IAC/ASC/Q2501: Technician - Registered Vehicle Scrapping Facility (RVSF)

Brief Job Description

This course provides participants with the necessary knowledge and skills for safe and responsible end-of-life vehicle (ELV) de-pollution and dismantling. It covers topics such as safety, hazards and risks associated with vehicle dismantling, ELV guidance for waste handling, personal protective equipment training, personnel safety, Tools, and equipment. The course aims to ensure compliance with regulations and promote environmental responsibility in the automotive industry.

Personal Attributes

Basic report generation skills and ability to follow guidelines for scrapping processes. Effective communication skills to interact with team members.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [IAC/ASC/N2501: An introduction to End-of-Life Vehicles \(ELVs\)](#)
2. [IAC/ASC/N2502: Safe Working Practices](#)
3. [IAC/ASC/N2503: Vehicle Scrapping Process](#)
4. [IAC/ASC/N2504: Planning ELV Operations](#)
5. [IAC/ASC/N2505: Employability Skill - Technician \(RVSF\)](#)
6. [IAC/ASC/N2506: On Job Training \(OJT\) - Technician \(RVSF\)](#)

Qualification Pack (QP) Parameters

Qualification Pack

IAC/ASC/N2501: An introduction to End-of-Life Vehicles (ELVs)

Description

An introduction to End-of-Life Vehicles (ELVs) and their effects on the environment

Scope

The scope covers the following :

- Learners will be aware about End-of-Life Vehicles (ELVs) and their significance in terms of legal, sustainability, recycling, and responsible disposal.

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Acquire a holistic understanding of the automotive industry, including its historical evolution, market segmentation, and technological advancements.
- PC2.** Awareness about End-of-Life Vehicles (ELVs) and their significance in terms of legal, sustainability, recycling, and responsible disposal.
- PC3.** Recognize and navigate the complex stakeholder ecosystem in the ELV industry, fostering effective relationships with customers, suppliers, and competitors to drive sustainable practices and compliance.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Understanding the automobile industry.
- KU2.** Understanding End-of-Life Vehicles (ELVs) in the Automotive Industry.
- KU3.** Legislation, regulations, and policies governing ELVs.
- KU4.** Roles and Responsibilities within Recycling and Vehicle Salvage Facilities (RVSF).
- KU5.** Global scope of ELV management and its implications on different regions.
- KU6.** Understanding the various Stakeholder Ecosystem in ELV including customers, suppliers, and competitors.

IAC/ASC/N2502: Safe Working Practices

Description

Recognize and comply with safe working practices, environment regulations, and housekeeping in the Registered Vehicle Scrapping Facility

Scope

The scope covers the following :

- Recognize & comply with safe working practices, environment regulation and housekeeping in Registered Vehicle Scrapping Facility

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Gain the ability to identify potential risks and hazards in the workplace and promptly reporting process.
- PC2.** Capability to create and maintain a workplace that prioritizes safety, cleanliness, and environmental friendliness.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Recognize potentially hazardous activities and their underlying causes within the workplace.
- KU2.** Follow safe work practices to ensure personal safety and the safety of colleagues.
- KU3.** Coordinate with other resources at the workplace to achieve a healthy, safe, and secure environment for all incorporating all government norms esp. for emergency situations like fires, earthquakes etc.
- KU4.** Familiarize yourself with safety procedures during fire drills, including hazard recognition and prevention.
- KU5.** Regularly maintain and sanitize workstations and equipment.

IAC/ASC/N2503: Vehicle Scrapping Process

Description

General Vehicle Scrapping Process

Scope

The scope covers the following :

- General Vehicle Scrapping Process

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Identify the comprehensive range of tools in an essential ELV toolkit, ensuring efficient operations.
- PC2.** Apply critical factors to select suitable tools, adhere to safety protocols, follow guidelines, and manage tools effectively for safe and responsible ELV operations.
- PC3.** Understanding of vehicle components, assemblies, and subassemblies, focusing on practical skills for efficient vehicle dismantling. This includes hands-on training in the proper usage of tools and equipment, safe handling of hazardous materials during dismantling, and an awareness of associated risks.
- PC4.** Essentials of record-keeping, distinguishing between acceptable and unacceptable materials, and mastering proper material handling techniques.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Adhere to standard operating procedures, particularly those outlined in ELV management guidelines and manuals, when utilizing workshop tools and equipment for ELV-related tasks.
- KU2.** Identifying end-of-life vehicles, understanding vehicle documentation & technical data.
- KU3.** Recognizing the various components and subassemblies present in ELVs.
- KU4.** Ability to transfer information to connected authorities.
- KU5.** Awareness of safety protocols when handling hazardous components and fluids.
- KU6.** Adherence to government norms for the proper drainage and collection of fluids, including oil, coolant, brake fluid, refrigerants, and fuel.
- KU7.** Handling unforeseen incidents such as battery damage, fluid leakage, insufficient storage capacity, equipment malfunction, and contact with hazardous substances.
- KU8.** Practicing safety protocols during the dismantling process.
- KU9.** Implementing the concept of labeling & tagging.
- KU10.** Applying the concept of re-use, re-manufacture, or recycling.
- KU11.** Contributing to optimum resource utilization and reduction of wastage through process improvements, Kaizens, Poka Yoke, etc

IAC/ASC/N2504: Planning ELV Operations

Description

Strategic Work Planning and Organization for Effective ELV Operations

Scope

The scope covers the following :

- Strategic Work Planning and Organization for Effective ELV Operations

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

- PC1.** Acquire the skills to ensure the effective execution of sorting, streamlining, organizing, storage, and detailed documentation practices.
- PC2.** Foster systematic cleaning and uphold consistent standardization across both the organization's plant and office premises, aligning their efforts with the guidelines established by the organization.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Organize the workspace following the 5S principles.
- KU2.** Work in line with organizations policies and procedures
- KU3.** Manage time, materials and cost effectively Use resources in a responsible manner.

