HSS/Q5801: Telehealth Services Coordinator

Brief Job Description

Telehealth Services Coordinator serves as point-of-contact for telehealth services at either referral/patient/primary health care provider's site or specialty/consultation/secondary/tertiary healthcare provider's site. They support physicians, patients and other providers in using widespread e-Health services. Their key responsibilities include organizing teleconference, scheduling appointments, setting up telehealth equipment as needed, maintaining inventory, billing, database management with proper documentation and promoting telehealth services in local community especially in locations where there is limited access to healthcare providers.

Personal Attributes

The job requires individuals to have good communication and time management skills along with the ability to work in a multidisciplinary team environment. The individual should possess key qualities such as confidence, maturity, compassion, patient centricity and active listening. The person should be comfortable working in healthcare environment and usage of technology. They should have the ability to understand and follow technical instructions and effectively use computer applications.

Qualification Pack

HSS/N5805: Provide assistance to healthcare services provider for telehealth services

Description

This unit is about providing assistance to healthcare services provider like referring or specialty sites, emergency service providers, diagnostic centers and pharmacies under the guidance of consulting physician.

Scope

The scope covers the following :

- Collect adequate information from patients/ relatives/ referring physician
- Support in providing diagnostic and pharmacy related services
- Update and store patient related information and provide it to the specialty site
- Handle emergency situations appropriately
- Management of Healthcare Waste (Biomedical and General waste)

Elements and Performance Criteria

Collect adequate information from patients/ relatives/ referring physician

To be competent, the user/individual on the job must be able to:

- PC1.** collect the basic information about the patient in the prescribed format as per organizational policies and procedures related to their present ailment and symptoms
- PC2.** enter the clinical, medical, family, gynecological, allergic and treatment history of the patient in the prescribed format
- PC3.** gather evidences supporting the clinical history of the patient wherever available and applicable
- PC4.** complete the format by enquiring for information from the patients/ relatives/ referring physician
- PC5.** record the observations obtained from basic general/systematic physical examination as per organizational policies and procedures
- PC6.** exhibit sensitization while delivering services and obtaining information in terms of the patient's language, ethnicity, race, age, gender, geographical location, socioeconomic, and cultural backgrounds
- PC7.** communicate appropriately while interacting with a person with disability
- PC8.** obtain the consent forms from the patients as per policies and procedures
- PC9.** maintain patient's confidentiality

Support in providing diagnostic and pharmacy related services

To be competent, the user/individual on the job must be able to:

- PC10.** identify the diagnostic tests which can be performed in the telehealth set-up and the ones which need to be referred
- PC11.** assist in performing basic tele-diagnostic tests through remote patient monitoring programs as per standard operating procedures

Qualification Pack

- PC12.** match the patient's details with the requisition form to ensure accurate identification
- PC13.** seek patient's information with reference to the allergies, any previous experience of fainting during previous injections or blood draws, history of bleeding disorder, medications etc.
- PC14.** reassure the person and make them comfortable before beginning the procedure for anxious patients
- PC15.** provide details of procedure to be performed to the patient and obtain verbal consent to proceed
- PC16.** maintain supplies and stocks for avoiding shortage of materials before the end of the procedure
- PC17.** organize all the equipment needed for the procedure and place it within safe and easy reach
- PC18.** ensure all equipment to be used is clean, sterilized and in working condition
- PC19.** prepare the test site of patient using standard procedures for performing tele-diagnostic tests
- PC20.** maintain safety and hygiene while performing tele-diagnostic tests
- PC21.** record observations as well as test results in the prescribed format
- PC22.** discard all used items in the appropriate category of waste receptacles/bins
- PC23.** perform hand hygiene before and after performing tele-diagnostic tests
- PC24.** provide information to the patients regarding local diagnostic facilities for the diagnostic tests which cannot be performed in telehealth set-up
- PC25.** follow-through with the patient/diagnostic center for the referred diagnostic tests
- PC26.** obtain the report and test result from patient/diagnostic center
- PC27.** provide information to the patients regarding local pharmacies for ensuring medicine availability
- PC28.** follow-through with the patient till they get the prescribed medicine
- PC29.** explain prescription dose to the patient

Update and store patient related information and provide it to the specialty site

To be competent, the user/individual on the job must be able to:

