Qualification Pack

HYC/Q4002: Green Hydrogen Assistant Plant Supervisor

Brief Job Description

A Green Hydrogen Assistant Plant Supervisor is responsible for assist in supervision of efficiently operating and maintaining a green hydrogen production facility. The person at this job assist in oversee the operation of equipment like electrolyzers, dryers, deoxy reactor, electrical heater, pump, compressors and storage systems ensuring smooth production processes. The person will assist in monitor water purification process, Hydrogen, production rates, energy consumption and system efficiencies and make necessary adjustments to optimize output and minimize waste prioritizing the Safety and compliance. S/He collaborates with team members, maintain operational records and contribute to process improvement initiatives at the Green Hydrogen production Plant

Personal Attributes

The individual should have ability to give attention to detail, technical aptitude, adaptability, teamwork and a strong commitment to safety and sustainability. The person should have the ability to work individually / team round the clock and must always promote safety at workplace.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [HYC/N4001: Hydrogen Safety, Security and Health Management Procedures](#)
2. [HYC/N4004: Supervise the operation and maintenance of hydrogen production equipment](#)
3. [HYC/N4005: Supervise green hydrogen production operations](#)
4. [HYC/N9301: Working effectively in a team](#)
5. [DGT/VSQ/N0102: Employability Skills \(60 Hours\)](#)

Qualification Pack

HYC/N4001: Hydrogen Safety, Security and Health Management Procedures

Description

This unit covers maintaining health, safety and security procedures at the workplace where Hydrogen is produced and handled.

Scope

The scope covers the following :

- Understanding Properties of Hydrogen from safety point of view
- Safe handling of Hydrogen
- Follow fire safety procedures
- Follow emergencies, rescue and first-aid procedures

Elements and Performance Criteria

Understanding Properties of Hydrogen from safety point of view & Safe handling of Hydrogen

To be competent, the user/individual on the job must be able to:

- PC1.** Ensure that personnel under their supervision have a deep understanding of hydrogen's properties, including its flammability, explosive limits and potential hazards.
- PC2.** Ensure personal and team adherence to the use of appropriate protective clothing/equipment for specific tasks and work conditions
- PC3.** Identify and communicate the relevant documents, responsible individuals, and designated locations pertaining to health and safety in the workplace, facilitating effective safety management.
- PC4.** Oversee and participate in risk assessments specific to hydrogen storage, handling and production processes.
- PC5.** Proficiently identify hydrogen process hazards and assess risks including the analysis of risk or accident in the workplace due to hydrogen leak/fire
- PC6.** capability to accurately read and interpret data from sensing equipment used in hydrogen production processes
- PC7.** apply key safety parameters for handling hydrogen & oxygen
- PC8.** Evaluate hydrogen release pressures and understand hydrogen flame detection methods, emphasizing the colorless nature of hydrogen flames
- PC9.** Apply critical safety requirements for electrical equipment used in green hydrogen production, minimizing electrical hazards
- PC10.** competent in the operation and functioning of hydrogen exhaust systems, facilitating the safe removal of hydrogen from the workplace
- PC11.** Execute inertization processes using nitrogen to displace hazardous gases enhancing safety in hydrogen-related operations
- PC12.** Proficiently identify and recognize common safety signs displayed in various areas, promoting a safe work environment.

Qualification Pack

- PC13.** safely handle and manage lye solution (KOH solution), ensuring the prevention of accidents and injuries
- PC14.** carry out safe working practices while dealing with hazards to ensure the safety of self and others
- PC15.** Enforce the use of safety guidelines and procedures that consider hydrogen's unique properties.
- PC16.** Competently manage hydrogen ignition sources to prevent potential incidents and enhance workplace safety.
- PC17.** Adhere to standard practices for the safe venting of hydrogen and oxygen, referencing applicable industry standards and performance requirements for equipment and hoses, ensuring safe gas handling procedures.

