product Detailing and Design Enhancement

To be competent, the user/individual on the job must be able to:

- PC18.** Trim excess fibres and smooth out rough edges for a polished finish.
- PC19.** Include decorative elements such as coloured fibres, patterns, or embellishments as per product design.
- PC20.** Apply protective treatments (natural oils, waterproof coatings) to increase product longevity.
- PC21.** Verify that the product design is aligned with customer preferences and market demands.

Quality Check and Finishing Touches

To be competent, the user/individual on the job must be able to:

- PC22.** Examine the product for uniformity in weave, strength, and overall craftsmanship.
- PC23.** Test the product's durability, load capacity, or flexibility, depending on its intended purpose. Remove any loose fibres, uneven knots, or other defects.
- PC24.** Perform a final quality inspection, ensuring the product meets established standards before packaging.

Tool Maintenance and Upkeep

To be competent, the user/individual on the job must be able to:

- PC25.** Clean tools such as spindles, looms, cutting shears, and moulds after each use to eliminate coir dust and fibres.
- PC26.** Inspect tools regularly for wear and damage, ensuring smooth operation and safety.
- PC27.** Lubricate rotating parts of spinning wheels and looms to maintain efficiency.
- PC28.** Sharpen cutting tools and replace worn-out components to ensure accurate cutting and shaping.
- PC29.** Store tools in a dry area to prevent rust and damage.
- PC30.** Maintain records of maintenance activities and replace tools as necessary to avoid production delays.

Knowledge and Understanding (KU)

Qualification Pack

The individual on the job needs to know and understand:

- KU1.** Understand the characteristics, types, and grades of coir fibres for different product applications.
- KU2.** Knowledge of fibre preparation techniques, including cleaning, soaking, drying, and softening processes.
- KU3.** Familiarity with spinning methods to create coir yarn, ensuring uniform tension and durability.
- KU4.** Awareness of various product-making techniques such as weaving, braiding, moulding, and stitching.
- KU5.** Understanding product-specific measurements and cutting techniques for accuracy and consistency.
- KU6.** Knowledge of assembling methods for creating products like mats, ropes, brushes, and home decor items.
- KU7.** Awareness of design enhancement techniques, including adding decorative elements and applying protective treatments.
- KU8.** Familiarity with quality control processes to ensure product strength, durability, and finish.
- KU9.** Understanding proper tool handling, maintenance, and storage practices to ensure efficiency and safety.
- KU10.** Awareness of eco-friendly practices and sustainable materials for responsible production.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Ability to clearly understand instructions, share ideas, and coordinate with team members.
- GS2.** Effectively plan and prioritise tasks to meet production deadlines.
- GS3.** Ensure precision in measurements, cutting, weaving, and assembling to maintain product quality.
- GS4.** Identify and resolve issues in the production process, such as irregular weaving or fibre inconsistencies.
- GS5.** Work efficiently in a team setting, supporting colleagues to enhance productivity.
- GS6.** Adjust to new techniques, tools, or market trends to improve product offerings.
- GS7.** Follow safety protocols while handling sharp tools and heavy materials to prevent accidents.
- GS8.** Maintain accurate records of materials used, production processes, and finished goods.
- GS9.** Understand customer preferences to ensure product designs align with market demands.
- GS10.** Adopt eco-friendly practices and promote the use of sustainable materials in product making.

HCS/N8526: Entrepreneurship Skills for Coir Fibre Artisan

Description

This NOS covers the key entrepreneurship skills required for a coir fibre artisan to establish, manage, and grow a coir-based enterprise.

Scope

The scope covers the following :

- Opportunity identification and market research
- Business planning and goal setting
- Product development and design innovation
- Branding and Marketing strategy
- Financial management
- Quality assurance and production efficiency
- Legal compliance and ethical practices
- Scaling and Sustainability

Elements and Performance Criteria

Opportunity identification and market research

To be competent, the user/individual on the job must be able to:

- PC1.** Identify various applications of coir fibre in products like mats, ropes, handicrafts, and other eco-friendly items.
- PC2.** Analyse market demand, consumer preferences, and eco-friendly trends.
- PC3.** Research competitors and find niche markets for unique coir products.
- PC4.** Explore collaborative activities with local artisans and cooperatives.