- PC30.** update all kinds of information either personal or clinical in the patient records electronically
- PC31.** scan and upload the supporting evidences like films, videos, photos, documents, forms and other medical records, etc. in the patient records
- PC32.** ensure the correct registration ID is used while updating the information
- PC33.** keep patient's record carefully, properly and confidentially as per policies and procedures
- PC34.** provide the information to the specialty physician periodically

Handle emergency situations appropriately

To be competent, the user/individual on the job must be able to:

- PC35.** identify if the emergency is medical or non-medical
- PC36.** coordinate with the local emergency service provider as per type of emergency situations
- PC37.** inform to the patient's family about emergency
- PC38.** respond to the emergency within emergency response system's average response time
- PC39.** perform basic life support or basic first aid in medical emergencies, as and when required
- PC40.** assist in handling or operating remote patient monitoring programs during emergency

Management of Healthcare Waste (Biomedical and General waste)

Qualification Pack

To be competent, the user/individual on the job must be able to:

- PC41.** segregate healthcare waste as per the updated organizational/ state policies
- PC42.** handle, package, label, store, transport and dispose off waste appropriately as per scope of work
- PC43.** identify infection risks and plan for response appropriately as per organizational policies under scope of work
- PC44.** follow incident reporting protocols as per SOPs in incidents such as needle stick injuries etc.
- PC45.** follow spill management protocols

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** basic structure and function of healthcare facilities available at various levels, hospice care, set-ups in the country and the roles and responsibilities of various members of the healthcare team
- KU2.** relevant legislation, standards, policies, and procedures followed in the healthcare organization
- KU3.** the HR protocols, professional and dress code, grievance redressal mechanism as per the guidelines of the organization
- KU4.** the scope and objectives of the organization in order to perform the duties to meet the vision and mission of the organization
- KU5.** documentation methods for interdisciplinary communication (wherever applicable) for the specific organization
- KU6.** protocols of organization for optimizing health, well-being and illness prevention
- KU7.** the difference between private, public and non-profit hospital systems
- KU8.** the types of patient care including primary care, specialty care and emergency care
- KU9.** types of telehealth services and clinical applications and their functions and challenges
- KU10.** the roles and responsibilities of the telehealth team at the presenting/patient site and provider/specialty site
- KU11.** the rights of the patient
- KU12.** basic PwD laws/schemes/acts/provisions related to Persons with Disability (PwD)
- KU13.** different type of disabilities
- KU14.** the importance of following Health Insurance Portability and Accountability Act (HIPAA) guidelines to protect patient health information
- KU15.** the electrical safety standards
- KU16.** basic importance of familiarity to medical terminologies
- KU17.** the various types of public address alerts and codes
- KU18.** basics of using computers, internet and telephone operations
- KU19.** the troubleshooting techniques for various telehealth services
- KU20.** the patient identifiers to be matched on the requisition form or medical records like patient's name, medical record number and date of birth
- KU21.** all safety and hygiene measures

Qualification Pack

- KU22.** basic medical terms and principles related to diagnostic tests
- KU23.** basics of clinical history taking
- KU24.** information about common ailments, NCD (Non-communicable disease), and CDs (Communicable diseases) like fever, cough and cold, throat infections, diarrhoea, urinary tracts infections, headache, stomachache, tooth ache, skin allergies/infections, dandruff, gastritis, constipation, general body weakness/pains, nausea, hypertension management, diabetes management, menstrual problems, anaemia, asthma, acne, etc.
- KU25.** the supporting evidences to be acquired during case history like digital photos of lesions or capturable ailments esp. in case of skin and eye problems, old prescriptions, reports, recommendations or other relevant documents from referring physician or previous consultations for present ailment, films of X-Ray, CT scan, MRI, etc., documents, photos or video clips related to dietary, medicinal, environmental, physical, mental or other restrictions, etc.
- KU26.** the tests to be performed in telehealth set-up like vital signs, weight, blood pressure, blood sugar, blood oxygen levels, heart rate, electrocardiograms, etc.
- KU27.** how to perform basic tele-diagnostic tests
- KU28.** the uses of remote patient monitoring programs for diagnosis, screening of patient or during emergency
- KU29.** how to update and utilize medical databases or other computer programs for keeping the information safely and properly
- KU30.** what are the kinds of emergency services could be imparted at telehealth set-up and how to do so
- KU31.** how to act and react in an emergency
- KU32.** local emergency resources and phone numbers and other local or regional professional associations, such as the city, county, state, or provincial for both medical or non-medical emergency situations
- KU33.** local pharmacies and diagnostic centers for referral
- KU34.** signs of medication side effects, elevation in symptoms, and/or issues related to medication non-compliance
- KU35.** the importance of good record keeping
- KU36.**
 - significance of appropriate waste disposal methods as per organizational policies and procedures
- KU37.** person(s) responsible for health, safety, and security in the organization
- KU38.** ways to handle waste appropriately to reduce the risk of contamination
- KU39.** good personal hygiene practices including hand hygiene
- KU40.** types of bio medical waste and different types of color codes designated for types of wastes

