Qualification Pack

JUTE/TSC/Q2001: Junior Quality Control Technician (Jute Production)

Brief Job Description

Quality Control Technician (Jute Production) should be able to carry out Quality control/Quality assurance processes, understanding product and processes required at various stages of production for meeting the expectations of final customers.

Personal Attributes

A Quality Assessor carries out quality assurance /quality control procedures in the sampling, pre-production, during production, and post production stages, reports deviations and prevents quality failures.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [DGT/VSQ/N0101: Employability Skills \(30 Hours\)](#)
2. [JUTE/TSC/N1006: Maintain health, safety and security at work place \(L4\)](#)
3. [JUTE/TSC/N2001: Jute Retting, Selection and Batching](#)
4. [JUTE/TSC/N2002: Understanding of product specification, the process & procedure](#)
5. [JUTE/TSC/N2004: Testing and Quality Control in Jute Fabric Manufacturing Process](#)
6. [JUTE/TSC/N2005: Quality Assurance in spinning and weaving section](#)
7. [JUTE/TSC/N2003: Testing and Quality Control in Jute Yarn Manufacturing Processes](#)

DGT/VSQ/N0101: Employability Skills (30 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

PC1. understand the significance of employability skills in meeting the job requirements

Constitutional values - Citizenship

To be competent, the user/individual on the job must be able to:

PC2. identify constitutional values, civic rights, duties, personal values and ethics and environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

PC3. explain 21st Century Skills such as Self-Awareness, Behavior Skills, Positive attitude, self-motivation, problem-solving, creative thinking, time management, social and cultural awareness, emotional awareness, continuous learning mindset etc.

Basic English Skills

To be competent, the user/individual on the job must be able to:

PC4. speak with others using some basic English phrases or sentences

Communication Skills

To be competent, the user/individual on the job must be able to:

PC5. follow good manners while communicating with others

PC6. work with others in a team

Qualification Pack

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

PC7. communicate and behave appropriately with all genders and PwD

PC8. report any issues related to sexual harassment

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

PC9. use various financial products and services safely and securely

PC10. calculate income, expenses, savings etc.

PC11. approach the concerned authorities for any exploitation as per legal rights and laws

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

PC12. operate digital devices and use its features and applications securely and safely

PC13. use internet and social media platforms securely and safely

Entrepreneurship

To be competent, the user/individual on the job must be able to:

PC14. identify and assess opportunities for potential business

PC15. identify sources for arranging money and associated financial and legal challenges

Customer Service

To be competent, the user/individual on the job must be able to:

PC16. identify different types of customers

PC17. identify customer needs and address them appropriately

PC18. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC19. create a basic biodata

PC20. search for suitable jobs and apply

PC21. identify and register apprenticeship opportunities as per requirement

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use basic spoken English language

KU6. Do and dont of effective communication

KU7. inclusivity and its importance

KU8. different types of disabilities and appropriate communication and behaviour towards PwD

KU9. different types of financial products and services

Qualification Pack

- KU10.** how to compute income and expenses
- KU11.** importance of maintaining safety and security in financial transactions
- KU12.** different legal rights and laws
- KU13.** how to operate digital devices and applications safely and securely
- KU14.** ways to identify business opportunities
- KU15.** types of customers and their needs
- KU16.** how to apply for a job and prepare for an interview
- KU17.** apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate effectively using appropriate language
- GS2.** behave politely and appropriately with all
- GS3.** perform basic calculations
- GS4.** solve problems effectively
- GS5.** be careful and attentive at work
- GS6.** use time effectively
- GS7.** maintain hygiene and sanitisation to avoid infection

JUTE/TSC/N1006: Maintain health, safety and security at work place (L4)

Description

Maintain health, safety and security at work place

Scope

The scope covers the following :

- Maintain health, safety and security at work place

Elements and Performance Criteria

Maintain health, safety and security at work place

To be competent, the user/individual on the job must be able to:

