JUTE/TSC/Q1001: Jute Manufacturing Technician (Elective 1: Yarn, Elective 2: fabric)

Brief Job Description

Jute Manufacturing Technician is responsible for efficiently handling modern Spinning machines including preparatory and Jute Batching or modern looms (Rapier, S-4A & one mack etc.) including preparatory and Jute finishing. As Jute Manufacturing Technician, S/he makes necessary arrangements including checking of quality of jute sliver, jute yarn, jute warp beam and jute weft package availability including its quality. To run efficiently and ensure sustainability of production process S/he requires skill on mechanism of Spreader / Softener, Carding, Drawing and Spinning machine spare parts function, knowledge of different carding action, draft & doubling mechanism of loom, spare parts function, knowledge of different motions of loom, tension control mechanism, lubrication schedule, maintenance, detection of yarn /fabric faults and Testing and Quality Control of Jute yarn, fabric on quality of jute packaging materials.

Personal Attributes

This job requires the individual to have good eye-hand coordination, and good vision (including near vision, distance vision, colour vision, depth perception and , and the ability to focus on micro things).

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [JUTE/TSC/N1006: Maintain health, safety and security at work place \(L4\)](#)
2. [JUTE/TSC/N1007: Concept about the man machine ratio and hands complements](#)
3. [JUTE/TSC/N1008: Basic Computer Skill & role of supervisor in spinning section](#)
4. [JUTE/TSC/N1009: Testing and Quality Control of Raw Jute, sliver and yarn quality](#)
5. [DGT/VSQ/N0101: Employability Skills \(30 Hours\)](#)

Electives(mandatory to select at least one):

Elective 1: Elective NOS/s - 1: Yarn

Mechanism of Jute Spreader / Softener, Carding, drawing and spinning machines

1. [JUTE/TSC/N1010: Mechanism of Jute Batching, Carding, Drawing and Spinning machinery](#)

Elective 2: Elective NOS/s - 2: Fabric

Mechanism of Jute Winding, beaming, sizing, weaving and finishing

Qualification Pack

1. [JUTE/TSC/N1011: Mechanism of Jute weaving and Finishing machinery](#)

JUTE/TSC/N1006: Maintain health, safety and security at work place (L4)

Description

Maintain health, safety and security at work place

Scope

The scope covers the following :

- Maintain health, safety and security at work place

Elements and Performance Criteria

Maintain health, safety and security at work place

To be competent, the user/individual on the job must be able to:

- PC1.** Comply with health and safety related instructions applicable to the workplace
- PC2.** Use and maintain personal protective equipment such as “ear plug”, “ nose mask”, “head cap” etc., as per protocol
- PC3.** Carry out own activities in line with approved guidelines and procedures
- PC4.** Safely handle and remove waste
- PC5.** Follow environment management system related procedures
- PC6.** Identify and correct (if possible) malfunctions in machinery and equipment
- PC7.** Store materials and equipment in line with organizational requirements
- PC8.** Minimize health and safety risks to self and others due to own actions
- PC9.** Communicate the safety plan to everyone and attach disciplinary rules with the implementation
- PC10.** Monitor the workplace and work processes for potential risks and threat
- PC11.** Undertake first aid, fire-fighting and emergency response training, if asked to do so
- PC12.** Take action based on instructions in the event of fire, emergencies or accidents
- PC13.** Follow organization procedures for shutdown and evacuation when required
- PC14.** Recognise other possible security issues existing in the workplace

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Knowledge on health and safety related instructions applicable to the workplace
- KU2.** Understand use of personal protective equipment such as ear plug, nose mask, head cap etc., as per protocol
- KU3.** Understand activities in line with approved guidelines and procedures
- KU4.** Safely handle and remove waste
- KU5.** Understand environment management system related procedures

Qualification Pack

- KU6.** Identify and correct (if possible) malfunctions in machinery and equipment
- KU7.** Knowledge on health and safety risks to self and others due to own actions
- KU8.** Understand safety plan to everyone and attach disciplinary rules with the implementation
- KU9.** Understand first aid, fire-fighting and emergency response training
- KU10.** Understand organization procedures for shutdown and evacuation when required

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Read and understand written instructions
- GS2.** Communicate with supervisor appropriately
- GS3.** Write clear and short sentences in simple language for daily reporting
- GS4.** Talk to others to convey information effectively
- GS5.** Identify the real reason for the problem faced

Qualification Pack

JUTE/TSC/N1007: Concept about the man machine ratio and hands complements

Description

Calculate production balancing and allocate of manpower as per requirements.

