Qualification Pack

IAC/ASC/Q0201: Supervisor Registered Vehicle Scrapping Facility (RVSF)

Brief Job Description

This course provides participants with the necessary knowledge and skills for safe and responsible end-of-life vehicle (ELV) de-pollution and dismantling. It covers topics such as safety, hazards and risks associated with vehicle dismantling, ELV guidance for waste handling, personal protective equipment training, personnel safety, Tools, and equipment. The course aims to ensure compliance with regulations and promote environmental responsibility in the automotive industry.

Personal Attributes

Knowledge of health and safety risks in ELV operations and apply appropriate risk assessment and management techniques. Understand the environmental considerations associated with ELV management and implement strategies to minimize pollution and negative impacts

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [IAC/ASC/N0201: Introduction to ELV and Environmental Impact](#)
2. [IAC/ASC/N0202: Maintain a safe and healthy working environment at the Registered Vehicle Scrapping Facility \(RVSF\)](#)

IAC/ASC/N0201: Introduction to ELV and Environmental Impact

Description

Introduction to ELV and Environmental Impact

Scope

The scope covers the following :

- Learners will comprehend the definition and characteristics of ELVs, including the factors that contribute to their end-of-life status.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Learners will comprehend the definition and characteristics of ELVs, including the factors that contribute to their end-of-life status.
- PC2.** Learners will gain an awareness of the environmental challenges associated with ELVs, such as pollution, resource depletion, and waste generation.
- PC3.** Learners will recognize and analyze the key stakeholders involved in the ELV industry, including customers, suppliers, and competitors.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Concept of End-of-Life Vehicles (ELVs) and their significance in the automotive industry.
- KU2.** Legislative, regulatory and policy aspects.
- KU3.** Environmental impact of ELVs and the need for proper management and disposal practices.
- KU4.** Key responsibilities of a Various roles in the RVSF.
- KU5.** Different segments in Automotive
- KU6.** Various stakeholders involved in the ELV industry, including customers, suppliers, and competitors.

IAC/ASC/N0202: Maintain a safe and healthy working environment at the Registered Vehicle Scrapping Facility (RVSF)

Description

Maintain a safe and healthy working environment at the Registered Vehicle Scrapping Facility (RVSF)

Scope

The scope covers the following :

- Creating and sustaining a safe, clean, and environmentally friendly workplace.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

PC1. Creating and sustaining a safe, clean, and environmentally friendly workplace.

PC2. Identifying and reporting risks.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. Report on Health, Safety, and Security Incidents case studies.

KU2. Demonstration/ practical on PPE

KU3. First Aid Safety

KU4. HAZOP Study

KU5. Employ practices for efficient utilization of material and energy/electricity.

KU6. Recognize and pinpoint areas within the plant that have the potential to be hazardous or unhygienic in nature.

KU7. Verify, that all equipment undergo safety testing as outlined in the organization's specified cycle or timelines.

KU8. Label and tag areas near workplaces or machinery that pose risks or hazards to caution users about potential dangers.

KU9. Providing Safety Training to Team Members

KU10. Enforcing Organizational Safety, Health, and Environment Practices

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. Understanding of different types of hazards & risks including behavioral & Engineering safety

GS2. Reporting Identified Risks to Relevant Teams.

GS3. Raising Awareness and Conducting Training Sessions

Qualification Pack

GS4. Enforcing Personal Protective Equipment (PPE) usage

GS5. Following Equipment Operating Procedures and Manuals

IAC/ASC/N0203: Comprehensive Management of End-of-Life Vehicles: Understanding Processes, Ensuring Implementation, and Suggesting Improvements

Description

Comprehensive Management of End-of-Life Vehicles: Understanding Processes, Ensuring Implementation, and Suggesting Improvements

Scope

The scope covers the following :