- PC1.** Comply with health and safety related instructions applicable to the workplace
- PC2.** Use and maintain personal protective equipment such as “ear plug”, “ nose mask”, “head cap” etc., as per protocol
- PC3.** Carry out own activities in line with approved guidelines and procedures
- PC4.** Safely handle and remove waste
- PC5.** Follow environment management system related procedures
- PC6.** Identify and correct (if possible) malfunctions in machinery and equipment
- PC7.** Store materials and equipment in line with organizational requirements
- PC8.** Minimize health and safety risks to self and others due to own actions
- PC9.** Communicate the safety plan to everyone and attach disciplinary rules with the implementation
- PC10.** Monitor the workplace and work processes for potential risks and threat
- PC11.** Undertake first aid, fire-fighting and emergency response training, if asked to do so
- PC12.** Take action based on instructions in the event of fire, emergencies or accidents
- PC13.** Follow organization procedures for shutdown and evacuation when required
- PC14.** Recognise other possible security issues existing in the workplace

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Knowledge on health and safety related instructions applicable to the workplace
- KU2.** Understand use of personal protective equipment such as ear plug, nose mask, head cap etc., as per protocol
- KU3.** Understand activities in line with approved guidelines and procedures
- KU4.** Safely handle and remove waste
- KU5.** Understand environment management system related procedures

Qualification Pack

- KU6.** Identify and correct (if possible) malfunctions in machinery and equipment
- KU7.** Knowledge on health and safety risks to self and others due to own actions
- KU8.** Understand safety plan to everyone and attach disciplinary rules with the implementation
- KU9.** Understand first aid, fire-fighting and emergency response training
- KU10.** Understand organization procedures for shutdown and evacuation when required

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Read and understand written instructions
- GS2.** Communicate with supervisor appropriately
- GS3.** Write clear and short sentences in simple language for daily reporting
- GS4.** Talk to others to convey information effectively
- GS5.** Identify the real reason for the problem faced

JUTE/TSC/N2001: Jute Retting, Selection and Batching

Description

Gain knowledge on Quality of Retting of Jute and Grading of Jute fibre

Scope

The scope covers the following :

- Understanding of Jute bale quality wise sorting, Identification of defects, moisture compliances, BIS Gradation / hand & eye gradation system & instrument grading system

Elements and Performance Criteria

Understanding of Jute bale quality wise sorting, Identification of defects, moisture compliances, BIS Gradation / hand & eye gradation system & instrument grading system

To be competent, the user/individual on the job must be able to:

- PC1.** Knowledge Conventional retting Process
- PC2.** Identify need for improved and efficient method of retting
- PC3.** Demonstrate factors affecting the retting process
- PC4.** Upgrade of low grade jute due to retting of jute
- PC5.** Demonstrate of improved retting with microbial formulation Quality improvement/ piling technique
- PC6.** Knowledge on Dos and Don'ts of fibre upgradation in shop floor
- PC7.** Understand Gradation of Jute fibre – BIS std IS271:2020
- PC8.** Identify the approximate root portion (approximate weight %) in bundles of raw jute strand (Reed) in morah
- PC9.** Carry out proper cleaning and opening each bundle for proper selection and grading
- PC10.** Carry out selection of raw jute bundles in proper manner giving due importance to each quality parameter and defects etc.
- PC11.** Carry out by hand and eye method the following quality parameters of raw jute fibres during selection, Strength, Root content, Defects, Colour, Fineness, Bulk-Density
- PC12.** Carry out that after proper selection of jute bundle, each morah (approx. 1500 ± 200 gms) is half twisted and folded at the middle before stacking for further processing to keep grade-wise
- PC13.** Carry out raw jute after selection is to be kept in dry and clean conditions
- PC14.** Carry out that barrows with selected morahs be marked with proper identification mark, to avoid mixing up of one quality of jute fibre morahs with other quality morahs
- PC15.** Identify the Jute bales of a particular grade as required for processing of a specific yarn count, has to be reported to the next senior. Up-gradation or down-gradation of jute to be noted
- PC16.** Carry out up-gradation and down-gradation the jute bundle has been separately stacked with identification mark

Qualification Pack

- PC17.** Carry out down-gradation/ up-gradation, the bigger bundle of raw jute is to be splitted into smaller and uniform weight of morah (approx. 1500 ± 200 gms each)
- PC18.** Carry out that the moisture regain% of jute morah has been taken properly for future reference
- PC19.** Carry out that the cut roots of Jute strand (reed) are kept/stored in a separate stack for billing
- PC20.** Check the colour coding of different quality of Jute, as per quality & grade of raw jute (TD3-TD7), or the display board (mentioned the jute grade) in case of piled jute

