Qualification Pack

IAC/ASC/Q0101: Junior Tyre Specialist

Brief Job Description

This qualification pack is designed to equip personnel with the necessary knowledge and skills to excel in the Tyre Management Industry. This program covers topics such as safe working practices, tyre usage, maintenance, and repair, vehicle driving dynamics related to tyres, and basic problem-solving techniques. Personnel will also receive training on Lean principles, productivity improvement, supervisor training, and soft skills such as team building, task management, and leadership. The program aims to provide personnel with the technical and soft skills required to excel as Jr. Technical Supervisors/Service Engineers in the tyre management industry.

Personal Attributes

Perform detailed tyre inspection including tyre pressure, wear and tear, etc. Create an inspection sheet for tyres. Inspect the wheel system, suspension system, and braking system of a motor vehicle.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [IAC/ASC/N0112: Introduction to Industry and Job Role & Automotive Fundamental](#)
2. [IAC/ASC/N0103: Tyre basics](#)
3. [IAC/ASC/N0111: Tyre Technology](#)
4. [IAC/ASC/N0110: Tyre Maintenance](#)
5. [IAC/ASC/N0109: Wheel & Brake Systems](#)
6. [IAC/ASC/N0108: Steering & Suspension Systems](#)
7. [IAC/ASC/N0107: Report generation and Inventory management](#)
8. [IAC/ASC/N0106: Business Growth](#)
9. [IAC/ASC/N0105: Employability Skills \(ES\)](#)
10. [IAC/ASC/N0104: On Job Training \(OJT\)](#)

IAC/ASC/N0112: Introduction to Industry and Job Role & Automotive Fundamental

Description

Introduction to Industry and Job Role & Automotive Fundamental

Scope

The scope covers the following :

- Understand the history and evolution of Tyre Management Industries, including the services offered, their
- origin, and current market position

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Understand the history and evolution of Tyre Management Industries, including the services offered, their origin, and current market position
- PC2.** Analyze the challenges and opportunities facing Tyre Management Industries in the current business environment, and suggest strategies for addressing them
- PC3.** Understand the key responsibilities of a Service Engineer in the Tyre Management Industry, including KRA (Key Result Areas) and KPIs (Key Performance Indicators)
- PC4.** Identify the skills and competencies required for success as a Service Engineer, including technical knowledge, communication skills, problem-solving ability, and teamwork
- PC5.** Demonstrate safe working practices in the tyre management industry.
- PC6.** Maintain environmental and sustainability best practices in the workplace.
- PC7.** Select and apply appropriate tools and measuring equipment.
- PC8.** Apply knowledge of petrol and diesel engine operation.
- PC9.** Check and maintain batteries and jump-start vehicles as needed.
- PC10.** Adhere to best practices for selecting and using measuring equipment in the workplace.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Introduction to Tyre Management Industries, our services, how we started and where we are, our vision, mission and core values.
- KU2.** Understanding Service Engineer job role and responsibilities (KRA and KPI).
- KU3.** Understanding of Safe working practices
- KU4.** Understanding the environmental and sustainability best practice
- KU5.** Understanding the working of the tools and equipment used in the workshop
- KU6.** Understanding the working of measuring equipment

Qualification Pack

KU7. Knowledge of Petrol and diesel engine operation

KU8. Understanding the procedure to check and maintain batteries and Jump start vehicles.

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. Identify the unsafe environment and implement Safe working practices

GS2. Maintain environmental and sustainability best practice

GS3. Select and Apply tools and equipment

GS4. Select and Apply measuring equipment

GS5. Practical demonstration on Petrol and diesel engine operation

GS6. Check and maintain batteries and Jump start vehicles

Qualification Pack

IAC/ASC/N0103: Tyre basics

Description

Tyre basics

Scope

The scope covers the following :

- Understand the importance of tyre usage in terms of load, shock absorption, and vehicle handling.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Understand the importance of tyre usage in terms of load, shock absorption, and vehicle handling.
- PC2.** Describe the key features of tyre specifications and how they impact tyre performance.
- PC3.** Recognize and address issues related to low NSD, hub mismatch, and flat tyres.
- PC4.** Understand the impact of tyre wear on driving force and braking power.
- PC5.** Explain the relationship between tyre usage and steering wheel movement.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Introduction to Tyre usage load, Shock absorption, vehicle handling driving force and braking power, steering wheel movement.
- KU2.** Introduction to Tyre Specification.
- KU3.** Introduction to Low NSD, Hub Mismatch, Flat tyres.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Tyre usage load, Shock absorption, vehicle handling driving force and braking power, steering wheel movement.
- GS2.** Understanding of Tyre Specification.
- GS3.** Demonstration/ practical on Low NSD, Hub Mismatch, Flat tyres.

