Qualification Pack

JUTE/TSC/Q3001: Jute Machine Maintenance Technician (Elective 1: Spinning machinery, Elective 2: Weaving Machinery)

Brief Job Description

A Jute Machine Maintenance Technician should be able to carry out Practical hands-on experience, in addition to theoretical knowledge, is crucial for achieving consistent and high-machine efficiency in yarn/fabric production in the jute industry

Personal Attributes

The courses help to develop career on Jute Machinery and its Maintenance and able to keep /bring mechanical, electrical and hydraulics system used in jute mill machinery in satisfactory operation

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [JUTE/TSC/N3001: Workshop Calculation, Power Transmission and accessories](#)
2. [JUTE/TSC/N3002: Basic maintenance, machine audit and Spare Parts Inventory](#)
3. [JUTE/TSC/N3003: Electrical Appliance and retrofit Automation / Automated system with Basic Computer Skill](#)
4. [JUTE/TSC/N3004: Lubrication and its schedule](#)
5. [DGT/VSQ/N0101: Employability Skills \(30 Hours\)](#)
6. [JUTE/TSC/N1006: Maintain health, safety and security at work place \(L4\)](#)

Electives (mandatory to select at least one):

Elective 1: Elective NOS/s: 1- Spinning Machinery

Jute Spinning Machinery operation and its maintenance requirements

1. [JUTE/TSC/N3005: Jute Spinning Machinery operation and its maintenance requirements](#)

Elective 2: Elective NOS/s: 2- Weaving Machinery

Jute Weaving Machinery operation and its maintenance requirements

1. [JUTE/TSC/N3006: Jute Weaving Machinery operation and its maintenance requirements](#)

Qualification Pack

JUTE/TSC/N3001: Workshop Calculation, Power Transmission and accessories

Description

Elucidate various workshop machinery and maintenance tools, power transmission devices in Jute mill machinery

Scope

The scope covers the following :

- Perform basic workshop operations using suitable tools for fitting, riveting, milling, lathe, grinding, files, drilling etc

Elements and Performance Criteria

Workshop Calculation, Power Transmission and accessories

To be competent, the user/individual on the job must be able to:

- PC1.** Describe the working principles of workshop machineries viz. lathe, shaping machine, drilling machine, milling machine and grinding machine
- PC2.** Identify, troubleshoot and rectify different faults in the machine and machine parts
- PC3.** Plan work in compliance with standard safety norms
- PC4.** Repair, overhaul and assemble the parts in the machine with the help of blueprint
- PC5.** Check for functionality of part and ascertain faults of the part/ machine in case of improper function
- PC6.** Ascertain and select tools and materials for the job and make this available for use in a timely manner
- PC7.** Produce component by observing standard procedure
- PC8.** Check the dimensions of the produced components to ensure dimensions are within prescribed limit
- PC9.** Measure all dimensions in accordance with standard specifications and tolerances
- PC10.** Identify Hand Tools for different fitting operations and make the available for use in a timely manner
- PC11.** Prepare the job for Hacksawing, chiselling, filing, drilling, tapping, grinding
- PC12.** Perform basic fitting operations viz., Hacksawing, filing, drilling, tapping and grinding to close tolerance as per specification to make the job.
- PC13.** Check for dimensional accuracy as per standard procedure
- PC14.** Identify various types of gears- spur gear, bevel gear, helical gear, worm and worm wheel, rack and pinion and its calculations
- PC15.** Identify different types of gear used in jute machinery and calculate power transmission takes place through gear
- PC16.** Explain different types of belt used in jute machinery and their speed transmission takes place

Qualification Pack

- PC17.** Calculate Speed ratio through different types of gear and belt drive
- PC18.** Identify different bearing in jute machinery and their application
- PC19.** Handle tools and equipment's as per safety norms
- PC20.** Avoid waste, ascertain unused materials and components for disposal, store the seinan environmentally appropriate manner and prepare for disposa

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Understand working principles of workshop machineries viz. lathe, shaping machine, drilling machine, milling machine and grinding machine
- KU2.** Identify troubleshoot and rectify different faults in the machine and machine parts.
- KU3.** Understand plan work in compliance with standard safety norms
- KU4.** Repair, overhaul and assemble the parts in the machine with the help of blueprint
- KU5.** Understand functionality of part and ascertain faults of the part/ machine in case of improper function
- KU6.** Knowledge on select tools and materials for the job and make this available for use in a timely manner
- KU7.** Produce component by observing standard procedure
- KU8.** Knowledge on Checking the dimensions of the produced components to ensure dimensions are within prescribed limit
- KU9.** Understand measurement of all dimensions in accordance with standard specifications and tolerances
- KU10.** Identify Hand Tools for different fitting operations and make the available for use in a timely manner
- KU11.** Understand the job for Hacksawing, chiselling, filing, drilling, tapping, grinding.
- KU12.** Understand basic fitting operations viz., Hacksawing, filing, drilling, tapping and grinding to close tolerance as per specification to make the job.
- KU13.** Understand dimensional accuracy as per standard procedure
- KU14.** Identify various types of gears- spur gear, bevel gear, helical gear, worm and worm wheel, rack and pinion and its calculations
- KU15.** Identify different types of gear used in jute machinery and calculate power transmission takes place through gear
- KU16.** Knowledge different types of belt used in jute machinery and their speed transmission takes place
- KU17.** Understand Calculation Speed ratio through different types of gear and belt drive
- KU18.** Identify different bearing in jute machinery and their application
- KU19.** Knowledge on tools and equipments as per safety norms
- KU20.** Knowledge on waste reduction, ascertain unused materials and components for disposal