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Knowledge Conventional retting Process
- KU2.** Knowledge on improved and efficient method of retting
- KU3.** Understand retting process
- KU4.** Upgrade of low grade jute due to retting of jute
- KU5.** Understand improved retting with microbial formulation Quality improvement/ piling technique

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Read and understand written instructions
- GS2.** Communicate with supervisor appropriately
- GS3.** Write clear and short sentences in simple language for daily reporting
- GS4.** Apply problem solving approaches in different situations
- GS5.** Maintain precision of work

JUTE/TSC/N2002: Understanding of product specification, the process & procedure

Description

Comply with industry, regulatory and organizational requirements

Scope

The scope covers the following :

- Explain various quality wise machine and process parameters

Elements and Performance Criteria

Explain various quality used in Jute mill like Sacking Warp, Sacking Weft, Hessian warp and weft, export quality yarn value added other product

To be competent, the user/individual on the job must be able to:

- PC1.** Prepare flow chart and batch composition for Sacking Warp quality
- PC2.** Prepare flow chart and batch composition for Sacking Weft quality
- PC3.** Prepare flow chart and batch composition for Hessian Warp & Weft batch quality
- PC4.** Prepare flow chart and batch composition for S4 A Warp & Weft batch quality
- PC5.** Prepare flow chart and batch composition for Export Sale yarn quality
- PC6.** Prepare batch composition for Type 'A' and Type 'B' - B. Twill jute bags
- PC7.**
 - Carry out frequent checking morah weight for compliance
 - Ensure quality management of delivered sliver of spreader and softener and other jute spinning machineries
- PC8.** Explain emulsion and its purpose and important points during application of emulsion, Defects in Emulsions
- PC9.** Carry out Pile Management, piling methods, pile duration, morah size etc.
- PC10.** Calculate Formulation and Mixing of Emulsions with Spreader Production calculations
- PC11.** Knowledge of Breaker/Inter / Finisher cards & their basic features and principles of operations
- PC12.** Explain basic idea of lead, draft, draft constant, Draft Change pinion, doubling and its importance in carding /drawing/spinning process
- PC13.** Objectives of carding, drawing, spinning, Principles of Drafting, Twisting & Winding
- PC14.** Explain yarn count and twist. Idea of twist constant
- PC15.** Explain to assure yarn end breakage rate as per industry standard, Doffing time & release of full/half/empty bobbin if segregate
- PC16.** Explain Sizing- purpose, importance and quality of size mixture. Sizing/beaming machine and their working procedures, different parts and their functions, sizing paste testing & MR% in sized yarn in warp beam, tension
- PC17.** Explain Loom Motions
- PC18.** Explain Steps of operations in jute finishing

Qualification Pack

- PC19.** Explain working principle of Damping, Calendaring, Lapping, Cutting machine, Hemming, Herackle sewing machine operation machines and functions
- PC20.** Explain Do's and Don'ts of Jute Spreader/ Softener, Carding, Drawing, Spinning, Winding, Pre-beaming, weaving and Jute Finishing machinery operation

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Knowledge on batch composition for Sacking Warp, Sacking Weft, Hessian Warp & Weft batch, S4 A Warp & Weft batch quality
- KU2.** Understand batch composition for Export Sale yarn quality
- KU3.** Knowledge on emulsion and its purpose and important points during application of emulsion, Defects in Emulsions
- KU4.** Understand Pile Management, piling methods, pile duration, morah size etc.
- KU5.** Knowledge on Formulation and Mixing of Emulsions with Spreader Production calculations
- KU6.** Knowledge of Breaker/Inter / Finisher cards & their basic features and principles of operations.
- KU7.** Understand basic idea of lead, draft, draft constant, Draft Change pinion, doubling and its importance in carding /drawing/spinning process
- KU8.** Knowledge Objectives of carding, drawing, spinning
- KU9.** Principles of Drafting, Twisting & Winding
- KU10.** Understand yarn count and twist. Idea of twist constant
- KU11.** Knowledge on yarn end breakage rate as per industry standard, Doffing time & release of full/half/empty bobbin if segregate
- KU12.** Knowledge on Sizing purpose, importance and quality of size mixture.
- KU13.** Knowledge on Loom Motions
- KU14.** Knowledge operations in jute finishing
- KU15.** Do's and Don'ts of Jute Spreader/ Softener, Carding, Drawing, Spinning, Winding, Pre-beaming, weaving and Jute Finishing machinery operation