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** document call logs, reports, task lists, and schedules
- GS2.** prepare status and progress reports
- GS3.** write memos and e-mails to stakeholders, co-workers, and vendors to provide them with work updates and to request appropriate information

Qualification Pack

- GS4.** communicate information (for example, facts, ideas, or messages) in a brief, clear, and organized manner
- GS5.** interpret written material, including technical documents, rules, regulations, instructions, reports, charts, graphs, or tables
- GS6.** read scanned instructions in notes attached to patients' files
- GS7.** read protocol updates and hospital policy changes
- GS8.** discuss with healthcare service providers and patients in the community to identify needs for telemedicine consultations
- GS9.** discuss task lists, schedules, and work-loads with co-workers
- GS10.** question stakeholders appropriately in order to understand the nature of the problem
- GS11.** keep stakeholders informed about progress
- GS12.** make sound, well-informed and objective decisions pertaining to the concerned area of work
- GS13.** perceive the impact and implications of decisions
- GS14.** prioritize, organize, and accomplish work within prescribed timelines
- GS15.** build customer relationships and use customer centric approach
- GS16.** troubleshoot the faults detected in the equipment and systems
- GS17.** address work-related issues and problems
- GS18.** review the information gathered from observation, experience, reasoning, or communication to act efficiently
- GS19.** read and understand latest guidelines on managing biomedical waste and infection control and prevention
- GS20.** communicate effectively with others
- GS21.** report hazards and incidents clearly with the appropriate level of urgency
- GS22.** plan for safety of the work environment
- GS23.** identify risk, evaluate possible solutions and suggest effective solutions
- GS24.** analyse the seriousness of hazards pertaining to hospital waste and related infections

HSS/N5803: Prepare and manage the set-up for teleconsultation

Description

This unit is about preparing and managing the set-up for teleconsultation as per needs and protocols.

Scope

The scope covers the following :

- Manage consultation site before teleconsultation
- Manage consultation site during teleconsultation
- Manage consultation site after teleconsultation
- Maintain defined periodicity of calibration, repair and maintenance of telehealth equipment

Elements and Performance Criteria

Manage consultation site before teleconsultation

To be competent, the user/individual on the job must be able to:

- PC1.** notify specialty physician of upcoming appointments
- PC2.** display daily patient schedule appropriately for hassle free waiting area
- PC3.** check if all relevant information is present in standardized formats related to patient's profile (clinical history, investigation reports and prior prescriptions etc.) before teleconsultation
- PC4.** prepare consultation room and telehealth equipment prior to scheduled consultation
- PC5.** ensure mock performance check of all sorts of telehealth equipment before any consultation
- PC6.** ensure back-up coverage for set-up phones, and set-up related activities at other telemedicine consultation sites is available

Manage consultation site during Teleconsultation

To be competent, the user/individual on the job must be able to:

- PC7.** operate clinical telemedicine applications (live interactive videoconferencing and store-and-forward) for the successful interactive video teleconsultation effectively
- PC8.** provide technical assistance during consultation, when necessary
- PC9.** troubleshoot minor technical difficulties, and escalate to technical staff when appropriate
- PC10.** coordinate with the technical support team to ensure problems and system development needs are addressed timely
- PC11.** prepare notes of adequate information during consultation required for further action or referral

Manage consultation site after Teleconsultation

To be competent, the user/individual on the job must be able to:

- PC12.** ensure equipment are properly turned off when not in use
- PC13.** inform the patient regarding the next follow-up schedule
- PC14.** follow-through with concerned personnel for further action as decided during teleconsultation

Maintain defined periodicity of calibration, repair and maintenance of telehealth equipment.

