Qualification Pack

ISC/Q0106: Coupler and Shunting Porter (Steel Plant)

Brief Job Description

The individual in this role performs loco crew joining / disengaging Loco / match car with Rolling Stock, wagons etc. and other jobs related to the safe movement on railway track.

Personal Attributes

The person should be patient, organised, team-oriented and have the ability to work for long hours in adverse conditions. They must be able to plan and prioritise tasks effectively and have an eye for detail and quality.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [ISC/N0008: Use basic health and safety practices at the workplace](#)
2. [ISC/N0114: Conduct pre-departure checks and inspections](#)
3. [ISC/N0115: Perform coupling and de-coupling of train](#)
4. [ISC/N0116: Perform shunting of rolling stock](#)
5. [ISC/N0117: Perform rail track maintenance](#)
6. [DGT/VSQ/N0102: Employability Skills \(60 Hours\)](#)

ISC/N0008: Use basic health and safety practices at the workplace

Description

This OS unit is about knowledge and practices relating to health, safety and security that candidates need to use in the workplace. It covers responsibilities towards self, others, assets and the environment. It includes understanding of risks and hazards in the workplace, along with common techniques to minimize risk, deal with accidents, emergencies, etc

Elements and Performance Criteria

Health and safety

To be competent, the user/individual on the job must be able to:

- PC1.** Use protective clothing/equipment for specific tasks and work conditions
Protective clothing includes: Leather or asbestos gloves Flame proof aprons Flame proof overalls buttoned to neck Cuff less (without folds) trousers Reinforced footwear Helmets/hard hats Cap and shoulder covers Ear defenders/plugs Safety boots Knee pads Particle masks
Glasses/gloves/visors
Equipment includes: Hand shields Machine guards Residual current devices Shields Dust sheets Respirator

Health and safety procedures

To be competent, the user/individual on the job must be able to:

- PC2.** State the name and location of people responsible for health and safety in the workplace
Various areas are listed below: On chemical containers Equipment Packages Inside buildings Open areas and public spaces, etc.
- PC3.** State the names and location of documents that refer to health and safety in the workplace
- PC4.** Identify job-site hazardous work and state possible causes of risk or accident in the workplace
Hazards include: Working with electrical and thermal tools and equipment Sharp edged and heavy tools Heated metals Oxyfuel and gas cylinders Welding radiation Surfaces: sharp, slippery, uneven, chipped, broken, etc. Substances: chemicals, gas, oxy-fuel, fumes, dust, etc. Physical: working at heights, large and heavy objects and machines, sharp and piercing objects, tolls and machines, intense light, load noise, obstructions in corridors, by doors, blind turns, noise, over stacked shelves and packages, etc. Electrical: power supply and points, loose and naked cables and wires, electrical machines and appliances, etc.
- PC5.** Carry out safe working practices while dealing with hazards to ensure the safety of self and others state methods of accident prevention in the work environment of the job role
Safe working practices include: Using protective clothing and equipment Putting up and reading safety signs Handle tools in the correct manner and store and maintain them properly Keep work area clear of clutter, spillage and unsafe object lying casually While working with electricity take all electrical precautions like insulated clothing, adequate equipment insulation, use of control equipment, dry work area, switch off the power supply when not required, etc. Safe lifting and carrying practices Use equipment that is working properly and is well maintained Take due measures for safety while working in confined places, trenches or at heights, etc. Including safety harness, fall arrestors, etc. Methods are: Training in health and safety procedures Using health and safety procedures Use of equipment and working practices (such as safe carrying procedures) Safety notices, advice Instruction from colleagues and supervisors
- PC6.** State location of general health and safety equipment in the workplace

Qualification Pack

- PC7.** Inspect for faults, set up and safely use steps and ladders in general use
Faults : Corrosion of metal components Deterioration Splits and cracks timber components Imbalance Loose rungs Nuts or bolts, etc.
Set up: Firm/level base Clip/lash down Leaning at the correct angle, etc.
- PC8.** Work safely in and around trenches, elevated places and confined areas
- PC9.** Lift heavy objects safely using correct procedures
- PC10.** Apply good housekeeping practices at all times. Good housekeeping practices: Clean/tidy work areas Removal/disposal of waste products Protect surfaces
- PC11.** Identify common hazard signs displayed in various areas
- PC12.** Retrieve and/or point out documents that refer to health and safety in the workplace