Scope

The scope covers the following :

- Calculate production balancing and allocate of manpower as per requirements.

Elements and Performance Criteria

Concept about the man machine ratio and hands complements

To be competent, the user/individual on the job must be able to:

- PC1.** Assigned duties effectively section- wise / machine- wise
- PC2.** Calculate of time required for each operation
- PC3.** Calculate performance of machine / operator
- PC4.** Calculate Potential production/ hour
- PC5.** Prepare road map to achieve target
- PC6.** Calculate Production for Jute Spreader / Softener, Carding, drawing and spinning machines
- PC7.** Report the role of operator of each Jute Processing machinery

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Knowledge on assigned duties effectively section- wise / machine- wise
- KU2.** Understand Calculation of time required for each operation
- KU3.** Understand Calculation performance of machine / operator
- KU4.** Understand Calculation Potential production/ hour
- KU5.** Knowledge on road map preparation to achieve target
- KU6.** Understand Production calculation for Jute Spreader / Softener, Carding, drawing and spinning machines
- KU7.** Understand role of operator of each Jute Processing machinery

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Read and understand written instructions
- GS2.** Communicate with supervisor appropriately

Qualification Pack

- GS3.** Write clear and short sentences in simple language for daily reporting
- GS4.** Talk to others to convey information effectively
- GS5.** Refer anomalies to the supervisor

Qualification Pack

JUTE/TSC/N1008: Basic Computer Skill & role of supervisor in spinning section

Description

Measure Statistical Quality Control parameters like mean, standard deviation, CV%, PMD etc, and related standards using spread sheet/App and Supervise production operation

Scope

The scope covers the following :

- Basic concept of computer application and its necessity in jute mill

Elements and Performance Criteria

Measure Statistical Quality Control parameters like mean, standard deviation, CV%, PMD etc, and related standards using spread sheet/App and Supervise production operation

To be competent, the user/individual on the job must be able to:

- PC1.** Calculate Production data in excels
- PC2.** Prepare Report on maintenance plan / schedule
- PC3.** Calculate and analyse Statistical test data
- PC4.** Calculate and analyse data using Statistical parameters like Mean, CV%, etc.
- PC5.** Perform record of machine details
- PC6.** Perform process parameter setting /details in MS Office
- PC7.** Perform Apps Application by mobile

Take Charge of the Shift from previous shift supervisor

To be competent, the user/individual on the job must be able to:

- PC8.** come at least 10 - 15 minutes earlier to the work spot
- PC9.** Carry out whether oil can, grease gun etc. is in order
- PC10.** check the cleanliness of the machines & other work areas
- PC11.** Check whether any spare/raw material/ tool / Yarn/ any other material are thrown under the machines or in the other work areas
- PC12.** Report to his superior in case next shift reliever doesn't report for duty. In that case hand over the shift to next shift supervisor
- PC13.** Carry out the machines & other work area is neat & clean
- PC14.** Report to His/ Her Superior about the quality / safety issues/ any other issue faced

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Understand Production calculation data in excels