Business planning and goal setting

To be competent, the user/individual on the job must be able to:

- PC5.** Develop a clear vision, mission, and long-term goals for the coir industry.
- PC6.** Create a business plan, including product selection, pricing, and target customers.
- PC7.** Create initial investment, working capital, and revenue streams.
- PC8.** Identify risks and develop strategies to manage uncertainties.

Product development and design innovation

To be competent, the user/individual on the job must be able to:

- PC9.** Explore new designs and patterns for coir products.
- PC10.** Utilise traditional craftsmanship with modern techniques.
- PC11.** Create eco-friendly products by using natural dyes and minimising waste.
- PC12.** Ensure product durability, aesthetics, and functionality are aligned with the market trends.

Branding and Marketing strategy

To be competent, the user/individual on the job must be able to:

- PC13.** Establish a brand identity that emphasizes eco-friendly and cultural heritage.

Qualification Pack

PC14. Design attractive packaging that emphasises sustainability.

PC15. Use social media, e-commerce platforms, and local exhibitions to sell products.

PC16. Create narratives to connect customers with the artisan's journey.

Financial management

To be competent, the user/individual on the job must be able to:

PC17. Estimate the cost for raw materials, labour, and transportation.

PC18. Create pricing strategies that ensure profitability while remaining competitive.

PC19. Maintain accurate records of income, expenses, and profit margins.

PC20. Access financial support through loans, grants, or government schemes.

Quality assurance and production efficiency

To be competent, the user/individual on the job must be able to:

PC21. Implement quality control measures at every stage of production.

PC22. Train employees to improve productivity and reduce defects.

PC23. Reduce the use of raw materials to reduce waste and reduce costs.

PC24. Ensure that products meet customer expectations for durability and craftsmanship.

Legal compliance and ethical practices

To be competent, the user/individual on the job must be able to:

PC25. Register the business and obtain the necessary licenses.

PC26. Maintain compliance with labour laws, fair wages, and safe working conditions.

PC27. Adopt environmentally sustainable practices and adhere to pollution control regulations.

Scaling and Sustainability

To be competent, the user/individual on the job must be able to:

PC28. Discover new markets, including exports and online sales. Define product lines to cater to different market segments.

PC29. Implement sustainable measures, such as reusing coir waste.

PC30. Build partnerships with eco-friendly initiatives and local communities.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. Understand the fundamentals of entrepreneurship, including the risks and rewards of starting a coir fibre business.

KU2. Recognise the market demand for coir-based products and identify business opportunities in local, national, and international markets.

KU3. Gain in-depth knowledge of traditional coir-making processes, such as manual Dehusking, soaking, and hand-spinning.

KU4. Understand modern techniques and machinery like Dehusking machines, Defibering machines, refining machines (kudu), and spinning wheels.

KU5. Identify the types and quality of raw materials required, such as coconut husks, and understand the impact of soaking duration on fibre quality.

Qualification Pack

- KU6.** Understand the proper use and maintenance of traditional tools (e.g., iron rods, hand-beaters) and modern machines (e.g., Dehusking machines).
- KU7.** Understand inventory management to ensure a steady supply of raw materials without overstocking or wastage.
- KU8.** Understand cost calculation techniques, including raw material costs, labour, machinery maintenance, and overheads.
- KU9.** Understand the importance of creating unique selling propositions (USPs) for coir products.
- KU10.** Understand quality parameters such as fibre strength, texture, and colour.
- KU11.** Understand the legal and regulatory compliances required for running a coir-based business.
- KU12.** Gain knowledge about sustainable business practices and their role in long-term success.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Proficiency in traditional coir-making techniques like soaking, beating, and spinning.
- GS2.** Ability to clearly convey ideas and information to team members, suppliers, and customers.
- GS3.** Ability to assess fibre texture, strength, and consistency at every stage of production.
- GS4.** Active listening to understand customer preferences and respond appropriately.
- GS5.** Basic arithmetic for calculating costs, pricing, and profits.
- GS6.** Understanding units of measurement for raw materials and finished products.
- GS7.** Basic knowledge of online sales platforms and social media for product promotion.
- GS8.** Identifying production bottlenecks and implementing timely solutions.
- GS9.** Willingness to adopt new techniques or machinery to enhance productivity.
- GS10.** Coordinating with co-workers to ensure efficient workflow.
- GS11.** Identifying opportunities for product diversification, like coir mats, ropes, or eco-friendly handicrafts.
- GS12.** Ensuring timely delivery and maintaining product quality to build trust and loyalty.