Fire safety procedures

To be competent, the user/individual on the job must be able to:

- PC13.** Use the various appropriate fire extinguishers on different types of fires correctly.
Fire extinguishers: Sand Water Foam Co2 Dry powder
Fires: Class A: Ordinary solid combustibles, e.g. wood, paper, cloth, plastic, charcoal etc. Class B: Flammable liquids and gases, e.g. gasoline, propane, diesel fuel, tar, cooking oil and similar substances Class C: Electrical equipment e.g. appliances, wiring, breaker panels etc. (these categories of fires become Class A, B, and D fires when the electrical equipment that initiated the fire is no longer receiving electricity) Class D: Combustible metals such as magnesium, titanium, and sodium (these fires burn at extremely high temperatures and require special suppression agents)
Causes of fires: Heating of metal Spontaneous ignition Sparking, Electrical heating Loose fires (e.g. Smoking, welding, etc.) Chemical fires, etc.
- PC14.** Demonstrate rescue techniques applied during fire hazard
- PC15.** Demonstrate good housekeeping in order to prevent fire hazards
- PC16.** Demonstrate the correct use of a fire extinguisher

Emergencies, rescue and first-aid procedures

To be competent, the user/individual on the job must be able to:

- PC17.** Demonstrate how to free a person from electrocution
- PC18.** Administer appropriate first aid to victims as required e.g. in case of bleeding, burns, choking, electric shock, poisoning etc.
- PC19.** Demonstrate basic techniques of bandaging
- PC20.** Respond promptly and appropriately to an accident situation or medical emergency in real or simulated environments. few General health and safety equipment are mentioned below :
Fire extinguishers First aid equipment Safety instruments and clothing Safety installations, e.g. Fire exits, exhaust fans etc.
- PC21.** Perform and organize loss minimization or rescue activity during an accident in real or simulated environments
- PC22.** Administer first aid to victims in case of a heart attack or cardiac arrest due to electric shock, before the arrival of emergency services in real or simulated cases
- PC23.** Demonstrate the artificial respiration and the CPR Process
- PC24.** Participate in emergency procedures. Emergency procedures are: Raising alarm Safe/efficient evacuation Correct means of escape Correct assembly point Roll call Correct return to work

Qualification Pack

- PC25.** Complete a written accident/incident report or dictate a report to another person, and send report to person responsible Incident Report should capture: Name Date/time of incident Date/time of report, Location Environment conditions Persons involved Sequence of events Injuries sustained Damage sustained Actions taken Witnesses Supervisor/manager notified Documents: Fire notices Accident reports Safety instructions for equipment and procedures Company notices and documents Legal documents (e.g. Government notices) Job titles: ISC/N0008: Use basic health and safety practices at the workplace Health and safety officer First aid officer Fire officer
- PC26.** Demonstrate correct method to move injured people and others during an emergency

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** State the names (and job titles if applicable), and describe where to find, all the people responsible for health and safety in a workplace
- KU2.** State the names and location of documents that refer to health and safety in the workplace
- KU3.** Meaning of hazards and risks
- KU4.** Health and safety hazards commonly present in the work environment and related precautions
- KU5.** Possible causes of risk, hazard or accident in the workplace and why risk and/or accidents are possible
- KU6.** Activities and causes of risk and accident
- KU7.** Methods of accident prevention
- KU8.** Safe working practices when working with tools and machines
- KU9.** Safe working practices while working at various hazardous sites
- KU10.** Where to find all the general health and safety equipment in the workplace
- KU11.** Various dangers associated with the use of electrical equipment
- KU12.** Preventative and remedial actions to be taken in the case of exposure to toxic materials. Exposure: ingested, contact with skin, inhaled Preventative action: ventilation, masks, protective clothing/equipment Remedial action: immediate first aid, report to supervisor Materials: solvents, flux, lead
- KU13.** Importance of using protective clothing/equipment while working
- KU14.** Precautionary activities to prevent the fire accident Activities and causes: Physical actions Reading Listening to and giving instructions Inattention Sickness and incapacity (e.g. Drunkenness) Health hazards (e.g. Untreated injuries and contagious illness)
- KU15.** Various causes of fire
- KU16.** Techniques of using the different fire extinguishers
- KU17.** Different methods of extinguishing fire
- KU18.** Rescue techniques applied during a fire hazard
- KU19.** Various types of safety signs and what they mean
- KU20.** Appropriate basic first aid treatment relevant to the condition e.g. Shock, electrical shock, bleeding, breaks to bones, minor burns, resuscitation, poisoning, eye injuries
- KU21.** Content of written accident report