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC15.** identifying and responding to medical emergencies or technology failures during virtual consultations.
- PC16.** importance of following the manufacturers' recommendations stated in the operational and service manual.
- PC17.** Identify safety hazards, its troubleshooting technique and the corrective measures to be taken.
- PC18.** understand the basic concepts of AC circuits, DC circuits, magnetic circuits, transformers, AC machines and other electrical machines and their application in telehealth related instrumentation
- PC19.** understand the relevant laws, regulations, and codes for technology and technical safety laid down by regulatory bodies such as Food and Drug Administration (FDA), Bureau of Indian Standards (BIS), Occupational Safety and Health Administration (OSHA), etc

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** basic structure and function of healthcare facilities available at various levels, hospice care, set-ups in the country and the roles and responsibilities of various members of the healthcare team
- KU2.** relevant legislation, standards, policies, and procedures followed in the healthcare organization
- KU3.** the HR protocols, professional and dress code, grievance re-dressal mechanism as per the guidelines of the organization
- KU4.** the scope and objectives of the organization in order to perform the duties to meet the vision and mission of the organization
- KU5.** documentation methods for interdisciplinary communication (wherever applicable) for the specific organization
- KU6.** protocols of organization for optimizing health, well-being and illness prevention
- KU7.** the difference between private, public and non-profit hospital systems
- KU8.** the types of patient care including primary care, specialty care and emergency care
- KU9.** types of telehealth services and clinical applications and their functions and challenges
- KU10.** the roles and responsibilities of the telehealth team at the presenting/patient site and provider/specialty site
- KU11.** the rights of the patient
- KU12.** the importance of following Health Insurance Portability and Accountability Act (HIPAA) guidelines to protect patient health information
- KU13.** the electrical safety standards
- KU14.** basic importance of familiarity to medical terminologies
- KU15.** the various types of public address alerts and codes
- KU16.** basics of using computers, internet and telephone operations
- KU17.** the troubleshooting techniques for various telehealth services

Qualification Pack

- KU18.** how to manage various front office services at the telehealth set-up including reception handling, scheduling, registration, authorizations, referrals, billing support, medical records, database creation, management, report generation and administrative support
- KU19.** what are the components of consultation room and how to set-up all kinds of pre-requisites
- KU20.** the technology required for telehealth services
- KU21.** the basic steps of using clinical telemedicine applications: live interactive videoconferencing or telemedicine encounter and store and forward in the clinical setting and what are in an interactive video consultation
- KU22.** advantages of telemedicine via interactive videoconferencing
- KU23.** how to work with the telehealth equipment
- KU24.** the appropriate video conferencing etiquette to be followed
- KU25.** the importance of good record keeping
- KU26.** how to assist concerned personnel during setting up of the telehealth equipment
- KU27.** how to carry out activities in compliance with all relevant laws, regulations, and codes for technology and technical safety laid down by regulatory bodies

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** document call logs, reports, task lists, and schedules
- GS2.** prepare status and progress reports
- GS3.** write memos and e-mails to stakeholders, co-workers, and vendors to provide them with work updates and to request appropriate information
- GS4.** communicate information (for example, facts, ideas, or messages) in a brief, clear, and organized manner
- GS5.** interpret written material, including technical documents, rules, regulations, instructions, reports, charts, graphs, or tables
- GS6.** read scanned instructions in notes attached to patients' files
- GS7.** read protocol updates and hospital policy changes
- GS8.** discuss with healthcare service providers and patients in the community to identify needs for telemedicine consultations
- GS9.** discuss task lists, schedules, and work-loads with co-workers
- GS10.** question stakeholders appropriately in order to understand the nature of the problem
- GS11.** keep stakeholders informed about progress
- GS12.** make sound, well-informed and objective decisions pertaining to the concerned area of work
- GS13.** perceive the impact and implications of decisions
- GS14.** prioritize, organize, and accomplish work within prescribed timelines
- GS15.** build customer relationships and use customer centric approach
- GS16.** troubleshoot the faults detected in the equipment and systems
- GS17.** address work-related issues and problems
- GS18.** review the information gathered from observation, experience, reasoning, or communication to act efficiently

Qualification Pack

- GS19.** able to know the standard biological precautions to be taken during diagnosis, repair, calibration and final testing/ verification of equipment.
- GS20.** follow the manufacturers recommendations stated in the operational and service manual

HSS/N5806: Manage telehealth facility and coordinate for telehealth services

Description

This OS unit is about managing telehealth facility in terms of inventory, accounts, documentation and database as per procedures and protocols, especially at the patient site.

