JUTE/TSC/Q1002: Jute Loom Weaving Operator (S4 loom)

Brief Job Description

Jute Loom Weaving Operator (S4 loom) is responsible for efficiently operating modern looms (Rapier, S-4A & one mack etc.). As weaver, S/he makes necessary arrangements including checking of quality of jute warp beam and jute weft package availability including its quality. To run efficiently and ensure sustainability of production process

Personal Attributes

S/he is required skill on mechanism of loom, spare parts identification, knowledge of different motions of loom, tension control mechanism, lubrication schedule, maintenance, detection of fabric faults and Testing and Quality Control of Jute yarn, fabric on quality of jute packaging materials.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [JUTE/TSC/N1001: Jute beaming, sizing quality and weaving efficiency](#)
2. [JUTE/TSC/N1002: Testing and Quality Control \(S4\)](#)
3. [JUTE/TSC/N1003: Lubricate weaving machines.](#)
4. [JUTE/TSC/N1004: Operating Shuttleless Jute Weaving machine & its motions, tuning aspects](#)
5. [JUTE/TSC/N1005: Fire and industrial safety, implementation of production plan as per quality, Housekeeping, handling of tools & equipment and working](#)
6. [DGT/VSQ/N0101: Employability Skills \(30 Hours\)](#)

Qualification Pack

JUTE/TSC/N1001: Jute beaming, sizing quality and weaving efficiency

Description

Supervise production operation in weaving section

Scope

The scope covers the following :

- Taking charge of loom sets and handing loom sets shift to Operator- Weaving in the following shift

Elements and Performance Criteria

Jute beaming, sizing quality and weaving efficiency

To be competent, the user/individual on the job must be able to:

- PC1.** Knowledge and understanding of various types of Jute Yarn & fabric
- PC2.** Illustrate Knowledge of various Jute fabric products, its market size and customer base in state, national and international level
- PC3.** Overview of Jute process
- PC4.** Explain Jute Beaming machine and identification of parts
- PC5.** Explain Jute Sizing and its necessity
- PC6.** Importance and quality of size mixture.
- PC7.** Explain Loom Motions and its classification, Identification and function of required tools, equipment, and consumables needed for the Production

Take Charge of the Shift from loom operator

To be competent, the user/individual on the job must be able to:

- PC8.** come at least 10 - 15 minutes earlier to the work spot
- PC9.** Ensure whether oil can, grease gun etc. is in order
- PC10.** Check the cleanliness of the machines & other work areas
- PC11.** Check whether any spare/raw material/ tool / fabric/ any other material are thrown under the machines or in the other work areas
- PC12.** Report to his superior in case next shift reliever doesn't report for duty. In that case hand over the shift to next shift supervisor
- PC13.** Ensure the machines & other work area is neat & clean
- PC14.** Report to His/ Her Superior about the quality / safety issues/ any other issue faced

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Knowledge and understanding of various types of Jute Yarn & fabric
- KU2.** Knowledge of various Jute fabric products, its market size and customer base in state, national and international level

Qualification Pack

- KU3.** Knowledge on overview of Jute process
- KU4.** Understand Jute Beaming machine and identification of parts
- KU5.** Knowledge on Jute Sizing and its necessity
- KU6.** Understand importance and quality of size mixture
- KU7.** Understand Loom Motions and its classification, Identification and function of required tools, equipment, and consumables needed for the Production.
- KU8.** Knowledge on shift handover at least 10 - 15 minutes earlier to the work spot
- KU9.** Knowledge on use of oil can, grease gun etc.
- KU10.** Understand cleanliness of the machines & other work areas
- KU11.** Knowledge on spare/raw material/ tool / fabric/ any other material are thrown under the machines or in the other work areas
- KU12.** Knowledge on report to his superior in case next shift reliever doesnot report for duty. In that case hand over the shift to next shift supervisor
- KU13.** Knowledge on cleanliness of the machines & other work area
- KU14.** Understand report to His/ Her Superior about the quality / safety issues/ any other issue faced