Qualification Pack

- KU22.** Potential injuries and ill health associated with incorrect manual handling
- KU23.** Safe lifting and carrying practices
- KU24.** Personal safety, health and dignity issues relating to the movement of a person by others
- KU25.** Potential impact to a person who is moved incorrectly

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Read and comprehend basic content to read labels, charts, signages
- GS2.** Read and comprehend basic English to read manuals of operations
- GS3.** Read and write an accident/incident report in local language or English
- GS4.** Question co-workers appropriately in order to clarify instructions and other issues
- GS5.** Give clear instructions to co-workers, subordinates others
- GS6.** Make appropriate decisions pertaining to the concerned area of work with respect to intended work objective, span of authority, responsibility, laid down procedure and guidelines
- GS7.** Plan and organize their own work schedule, work area, tools, equipment and materials to maintain decorum and for improved productivity
- GS8.** Remain congenial while discussing and debating issues with co-workers
- GS9.** Follow appropriate protocols for communication based on situation, hierarchy, organizational culture and practice
- GS10.** Ask for, provide and receive required assistance where possible to ensure achievement of work related objectives
- GS11.** Thank co-workers for any assistance received
- GS12.** Offer appropriate respect based on mutuality and respect for fellow workmanship and authority
- GS13.** Think through the problem, evaluate the possible solution(s) and suggest an optimum /best possible solution(s)
- GS14.** Identify immediate or temporary solutions to resolve delays
- GS15.** Identify sources of support that can be availed of for problem solving for various kind of problems
- GS16.** Report problems that you cannot resolve to appropriate authority
- GS17.** Identify cause and effect relations in their area of work
- GS18.** Use cause and effect relations to anticipate potential problems and their solution

ISC/N0114: Conduct pre-departure checks and inspections

Description

This OS unit is about conducting pre-departure checks and confirming the required train documentation. This involves general troubleshooting and inspection of locomotive and wagons carrying rolling stock.

Scope

The scope covers the following :

- The scope covers the following:
 1. Identify pre-departure checks
 2. Conduct pre-departure checks
 3. Confirm train can proceed

Elements and Performance Criteria

Identify pre-departure checks

To be competent, the user/individual on the job must be able to:

- PC1.** interpret the brake test documentation, rolling stock data
- PC2.** conducts physical inspections to check coolant level, oil level etc. as per checklist
- PC3.** conduct regular checks of the engine and wagons
- PC4.** check the coupler position (if the position is not on the line, make them on a line)
- PC5.** check the signalling system
- PC6.** check for special instructions for inspection according to the material to be transported
- PC7.** isolate the train or secured in accordance with workplace procedures to make the work area safe for inspection

Conduct pre-departure checks

To be competent, the user/individual on the job must be able to:

- PC8.** identify the potential hazards and implement hazard control measures
- PC9.** setup the motive power unit control systems as per SOP
- PC10.** check to ensure rolling stock is coupled and sequenced correctly
- PC11.** conduct the brake leak test
- PC12.** conduct modified brake test as per standard requirements
- PC13.** conduct air continuity test to ensure train braking system meets functional specifications
- PC14.** check the train braking system for operational correctness
- PC15.** inspect Hoses and pipes for leakage and defects
- PC16.** identify the defective rolling stock not fit to run and detachment arrangements are made in compliance with workplace procedures

Confirm train can proceed

To be competent, the user/individual on the job must be able to:

- PC17.** take action to rectify identified faults to ensure minimum delay to planned running schedule

Qualification Pack

- PC18.** repair or replace the faulty parts
- PC19.** verify the minor repairs carried out and replacements done
- PC20.** records are filed in accordance with workplace policies and procedures
- PC21.** record Brake tests completed in accordance with workplace policies and procedures