IAC/ASC/N2505: Employability Skill - Technician (RVSF)

Description

Employability Skills (ES)

Scope

The scope covers the following :

- Employability Skills (ES)

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

PC1. Develop an understanding of employability skills and their importance in the 21st century workplace.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Develop practical skills and abilities in employability skills, constitutional values, professionalism, basic English proficiency, career development, effective communication, diversity and inclusion, financial and legal literacy, digital skills, entrepreneurship, customer service, and job readiness.
- KU2.** Apply these practical skills in real-world scenarios, such as job interviews, workplace interactions, goal setting, financial decision-making, digital communication, and providing excellent customer service.
- KU3.** Enhance employability prospects, adapt to diverse work environments, and succeed in professional endeavors.

IAC/ASC/N2506: On Job Training (OJT) - Technician (RVSF)

Description

On Job Training (OJT)

Scope

The scope covers the following :

- On Job Training (OJT)

Elements and Performance Criteria

To be competent, the user/individual on the job must be able to:

PC1. Practical, hands-on experience, trainees gain a deep understanding of safety protocols, equipment operation, and material handling specific to ELV recycling operations

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Become familiar with the entire ELV process, from vehicle intake and depollution to component separation OJT also focuses on hazardous material management, ensuring proper handling and disposal of materials like batteries and airbags.
- KU2.** Identify recyclable components, develop problem-solving skills, and understand environmental compliance.
- KU3.** Inventory management, teamwork, and customer service.

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Define the Assessment Criteria: The first step in conducting an assessment of training participants is to define the assessment criteria. This includes identifying the learning objectives, knowledge, and skills that trainees are expected to acquire from the training program.
2. Select the Assessment Method: Once the assessment criteria are defined, the next step is to select an appropriate assessment method.
3. Prepare the Assessment Materials: Based on the selected assessment method, prepare the necessary assessment materials, such as question papers, evaluation forms, and grading rubrics. It may or may not include testing and trials of assessment.
4. Communicate Assessment Expectations: Communicate the assessment expectations to the trainees beforehand, including the assessment method, evaluation criteria, and any relevant instructions.
5. Conduct the Assessment: Conduct the assessment according to the chosen method, making sure to follow the assessment criteria and instructions provided to the trainees. Ensure that the assessment environment is suitable for the chosen assessment method.

Qualification Pack

6. Evaluate and Grade the Assessments: Evaluate the assessments and assign grades or scores based on the assessment criteria and grading rubrics. Ensure that grading is consistent and fair for all trainees.

7. Provide Feedback: Provide feedback to trainees based on their assessment results, including areas of strengths and weaknesses, and areas for improvement.

8. Record and Report Assessment Results: Record the assessment results and report them to relevant stakeholders, such as supervisors and training coordinators. Ensure that the assessment results are kept confidential and only shared with authorized personnel.

Assessment Method:

1. Written Tests: This includes multiple choice questions, short answer questions, and essay questions that test knowledge and understanding of course material.

2. Performance-based Assessments: This includes tasks such as role-playing exercises, simulations, and case studies, which allow learners to apply their knowledge and skills in real-world scenarios.

3. Oral Assessments: This includes presentations, debates, Quizzes and discussions, which allow learners to demonstrate their understanding of course material and ability to communicate effectively.

4. Portfolios: This involves collecting and presenting samples of work produced by learners over a period of time, allowing them to showcase their learning and progress.

5. Self-Assessment: This involves learners reflecting on their own learning and performance, identifying areas of strength and weakness, and setting goals for improvement.

6. Peer Assessment: This involves learners providing feedback to each other on their work and performance, which can promote collaboration and constructive feedback.

Minimum Aggregate Passing % at QP Level : 80

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
Key learning outcome	Key learning outcome is the statement of what a learner needs to know, understand and be able to do in order to achieve the terminal outcomes. A set of key learning outcomes will make up the training outcomes. Training outcome is specified in terms of knowledge, understanding (theory) and skills (practical application).
Training outcome	Training outcome is a statement of what a learner will know, understand and be able to do upon the completion of the training.
Terminal outcome	Terminal outcome is a statement of what a learner will know, understand and be able to do upon the completion of a module. A set of terminal outcomes help to achieve the training outcome.
OJT (M)	On-the-job training (Mandatory) trainees are mandated to complete specified hours of training on site
OJT (R)	On-the-job training (Recommended) trainees are recommended the specified hours of training on site
Procedural knowledge	Procedural knowledge addresses how to do something, or how to perform a task. It is the ability to work, or produce a tangible work output by applying cognitive, affective or psychomotor skills.