Scope

The scope covers the following :

- Manage database creation, updation and retrieval
- Manage accounts and funds at patient site
- Manage documentation, purchases, inventory and medical records
- Understand ethics and medico-legal aspects related to telehealth services

Elements and Performance Criteria

Manage database creation, updation and retrieval

To be competent, the user/individual on the job must be able to:

- PC1.** gather all sorts of information necessary to create the database of patients, incoming calls, equipment, logistics, spare parts, vendors and inventory, etc. into the prescribed format
- PC2.** cross-check if the database is accurate and properly formatted in the layout
- PC3.** update the database periodically
- PC4.** convert the database into MIS reports, statistical reports, etc. as and when required
- PC5.** check if the inventory data software reflects actual inventory levels of spare parts, logistics and equipment

Manage accounts and funds at patient site

To be competent, the user/individual on the job must be able to:

- PC6.** maintain the records of financial transactions like cash flow, cheques, demand draft, card swapping, direct bank transfer, etc. appropriately and precisely as per organizational policy
- PC7.** generate, receive and store the invoices, bills, vouchers, receipts, etc. appropriately
- PC8.** ensure reconciliation of bank statements with appropriate personnel
- PC9.** check if there is proper and complete authorization in each financial transaction
- PC10.** ensure proper and secure filing of accounts, funds and other related documents physically and electronically

Manage documentation, purchases, inventory and medical records

To be competent, the user/individual on the job must be able to:

- PC11.** plan the replenishment of the equipment, spare parts, logistics as per organizational policy and availability of funds
- PC12.** ensure documents are in place justifying the necessity for logistics, equipment and parts in stock and quantity like purchase orders, financial transactions and other relevant documents/records

Qualification Pack

- PC13.** follow proper condemnation guidelines of equipment or logistics which are outdated or in non-working condition
- PC14.** coordinate with the appropriate and listed vendor for the purchases as per timelines, quality and financials required
- PC15.** review the medical records for completeness and maintain them as per the organization protocol
- PC16.** store current and past medical records safely and securely as per organizational policy
- PC17.** retain all medical records for a time specified in the organizational policies
- PC18.** dispose of medical records as per Standard Operating Procedure (SOPs)
- PC19.** take written consent of authorized officer or follow organizational policy for sharing any patient related information to others
- PC20.** ensure that medical records are treated confidential
- PC21.** ensure the safety of records with respect to protection from insects, termites and exposure to heat, fire, dampness and dust
- PC22.** arrange documents and records properly in shelves in numeric order to facilitate easy retrieval when required

Understand ethics and medico-legal aspects related to telehealth services

To be competent, the user/individual on the job must be able to:

- PC23.** assess to relevant legislation, standards, policies, and procedures followed in the healthcare organization
- PC24.** understand the medico-legal aspects of Health Insurance Portability and Accountability Act (HIPAA) guidelines
- PC25.** Identify the key ethical issues related to telehealth services

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** basic structure and function of healthcare facilities available at various levels, hospice care, set-ups in the country and the roles and responsibilities of various members of the healthcare team
- KU2.** relevant legislation, standards, policies, and procedures followed in the healthcare organization
- KU3.** the HR protocols, professional and dress code, grievance re-dressal mechanism as per the guidelines of the organization
- KU4.** the scope and objectives of the organization in order to perform the duties to meet the vision and mission of the organization
- KU5.** documentation methods for interdisciplinary communication (wherever applicable) for the specific organization
- KU6.** protocols of organization for optimizing health, well-being and illness prevention
- KU7.** the difference between private, public and non-profit hospital systems
- KU8.** the types of patient care including primary care, specialty care and emergency care
- KU9.** types of telehealth services and clinical applications and their functions and challenges