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Read and understand written instructions
- GS2.** Communicate with supervisor appropriately
- GS3.** Write clear and short sentences in simple language for daily reporting
- GS4.** Talk to others to convey information effectively
- GS5.** Identify the real reason for the problem faced

Qualification Pack

Assessment Criteria

JUTE/TSC/N1002: Testing and Quality Control (S4)

Description

Supervise production operation in weaving section

Scope

The scope covers the following :

- Taking charge of loom sets and handing loom sets shift to Operator- Weaving in the following shift

Elements and Performance Criteria

Testing and Quality Control

To be competent, the user/individual on the job must be able to:

- PC1.** Check quality of feed material (beam and weft package)
- PC2.** Ensure that quality-wise identification mark for jute yarn (sacking warp, sacking weft, hessian warp, hessian weft and any other qualities) is proper
- PC3.** Ensure that operators join the broken ends by proper weavers' knots using mechanical knotter hook
- PC4.** Ensure that defective packages are kept separately
- PC5.** Minimise unnecessary wastage of yarn while removing faults or during beam change
- PC6.** Identification of various types of fabric faults
- PC7.** Quality standards about final finished product to meet the defined requirements
- PC8.** Explain Importance of proper communication with associated departments and teams in Production process.
- PC9.** Report immediately to the supervisor or concern superiors, if any technological or mechanical problem occurs in machine

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Understand quality of feed material (beam and weft package)
- KU2.** Knowledge on quality-wise identification mark for jute yarn (sacking warp, sacking weft, hessian warp, hessian weft and any other qualities) is proper
- KU3.** Understand joining of the broken ends by proper weavers knots using mechanical knotter hook
- KU4.** Knowledge of defective packages and it should be kept separately
- KU5.** Knowledge on wastage of yarn while removing faults or during beam change
- KU6.** Knowledge on various types of fabric faults
- KU7.** Understand Quality standards about final finished product to meet the defined requirements

Qualification Pack

- KU8.** Understand Importance of proper communication with associated departments and teams in Production process.
- KU9.** Knowledge on Reporting to the supervisor or concern superiors, if any technological or mechanical problem occurs in machine

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Read and understand written instructions
- GS2.** Communicate with supervisor appropriately
- GS3.** Talk to others to convey information effectively
- GS4.** Identify the real reason for the problem faced
- GS5.** Apply problem solving approaches in different situations

Qualification Pack

JUTE/TSC/N1003: Lubricate weaving machines.

Description

Concept of loom maintenance and its lubrication & loom tuning

Scope

The scope covers the following :

- Concept of loom maintenance and its lubrication & loom tuning

Elements and Performance Criteria

Concept of loom maintenance and its lubrication

To be competent, the user/individual on the job must be able to:

- PC1.** Learn mechanical equipment of each machinery parts and their function
- PC2.** Purpose and specification of tools used in maintenance activity.
- PC3.** Arrange for safety gears and tools to be used while carrying out maintenance
- PC4.** Perform Oiling and greasing the machines
- PC5.** Ensure that oiling points are identified with marking in paint
- PC6.** Ensure that there is no fluff in the oiling points
- PC7.** Check the oil quality before the same is applied
- PC8.** Apply oil in the oiling points as per the schedule
- PC9.** Ensure that the greasing points are identified with marking in paint
- PC10.** ensure that the grease nipples in the greasing points are there
- PC11.** Ensure grease in the grease points as per the schedule
- PC12.** Ensure that hands are free from oil or grease while touching the raw materials or fabrics

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Knowledge on mechanical equipment of each machinery parts and their function
- KU2.** Understand purpose and specification of tools used in maintenance activity.
- KU3.** Knowledge for safety gears and tools to be used while carrying out maintenance
- KU4.** Understand Performance of Oiling and greasing the machines
- KU5.** Knowledge of oiling points are identified with marking in paint
- KU6.** Knowledge to ensure that there is no fluff in the oiling points
- KU7.** Understand checking the oil quality before the same is applied
- KU8.** Understand application of oil in the oiling points as per the schedule
- KU9.** Knowledge on the greasing points at identified with marking in paint.
- KU10.** Understand the grease nipples in the greasing points are there