Ensure the following fire safety procedures

To be competent, the user/individual on the job must be able to:

- PC18.** Ensure the personal and team Familiarization with Hydrogen Leak and flame detection system, Identification of Hydrogen Fire; use the various appropriate fire extinguishers on different types of fires correctly
- PC19.** Develop and implement measures to mitigate hydrogen fire, isolation of Hydrogen supply line and lead the team in following rescue techniques applied during fire hazard
- PC20.** Promote and enforce following good housekeeping practice in order to prevent fire hazards
- PC21.** Regularly inspect work areas for compliance with housekeeping standards
- PC22.** identify and document issues concerning the hydrogen safety in work place
- PC23.** Collaborate with relevant departments to address and rectify safety concerns promptly
- PC24.** Ensure that work areas and escape routes are well maintained and free from any hindrance
- PC25.** Establish and communicate a system for personnel to report any near-miss incidents to the fire safety department and provide the necessary guidance and resources for reporting and investigation
- PC26.** Lead by example in consistently following and enforcing the applicable laws, regulations and codes as per safety standard
- PC27.** Ensure that personnel are trained in preparing comprehensive accident/incident reports
- PC28.** Review and approve written accident/incident reports before sharing them with the concerned officer or department to facilitate proper documentation and follow-up actions

Follow emergencies, rescue and first-aid procedures

To be competent, the user/individual on the job must be able to:

- PC29.** provide appropriate first aid to victims during emergency situations, ensuring prompt and effective response to injuries or medical issues
- PC30.** Be proficient in basic techniques of bandaging
- PC31.** Lead by example in responding promptly and appropriately to an accident
- PC32.** perform rescue activity during an accident in real or simulated environments
- PC33.** Familiarize personnel with correct escape routes during an emergency
- PC34.** demonstrate correct method to rescue injured people and others during an emergency
- PC35.** Ensure that personnel are familiar with emergency protocols, including evacuation and shutdown procedures and verify that the team understands and can implement these protocols effectively in case of emergencies.

Qualification Pack

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** company policies on personnel management and duty reporting procedure
- KU2.** reporting structure within organization
- KU3.** how to escalate problem
- KU4.** concept of hazards and risks
- KU5.** health and safety hazards commonly affecting the work environment and related precautions
- KU6.** preventative and remedial actions to be taken in the case of exposure to toxic materials
- KU7.** importance of using protective clothing/equipment while working
- KU8.** various causes of fire
- KU9.** techniques of using different types of fire extinguishers
- KU10.** different materials used for extinguishing fire
- KU11.** various types of safety signs and their significance
- KU12.** the concept of Mission Karmayogi
- KU13.** the concept of Swachhata Hi Seva

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate by writing
- GS2.** read instructions, guidelines/procedures and reports
- GS3.** communicate effectively and share the information efficiently
- GS4.** identify and report potential sources of danger
- GS5.** how to plan the work to meet the deadline
- GS6.** the importance of on time services
- GS7.** apply problem solving approaches in different situations
- GS8.** apply balanced judgments to different situations

HYC/N4004: Supervise the operation and maintenance of hydrogen production equipment

Description

This unit is about supervise the operation and maintenance of the equipment used in green hydrogen production, including electrolyzers, compressors, and storage systems. Oversee in performing routine maintenance, inspections, and troubleshooting to ensure optimal operation and reliability.

Scope

The scope covers the following :

- Supervision of working of water purification, hydrogen production methods and storage and
- compression equipment
- Supervision of maintenance of hydrogen production and storage equipment

Elements and Performance Criteria

Supervision of working of Water purification, hydrogen production, storage and compression equipment

To be competent, the user/individual on the job must be able to:

- PC1.** Identify various hydrogen production equipment types
- PC2.** Understand types of electrolyzers, functions and principles
- PC3.** Recognize various compressors and their roles
- PC4.** Familiarize with purification systems and operating procedures
- PC5.** Comprehend water purification processes for hydrogen production
- PC6.** Determine user interfaces and instrumentation for equipment
- PC7.** Apply safety protocols during equipment operation

Supervision of maintenance for hydrogen production and storage equipment

To be competent, the user/individual on the job must be able to:

- PC8.** Conduct routine inspections to ensure equipment functionality
- PC9.** Perform routine maintenance tasks, including cleaning and lubrication
- PC10.** Handle component replacements when necessary
- PC11.** Troubleshoot common issues related to hydrogen production equipment
- PC12.** Report equipment malfunctions to supervisors
- PC13.** Coordinate with technicians for equipment repairs
- PC14.** Demonstrate troubleshooting skills and safe equipment handover for maintenance

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** importance of calibration of tools and instruments used in Green Hydrogen production
- KU2.** organizational procedures for safe handling of equipment and machine operations