- Learner will acquire the complete understating of vehicle components, assemblies, and subassemblies, vehicle dismantling process, proper usage of tools and equipment, handling of hazardous material during the dismantling, the risk associated with the dismantling process, record keeping, identification of ok/not ok material, proper handling of material, etc.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Demonstrate the usage of each of the tools and equipment.
- PC2.** Demonstrate how to conduct scheduled maintenance checks on tools and equipment to identify any issues or malfunctions.
- PC3.** Demonstration of Plasma Arc Cutting, Gas Cutting and Hand Grinder
- PC4.** Practical Task of document completion of Various Vehicles.
- PC5.** Creating and maintaining records.
- PC6.** Creating a unique stock number for an end-of-life vehicle
- PC7.** How to deal with vehicles where the vehicle registration mark (VRM) and chassis number (VIN) do not match data sources.
- PC8.** Removal of batteries and liquefied gas tanks
- PC9.** Removal or neutralization of potential explosive components (e.g., air bags)
- PC10.** Removal and collection of all types of fluids
- PC11.** Removal of wheels and tires
- PC12.** Removal of hazardous components (e.g., lead balancing weights or mercury switches)
- PC13.** Demonstration of components and subassemblies of Vehicle
- PC14.** Removing body parts, engine, transmission, suspension system, and other parts, using appropriate tools and techniques.
- PC15.** Practical Dismantling of Vehicle (Various Segments)
- PC16.** Demonstration of operating Shredder & Baler
- PC17.** Categorize and organize materials based on size, type, or other relevant factors.

Knowledge and Understanding (KU)

Qualification Pack

The individual on the job needs to know and understand:

- KU1.** Understanding the purpose, working principle of various tools & Equipment.
- KU2.** Knowledge on Maintenance process for each equipment
- KU3.** Knowledge of User Manuals and SOPs
- KU4.** Understanding Metal Cutting & Removing Process
- KU5.** Knowledge of information transfer with connected Authorities
- KU6.** Understanding of safety protocols in handling potentially dangerous components and fluids found in end-of-life vehicles.
- KU7.** Understanding of Unforeseen incidents battery damage, fluid leakage, seized fixings, insufficient storage capacity, equipment malfunction, contact with hazardous substances
- KU8.** Preparation of Checklists
- KU9.** Identify end-of-life vehicles, vehicle documentation & vehicle technical data.
- KU10.** Concept of Labeling & Tagging
- KU11.** Support in ensuring optimum resource utilization and wastage reduction through process improvements, Kaizen, Poka Yoke etc.
- KU12.** Operating Morth, VAHAN or State Registration Portal databases with the scrapping process.

IAC/ASC/N0204: Managing the team on the line/ shift on a day-to-day basis

Description

Managing the team on the line/ shift on a day-to-day basis.

Scope

The scope covers the following :

- Learners will acquire the competence to efficiently oversee operations during shifts or on production lines, mastering essential skills and strategies for effective management.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Generate daily and monthly Management Information System (MIS) reports for production, meticulously comparing actual performance against set targets. Subsequently, communicating these findings to the Production In charge within the context of End-of-Life Vehicles (ELV) operations.
- PC2.** Conduct thorough quality inspections on incoming materials for scrap vehicles and provide pertinent feedback to the store department.
- PC3.** Perform comprehensive quality inspections on the dismantling process, ensuring adherence to specified parameters and guidelines. Provide necessary feedback to line leaders.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Understand strategically assigning manpower and effectively managing shifts to ensure the appropriate placement of personnel at designated workstations.
- KU2.** Support Shift In Charge/ Process head/ Shop head in finalizing the shift rosters for the week and month based on the production plan available.
- KU3.** Initiate the submission of inventory requisitions to both the Stores and Purchase departments, and subsequently, maintain active communication with these departments to ensure the punctual receipt of materials, including spares and consumables, aligned with the context of End-of-Life Vehicles (ELV) operations.
- KU4.** Secure the alignment of material movement on the shop floor with the designated Time-At-Task (TAT) durations outlined in Standard Operating Procedures (SOP) or Work Plans.
- KU5.** Optimal resource utilization (man, machine, and material) and streamlining of activities within the shift.
- KU6.** Identify & implement action steps to reduce losses and wastages during shift operation.
- KU7.** Support the in charge/ Engineer/ Shop Head in analyzing the various data sheets related to production, maintenance, manpower deployment etc.
- KU8.** Support the maintenance function to ensure execution of the maintenance schedules.