Qualification Pack

KU11. Understand ensure grease in the grease points as per the schedule

KU12. Knowledge to ensure that hands are free from oil or grease while touching the raw materials or fabrics

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. Read and understand written instructions

GS2. Communicate with supervisor appropriately

GS3. Talk to others to convey information effectively

GS4. Identify the real reason for the problem faced

GS5. Apply problem solving approaches in different situations

JUTE/TSC/N1004: Operating Shuttleless Jute Weaving machine & its motions, tuning aspects

Description

Machine operation for overall efficiency of loom shed

Scope

The scope covers the following :

- Working in a team and machine operation for overall efficiency of loom shed

Elements and Performance Criteria

Working in a team and machine operation for overall efficiency of loom shed

To be competent, the user/individual on the job must be able to:

- PC1.** Ensure the weavers knot is of minimum size to pass easily through the heald wires and reed
- PC2.** Check the indicating lamp and find out the broken warp end
- PC3.** Should find out the location of the broken end, by bringing the hands under the dropper bars , with mechanical droppers
- PC4.** Use electrical warp stop motion , to detect the location using the indication lamp and by bringing the hands over the droppers
- PC5.** Be able to mend the broken warp end in the sized beams with the thrums of the same count of the sized beams, using " weavers ' knots"
- PC6.** Be able to draw the mended warp yarn through the healds properly , as per the drawing order prescribed
- PC7.** Start the loom without inching/ in one stroke
- PC8.** Find out the breakage place (whether it is before accumulator or in the accumulator or in the weft feeder or in the rapier)
- PC9.** Be able to find out the last pick inserted in the produced cloth, by ensuring proper pick finding
- PC10.** Start the loom without inching/ in one stroke
- PC11.** Correct the fabric defects like wrong drawing, wrong denting , end out , double end etc., immediately and also ensure that the other fabric defects too are corrected at the earliest, before continuing further production
- PC12.** Clean the machines and work area, so as to ensure good working atmosphere, without damaging the fabrics in the looms where the cleaning work is carried out as well as in the adjacent & opposite looms.
- PC13.** In case of any floats, should be able to " unweave " the same & should be able to run the machine without " starting mark or crack"
- PC14.** Weft yarn reserve packages have to be tied with tail ends of the running weft yarn package & ensure proper transfer
- PC15.** Patrol the machines and do mending so as to minimize the stoppages

Qualification Pack

- PC16.** Should tie the “waste bag” & all the waste generated by the weavers are collected in the said waste bag, which can be ultimately disposed in the places/ bins provided, at the end of the shift.
- PC17.** See that the weft yarn is completely used, without giving room for additional wastage of raw materials. For any quality issue or defective cone etc., the same has to be brought to the notice of the superiors
- PC18.** Ensure that all the stop motions, indication lamps , preventive mechanisms etc., function properly
- PC19.** Report to superiors for any deviation in the same & for any other quality issue
- PC20.** Ensure that his/ her looms are stopped for a minimum possible down time due to whatever reason & see that he/ she gets maximum outputs in his/ her shift
- PC21.** Check the fabrics for the defects at least twice in a shift
- PC22.** Ensure that cloth rolls are doffed whenever/ wherever necessary
- PC23.** Ensure that no raw material/ cloth/ spare/ tool / any other material is thrown under/ near the machines or in the other work areas

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Knowledge of weavers knot is of minimum size to pass easily through the heald wires and reed
- KU2.** Understand the location of the broken end, by bringing the hands under the dropper bars , with mechanical droppers
- KU3.** Understand electrical warp stop motion , to detect the location using the indication lamp
- KU4.** Knowledge of mending the broken warp end in the sized beams of the same count of the sized beams,
- KU5.** Understand the inching of the loom
- KU6.** Identify the breakage place (whether it is before accumulator or in the accumulator or in the weft feeder or in the rapier)
- KU7.** Identify the last pick inserted in the produced cloth, by ensuring proper pick finding
- KU8.** Understand the Correction of the fabric defects like wrong drawing, wrong denting , end out , double end
- KU9.** Understand fabric defects too are corrected at the earliest, before continuing further production
- KU10.** Knowledge of Cleaning the machines and work area, without damaging the fabrics in the looms where the cleaning work is carried out as well as in the adjacent & opposite looms.
- KU11.** Knowledge of Weft yarn reserve packages have to be tied with tail ends of the running weft yarn package & ensure proper transfer
- KU12.** Knowledge Patrol the machines and do mending so as to minimize the stoppages
- KU13.** Knowledge of use of waste bag & all the waste generated by the weavers are collected in the said waste bag, which can be ultimately disposed in the places/ bins provided, at the end of the shift.
- KU14.** Identify the stop motions, indication lamps , preventive mechanisms etc., function properly