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** job relevant legislation, standards, policies, and procedures followed in the company
- KU2.** understand various parts of locomotive
- KU3.** applying rail safety practices and procedures
- KU4.** conducting inspections and testing brake operations on relevant types of passenger train, freight train or railcar in accordance with workplace procedures
- KU5.** identifying job hazards and taking required action to minimise, control or eliminate identified hazards
- KU6.** interpreting and following operational instructions and prioritising work
- KU7.** modifying activities depending on operational contingencies, risk situations and environments
- KU8.** hazards that may exist when operating road/rail vehicles, and ways of controlling the risks involved
- KU9.** manufacturer specifications and road/rail vehicle operational requirements
- KU10.** problems that may occur when on tracking and off tracking road/rail vehicles, and action that can be taken to report or resolve these problems in accordance with workplace procedures
- KU11.** problems that may occur when operating road/rail vehicles, and action that can be taken to report or resolve these problems in accordance with workplace procedures
- KU12.** relevant rail danger zones
- KU13.** technical specifications and manuals
- KU14.** types of Locos and their applications
- KU15.** operating and adapting to differences in brakes and related equipment in accordance with operating procedures
- KU16.** reading and interpreting relevant instructions, procedures, information and signs
- KU17.** reporting identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- KU18.** selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- KU19.** relevant sections of applicable state/territory legislated rail safety requirements, relevant codes of practice and/or guidelines

Generic Skills (GS)

User/individual on the job needs to know how to:

Qualification Pack

- GS1.** read safety instructions/guidelines
- GS2.** modify work practices to improve them
- GS3.** ask for clarifications from superior about the job requirement
- GS4.** work with supervisors/team members to carry out work related tasks
- GS5.** complete tasks efficiently and accurately within stipulated time
- GS6.** inform/report to concerned person in case of any problem
- GS7.** make timely decisions for efficient utilization of resources
- GS8.** write reports such as accident report, in at least English/regional language
- GS9.** be punctual and utilize time efficiently

ISC/N0115: Perform coupling and de-coupling of train

Description

This OS unit is about performing coupling and de-coupling of train carriages with the engine by following appropriate safety procedures and standards.

Scope

The scope covers the following :

- The scope covers the following:
- . Coupling of train
- . De-coupling of train

Elements and Performance Criteria

Coupling of train

To be competent, the user/individual on the job must be able to:

- PC1.** identify the type of connections required prior to coupling
- PC2.** position the trains to be coupled in accordance with operating procedures and workplace requirements
- PC3.** ensure that trains to be coupled are fully secured
- PC4.** align couplers in the appropriate position for type of connection required
- PC5.** ensure that all safety requirements are followed prior to coupling trains
- PC6.** couple the rolling stock (in case of auto coupler, coupling will be automatic and in case of screw-coupling coupling to be made manually)
- PC7.** couple the trains in accordance with operational/workplace requirements
- PC8.** check if there is any skit under the wheel of the train, remove the skit if any
- PC9.** conduct post-coupling inspection/tests in accordance with operating procedures and workplace requirements

De-coupling of train

To be competent, the user/individual on the job must be able to:

- PC10.** identify the trains to be uncoupled
- PC11.** conduct pre-uncoupling checks and, where required, procedures are conducted in accordance with operating procedures and workplace requirements
- PC12.** ensure that all safety requirements are followed prior to uncoupling trains
- PC13.** provide skit properly under the front wheel of the rolling stock
- PC14.** de-couple the rolling stock by raising the auto-coupling handle or by detaching d-shackle from c -hook in case of screw coupling
- PC15.** ensure that trains are uncoupled in accordance with operating procedures and workplace requirements
- PC16.** ensure that train is fully secured after uncoupling

Qualification Pack

PC17. conduct post-uncoupling inspection/tests in accordance with operating procedures and workplace requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** applicable minimum standards and approved compliance codes and/or guidelines
- KU2.** communication protocols
- KU3.** coupling systems, their components and their operation
- KU4.** diagnostic techniques relating to coupling and uncoupling trains
- KU5.** procedures to be followed in an emergency
- KU6.** relevant OH&S and environmental procedures and regulations including codes of practice for manual handling
- KU7.** types of couplers and their purpose
- KU8.** types of coupling adaptors and their purpose (where used)