IAC/ASC/N0205: Execution of 5S Initiatives in the Shop Floor and Office Premises

Description

Execution of 5S Initiatives in the Shop Floor and Office Premises

Scope

The scope covers the following :

- Learners will acquire the skills to ensure the effective execution of sorting, streamlining, organizing, storage, and detailed documentation practices.
- Learners will actively foster systematic cleaning and uphold consistent standardization across both the organization's plant and office premises, aligning their efforts with the guidelines established by the organization.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Practically implement the 5S principle within the ELV Workshop, focusing on proper material handling, storage, and safety measures.
- PC2.** Prepare a plan to implement logical & user-friendly documentation, file management for all activities across the plant and create guidelines around standardization of processes.
- PC3.** Demonstrate that all materials and tools are stored in the designated places and in the manner indicated in the 5S instructions.
- PC4.** Ensure that areas of material storage are not overflowing and maintain proper storage plan.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Ensure workstations are free from tools, fixtures, and jigs when not in use, and workbenches remain uncluttered, and devoid of unnecessary items unless actively employed.
- KU2.** Organize tools, equipment, fasteners, and spare parts into proper trays, cabinets, and lockers, adhering to specifications and utility as detailed in the 5S guidelines and work instructions.
- KU3.** Monitor the return of surplus materials and tools to designated sections, maintaining a clutter-free work area without additional materials or tools nearby.
- KU4.** Supervise the removal of redundant equipment, storage, furniture, excess inventory, supplies, and materials.
- KU5.** Guarantee proper stacking and storage of diverse boxes and containers based on size and utility to prevent items from falling or breaking, while also facilitating easy sorting when necessary.
- KU6.** Ensure workplace organization aligns with the principles of minimizing wasted motions, considering ergonomics, and incorporating work and method study.

Qualification Pack

- KU7.** Promote self-cleanliness by maintaining clean uniforms, shoes, gloves, helmets, and upholding personal hygiene.
- KU8.** Enforce the consistent practice of daily cleaning standards and schedules throughout the entire plant, fostering a clean working environment.
- KU9.** Supervise the development and assignment of various cleaning and organizing tasks within the work area.
- KU10.** Actively participate in employee work groups focusing on 5S, while encouraging team members to engage actively.
- KU11.** Supervise the training of staff and operators to ensure a comprehensive understanding of 5S procedures.
- KU12.** Confirm the inclusion of guidelines for building sustainability within 5S, encompassing do's and don'ts, within the 5S checklists and work instructions for easy reference.
- KU13.** Ensure the continuous training of team members on 5S, aiming to enhance their awareness, support the effective implementation.
- KU14.** Confirm the creation, functionality, and proper placement of all visual controls, notice boards, symbols, etc., within the manufacturing area as per the requirement.

IAC/ASC/N0206: Employability Skill (ES)

Description

Employability Skill (ES)

Scope

The scope covers the following :

- Develop an understanding of employability skills and their importance in the 21st century workplace.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Develop practical skills and abilities in employability skills, constitutional values, professionalism, basic English proficiency, career development, effective communication, diversity and inclusion, financial and legal literacy, digital skills, entrepreneurship, customer service, and job readiness.
- PC2.** Apply practical skills in real-world scenarios, such as job interviews, workplace interactions, goal setting, financial decision-making, digital communication, and providing excellent customer service.
- PC3.** Enhance employability prospects, adapt to diverse work environments, and succeed in professional endeavors.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Develop theoretical understanding of employability skills, constitutional values, professionalism, basic English skills, career development, communication, diversity, financial and legal literacy, digital skills, entrepreneurship, customer service, and job readiness.
- KU2.** Gain insights into relevant theories, principles, and frameworks to comprehend the underlying concepts and foundations.
- KU3.** Apply theoretical knowledge to enhance employability, personal growth, and success in the 21st-century workplace.