Qualification Pack

- KU2.** Knowledge on Report preparation on maintenance plan / schedule
- KU3.** Understand Statistical test data Calculation and analysis
- KU4.** Knowledge on Statistical parameters like Mean, CV, etc.
- KU5.** Understand Perform record of machine details
- KU6.** Knowledge on process parameter setting /details in MS Office
- KU7.** Knowledge on Performance Apps Application by mobile
- KU8.** Knowledge on shift arrival time earlier to the work spot
- KU9.** Understand equipment oil can, grease gun etc. is in order
- KU10.** Knowledge on cleanliness of the machines & other work areas
- KU11.** Knowledge on spare/raw material/ tool / Yarn/ any other material are thrown under the machines or in the other work areas
- KU12.** Knowledge of Report to his superior in case next shift reliever doesnot report for duty. In that case hand over the shift to next shift supervisor
- KU13.** Knowledge of cleaning of machine and process material
- KU14.** Understand report to His/ Her Superior about the quality / safety issues/ any other issue faced

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Read and understand written instructions
- GS2.** Talk to others to convey information effectively
- GS3.** Identify the real reason for the problem faced
- GS4.** Apply problem solving approaches in different situations
- GS5.** Refer anomalies to the supervisor

JUTE/TSC/N1009: Testing and Quality Control of Raw Jute, sliver and yarn quality

Description

Collect and test sample for quality control of Jute Fibre, Sliver, Yarn and Fabric quality

Scope

The scope covers the following :

- Check various quality parameters following SOP

Elements and Performance Criteria

Collect and test sample for quality control of Jute Fibre, Sliver, Yarn and Fabric quality

To be competent, the user/individual on the job must be able to:

- PC1.** Knowledge of all technical terms and definition
- PC2.** Calculate mean, standard deviation, CV%, Percentage Mean Deviation
- PC3.** Identify Statistical Quality Control for jute processing
- PC4.** Identify faults and inform the concern person
- PC5.** Identify sample collection from shop floor
- PC6.** Perform various sampling technique
- PC7.** Measure the sliver / yarn quality as per company's quality standard
- PC8.** Carry out quality and standards required in the jute mill in Jute batching, carding, drawing, spinning, beaming, sizing, weaving and finishing section
- PC9.** Identify different techniques for methods of process control
- PC10.** Identify / rectification of any deviation found in shop floor

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Knowledge of all technical terms and definition
- KU2.** Understand Calculation of mean, standard deviation, CV, Percentage Mean Deviation
- KU3.** Knowledge on Statistical Quality Control for jute processing
- KU4.** Knowledge of faults identification in process and inform the concern person
- KU5.** Knowledge of sample collection from shop floor
- KU6.** Understand various sampling techniques
- KU7.** Understand the sliver / yarn quality as per quality standard
- KU8.** Knowledge on quality and standards required in the jute mill in Jute batching, carding, drawing, spinning, beaming, sizing, weaving and finishing section
- KU9.** Knowledge of different techniques for methods of process control

Qualification Pack

KU10. Knowledge of rectification of any deviation found in shop floor

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Read and understand written instructions
- GS2.** Communicate with supervisor appropriately
- GS3.** Refer anomalies to the supervisor
- GS4.** Seek clarification on problems from others
- GS5.** Apply good attention to detail
- GS6.** Maintain precision of work

DGT/VSQ/N0101: Employability Skills (30 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

PC1. understand the significance of employability skills in meeting the job requirements

Constitutional values - Citizenship

To be competent, the user/individual on the job must be able to:

PC2. identify constitutional values, civic rights, duties, personal values and ethics and environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

PC3. explain 21st Century Skills such as Self-Awareness, Behavior Skills, Positive attitude, self-motivation, problem-solving, creative thinking, time management, social and cultural awareness, emotional awareness, continuous learning mindset etc.

Basic English Skills

To be competent, the user/individual on the job must be able to:

PC4. speak with others using some basic English phrases or sentences

Communication Skills

To be competent, the user/individual on the job must be able to:

PC5. follow good manners while communicating with others

PC6. work with others in a team

Qualification Pack

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

PC7. communicate and behave appropriately with all genders and PwD

PC8. report any issues related to sexual harassment

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

PC9. use various financial products and services safely and securely

PC10. calculate income, expenses, savings etc.