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read safety instructions/guidelines
- GS2.** modify work practices to improve them
- GS3.** ask for clarifications from superior about the job requirement
- GS4.** work with supervisors/team members to carry out work related tasks
- GS5.** complete tasks efficiently and accurately within stipulated time
- GS6.** inform/report to concerned person in case of any problem
- GS7.** make timely decisions for efficient utilization of resources
- GS8.** write reports such as accident report, in at least English/regional language
- GS9.** be punctual and utilize time efficiently

ISC/N0116: Perform shunting of rolling stock

Description

This OS unit is about controlling and directing the physical movement of rolling stock and operating relevant equipment to carry out planned shunting strategy.

Scope

The scope covers the following :

- The scope covers the following:
- . Plan and prepare for shunting operation
- . Carry out shunting control procedures
- . Shunt rolling stock

Elements and Performance Criteria

Plan and prepare for shunting operation

To be competent, the user/individual on the job must be able to:

- PC1.** interpret the shunting requirements and vehicles and equipment are obtained and prepared in accordance with shunting strategy
- PC2.** check Rolling stock movements, availability and locations are established to determine appropriate siding and/or track locations for vehicle placement
- PC3.** follow Work health and safety (WHS)/occupational health and safety (OHS) legislation, codes of practice, policies and procedures

Carry out shunting control procedures

To be competent, the user/individual on the job must be able to:

- PC4.** use Points, levers, switches, signals and line of sight communications are used to assist the control of rolling stock movement
- PC5.** use uniform hand signals, light and radio shunting commands that conform with operational rules and statutory requirements
- PC6.** ensure wagon cards are checked and wagons are obtained and sorted to comply with shunting requirements
- PC7.** apply shunting control techniques to prevent damage of rolling stock and loads/contents

Shunt rolling stock

To be competent, the user/individual on the job must be able to:

- PC8.** apply workplace procedures for shunting
- PC9.** position the rolling stock to meet shunting requirements
- PC10.** identify and apply coupling systems to attach and detach rolling stock
- PC11.** connect brake hoses, electrical couplings and hand brakes are connected/disconnected and applied/released
- PC12.** ensure that rolling stock is shunted with the minimum of necessary moves
- PC13.** identify the defective rolling stock not fit to run and detachment arrangements are made in compliance with workplace procedures

Qualification Pack

- PC14.** identify the irregularities and defects with rolling stock equipment are reported in accordance with operational requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** job relevant legislation, standards, policies, and procedures followed in the company
- KU2.** department structure and hierarchy protocols
- KU3.** work flow and own role in the workflow
- KU4.** applicable state/territory legislated rail safety requirements, relevant codes of practice and/or guidelines
- KU5.** characteristics and features of wagons and other rolling stock
- KU6.** defects that can occur on a shunting gear and equipment and related action that should be taken
- KU7.** draw gear capacities and related operating procedures
- KU8.** loading and unloading procedures
- KU9.** location and operation of signals and points
- KU10.** principles of operation of protective devices, air brakes, handbrakes, derailleurs
- KU11.** procedures for coupling and uncoupling rolling stock
- KU12.** procedures for identifying and reporting hazards
- KU13.** procedures for operating points and signals
- KU14.** radio communications protocol
- KU15.** safe working systems and rule requirements
- KU16.** shunting plan and instructions
- KU17.** shunting signals and commands and line of sight communications systems
- KU18.** track and signal layouts and features in yard

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read instructions/guidelines/procedures
- GS2.** listen effectively and orally communicate information
- GS3.** ask for clarification and advice from the concerned person
- GS4.** maintain positive and effective relationships with colleagues
- GS5.** evaluate the possible solution(s) to the problem
- GS6.** spot and communicate potential areas of disruptions in the work process and report the same
- GS7.** complete written work with attention to detail
- GS8.** check that the work meets customer requirements

ISC/N0117: Perform rail track maintenance

Description

This OS unit is about performing the maintenance and repairing of rail tracks as per the SOP.