HCS/N9908: Working in a Team

Description

This unit is about working as part of a team in the process.

Elements and Performance Criteria

Commitment and trust

To be competent, the user/individual on the job must be able to:

- PC1.** Be accountable to ones own role in whole process.
- PC2.** Perform all roles with full responsibility.

Communication

To be competent, the user/individual on the job must be able to:

- PC3.** Report problems faced during the process.
- PC4.** Talk politely with other team members and colleagues.
- PC5.** Submit daily report of own performance.

Adaptability

To be competent, the user/individual on the job must be able to:

- PC6.** Adjust in different work situations.
- PC7.** Give due importance to others point of view.
- PC8.** Avoid conflicting situations.

Creative freedom

To be competent, the user/individual on the job must be able to:

- PC9.** Develop new ideas for work procedures
- PC10.** Improve upon the existing techniques to increase process efficiency

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** General rules and regulations in the sector.
- KU2.** Procedure followed to get the final output.
- KU3.** Safe working practices to be adopted.
- KU4.** Reporting to the supervisor or higher authority about any grievances faced.
- KU5.** Understanding the importance of the previous and next step of the process.
- KU6.** Process flow in the handicraft section.
- KU7.** Material sequence of flow.
- KU8.** Functions of different parts of product development.
- KU9.** Tools and equipments used.
- KU10.** Guidelines for operating the equipment.
- KU11.** Safety procedures to be followed as applicable.

Qualification Pack

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Prepare status and progress reports.
- GS2.** Write memos and e-mail to co-workers, and vendors to provide them with work updates and to request appropriate information without English language errors regarding grammar or sentence construct.
- GS3.** Keep abreast with the latest knowledge by reading brochures, pamphlets, and product information sheets.
- GS4.** Discuss task lists, schedules, and work-loads with co-workers.
- GS5.** Keep co-workers and supervisors informed about progress.
- GS6.** Make decisions pertaining to the concerned area of work.
- GS7.** Plan and organize service feedback files/documents.
- GS8.** Manage relationships with customers.
- GS9.** Build customer relationships and use customer centric approach.
- GS10.** Think through the problem, evaluate the possible solution(s) and suggest an optimum /best possible solution(s).
- GS11.** Identify immediate or temporary solutions to resolve delays.
- GS12.** Use the existing data to arrive at specific data points.
- GS13.** Apply, analyze, and evaluate the information gathered from observation, experience, reasoning, or communication, as a guide to thought and action.

HCS/N9945: Maintaining workplace health and safety

Description

This unit provides Performance Criteria, Knowledge & Understanding, and Skills & Abilities required to comply with health, safety, and security requirements at the workplace and covers procedures to prevent, control, and minimize risk to self and others.

Scope

The scope covers the following :

- Comply with health, safety, and security requirements at work

Elements and Performance Criteria

Comply with health, safety, and security requirements at work

To be competent, the user/individual on the job must be able to:

- PC1.** comply with health and safety related instructions applicable to the workplace.
- PC2.** use and maintain personal protective equipment as per protocol.
- PC3.** carry out own activities in line with approved guidelines and procedures
- PC4.** maintain a healthy lifestyle and guard against dependency on intoxicants.
- PC5.** follow environment management system related procedures.
- PC6.** store materials and tools in line with manufacturers and organisational requirements
- PC7.** safely handle and move waste and debris.
- PC8.** minimize health and safety risks to self and others due to own actions
- PC9.** seek clarifications, from supervisors or other authorized personnel in case of perceived risks
- PC10.** monitor the workplace and work processes for potential risks and threats.
- PC11.** carry out periodic walk-through to keep work area free from hazards and obstructions, if assigned
- PC12.** report hazards and potential risks/ threats to supervisors or other authorized personnel
- PC13.** participate in mock drills/ evacuation procedures organized at the workplace
- PC14.** undertake first aid, fire-fighting and emergency response training, if asked to do so
- PC15.** take action based on instructions in the event of fire, emergencies or accidents
- PC16.** follow organisation procedures for evacuation when required

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** health and safety related practices applicable at the workplace
- KU2.** potential hazards, risks and threats based on nature of operations
- KU3.** organizational procedures for safe handling of tools