PC11. approach the concerned authorities for any exploitation as per legal rights and laws

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

PC12. operate digital devices and use its features and applications securely and safely

PC13. use internet and social media platforms securely and safely

Entrepreneurship

To be competent, the user/individual on the job must be able to:

PC14. identify and assess opportunities for potential business

PC15. identify sources for arranging money and associated financial and legal challenges

Customer Service

To be competent, the user/individual on the job must be able to:

PC16. identify different types of customers

PC17. identify customer needs and address them appropriately

PC18. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC19. create a basic biodata

PC20. search for suitable jobs and apply

PC21. identify and register apprenticeship opportunities as per requirement

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use basic spoken English language

KU6. Do and dont of effective communication

KU7. inclusivity and its importance

KU8. different types of disabilities and appropriate communication and behaviour towards PwD

KU9. different types of financial products and services

Qualification Pack

- KU10.** how to compute income and expenses
- KU11.** importance of maintaining safety and security in financial transactions
- KU12.** different legal rights and laws
- KU13.** how to operate digital devices and applications safely and securely
- KU14.** ways to identify business opportunities
- KU15.** types of customers and their needs
- KU16.** how to apply for a job and prepare for an interview
- KU17.** apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate effectively using appropriate language
- GS2.** behave politely and appropriately with all
- GS3.** perform basic calculations
- GS4.** solve problems effectively
- GS5.** be careful and attentive at work
- GS6.** use time effectively
- GS7.** maintain hygiene and sanitisation to avoid infection

JUTE/TSC/N1010: Mechanism of Jute Batching, Carding, Drawing and Spinning machinery

Description

Supervise production operation in Jute Spinning section

Scope

The scope covers the following :

- Understand the mechanism of Jute Batching, Carding, Drawing and Spinning machinery

Elements and Performance Criteria

Mechanism of Jute Spreader / Softener, Carding, drawing and spinning machines

To be competent, the user/individual on the job must be able to:

- PC1.** Explain Jute Spreader / Softener, Carding, drawing and spinning machine and identification of parts
- PC2.** Explain Jute softening & carding and its necessity
- PC3.** Calculate Draft & doubling and its necessity for sliver and yarn preparation
- PC4.** Carry out by hand and eye method the following quality parameters of raw jute fibres during selection, Strength, Root content, Defects, Colour, Fineness, Bulk-Density
- PC5.** Identify the approximate root portion (approximate weight %) in bundles of raw jute strand (Reed) in morah
- PC6.** Prepare quality wise Batch mix
- PC7.** Check the colour code used for different grade and quality of jute
- PC8.** Carryout the moisture content of jute morah has been taken properly for future reference
- PC9.** Check that the roll former in 1st card (Breaker card) is in proper working condition, and need no maintenance
- PC10.** Perform basic maintenance work to be carried out in the shift in case of necessity
- PC11.** Carry out starting/stopping/control switches are O.K. in case individual drive and alternative arrangements in case of group drive
- PC12.** Knowledge on machine safety arrangement functioning correctly, in case of jam in the feed roller
- PC13.** Identify pile duration of jute as prescribed and matured for carding
- PC14.** Carry out proper working of Spreader / Softener , Carding and drawing machine and uniformity of the sliver otherwise take corrective measure
- PC15.** Carry out grade/quality wise (with proper colour coding) stocking of doffed spreader /carded roles at appropriate place for further processing
- PC16.** Maintaining proper sliver path for ensuring perfect drawing (also checking of stop motion)
- PC17.** Understand the quality of jute fibre in the morah/spreader roll /sliver