Scope

The scope covers the following :

- The scope covers the following:
- . Prepare for maintenance of rail tracks
- . Perform maintenance of rail tracks

Elements and Performance Criteria

Prepare for maintenance of rail tracks

To be competent, the user/individual on the job must be able to:

- PC1.** follow safety practices during maintenance activities as per organisational SOP
- PC2.** read maintenance schedule and checklist and plan the time and schedule for conducting the maintenance
- PC3.** use checklist and coordinate with the superior for confirming maintenance tasks
- PC4.** select and arrange the right tools, equipment, consumables and spare parts as per the SOP and job requirements
- PC5.** check the tools, equipment, consumables and spare parts for any defects and that they are as per the required quality standards
- PC6.** prepare tools, tackles, spares, lifting equipment etc. as per SOP/WI

Perform maintenance of rail tracks

To be competent, the user/individual on the job must be able to:

- PC7.** inspect the railway line for potential hazards and faults/failures
- PC8.** conduct routine checks on the tracks to identify any signs of wear, damage, or defects that could affect train operations
- PC9.** utilize specialized tools and machinery (e.g., ultrasonic testing devices, track inspection vehicles) to inspect the tracks, looking for issues like cracks, misalignment, or erosion
- PC10.** measure the alignment, elevation, and gauge (distance between rails) by using special measuring equipment
- PC11.** take appropriate action to ensure track system integrity
- PC12.** repair or replace damaged rail components, including rails, ties (sleepers), and fasteners, to maintain proper track alignment
- PC13.** perform welding of rail joints and grinding of track to ensure smooth and safe passage for trains
- PC14.** use grinding machines to correct corrugations, fatigue, and metal flow in the rail
- PC15.** use vibrating tamping lines to correct the level of the track by lifting the sleepers

Qualification Pack

- PC16.** maintain and adjust ballast (gravel or crushed stone placed under and around the track) to ensure proper track stability and drainage
- PC17.** address issues such as track curvature or misalignment caused by wear, extreme weather, or external factors, ensuring proper gauge and alignment for safe train passage
- PC18.** realign the track when it becomes warped or misaligned due to wear, temperature changes, or shifts in the ground beneath the track
- PC19.** replace or tighten the bolts, clips, and other fasteners that hold the rails to the ties, ensuring the track remains secure
- PC20.** inspect and maintain the rail switches, which are critical for directing trains to different tracks. This includes lubricating and checking mechanical components
- PC21.** remove debris or obstructions from the track that could impede train movement
- PC22.** ensure proper drainage systems are in place to prevent water accumulation, which can erode tracks and cause other maintenance issues
- PC23.** keep accurate records of inspections, repairs, and maintenance activities for future reference and compliance purposes.
- PC24.** assess when the faults/failures are beyond the competence and report the problem to suitably qualified/designated and competent personnel
- PC25.** track the lifespan and condition of rails and other components to schedule replacements or upgrades in a timely manner

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** company's maintenance standards and processes
- KU2.** risk and impact of not following defined procedures/work instructions
- KU3.** importance of rail track maintenance
- KU4.** common challenges in steel plant railway tracks
- KU5.** key aspects of railway track maintenance
- KU6.** how to read maintenance schedules and checklists for rail track maintenance
- KU7.** tools and equipment such as Cant Board, Wire Claw, Powarah, Hammer, Rail Bender, Jacks, Railgauge, Sleeper Tongs, Auger, Shovels, Rail Tongs, Claw Bar, Sledge Hammer, Chisel, Beater cum pickaxe, Spanner, Spirit Level along with straight edge etc. required during track maintenance
- KU8.** rail track inspection in steel plants
- KU9.** types of track maintenance
- KU10.** best practices for effective track maintenance
- KU11.** common faults and failures in rail tracks
- KU12.** corrective actions for common faults and failures in rail tracks
- KU13.** best practices and guidelines for maintenance and repairing of faults/failures in rail tracks
- KU14.** use of appropriate PPE, material handling equipment and tools for completing the maintenance tasks
- KU15.** documentation required regarding repair, maintenance and service performed

Qualification Pack

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** read instructions/guidelines/procedures
- GS2.** listen effectively and orally communicate information

DGT/VSQ/N0102: Employability Skills (60 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Career Development & Goal Setting
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

- PC1.** identify employability skills required for jobs in various industries
- PC2.** identify and explore learning and employability portals

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

- PC3.** recognize the significance of constitutional values, including civic rights and duties, citizenship, responsibility towards society etc. and personal values and ethics such as honesty, integrity, caring and respecting others, etc.
- PC4.** follow environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