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Read and understand written instructions
- GS2.** Communicate with supervisor appropriately
- GS3.** Write clear and short sentences in simple language for daily reporting
- GS4.** Talk to others to convey information effectively
- GS5.** Identify the real reason for the problem faced
- GS6.** Apply problem solving approaches in different situations

JUTE/TSC/N2004: Testing and Quality Control in Jute Fabric Manufacturing Process

Description

Check various quality parameters following SOP in Jute Fabric Manufacturing Process

Scope

The scope covers the following :

- Knowledge and Understanding on various quality parameters in Jute Fabric Manufacturing Process

Elements and Performance Criteria

Testing and Quality Control of Jute Yarn, Fabric and Gunny Bag quality

To be competent, the user/individual on the job must be able to:

- PC1.** Knowledge of Testing standard and SOP of test method for Jute Fabric Testing
- PC2.** Demonstrate Fabric Testing: Strip strength (warp and weft way), MR%, thickness, yarn count from seam, stitch density, wt conversion, ends/ dm, picks / dm, gsm, cover factor calculation
- PC3.** Identify Statistical Quality Control for jute Fabric processing
- PC4.** Identify Inspection process of Gunny bags as per BIS standards (IS 16186:2014)
- PC5.** Identify sample collection from shop floor /bales
- PC6.** Carry out various sampling technique
- PC7.** Carry out the yarn/fabric quality as per company's quality standard
- PC8.** Carry out quality and standards required in the jute mill in Jute winding, beaming, sizing, weaving and finishing machinery
- PC9.** Techniques for Procedure of inspection of Jute Product
- PC10.** Parameters of the products considered for inspection

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Knowledge of Testing standard and SOP of test method for Jute Fabric Testing
- KU2.** Understand Fabric Testing: Strip strength (warp and weft way), MR, thickness, yarn count from seam, stitch density, wt conversion, epdm, gsm, cover factor calculation
- KU3.** Knowledge on Statistical Quality Control for jute Fabric processing
- KU4.** Understand on Inspection process of Gunny bags as per BIS standards (IS 16186:2014)
- KU5.** Understand sample collection from shop floor /bales
- KU6.** Understand various sampling technique
- KU7.** Understand yarn/fabric quality as per quality standard
- KU8.** Knowledge on quality and standards required in the jute mill in Jute winding, beaming, sizing, weaving and finishing machinery

Qualification Pack

KU9. Knowledge on Parameters of the products considered for inspection

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. Write clear and short sentences in simple language for daily reporting

GS2. Talk to others to convey information effectively

GS3. Identify the real reason for the problem faced

GS4. Apply problem solving approaches in different situations

GS5. Seek clarification on problems from others

Qualification Pack

Assessment Criteria

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
<i>Testing and Quality Control of Jute Yarn, Fabric and Gunny Bag quality</i>	25	20	-	5
PC1. Knowledge of Testing standard and SOP of test method for Jute Fabric Testing	3	2	-	1
PC2. Demonstrate Fabric Testing: Strip strength (warp and weft way), MR%, thickness, yarn count from seam, stitch density, wt conversion, ends/ dm, picks / dm, gsm, cover factor calculation	3	2	-	1
PC3. Identify Statistical Quality Control for jute Fabric processing	2	2	-	-
PC4. Identify Inspection process of Gunny bags as per BIS standards (IS 16186:2014)	2	2	-	-
PC5. Identify sample collection from shop floor /bales	3	2	-	1
PC6. Carry out various sampling technique	2	2	-	-
PC7. Carry out the yarn/fabric quality as per company's quality standard	3	2	-	1
PC8. Carry out quality and standards required in the jute mill in Jute winding, beaming, sizing, weaving and finishing machinery	3	2	-	1
PC9. Techniques for Procedure of inspection of Jute Product	2	2	-	-

Qualification Pack

JUTE/TSC/N2005: Quality Assurance in spinning and weaving section

Description

Method & Tools to analyze the quality issue

Scope

The scope covers the following :