Qualification Pack

- KU3.** reporting protocol and documentation required
- KU4.** relevant health and safety requirements applicable to the workplace
- KU5.** the importance of personal protective equipment used during the procedure performing
- KU6.** ways of efficiently managing renewable sources such as wind, water in the process
- KU7.** latest methods of energy and material conservation
- KU8.** categorization of waste into dry, wet, recyclable, non-recyclable and items of single-use plastics
- KU9.** the difference between recyclable/reusable and waste material
- KU10.** the concept of Mission Karmayogi
- KU11.** the concept of Swachhata Hi Seva

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Interpret test data effectively
- GS2.** Analyze critical parameters for optimization
- GS3.** Record waste disposal data accurately
- GS4.** Assess task complexity and importance
- GS5.** Communicate efficiently with the team
- GS6.** Perform mathematical calculations
- GS7.** Complete tasks efficiently and on time
- GS8.** Work on constructive collaboration
- GS9.** Delegate tasks for improved efficiency
- GS10.** Plan and organize marketing activities

HYC/N4005: Supervise green hydrogen production operations

Description

This unit is about supervising green hydrogen production operations which includes monitoring parameters and production rates, and ensure efficient resource utilization to obtain pure hydrogen gas. The individual has to perform routine maintenance, inspections and should be able to troubleshoot to ensure optimal operation and reliability

Scope

The scope covers the following :

- oversee activities related to Green Hydrogen production process

Elements and Performance Criteria

oversee activities related to Green Hydrogen production process

To be competent, the user/individual on the job must be able to:

- PC1.** Determine the startup, shutdown, parameter adjustments and performance monitoring to ensure optimal electrolysis
- PC2.** Supervise the startup and monitoring of the power supply system including renewable energy sources to ensure efficient operation
- PC3.** Oversee and regulate the water supply to the electrolyzer, maintaining consistent operation
- PC4.** Control and monitor the water purification system, including filters, deionization units or reverse osmosis systems to uphold required water quality standards
- PC5.** Oversee the operation of gas purification systems to effectively remove impurities from hydrogen gas
- PC6.** Determine and oversee gas separation processes, such as pressure swing adsorption (PSA) or membrane separation, to ensure the production of pure hydrogen gas
- PC7.** Monitor storage tanks or cylinders to guarantee proper storage conditions for the produced hydrogen gas
- PC8.** Report production logs, findings and faults promptly to superiors for appropriate action
- PC9.** Ensure strict compliance with safety and quality standards throughout the entire process of green hydrogen production
- PC10.** Maintain daily operational reporting and promptly report incidents, near misses and findings to superiors
- PC11.** Continuously monitor and uphold safety & quality standards during all phases of green hydrogen production
- PC12.** Supervise the maintenance and recording of critical electrolyzer parameters such as electrolyte flow, temperature, current, hydrogen flow rate and pressure parameters
- PC13.** Manage the monitoring of periodic cleaning-in-place (CIP) records and proper maintenance of the rejected water from reverse osmosis (RO) through a zero liquid discharge scheme
- PC14.** Ensure adherence to generic SOP to maintain safety and operational efficiency

Qualification Pack

- PC15.** Apply basic knowledge of Material Safety Data Sheets (MSDS) for hazardous substances like KOH, H₂, and O₂
- PC16.** Supervise the safe collection of laboratory samples as needed for quality control purposes
- PC17.** Effectively lead emergency response actions and troubleshooting efforts to ensure operational continuity and safety

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** the basic principles and processes involved in hydrogen production
- KU2.** the properties and use of green hydrogen
- KU3.** standard operating procedures for green hydrogen production
- KU4.** importance of calibration of tools and instruments used in green hydrogen production
- KU5.** hydrogen output per unit of time
- KU6.** the block flow diagram and process flow diagram
- KU7.** basic heat & material balance
- KU8.** the basic PID with legends
- KU9.** organizational procedures for safe handling of hydrogen gas
- KU10.** reporting protocol and documentation required
- KU11.** relevant health and safety requirements applicable to the workplace
- KU12.** the importance of personal protective equipment used during the procedure performing
- KU13.** ways of efficiently managing wind and water in the process
- KU14.** latest methods of energy and material conservation
- KU15.** categorization of waste into dry, wet, recyclable, non-recyclable and items of single-use plastics
- KU16.** the difference between recyclable/reusable and waste material
- KU17.** MSDS of all chemicals
- KU18.** PID interlocks emergency shut down actions
- KU19.** properly maintaining logbook & proper shift handover are practiced everyday very effectively
- KU20.** work permits are signed after ensuring safety & in time on daily basis.
- KU21.** safe startup & shutdown of electrolyzers /compressors /h₂ deoxo etc. as per sop.
- KU22.** the concept of Mission Karmayogi
- KU23.** the concept of Swachhata Hi Seva