Qualification Pack

- KU15.** Knowledge of Report to superiors for any deviation in the same & for any other quality issue
- KU16.** Understand looms are stopped for a minimum possible down time due to whatever reason & see that he/ she gets maximum outputs in his/ her shift
- KU17.** Check the fabrics for the defects at least twice in a shift
- KU18.** Ensure that no raw material/ cloth/ spare/ tool / any other material is thrown under/ near the machines or in the other work areas.

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Read and understand written instructions
- GS2.** Communicate with supervisor appropriately
- GS3.** Write clear and short sentences in simple language for daily reporting
- GS4.** Apply good attention to detail
- GS5.** Maintain precision of work

JUTE/TSC/N1005: Fire and industrial safety, implementation of production plan as per quality, Housekeeping, handling of tools & equipment and working

Description

Maintain health, safety and security at work place

Scope

The scope covers the following :

- Maintain health, safety and security at work place

Elements and Performance Criteria

Maintain health, safety and security at work place

To be competent, the user/individual on the job must be able to:

- PC1.** Comply with health and safety related instructions applicable to the workplace
- PC2.** Use and maintain personal protective equipment such as “ear plug”, “ nose mask”, “head cap” etc., as per protocol
- PC3.** Carry out own activities in line with approved guidelines and procedures
- PC4.** Safely handle and remove waste
- PC5.** Follow environment management system related procedures
- PC6.** Identify and correct (if possible) malfunctions in machinery and equipment
- PC7.** Store materials and equipment in line with organizational requirements
- PC8.** Minimize health and safety risks to self and others due to own actions
- PC9.** Communicate the safety plan to everyone and attach disciplinary rules with the implementation
- PC10.** Monitor the workplace and work processes for potential risks and threat
- PC11.** Undertake first aid, fire-fighting and emergency response training, if asked to do so
- PC12.** Take action based on instructions in the event of fire, emergencies or accidents
- PC13.** Follow organization procedures for shutdown and evacuation when required
- PC14.** Recognise other possible security issues existing in the workplace

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Knowledge on health and safety related instructions applicable to the workplace
- KU2.** Understand use of personal protective equipment such as ear plug, nose mask, head cap etc., as per protocol
- KU3.** Understand activities in line with approved guidelines and procedures

Qualification Pack

- KU4.** Safely handle and remove waste

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Assessment System Overview:

- Batches assigned to IJIRA for conducting the assessment online through Portal with two probable dates for Assessment
- IJIRA deploys the ToA certified Assessor for executing the assessment
- IJIRA monitors the assessment process & records

2. Testing Environment:

- Check the Assessment location, date and time
- If the batch size is more than 30, then Assessment will spill over to consecutive days.
- Check that the allotted time to the candidates to complete Theory & Practical Assessment is correct.

3. Assessment Quality Assurance levels/Framework:

Qualification Pack

- Question bank is created by the Subject Matter Experts (SME) are verified by the other SME
- Questions are mapped to the specified assessment criteria
- Assessor must be ToA certified.

4. Types of evidence or evidence-gathering protocol:

- reporting of the assessor from assessment location
- Centre photographs with signboards and scheme specific branding

5. Method of verification or validation:

- Surprise visit to the assessment location

6. Method for assessment documentation, archiving, and access

- Hard copies of the documents are stored

Minimum Aggregate Passing % at QP Level : 40

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Assessment Weightage

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