IAC/ASC/N0111: Tyre Technology

Description

Tyre Technology

Scope

The scope covers the following :

- Identify and describe the different classifications of tyres and their functions and performance.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Identify and describe the different classifications of tyres and their functions and performance.
- PC2.** Understand the key elements of tyre design and development, including design sequences, tread patterns, and tyre contours.
- PC3.** Explain the different tyre components, compounds, and materials used in tyre.
- PC4.** Understand the tyre construction process.
- PC5.** Describe the tyre rethreading process and the importance of tyre inspection reports in maintaining tyre performance and safety.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Understanding on Tyre classification, its functions and performance.
- KU2.** Knowledge on Elements of Tyre Design and Development
- KU3.** Knowledge of Design sequences. Tread pattern. Tyre Contour. Tyre components, compounds and materials. Tyre Construction
- KU4.** Procedure for Tyre rethreading, Introduction to Tyre Inspection report

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Demonstration on Tyre classification, functions and performance.
- GS2.** Elements of Tyre Design and Development
- GS3.** Design sequences. Tread pattern. Tyre Contour. Tyre components, compounds and materials. Tyre construction
- GS4.** Tyre rethreading process, Tyre Inspection report

IAC/ASC/N0110: Tyre Maintenance

Description

Tyre Maintenance

Scope

The scope covers the following :

- Understanding the tyre maintenance cycle and its importance in prolonging tyre life and ensuring safe driving conditions.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Understanding the tyre maintenance cycle and its importance in prolonging tyre life and ensuring safe driving conditions.
- PC2.** Learning the techniques and procedures for repairing punctures and cuts in tyres.
- PC3.** Understanding the impact of tyre-related driving dynamics on vehicle performance.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Understanding of Tyre maintenance cycle
- KU2.** Procedure to repair Tyre puncher and cut repair
- KU3.** Knowledge of Vehicle driving dynamics related to tyre i.e. vehicle pulls on one side, uneven vibration and noise, braking difficulties, turning difficulties.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Tyre maintenance cycle
- GS2.** Tyre puncher and cut repair
- GS3.** Vehicle driving dynamics related to tyre i.e. vehicle pulls on one side, uneven vibration and noise, braking difficulties, turning difficulties.

IAC/ASC/N0109: Wheel & Brake Systems

Description

Wheel & Brake Systems

Scope

The scope covers the following :

- Maintain vehicle wheel and tyre assemblies

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Maintain vehicle wheel and tyre assemblies
- PC2.** Perform wheels and tyres balancing
- PC3.** Check and maintain braking systems, including brake drums and brake disc rotors
- PC4.** Troubleshoot and rectify vehicle hydraulic braking system issues

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Procedure to Maintain vehicle wheel and tyre assemblies
- KU2.** Procedure to Wheels and tyres balancing
- KU3.** Procedure to Check and maintain braking systems
- KU4.** Procedure to Maintain brake drums and brake disc rotors
- KU5.** Procedure to Troubleshoot and Rectify and Fix vehicle hydraulic braking system

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Maintain vehicle wheel and tyre assemblies
- GS2.** Wheels and tyres balancing
- GS3.** Check and maintain braking systems

IAC/ASC/N0108: Steering & Suspension Systems

Description

Steering & Suspension Systems

Scope

The scope covers the following :

- Selecting and applying bearings, seals, gaskets, sealants, and adhesives in vehicle maintenance.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Selecting and applying bearings, seals, gaskets, sealants, and adhesives in vehicle maintenance.
- PC2.** Troubleshooting and rectifying vehicle suspension systems.
- PC3.** Troubleshooting and rectifying vehicle steering systems.
- PC4.** Performing vehicle wheel alignment operations to enhance vehicle stability and reduce wear and tear.
- PC5.** dasdasdasd

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Specifications of Bearing, seals, gaskets, sealants and adhesives
- KU2.** Process flow of Troubleshoot and Rectifying vehicle suspension systems
- KU3.** Process flow of Troubleshoot and Rectify vehicle steering systems
- KU4.** Process flow to Perform vehicle wheel alignment operations