Qualification Pack

- KU10.** the roles and responsibilities of the telehealth team at the presenting/patient site and provider/specialty site
- KU11.** the rights of the patient
- KU12.** the importance of following Health Insurance Portability and Accountability Act (HIPAA) guidelines to protect patient health information
- KU13.** the electrical safety standards
- KU14.** basic importance of familiarity to medical terminologies
- KU15.** the various types of public address alerts and codes
- KU16.** basics of using computers, internet and telephone operations
- KU17.** the troubleshooting techniques for various telehealth services
- KU18.** taxation rules and regulations
- KU19.** importance of record-keeping of balance sheets and financial books as per accounting standards
- KU20.** importance of impartial and timely auditing of accounts
- KU21.** timelines and terms and conditions of various funding sources
- KU22.** importance of checking financial projections and thereby management, retention and investment of the funds accordingly
- KU23.** the availability of funds for emergency situations
- KU24.** importance of ensuring the proper liquidity of the funds
- KU25.** the methods to analyze financial data and compile accurate reports to meet deadlines
- KU26.** when your intervention is required to manage accounts and funds in telehealth set-up
- KU27.** what are the different requirements of documents, access and officials for managing accounts and funds
- KU28.** importance of secured and wise management of funding sources and funds
- KU29.** the different types of databases required to be maintained in telehealth set-up
- KU30.** how to maintain the databases so that the concerned personnel could utilize them for different purposes easily without any hindrance
- KU31.** how to convert the databases into reports, analysis and graphical presentations
- KU32.** what are the various types of inventory, supplies and documents to be maintained and managed
- KU33.** importance of maintaining database of vendors for correct selection for different types of purchases
- KU34.** the different types of logistics and equipment required for running the telehealth set-up
- KU35.** how to utilize and delegate resources or finances for purchases as per timelines and urgency
- KU36.** what are the different types of medical records
- KU37.** how to store the new and old medical records
- KU38.** how to store the medical records of patients with ongoing and completed treatment
- KU39.** how to maintain the confidentiality of the medical records
- KU40.** how to ensure maximum security against loss, tampering and from use by any unauthorized individual
- KU41.** how to arrange all sorts of documents in files and arrange them in the stacks/cupboard/shelves as per file numbers, category and other requisites

Qualification Pack

- KU42.** how to give and record the coding to files as per type of documents and records
- KU43.** importance of providing the medical records, financial data and other relevant documents for statutory compliance, medico-legal compliance and statistical database, as and when required
- KU44.** what are the different personal or professional attributes needed to impart qualitative professional practice
- KU45.** the general technical requirements for the telemedicine system
- KU46.** how to maintain time management, empathy, computer skills, analytical skills, communication skills, team work, decision making, workload division skills, etc.
- KU47.** how to identify safety hazards, troubleshoot the problem, take corrective measures within short span of time
- KU48.** the importance of good record keeping
- KU49.** legal, ethical, and regulatory requirements for telehealth services in Indian Context
- KU50.** the relevant sections of Health Insurance Portability and Accountability Act (HIPAA) guidelines related to telehealth services
- KU51.** relevant local and regional legislative issues that governs the delivery of telehealth services
- KU52.** the ethical issues related to telehealth services

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** work in rural or remote setting
- GS2.** empathize with patients
- GS3.** use computer skills with knowledge of word processing, spreadsheet, database, email and internet programs (Excel, word, access, etc.) proficiently
- GS4.** exhibit analytical skills to independently and tactfully assume responsibility for coordination and completion of complex projects requiring interactions with many individuals in a matrix organizational structure
- GS5.** maintain confidentiality, exercise discretion, use independent and mature judgement, work without close supervision and commit to excellence
- GS6.** exercise tact, courtesy and diplomacy when dealing with individuals at any level within or outside the centre
- GS7.** communicate effectively with physicians, clinical and technical staff
- GS8.** complete assigned job timely, efficiently and in desirous manner
- GS9.** handle situations independently
- GS10.** identify relationship challenges with referring sites and specialists
- GS11.** initiate appropriate action to resolve the challenges
- GS12.** work under strict scope and boundaries of policies, procedures, standards and regulations
- GS13.** work with external organizations, healthcare service providers and remote sites positively
- GS14.** provide accurate and succinct documentation of activities
- GS15.** prioritize workload and meet deadlines

Qualification Pack

- GS16.** keep emotions in check and stay cool under pressure especially while dealing with equipment, emergencies and patients as it may be life-threatening
- GS17.** handle challenging situations and make decisions based on applicable regulations and codes of conduct when possible conflicts arise
- GS18.** be updated with the latest knowledge by reading internal communications and legal framework changes related to roles and responsibilities
- GS19.** maintain etiquette, personal hygiene and proper grooming
- GS20.** follow the rules, regulations and code of ethics laid down by national/international regulatory authorities, department, organization
- GS21.** exhibit verbal and written communication skills especially during interdepartmental communications, customer interaction/communication, sales, marketing, support, service, etc.
- GS22.** convey information clearly and comprehensively
- GS23.** follow legal, ethical, and regulatory requirements for telehealth services in Indian Context
- GS24.** Identify the issues related to international practice of telemedicine.
- GS25.** the key ethical issues

HSS/N5802: Promote the telehealth services and its alternate utilization as per needs and protocols

Description

This unit is about promoting the telehealth services as per needs and protocols for maximum coverage of the local community.