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read and interpret the hydrogen output per unit of time
- GS2.** analyze the parameters and output

Qualification Pack

- GS3.** record data on waste disposal at workplace
- GS4.** assess complexity and criticality of task
- GS5.** communicate effectively with team members
- GS6.** perform basic mathematical calculation
- GS7.** complete tasks efficiently and accurately within stipulated time
- GS8.** work constructively and collaboratively with others
- GS9.** delegate tasks to improve efficiencies
- GS10.** plan and organize the marketing activity

HYC/N9301: Working effectively in a team

Description

This unit covers basic practices that improve effectiveness of working in a team in an organizational set-up

Scope

The scope covers the following :

- Effective team work

Elements and Performance Criteria

Effective team work

To be competent, the user/individual on the job must be able to:

- PC1.** maintain clear communication with colleagues
- PC2.** pass on information to colleagues in line with organisational requirements
- PC3.** work in a team and support the team members
- PC4.** work in ways that show respect to colleagues
- PC5.** fulfil commitments made to colleagues
- PC6.** inform team members timely, if timelines can't be met
- PC7.** take the necessary initiatives to resolve the issues while working in team

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** the organization policies and procedures related to team performance
- KU2.** the importance of effective communication and establishing good working relationships with colleagues
- KU3.** Deeper understanding of actions & consequences of gendered behaviour
- KU4.** the importance of creating an environment of trust and mutual respect
- KU5.** the implications of own work on the work and schedule of others
- KU6.** the standard practice in organization w.r.t communication at various levels
- KU7.** the instructions at individual level or at group level
- KU8.** individual work responsibility and corrective measures required to complete task in time
- KU9.** the importance of personal qualities like discipline and confidence to achieve success in work assigned

Generic Skills (GS)

User/individual on the job needs to know how to:

Qualification Pack

- GS1.** communicate effectively in writing
- GS2.** read instructions, guidelines/procedures
- GS3.** communicate information effectively
- GS4.** make decisions on a suitable course of action or response keeping in view resource utilization while meeting commitments
- GS5.** how to plan the work to meet the deadline
- GS6.** the importance of consistent and reliable services for customer satisfaction
- GS7.** apply problem solving approaches in different situations
- GS8.** apply balanced judgments to different situations

DGT/VSQ/N0102: Employability Skills (60 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Career Development & Goal Setting
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

- PC1.** identify employability skills required for jobs in various industries
- PC2.** identify and explore learning and employability portals

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

- PC3.** recognize the significance of constitutional values, including civic rights and duties, citizenship, responsibility towards society etc. and personal values and ethics such as honesty, integrity, caring and respecting others, etc.
- PC4.** follow environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

- PC5.** recognize the significance of 21st Century Skills for employment
- PC6.** practice the 21st Century Skills such as Self-Awareness, Behaviour Skills, time management, critical and adaptive thinking, problem-solving, creative thinking, social and cultural awareness, emotional awareness, learning to learn for continuous learning etc. in personal and professional life

Basic English Skills

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC7.** use basic English for everyday conversation in different contexts, in person and over the telephone
- PC8.** read and understand routine information, notes, instructions, mails, letters etc. written in English
- PC9.** write short messages, notes, letters, e-mails etc. in English

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down the proportion of marks for Theory and Skills Practical for each PC.
2. The assessment for the theory part will be based on the knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. Individual assessment agencies will create unique question papers for the theory part for each candidate at each examination/training center (as per assessment criteria below).

Qualification Pack

5. Individual assessment agencies will create unique evaluations for skill practical for every student at each

examination/ training center based on these criteria.

6. To pass the Qualification Pack assessment, every trainee should score a minimum of 70% of aggregate marks to successfully clear the assessment.

7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Recommended Pass % aggregate for QP: 70

Minimum Aggregate Passing % at QP Level : 70

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Minimum Passing % at NOS Level: 70

(Please note: A Trainee must score the minimum percentage for each NOS separately as well as on the QP as a whole.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