Description

On-The-Job Training (OJT)

Scope

The scope covers the following :

- They become familiar with the entire ELV process, from vehicle intake and depollution to component separation OJT also focuses on hazardous material management, ensuring proper handling and disposal of materials like batteries and airbags. Trainees learn to identify recyclable components, develop problem-solving skills, and understand environmental compliance. Additionally, they gain practical experience in inventory management, teamwork, and customer service.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Trainees gain a deep understanding of safety protocols, equipment operation, and material handling specific to ELV recycling operations

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Define the Assessment Criteria: The first step in conducting an assessment of training participants is to define the assessment criteria. This includes identifying the learning objectives, knowledge, and skills that trainees are expected to acquire from the training program.
2. Select the Assessment Method: Once the assessment criteria are defined, the next step is to select an appropriate assessment method.
3. Prepare the Assessment Materials: Based on the selected assessment method, prepare the necessary assessment materials, such as question papers, evaluation forms, and grading rubrics. It may or may not include testing and trails of assessment.
4. Communicate Assessment Expectations: Communicate the assessment expectations to the trainees beforehand, including the assessment method, evaluation criteria, and any relevant instructions.
5. Conduct the Assessment: Conduct the assessment according to the chosen method, making sure to follow the assessment criteria and instructions provided to the trainees. Ensure that the assessment environment is suitable for the chosen assessment method.

Qualification Pack

6. Evaluate and Grade the Assessments: Evaluate the assessments and assign grades or scores based on the assessment criteria and grading rubrics. Ensure that grading is consistent and fair for all trainees.

7. Provide Feedback: Provide feedback to trainees based on their assessment results, including areas of strengths and weaknesses, and areas for improvement.

8. Record and Report Assessment Results: Record the assessment results and report them to relevant stakeholders, such as supervisors and training coordinators. Ensure that the assessment results are kept confidential and only shared with authorized personnel.

Assessment Method:

1. Written Tests: This includes multiple choice questions, short answer questions, and essay questions that test knowledge and understanding of course material.

2. Performance-based Assessments: This includes tasks such as role-playing exercises, simulations, and case studies, which allow learners to apply their knowledge and skills in real-world scenarios.

3. Oral Assessments: This includes presentations, debates, Quizzes and discussions, which allow learners to demonstrate their understanding of course material and ability to communicate effectively.

4. Portfolios: This involves collecting and presenting samples of work produced by learners over a period of time, allowing them to showcase their learning and progress.

5. Self-Assessment: This involves learners reflecting on their own learning and performance, identifying areas of strength and weakness, and setting goals for improvement.

6. Peer Assessment: This involves learners providing feedback to each other on their work and performance, which can promote collaboration and constructive feedback.

Minimum Aggregate Passing % at QP Level : 80

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
Key Learning Outcome	Key learning outcome is the statement of what a learner needs to know, understand and be able to do in order to achieve the terminal outcomes. A set of key learning outcomes will make up the training outcomes. Training outcome is specified in terms of knowledge, understanding (theory) and skills (practical application).
OJT (M)	On-the-job training (Mandatory) trainees are mandated to complete specified hours of training on site
OJT (R)	On-the-job training (Recommended) trainees are recommended the specified hours of training on site
Procedural Knowledge	Procedural knowledge addresses how to do something, or how to perform a task. It is the ability to work or produce a tangible work output by applying cognitive, affective, or psychomotor skills.
Training Outcome	Training outcome is a statement of what a learner will know, understand and be able to do upon the completion of the training.
Terminal Outcome	Terminal outcome is a statement of what a learner will know, understand and be able to do upon the completion of a module. A set of terminal outcomes help to achieve the training outcome.