Qualification Pack

- PC18.** Check that proper number of doubling (2:1) is maintained by the operator at the finisher drawing frame, so that right quality in finisher drawing sliver is maintained as per jute yarn grist
- PC19.** Calculate wastages like sliver, fleece, droppings time to time and take weight to understand the corrective measures required
- PC20.** Coordinate with maintenance people for proper setting of draft change pinion, twist pinion, felt bob position etc. for different count of yarn
- PC21.** Carry out that quality-wise identification mark for jute yarn (sacking warp, sacking weft, hessian warp, hessian weft and any other qualities) is proper
- PC22.** Identify jute sliver quality and jute yarn quality according to desired quality standards and specifications for the specific industry
- PC23.** Take report and ensure that all the spindles are in running condition
- PC24.** Maintain uniform bobbin weight is maintained in spinning machine
- PC25.** Find out the causes of end break in spinning machine, end break in winding(warp and weft) machine and take the remedial measures for excessive end breakage
- PC26.** Follow the instruction of Superior /shift In-charge during change of count and quality and Check frequently the quality of cop and spool and ensure that quality standards and specifications are maintained

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Knowledge on Jute Spreader / Softener, Carding, drawing and spinning machine and identification of parts
- KU2.** Understand Jute softening & carding and its necessity
- KU3.** Understand Calculation of Draft & doubling and its necessity for sliver and yarn preparation
- KU4.** Knowledge on hand and eye method the following quality parameters of raw jute fibres during selection, Strength, Root content, Defects, Colour, Fineness, Bulk-Density
- KU5.** Identify the approximate root portion (approximate weight) in bundles of raw jute strand (Reed) in morah
- KU6.** Understand quality wise Batch mix
- KU7.** Knowledge of colour code used for different grade and quality of jute
- KU8.** Understand the moisture content of jute morah calculation
- KU9.** Knowledge of Checking of the roll former in 1st card (Breaker card) is in proper working condition, and need no maintenance
- KU10.** Understand basic maintenance work to be carried out in the shift in case of necessity
- KU11.** knowledge to carry out starting/stopping/control switches are O.K. in case individual drive and alternative arrangements in case of group drive
- KU12.** Knowledge on machine safety arrangement functioning correctly, in case of jam in the feed roller
- KU13.** Identify pile duration of jute as prescribed and matured for carding
- KU14.** Understand proper working of Spreader / Softener , Carding and drawing machine and uniformity of the sliver otherwise take corrective measure

Qualification Pack

- KU15.** Understand grade/quality wise (with proper colour coding) stocking of doffed spreader /carded roles at appropriate place for further processing
- KU16.** Knowledge of sliver path for ensuring perfect drawing (also checking of stop motion)
- KU17.** Understand the quality of jute fibre in the morah/spreader roll /sliver
- KU18.** Understand proper number of doubling (2:1) is maintained by the operator at the finisher drawing frame, so that right quality in finisher drawing sliver is maintained as per jute yarn grist
- KU19.** Understand Calculation of wastages like sliver, fleece, droppings time to time and take weight to understand the corrective measures required
- KU20.** Knowledge of coordination with maintenance people for proper setting of draft change pinion, twist pinion, felt bob position etc. for different count of yarn
- KU21.** Understand quality-wise identification mark for jute yarn (sacking warp, sacking weft, hessian warp, hessian weft and any other qualities) is proper
- KU22.** Identify jute sliver quality and jute yarn quality according to desired quality standards and specifications for the specific industry
- KU23.** Knowledge on report and ensure that all the spindles are in running condition
- KU24.** uniform bobbin weight is maintained in spinning machine
- KU25.** Knowledge of causes of end break in spinning machine and take the remedial measures for excessive end breakage
- KU26.** Knowledge on instruction of Superior /shift In-charge during change of count and quality and Check frequently the quality of cop and spool and ensure that quality standards and specifications

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Read and understand written instructions
- GS2.** Communicate with supervisor appropriately
- GS3.** Write clear and short sentences in simple language for daily reporting
- GS4.** Talk to others to convey information effectively
- GS5.** Apply problem solving approaches in different situations
- GS6.** Maintain precision of work