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Bearing selection and apply, seals, gaskets, sealants and adhesives
- GS2.** Troubleshoot and Rectify vehicle suspension systems
- GS3.** Troubleshoot and Rectify vehicle steering systems

IAC/ASC/N0107: Report generation and Inventory management

Description

Report generation and Inventory management

Scope

The scope covers the following :

- Understanding vehicle and trailer masters

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Understanding vehicle and trailer masters
- PC2.** Familiarity with common reports, including tyre status, issue, inspection, CPKM, observation, and action reports
- PC3.** Knowledge of tyre management practices.
- PC4.** Ability to generate accurate and comprehensive vehicle inspection reports

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Vehicle Inspection and report preparation
- KU2.** Master - Vehicle master, Trailer master.
- KU3.** Report- Common reports, tyre status report, Issue report, Inspection report, CPKM report, Observation and action
- KU4.** Tyre Management - Tyre KM, Tyre Purchase, Fitment, Expense Rethread, Scrap, Alignment, Rotation

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Vehicle Inspection and report preparation
- GS2.** Master - Vehicle master, Trailer master.
- GS3.** Report - Common reports, tyre status report, Issue report, Inspection report, CPKM report, Observation and action

IAC/ASC/N0106: Business Growth

Description

Business Growth

Scope

The scope covers the following :

- Principles of Lean and Toyota Production System: Introduction to Lean methodology and Toyota Production System for process improvement and waste reduction.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Principles of Lean and Toyota Production System: Introduction to Lean methodology and Toyota Production System for process improvement and waste reduction.
- PC2.** Basic Problem-Solving Techniques: Knowledge and application of 7 QC (quality control) and 7 MP (management and planning) tools for continuous improvement.
- PC3.** Improving Productivity: Introduction to Standard Work, MOST (Maynard Operation Sequence Technique), and OEE (Overall Equipment Effectiveness) for productivity improvement.
- PC4.** Supervisor training: Training on vendor development, warehouse management, and supply chain management for effective supervision and leadership.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Principles of Lean and Toyota Production System
- KU2.** Concept of Muda, Mura, Muri & Managing Flow
- KU3.** Introduction to Value Stream Thinking
- KU4.** Understanding Flow and Process Kaizens
- KU5.** Basic Problem-Solving Techniques (7QC Plus 7 MP Tools)
- KU6.** Improving Productivity - Standard Work (MOST, OEE)
- KU7.** Supervisor training (Vendor development, warehouse management, Supply chain)

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Lean and Toyota Production System
- GS2.** Implementation of of Muda, Mura, Muri & Managing Flow
- GS3.** Application of Value Stream Thinking
- GS4.** Application of Flow and Process Kaizens

Qualification Pack

GS5. Report analysis by application of basic Problem-Solving Techniques (7QC Plus 7 MP Tools)

GS6. Improving Productivity - Standard Work (MOST, OEE)

IAC/ASC/N0105: Employability Skills (ES)

Description

Employability Skills (ES)

Scope

The scope covers the following :

- Develop an understanding of employability skills and their importance in the 21st century workplace.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Develop an understanding of employability skills and their importance in the 21st century workplace.
- PC2.** Demonstrate knowledge and appreciation of constitutional values and citizenship responsibilities.
- PC3.** Acquire the skills and mindset necessary to become a professional in the 21st century.
- PC4.** Enhance basic English skills, including reading, writing, listening, and speaking.
- PC5.** Understand the principles of career development and goal setting to plan for a successful future.
- PC6.** Improve communication skills, both verbal and written, for effective interaction in professional settings.
- PC7.** Embrace diversity and inclusion, recognizing and respecting the value of different perspectives and backgrounds.
- PC8.** Gain financial and legal literacy to make informed decisions and navigate personal and professional finances.
- PC9.** Develop essential digital skills to effectively utilize technology and digital tools in various work environments.
- PC10.** Cultivate an entrepreneurial mindset, including creativity, innovation, and problem-solving abilities.
- PC11.** Understand the principles and practices of providing excellent customer service.
- PC12.** Prepare for apprenticeships and job opportunities by acquiring relevant skills and knowledge.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

Qualification Pack

KU1. Develop theoretical understanding of employability skills, constitutional values, professionalism, basic English skills, career development, communication, diversity, financial and legal literacy, digital skills, entrepreneurship, customer service, and job readiness. Gain insights into relevant theories, principles, and frameworks to comprehend the underlying concepts and foundations. Apply theoretical knowledge to enhance employability, personal growth, and success in the 21st-century workplace

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Develop practical skills and abilities in employability skills, constitutional values, professionalism, basic English proficiency, career development, effective communication, diversity and inclusion, financial and legal literacy, digital skills, entrepreneurship, customer service, and job readiness.
- GS2.** Apply these practical skills in real-world scenarios, such as job interviews, workplace interactions, goal setting, financial decision-making, digital communication, and providing excellent customer service. Enhance employability prospects, adapt to diverse work environments, and succeed in professional endeavors.