- PC5.** recognize the significance of 21st Century Skills for employment
- PC6.** practice the 21st Century Skills such as Self-Awareness, Behaviour Skills, time management, critical and adaptive thinking, problem-solving, creative thinking, social and cultural awareness, emotional awareness, learning to learn for continuous learning etc. in personal and professional life

Basic English Skills

To be competent, the user/individual on the job must be able to:

Qualification Pack

- PC7.** use basic English for everyday conversation in different contexts, in person and over the telephone
- PC8.** read and understand routine information, notes, instructions, mails, letters etc. written in English
- PC9.** write short messages, notes, letters, e-mails etc. in English

Career Development & Goal Setting

To be competent, the user/individual on the job must be able to:

- PC10.** understand the difference between job and career
- PC11.** prepare a career development plan with short- and long-term goals, based on aptitude

Communication Skills

To be competent, the user/individual on the job must be able to:

- PC12.** follow verbal and non-verbal communication etiquette and active listening techniques in various settings
- PC13.** work collaboratively with others in a team

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

- PC14.** communicate and behave appropriately with all genders and PwD
- PC15.** escalate any issues related to sexual harassment at workplace according to POSH Act

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

- PC16.** select financial institutions, products and services as per requirement
- PC17.** carry out offline and online financial transactions, safely and securely
- PC18.** identify common components of salary and compute income, expenses, taxes, investments etc
- PC19.** identify relevant rights and laws and use legal aids to fight against legal exploitation

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

- PC20.** operate digital devices and carry out basic internet operations securely and safely
- PC21.** use e- mail and social media platforms and virtual collaboration tools to work effectively
- PC22.** use basic features of word processor, spreadsheets, and presentations

Entrepreneurship

To be competent, the user/individual on the job must be able to:

- PC23.** identify different types of Entrepreneurship and Enterprises and assess opportunities for potential business through research
- PC24.** develop a business plan and a work model, considering the 4Ps of Marketing Product, Price, Place and Promotion
- PC25.** identify sources of funding, anticipate, and mitigate any financial/ legal hurdles for the potential business opportunity

Customer Service

To be competent, the user/individual on the job must be able to:

- PC26.** identify different types of customers
- PC27.** identify and respond to customer requests and needs in a professional manner.

Qualification Pack

PC28. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC29. create a professional Curriculum vitae (Résumé)

PC30. search for suitable jobs using reliable offline and online sources such as Employment exchange, recruitment agencies, newspapers etc. and job portals, respectively

PC31. apply to identified job openings using offline /online methods as per requirement

PC32. answer questions politely, with clarity and confidence, during recruitment and selection

PC33. identify apprenticeship opportunities and register for it as per guidelines and requirements

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills and different learning and employability related portals

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use English language for effective verbal (face to face and telephonic) and written communication in formal and informal set up

KU6. importance of career development and setting long- and short-term goals

KU7. about effective communication

KU8. POSH Act

KU9. Gender sensitivity and inclusivity

KU10. different types of financial institutes, products, and services

KU11. how to compute income and expenditure

KU12. importance of maintaining safety and security in offline and online financial transactions

KU13. different legal rights and laws

KU14. different types of digital devices and the procedure to operate them safely and securely

KU15. how to create and operate an e- mail account and use applications such as word processors, spreadsheets etc.

KU16. how to identify business opportunities

KU17. types and needs of customers

KU18. how to apply for a job and prepare for an interview

KU19. apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. read and write different types of documents/instructions/correspondence

GS2. communicate effectively using appropriate language in formal and informal settings

Qualification Pack

- GS3.** behave politely and appropriately with all
- GS4.** how to work in a virtual mode
- GS5.** perform calculations efficiently
- GS6.** solve problems effectively
- GS7.** pay attention to details
- GS8.** manage time efficiently
- GS9.** maintain hygiene and sanitization to avoid infection

Qualification Pack

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Performance Criteria (PC) (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
4. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
5. In case of successfully passing only certain number of NOSs, the trainee is eligible to take subsequent assessment on the balance NOS's to pass the Qualification Pack.
6. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Minimum Aggregate Passing % at QP Level : 70

Qualification Pack

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