Qualification Pack

Assessment Criteria

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
<i>Mechanism of Jute Spreader / Softener, Carding, drawing and spinning machines</i>	50	100	-	25
PC1. Explain Jute Spreader / Softener, Carding, drawing and spinning machine and identification of parts	2	4	-	1
PC2. Explain Jute softening & carding and its necessity	2	4	-	-
PC3. Calculate Draft & doubling and its necessity for sliver and yarn preparation	2	4	-	1
PC4. Carry out by hand and eye method the following quality parameters of raw jute fibres during selection, Strength, Root content, Defects, Colour, Fineness, Bulk-Density	2	4	-	1
PC5. Identify the approximate root portion (approximate weight %) in bundles of raw jute strand (Reed) in morah	2	4	-	1
PC6. Prepare quality wise Batch mix	2	4	-	1
PC7. Check the colour code used for different grade and quality of jute	2	4	-	1
PC8. Carryout the moisture content of jute morah has been taken properly for future reference	2	4	-	1
PC9. Check that the roll former in 1st card (Breaker card) is in proper working condition, and need no maintenance	2	4	-	1
PC10. Perform basic maintenance work to be carried out in the shift in case of necessity	2	4	-	1
PC11. Carry out starting/stopping/control switches are O.K. in case individual drive and alternative arrangements in case of group drive	1	2	-	1
PC12. Knowledge on machine safety arrangement functioning correctly, in case of jam in the feed roller	2	4	-	1

Qualification Pack

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
PC13. Identify pile duration of jute as prescribed and matured for carding	2	4	-	1
PC14. Carry out proper working of Spreader / Softener , Carding and drawing machine and uniformity of the sliver otherwise take corrective measure	2	4	-	1
PC15. Carry out grade/quality wise (with proper colour coding) stocking of doffed spreader /carded roles at appropriate place for further processing	2	4	-	1
PC16. Maintaining proper sliver path for ensuring perfect drawing (also checking of stop motion)	2	4	-	1

Qualification Pack

JUTE/TSC/N1011: Mechanism of Jute weaving and Finishing machinery

Description

Identify critical machine parts and its functions and speed ratios of jute winding, beaming, sizing, weaving and finishing

Scope

The scope covers the following :

- Supervise production operation in weaving section

Elements and Performance Criteria

Mechanism of Jute Winding, beaming, sizing, weaving and finishing

To be competent, the user/individual on the job must be able to:

- PC1.** Explain Yarn Quality for different end product
- PC2.** Explain Jute Winding / Beaming machine and identification of parts
- PC3.** Explain Jute Sizing and its necessity
- PC4.** Recommend yarn count of the spool (ask side beamers to follow the colour mark)
- PC5.** Perform measurement of machine performance at weaving preparatory section
- PC6.** Count and set the exact number of threads or runners at the start for a particular quality of beam (needed for a specified fabric) and continue frequent checking
- PC7.** Carry out correct take up of sizing paste by the yarn and squeezing properly, adjust the pressing roller accordingly
- PC8.** Carry out clean surface of the steam cylinders, correct steam pressure to get proper Drying of yarn
- PC9.** Carry out moisture content (30%-35% for sackings & 18% -22% for hessian) & 1.5-2 % size application in beam in consultation with superiors as practiced in jute industry and ensure 70%. wet pick-up of size
- PC10.** Check the steam pressure to keep it at 25-35 psi and put right identification mark for its quality
- PC11.** Control manually the beam speed to maintain right yarn tension in jute beaming machine
- PC12.** Align the warp yarns on the extreme selvage so that these warp yarns do not fall on flanges or wrap over the flanges
- PC13.** Carry out man and machine safety while operating the beaming machine, and keep the working place (floor) clean i.e. free from any unwanted elements like spool centre, thread waste, broken machine parts etc.
- PC14.** Carry out the weavers knot is of minimum size to pass easily through the heald wires and reed
- PC15.** Carry out that all the stop motions, indication lamps , preventive mechanisms etc., function properly
- PC16.** Explain Loom Motions and its classification, Identification and function of required tools, equipment, and consumables needed for the Production.