Scope

The scope covers the following :

- Facilitate training and continuous education sessions utilizing telehealth technology
- Organize promotion and outreach activities for the telehealth services
- Facilitate the telehealth services via home visits, mobile set-ups and case discussions

Elements and Performance Criteria

Facilitate training and continuous education sessions utilizing telehealth technology

To be competent, the user/individual on the job must be able to:

- PC1.** organize on-site training sessions for users of the telemedicine, videoconferencing, and remote monitoring systems periodically
- PC2.** prepare telemedicine facilities and equipment for conducting educational sessions
- PC3.** prepare the training calendar of the sessions and circulate the same to the concerned personnel
- PC4.** coordinate with the appropriate faculty for the sessions
- PC5.** ensure the participation of the concerned personnel in the scheduled program

Organize promotion and outreach activities for the telehealth services

To be competent, the user/individual on the job must be able to:

- PC6.** identify the different groups/organizations to be targeted for telehealth marketing
- PC7.** organize the promotional material (print/audio-visual) for the promotion of telehealth program as per the policies and procedures
- PC8.** facilitate the field visits of concerned personnel for planning the outreach of the telehealth services
- PC9.** organize community outreach activities for the promotion of telehealth services as advised by the authority like health screening camps, awareness activities, promotional campaigns, etc.
- PC10.** perform mock demonstrations of the telehealth system for visitors for better sensitization and word-of-mouth promotion as per organizational policies
- PC11.** promote the schedule of mobile set-ups with dates, timing and location much before the schedule for maximum participation

Facilitate the telehealth services via home visits, mobile set-ups and case discussions

To be competent, the user/individual on the job must be able to:

- PC12.** identify the patients who are unable to visit the telehealth facility like geriatric/ disable/ psychiatric/ paralytic patients, etc.

Qualification Pack

- PC13.** explain to the patients about benefits and usage of primary home telehealth technologies
- PC14.** follow-through with the patient or their relative if they are facing any difficulty while using the home telehealth technologies.
- PC15.** collect data and evidences from the patients using home telehealth technology by arranging home visits of concerned personnel periodically
- PC16.** assist the patient in transmitting the patient data using home telehealth technology to specialty physician as and when required
- PC17.** document the data of users of home telehealth technology separately as per protocols and procedures
- PC18.** schedule mobile telehealth set-ups by using vans/ambulances/other sources for facilitating the telehealth services in consultation with concerned authority
- PC19.** distribute the schedule for case discussions with concerned physicians for multiple cases using telehealth technology
- PC20.** organize the relevant case folders for all concerned personnel before the case conferences
- PC21.** document all case conferences organized as per organizational policies and procedures
- PC22.** support the personnel during utilization of the telehealth technology and premises for online educational programs, assessments, health surveys for various government/non-government entities, etc.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** basic structure and function of healthcare facilities available at various levels, hospice care, set-ups in the country and the roles and responsibilities of various members of the healthcare team
- KU2.** relevant legislation, standards, policies, and procedures followed in the healthcare organization
- KU3.** the HR protocols, professional and dress code, grievance re-dressal mechanism as per the guidelines of the organization
- KU4.** the scope and objectives of the organization in order to perform the duties to meet the vision and mission of the organization
- KU5.** documentation methods for interdisciplinary communication (wherever applicable) for the specific organization
- KU6.** protocols of organization for optimizing health, well-being and illness prevention
- KU7.** the difference between private, public and non-profit hospital systems
- KU8.** the types of patient care including primary care, specialty care and emergency care
- KU9.** types of telehealth services and clinical applications and their functions and challenges
- KU10.** the roles and responsibilities of the telehealth team at the presenting/patient site and provider/specialty site
- KU11.** the rights of the patient
- KU12.** the importance of following Health Insurance Portability and Accountability Act (HIPAA) guidelines to protect patient health information
- KU13.** the electrical safety standards