- Skilling on process and quality control in jute spinning, weaving and finishing process, understand the reason for roller lapping, sliver break, yarn break and waste%

Elements and Performance Criteria

Identifying of yarn faults and rectification

To be competent, the user/individual on the job must be able to:

- PC1.** Check whether the jute sliver quality and jute yarn quality according to desired quality standards and specifications for the specific industry
- PC2.** Carry out that proper identification mark is always present for different counts of jute yarns being spun or wound
- PC3.** Carry out that uniform bobbin weight is maintained in spinning machine (Yarn Unevenness, Mechanical Reasons)
- PC4.** Check and arrange replacement of defective machine parts of spinning and winding machinery by maintenance people in jute mills
- PC5.** Carry out proper wound angle and diameter in spool (warp package) and proper dia, cone length and length of the cop for jute weft (cop) yarn
- PC6.** Carry out the right piecing (minimum overlapping of sliver) in spinning and minimum overlapping in jute yarn in winding machine by appropriate method and use of coloured yarn while piecing export quality yarn
- PC7.** Find out the causes of end break in spinning machine, end break in winding(warp and weft) machine and take the remedial measures for excessive end breakage
- PC8.** Check frequently the quality of bobbin and spool and ensure that quality standards and specifications are maintained
- PC9.** Carry out join the broken ends by piecing in spinning frame & proper weavers' knots using mechanical knotter
- PC10.** Carry out the knots small and tight, with minimum yarn wastage
- PC11.** Carry out that winding tension in all drum/spindles are same and uniform throughout winding operation
- PC12.** Explain cause wise Loss in Efficiency % for in Jute Spreader / Softener, Carding, Drawing, Spinning, Winding, Pre-beaming, weaving and Jute Finishing Stages
- PC13.** Minimise unnecessary wastage of yarn while removing faults or during starting of winding and knotting
- PC14.** Carry out Quality wise Norms for Wastage at the Different Stages of Processing

Qualification Pack

PC15. Report immediately to the supervisor or concern superiors, if any technological or mechanical problem occurs in machine

Ensuring process and quality control in jute beaming , weaving and finishing

To be competent, the user/individual on the job must be able to:

- PC16.** Carry out quality-wise identification mark for jute yarn (sacking warp, sacking weft, hessian warp, hessian weft and any other qualities) is proper
- PC17.** Find out the major and minor causes of low production, if any, in case of beaming , weaving and finishing machines
- PC18.** Follow the instruction for changing any quality of jute yarn/fabric and related change in machine setting / parts and process parameter in jute beaming , weaving and finishing
- PC19.** Check and arrange replacement of defective machine parts of jute beaming , weaving and finishing
- PC20.** Carry out waste material inside his waste collection bag
- PC21.** Find out the causes of end break in weaving machine, end break in sewing machine and take the remedial measures for excessive end breakage
- PC22.** Calculate Sliver waste, Yarn waste, cloth waste & Gunny cuttings and its control
- PC23.** Carry out Cause wise Loss in Efficiency % for in Jute Spreader / Softener, Carding, Drawing, Spinning, Winding, Pre-beaming, weaving and Jute Finishing Stages
- PC24.** Carry out Cause-wise Loss in Efficiency % by Snap Study

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Understand jute sliver quality and jute yarn quality according to desired quality standards and specifications for the specific industry
- KU2.** Identification mark is always present for different counts of jute yarns being spun or wound
- KU3.** Knowledge on Yarn Unevenness
- KU4.** Knowledge on right piecing (minimum overlapping of sliver) in spinning and minimum overlapping in jute yarn in winding machine by appropriate method and use of coloured yarn while piecing export quality yarn
- KU5.** Understand causes of end break in spinning machine, end break in winding(warp and weft) machine and take the remedial measures for excessive end breakage
- KU6.** Understand quality of bobbin and spool and ensure that quality standards and specifications are maintained
- KU7.** Knowledge on quality of Knotting
- KU8.** Knowledge on cause wise Loss in Efficiency for in Jute Spreader / Softener, Carding, Drawing, Spinning, Winding, Pre-beaming, weaving and Jute Finishing Stages
- KU9.** Understand wastage of yarn while removing faults or during starting of winding and knotting
- KU10.** Knowledge on Quality wise Norms for Wastage at the Different Stages of Processing
- KU11.** Understand major and minor causes of low production, if any, in case of beaming , weaving and finishing machines
- KU12.** Knowledge on changing any quality of jute yarn/fabric and related change in machine setting / parts and process parameter in jute beaming , weaving and finishing