Qualification Pack

- PC17.** Be able to draw the mended warp yarn through the healds properly , as per the drawing order prescribed
- PC18.** Correct the fabric defects like wrong drawing, wrong denting, end out , double end etc., immediately and also ensure that the other fabric defects too are corrected at the earliest, before continuing further production
- PC19.** Rectify in case of any floats, should be able to " unweave " the same & should be able to run the machine without " starting mark or 1crack"
- PC20.** Carry out that cloth rolls are doffed whenever/ wherever necessary

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Understand Yarn Quality for different end product
- KU2.** Knowledge on Jute Winding / Beaming machine and identification of parts
- KU3.** Understand Recommend yarn count of the spool (ask side beamers to follow the colour mark)
- KU4.** Knowledge on Jute Sizing and its necessity
- KU5.** Understand measurement of machine performance at weaving preparatory section
- KU6.** Knowledge on count and set the exact number of threads or runners at the start for a particular quality of beam (needed for a specified fabric) and continue frequent checking
- KU7.** Knowledge on carrying out correct take up of sizing paste by the yarn and squeezing properly, adjust the pressing roller accordingly
- KU8.** Knowledge on Carrying out clean surface of the steam cylinders, correct steam pressure to get proper Drying of yarn
- KU9.** Knowledge on Carrying out moisture content, percent size application in beam in consultation with superiors as practiced in jute industry and ensure 70 percent wet pick-up of size
- KU10.** Understand steam pressure to keep it at 25-35 psi and put right identification mark for its quality
- KU11.** Knowledge on Control the beam speed to maintain right yarn tension in jute beaming machine
- KU12.** Knowledge on Alignment the warp yarns on the extreme selvedge so that these warp yarns do not fall on flanges or wrap over the flanges
- KU13.** Knowledge on Carrying out man and machine safety while operating the beaming machine, and keep the working place (floor) clean i.e. free from any unwanted elements like spool centre, thread waste, broken machine parts etc.
- KU14.** Knowledge on Carrying out weavers knot is of minimum size to pass easily through the heald wires and reed
- KU15.** Knowledge on Carrying out that all the stop motions, indication lamps , preventive mechanisms etc., function properly
- KU16.** Understand Loom Motions and its classification, Identification and function of required tools, equipment, and consumables needed for the Production.
- KU17.** Knowledge on mended warp yarn through the healds properly , as per the drawing order prescribed

Qualification Pack

- KU18.** Understand fabric defects like wrong drawing, wrong denting, end out , double end etc., immediately and also ensure that the other fabric defects too are corrected at the earliest, before continuing further production
- KU19.** Rectification of any floats, should be able to unweave the same & should be able to run the machine without starting mark
- KU20.** Knowledge on Carrying out that cloth rolls are doffed whenever/ wherever necessary

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Read and understand written instructions
- GS2.** Communicate with supervisor appropriately
- GS3.** Write clear and short sentences in simple language for daily reporting
- GS4.** Talk to others to convey information effectively
- GS5.** Identify the real reason for the problem faced
- GS6.** Apply problem solving approaches in different situations

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Assessment System Overview:

- Batches assigned to IJIRA for conducting the assessment online through Portal with two probable dates for Assessment
- IJIRA deploys the ToA certified Assessor for executing the assessment
- IJIRA monitors the assessment process & records

2. Testing Environment:

- Check the Assessment location, date and time
- If the batch size is more than 30, then Assessment will spill over to consecutive days.
- Check that the allotted time to the candidates to complete Theory & Practical Assessment is correct.

3. Assessment Quality Assurance levels/Framework:

Qualification Pack

- Question bank is created by the Subject Matter Experts (SME) are verified by the other SME
- Questions are mapped to the specified assessment criteria
- Assessor must be ToA certified.

4. Types of evidence or evidence-gathering protocol:

- reporting of the assessor from assessment location
- Centre photographs with signboards and scheme specific branding

5. Method of verification or validation:

- Surprise visit to the assessment location

6. Method for assessment documentation, archiving, and access

- Hard copies of the documents are stored

Minimum Aggregate Passing % at QP Level : 50

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Assessment Weightage

Compulsory NOS

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