IAC/ASC/N0104: On Job Training (OJT)

Description

Demonstrate competency in performing Junior Tyre Specialist job-specific tasks and responsibilities with a high level of proficiency and effectiveness. Apply theoretical knowledge and practical skills acquired during the training to successfully execute job duties. Adapt to the work environment, collaborate with colleagues, and meet or exceed performance expectations. Gain valuable hands-on experience, enhance job-related skills, and contribute to the overall success and productivity of the organization.

Scope

The scope covers the following :

- Demonstrate competency in performing Junior Tyre Specialist job-specific tasks and responsibilities with a high level of proficiency and effectiveness. Apply theoretical knowledge and practical skills acquired during the training to successfully execute job duties. Adapt to the work environment, collaborate with colleagues, and meet or exceed performance expectations.
- Gain valuable hands-on experience, enhance job-related skills, and contribute to the overall success and productivity of the organization.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Demonstrate competency in performing Junior Tyre Specialist job-specific tasks and responsibilities with a high level of proficiency and effectiveness.
- PC2.** Apply theoretical knowledge and practical skills acquired during the training to successfully execute job duties.
- PC3.** Adapt to the work environment, collaborate with colleagues, and meet or exceed performance expectations.
- PC4.** Gain valuable hands-on experience, enhance job-related skills, and contribute to the overall success and productivity of the organization.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Not applicable

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Adapt to the work environment, collaborate with colleagues, and meet or exceed performance expectations. Gain valuable hands-on experience, enhance job-related skills, and contribute to the overall success and productivity of the organization.

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

This section includes the processes involved in identifying, gathering, and interpreting information to evaluate the Candidate on the required competencies of the program.

Procedure:

1. Define the Assessment Criteria: The first step in conducting an assessment of training participants is to define the assessment criteria. This includes identifying the learning objectives, knowledge, and skills that trainees are expected to acquire from the training program.
2. Select the Assessment Method: Once the assessment criteria are defined, the next step is to select an appropriate assessment method.
3. Prepare the Assessment Materials: Based on the selected assessment method, prepare the necessary assessment materials, such as question papers, evaluation forms, and grading rubrics. It may or may not include testing and trails of assessment.
4. Communicate Assessment Expectations: Communicate the assessment expectations to the trainees beforehand, including the assessment method, evaluation criteria, and any relevant instructions.

Qualification Pack

5. Conduct the Assessment: Conduct the assessment according to the chosen method, making sure to follow the assessment criteria and instructions provided to the trainees. Ensure that the assessment environment is suitable for the chosen assessment method.
6. Evaluate and Grade the Assessments: Evaluate the assessments and assign grades or scores based on the assessment criteria and grading rubrics. Ensure that grading is consistent and fair for all trainees.
7. Provide Feedback: Provide feedback to trainees based on their assessment results, including areas of strengths and weaknesses, and areas for improvement.
8. Record and Report Assessment Results: Record the assessment results and report them to relevant stakeholders, such as supervisors and training coordinators. Ensure that the assessment results are kept confidential and only shared with authorized personnel.

Minimum Aggregate Passing % at QP Level : 80

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
Key Learning Outcome	Key learning outcome is the statement of what a learner needs to know, understand and be able to do in order to achieve the terminal outcomes. A set of key learning outcomes will make up the training outcomes. Training outcome is specified in terms of knowledge, understanding (theory) and skills (practical application).
OJT (M)	On-the-job training (Mandatory) trainees are mandated to complete specified hours of training on site
OJT (R)	On-the-job training (Recommended) trainees are recommended the specified hours of training on site
Procedural Knowledge	Procedural knowledge addresses how to do something, or how to perform a task. It is the ability to work, or produce a tangible work output by applying cognitive, affective or psychomotor skills.
Training Outcome	Training outcome is a statement of what a learner will know, understand and be able to do upon the completion of the training.
Terminal Outcome	Terminal outcome is a statement of what a learner will know, understand and be able to do upon the completion of a module. A set of terminal outcomes help to achieve the training outcome.