Qualification Pack

- KU4.** potential risks due to own actions and methods to minimize these
- KU5.** environmental management system related procedures at the workplace.
- KU6.** layout of the plant and details of emergency exits, escape routes, emergency equipment and assembly points
- KU7.** potential accidents and emergencies and response to these scenarios
- KU8.** reporting protocol and documentation required
- KU9.** details of personnel trained in first aid, fire-fighting and emergency response
- KU10.** actions to take in the event of a mock drills/ evacuation procedures or actual accident, emergency or fire.
- KU11.** occupational health and safety risks and methods
- KU12.** personal protective equipment and method of use
- KU13.** identification, handling and storage of hazardous substances
- KU14.** proper disposal system for waste and by-products
- KU15.** signage related to health and safety and their meaning
- KU16.** importance of sound health, hygiene and good habits
- KU17.** ill-effects of alcohol, tobacco and drugs

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** write in local language.
- GS2.** read measurement instructions
- GS3.** communicate orally with colleagues
- GS4.** follow organization rule-based decision making process
- GS5.** take decision with systematic course of actions and/or response
- GS6.** plan and organize your work to achieve targets and deadlines
- GS7.** manage relationships with customers
- GS8.** build customer relationships and use customer centric approach
- GS9.** think through the problem, evaluate the possible solution(s) and suggest an optimum /best possible solution(s)
- GS10.** identify immediate or temporary solutions to resolve delays
- GS11.** analyze data and activities.
- GS12.** pass on relevant information to others
- GS13.** apply, analyze, and evaluate the information gathered from observation, experience, reasoning, or communication, as a guide to thought and action

DGT/VSQ/N0101: Employability Skills (30 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

PC1. understand the significance of employability skills in meeting the job requirements

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

PC2. identify constitutional values, civic rights, duties, personal values and ethics and environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

PC3. explain 21st Century Skills such as Self-Awareness, Behavior Skills, Positive attitude, self-motivation, problem-solving, creative thinking, time management, social and cultural awareness, emotional awareness, continuous learning mindset etc.

Basic English Skills

To be competent, the user/individual on the job must be able to:

PC4. speak with others using some basic English phrases or sentences

Communication Skills

To be competent, the user/individual on the job must be able to:

PC5. follow good manners while communicating with others

PC6. work with others in a team

Qualification Pack

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

PC7. communicate and behave appropriately with all genders and PwD

PC8. report any issues related to sexual harassment

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

PC9. use various financial products and services safely and securely

PC10. calculate income, expenses, savings etc.

PC11. approach the concerned authorities for any exploitation as per legal rights and laws

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

PC12. operate digital devices and use its features and applications securely and safely

PC13. use internet and social media platforms securely and safely

Entrepreneurship

To be competent, the user/individual on the job must be able to:

PC14. identify and assess opportunities for potential business

PC15. identify sources for arranging money and associated financial and legal challenges

Customer Service

To be competent, the user/individual on the job must be able to:

PC16. identify different types of customers

PC17. identify customer needs and address them appropriately

PC18. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC19. create a basic biodata

PC20. search for suitable jobs and apply

PC21. identify and register apprenticeship opportunities as per requirement

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use basic spoken English language

KU6. Do and dont of effective communication

KU7. inclusivity and its importance

KU8. different types of disabilities and appropriate communication and behaviour towards PwD

KU9. different types of financial products and services

Qualification Pack

- KU10.** how to compute income and expenses
- KU11.** importance of maintaining safety and security in financial transactions
- KU12.** different legal rights and laws
- KU13.** how to operate digital devices and applications safely and securely
- KU14.** ways to identify business opportunities
- KU15.** types of customers and their needs
- KU16.** how to apply for a job and prepare for an interview
- KU17.** apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate effectively using appropriate language
- GS2.** behave politely and appropriately with all
- GS3.** perform basic calculations
- GS4.** solve problems effectively
- GS5.** be careful and attentive at work
- GS6.** use time effectively
- GS7.** maintain hygiene and sanitisation to avoid infection

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Element/ Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each Element/ PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
6. To pass the Qualification Pack assessment, every trainee should score the Recommended Pass % aggregate for the QP.
7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Qualification Pack

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Minimum Passing % at NOS Level: 50

(Please note: A Trainee must score the minimum percentage for each NOS separately as well as on the QP as a whole.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