Qualification Pack

- KU13.** Knowledge on causes of end break in weaving machine, end break in sewing machine and take the remedial measures for excessive end breakage
- KU14.** Understand Calculation of Sliver waste, Yarn waste, cloth waste & Gunny cuttings and its control
- KU15.** Perform Cause-wise Loss in Efficiency by Snap Study

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Read and understand written instructions
- GS2.** Talk to others to convey information effectively
- GS3.** communicate with colleagues and superiors as per standard protocol
- GS4.** Maintain precision of work

Qualification Pack

JUTE/TSC/N2003: Testing and Quality Control in Jute Yarn Manufacturing Processes

Description

Check various quality parameters in Jute Yarn Manufacturing Process

Scope

The scope covers the following :

- Check various quality parameters following SOP in Jute Yarn Manufacturing Process

Elements and Performance Criteria

Testing and Quality Control of Raw Jute, sliver and yarn quality

To be competent, the user/individual on the job must be able to:

- PC1.** Knowledge of all technical terms and definition, Testing stds
- PC2.** Calculate mean, standard deviation, CV%, Percentage Mean Deviation, MR%, Idea of RH%, Relation of RH% with MR%, QR. Calculation
- PC3.** Identify Statistical Quality Control for jute processing & preparation of control charts
- PC4.** Carry out various sampling technique for testing and sample collection from shop floor
- PC5.** Identify Testing standard and SOP of test method
- PC6.** Carry out Fibre Testing parameters – strength, fineness, root, defects, colour, MR%
- PC7.** Carry out the sliver / yarn quality as per company's quality standard and Sliver Weight and its CV% at different stages
- PC8.** Carry out quality and standards required in the jute mill in Jute batching, carding, drawing and spinning section
- PC9.** Identify techniques for methods of process control
- PC10.** Identify & rectification of any deviation found in shop floor

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Understand Statistical Quality Control for jute processing & preparation of control charts
- KU2.** Understand mean, standard deviation, CV, Percentage Mean Deviation
- KU3.** Knowledge of all technical terms and definition, Testing standards
- KU4.** Knowledge on sampling technique for testing and sample collection from shop floor
- KU5.** Understand Testing standard and SOP of test method
- KU6.** Knowledge on Fibre Testing parameters like strength, fineness, root, defects, colour, MR
- KU7.** Understand quality and standards required in the jute mill in Jute batching, carding, drawing and spinning section
- KU8.** Knowledge on methods of process control

Qualification Pack

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Read and understand written instructions
- GS2.** Identify the real reason for the problem faced
- GS3.** Apply problem solving approaches in different situations
- GS4.** Refer anomalies to the supervisor
- GS5.** Seek clarification on problems from others

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Assessment System Overview:

- Batches assigned to IJIRA for conducting the assessment online through Portal with two probable dates for Assessment
- IJIRA deploys the ToA certified Assessor for executing the assessment
- IJIRA monitors the assessment process & records

2. Testing Environment:

- Check the Assessment location, date and time
- If the batch size is more than 30, then Assessment will spill over to consecutive days.
- Check that the allotted time to the candidates to complete Theory & Practical Assessment is correct.

3. Assessment Quality Assurance levels/Framework:

Qualification Pack

- Question bank is created by the Subject Matter Experts (SME) are verified by the other SME
- Questions are mapped to the specified assessment criteria
- Assessor must be ToA certified.

4. Types of evidence or evidence-gathering protocol:

- reporting of the assessor from assessment location
- Centre photographs with signboards and scheme specific branding

5. Method of verification or validation:

- Surprise visit to the assessment location

6. Method for assessment documentation, archiving, and access

- Hard copies of the documents are stored

Minimum Aggregate Passing % at QP Level : 50

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Assessment Weightage

Compulsory NOS

National Occupational Standards	Theory Marks	Practical Marks	Project Marks	Viva Marks	Total Marks	Weightage

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