Qualification Pack

- KU14.** basic importance of familiarity to medical terminologies
- KU15.** the various types of public address alerts and codes
- KU16.** basics of using computers, internet and telephone operations
- KU17.** the troubleshooting techniques for various telehealth services
- KU18.** various arrangements required like logistics, personnel and support for conducting the promotional activities, outreach activities, home visits, mobile set-ups, case conferences and training/continuing educational sessions
- KU19.** the various types of promotional activities arranged for promotion of telehealth services
- KU20.** how to generate reports of promotional activities, outreach activities, educational/training programs and surveys
- KU21.** how to utilize the telehealth technology and premises for services other than telehealth services and the benefit of the same in promotion of telehealth program
- KU22.** the various pre-requisites for implementation of telehealth program
- KU23.** various types, benefits and common uses of primary home telehealth technologies
- KU24.** the care coordination process and documentation
- KU25.** the criteria for determination of appropriateness of patient for telehealth services

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** document call logs, reports, task lists, and schedules
- GS2.** prepare status and progress reports
- GS3.** write memos and e-mails to stakeholders, co-workers, and vendors to provide them with work updates and to request appropriate information
- GS4.** communicate information (for example, facts, ideas, or messages) in a brief, clear, and organized manner
- GS5.** interpret written material, including technical documents, rules, regulations, instructions, reports, charts, graphs, or tables
- GS6.** read scanned instructions in notes attached to patients' files
- GS7.** read protocol updates and hospital policy changes
- GS8.** discuss with healthcare service providers and patients in the community to identify needs for telemedicine consultations
- GS9.** discuss task lists, schedules, and work-loads with co-workers
- GS10.** question stakeholders appropriately in order to understand the nature of the problem
- GS11.** keep stakeholders informed about progress
- GS12.** make sound, well-informed and objective decisions pertaining to the concerned area of work
- GS13.** perceive the impact and implications of decisions
- GS14.** prioritize, organize, and accomplish work within prescribed timelines
- GS15.** build customer relationships and use customer centric approach
- GS16.** troubleshoot the faults detected in the equipment and systems
- GS17.** address work-related issues and problems

Qualification Pack

- GS18.** review the information gathered from observation, experience, reasoning, or communication to act efficiently

Qualification Pack

DGT/VSQ/N0101: Employability Skills (30 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

PC1. understand the significance of employability skills in meeting the job requirements

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

PC2. identify constitutional values, civic rights, duties, personal values and ethics and environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

PC3. explain 21st Century Skills such as Self-Awareness, Behavior Skills, Positive attitude, self-motivation, problem-solving, creative thinking, time management, social and cultural awareness, emotional awareness, continuous learning mindset etc.

Basic English Skills

To be competent, the user/individual on the job must be able to:

PC4. speak with others using some basic English phrases or sentences

Communication Skills

To be competent, the user/individual on the job must be able to:

PC5. follow good manners while communicating with others

PC6. work with others in a team

Qualification Pack

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

PC7. communicate and behave appropriately with all genders and PwD

PC8. report any issues related to sexual harassment

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

PC9. use various financial products and services safely and securely

PC10. calculate income, expenses, savings etc.

PC11. approach the concerned authorities for any exploitation as per legal rights and laws

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

PC12. operate digital devices and use its features and applications securely and safely

PC13. use internet and social media platforms securely and safely

Entrepreneurship

To be competent, the user/individual on the job must be able to:

PC14. identify and assess opportunities for potential business

PC15. identify sources for arranging money and associated financial and legal challenges

Customer Service

To be competent, the user/individual on the job must be able to:

PC16. identify different types of customers

PC17. identify customer needs and address them appropriately

PC18. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC19. create a basic biodata

PC20. search for suitable jobs and apply

PC21. identify and register apprenticeship opportunities as per requirement

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use basic spoken English language

KU6. Do and dont of effective communication

KU7. inclusivity and its importance

KU8. different types of disabilities and appropriate communication and behaviour towards PwD

KU9. different types of financial products and services

Qualification Pack

- KU10.** how to compute income and expenses
- KU11.** importance of maintaining safety and security in financial transactions
- KU12.** different legal rights and laws
- KU13.** how to operate digital devices and applications safely and securely
- KU14.** ways to identify business opportunities
- KU15.** types of customers and their needs
- KU16.** how to apply for a job and prepare for an interview
- KU17.** apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate effectively using appropriate language
- GS2.** behave politely and appropriately with all
- GS3.** perform basic calculations
- GS4.** solve problems effectively
- GS5.** be careful and attentive at work
- GS6.** use time effectively
- GS7.** maintain hygiene and sanitisation to avoid infection

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Performance Criteria (PC) (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
4. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.

Qualification Pack

Qualification Pack

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