Generic Skills (GS)

User/individual on the job needs to know how to:

Qualification Pack

- GS1.** Read and understand written instructions
- GS2.** Communicate with supervisor appropriately
- GS3.** Write clear and short sentences in simple language for daily reporting.
- GS4.** Talk to others to convey information effectively
- GS5.** Identify the real reason for the problem faced

JUTE/TSC/N3002: Basic maintenance, machine audit and Spare Parts Inventory

Description

Standard maintenance of machineries, machine audit and spare parts Inventory

Scope

The scope covers the following :

- Plan for standard maintenance of machineries as recommended by machine manufacturer

Elements and Performance Criteria

Basic maintenance, machine audit and Spare Parts Inventory

To be competent, the user/individual on the job must be able to:

- PC1.** : Plan maintenance activities based the work flow and deliverables
- PC2.** Follow the maintenance policy of the organization and time available for daily or annual maintenance
- PC3.** Interact with the supervisor in order to understand the work schedules, shifts and delivery dates
- PC4.** Plan the work including time, manpower and material requirement
- PC5.** Co-ordinate with stores and arrange for any consumables
- PC6.** Check the tools and equipment are adequate and are in good condition
- PC7.** Arrange for safety gears and tools to be used while carrying out maintenance
- PC8.** Refer to and use relevant product manuals, job instructions, wiring diagrams and schematics
- PC9.** Maintain electrical equipment such as single, three-phase and direct current power supplies, motors, starters, switch gears, control systems and wiring enclosures
- PC10.** Adopt Proper Inventory Control Measures of Effective parts
- PC11.** Analyse all the VED [viz. vital (V), essential (E), and desirable (D)] in focusing the attention of the management on vital items and ensuring their availability by frequent review and reporting

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Knowledge on planning of maintenance activities based the work flow and deliverables
- KU2.** Understand maintenance policy of the organization and time available for daily or annual maintenance
- KU3.** understand the work schedules, shifts and delivery dates
- KU4.** Understand planning of the work including time, manpower and material requirement
- KU5.** Knowledge of store consumption for any consumables

Qualification Pack

- KU6.** Understand checking of the tools and equipment are adequate and are in good condition
- KU7.** Knowledge on safety gears and tools to be used while carrying out maintenance
- KU8.** Understand relevant product manuals, job instructions, wiring diagrams and schematics

JUTE/TSC/N3003: Electrical Appliance and retrofit Automation / Automated system with Basic Computer Skill

Description

Perform and testing of PLC program

Scope

The scope covers the following :

- Hands on skill on monitor & repair / services system of Electrical Appliance and retrofit Automation / Automated system using electric devices, microprocessors

Elements and Performance Criteria

Electrical Appliance and retrofit Automation / Automated system with Basic Computer Skill

To be competent, the user/individual on the job must be able to:

- PC1.** Describe principle of motor and different types of motor (Idea about HP/ KWh)
- PC2.** Plan work in compliance with standard safety norms
- PC3.** Identify the Phase, Neutral and Earth on power socket, use a tester to monitor AC power
- PC4.** Construct a test lamp and use it to check mains healthiness.
- PC5.** Identify the different types of single range electrical meter for measuring AC & DC parameters
- PC6.** Measure the voltage between phase and ground and rectify Earthing
- PC7.** Identify and test different AC mains cables
- PC8.** Prepare terminations, skin the electrical wires /cables using wire stripper and cutter
- PC9.** Identify types of wires and verify their specification
- PC10.** Measure the gauge of the wire using SWG and outside micro-metre. Refer table and find current carrying capacity of wires.
- PC11.** Identify the type of single range meters and electronic instruments for electrical measurement
- PC12.** Measure the value of resistance, voltage and current using Analog/ digital multimeter
- PC13.** Operate Variable Frequency Drive used to control a 3 phase Induction Motor, VFD & servo motor
- PC14.** Operate various power electronic circuits
- PC15.** Prepare Report on maintenance plan / schedule
- PC16.** Perform record of machine details
- PC17.** Perform process parameter setting /details in MS Office

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

JUTE/TSC/N3004: Lubrication and its schedule

Description

Ensure proper quality of lubricants to be used in various jute mill machineries

Scope

The scope covers the following :

- Quality of lubricants to be used in various jute mill machineries and its application

Elements and Performance Criteria

Lubrication and its schedule

To be competent, the user/individual on the job must be able to:

PC1. Identify types of Lubricants and their characteristics

PC2. Select Industrial Lubricating Oils & Greases

PC3. Identify different lubrication points and lubricants

PC4. Use of correct lubricants and use minimum variety of lube oil in a mill

PC5. Calculate the amount and frequency of Lubrication Application

PC6. Check the storage and handling of lubricants

PC7. Lubricate the equipment using the right amount of lubricant

PC8. Explain test the oil can and grease gun occasionally to ensure that it is functioning properly

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. Understand types of Lubricants and their characteristics

KU2. Knowledge on Industrial Lubricating Oils & Greases

KU3. Identify different lubrication points and lubricants

KU4. Knowledge of use of correct lubricants and use minimum variety of lube oil in a mill

KU5. Understand calculation of amount and frequency of Lubrication Application

KU6. Understand storage and handling of lubricants

KU7. Knowledge of lubricate the equipment using the right amount of lubricant

KU8. Knowledge of test the oil can and grease gun to ensure that it is functioning properly

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. Read and understand written instructions

GS2. Communicate with supervisor appropriately

Qualification Pack

- GS3.** Write clear and short sentences in simple language for daily reporting

DGT/VSQ/N0101: Employability Skills (30 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

PC1. understand the significance of employability skills in meeting the job requirements

Constitutional values - Citizenship

To be competent, the user/individual on the job must be able to:

PC2. identify constitutional values, civic rights, duties, personal values and ethics and environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

PC3. explain 21st Century Skills such as Self-Awareness, Behavior Skills, Positive attitude, self-motivation, problem-solving, creative thinking, time management, social and cultural awareness, emotional awareness, continuous learning mindset etc.

Basic English Skills

To be competent, the user/individual on the job must be able to:

PC4. speak with others using some basic English phrases or sentences

Communication Skills

To be competent, the user/individual on the job must be able to:

PC5. follow good manners while communicating with others

PC6. work with others in a team

Qualification Pack

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

PC7. communicate and behave appropriately with all genders and PwD

PC8. report any issues related to sexual harassment

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

PC9. use various financial products and services safely and securely

PC10. calculate income, expenses, savings etc.

PC11. approach the concerned authorities for any exploitation as per legal rights and laws

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

PC12. operate digital devices and use its features and applications securely and safely

PC13. use internet and social media platforms securely and safely

Entrepreneurship

To be competent, the user/individual on the job must be able to:

PC14. identify and assess opportunities for potential business

PC15. identify sources for arranging money and associated financial and legal challenges

Customer Service

To be competent, the user/individual on the job must be able to:

PC16. identify different types of customers

PC17. identify customer needs and address them appropriately

PC18. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC19. create a basic biodata

PC20. search for suitable jobs and apply

PC21. identify and register apprenticeship opportunities as per requirement

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use basic spoken English language

KU6. Do and dont of effective communication

KU7. inclusivity and its importance

KU8. different types of disabilities and appropriate communication and behaviour towards PwD

KU9. different types of financial products and services

Qualification Pack

- KU10.** how to compute income and expenses
- KU11.** importance of maintaining safety and security in financial transactions
- KU12.** different legal rights and laws
- KU13.** how to operate digital devices and applications safely and securely
- KU14.** ways to identify business opportunities
- KU15.** types of customers and their needs
- KU16.** how to apply for a job and prepare for an interview
- KU17.** apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** communicate effectively using appropriate language
- GS2.** behave politely and appropriately with all
- GS3.** perform basic calculations
- GS4.** solve problems effectively
- GS5.** be careful and attentive at work
- GS6.** use time effectively
- GS7.** maintain hygiene and sanitisation to avoid infection

Qualification Pack

JUTE/TSC/N1006: Maintain health, safety and security at work place (L4)

Description

Maintain health, safety and security at work place

Scope

The scope covers the following :

- Maintain health, safety and security at work place

Elements and Performance Criteria

Maintain health, safety and security at work place

To be competent, the user/individual on the job must be able to:

- PC1.** Comply with health and safety related instructions applicable to the workplace
- PC2.** Use and maintain personal protective equipment such as “ear plug”, “ nose mask”, “head cap” etc., as per protocol
- PC3.** Carry out own activities in line with approved guidelines and procedures
- PC4.** Safely handle and remove waste
- PC5.** Follow environment management system related procedures
- PC6.** Identify and correct (if possible) malfunctions in machinery and equipment
- PC7.** Store materials and equipment in line with organizational requirements
- PC8.** Minimize health and safety risks to self and others due to own actions
- PC9.** Communicate the safety plan to everyone and attach disciplinary rules with the implementation
- PC10.** Monitor the workplace and work processes for potential risks and threat
- PC11.** Undertake first aid, fire-fighting and emergency response training, if asked to do so
- PC12.** Take action based on instructions in the event of fire, emergencies or accidents
- PC13.** Follow organization procedures for shutdown and evacuation when required
- PC14.** Recognise other possible security issues existing in the workplace

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Knowledge on health and safety related instructions applicable to the workplace
- KU2.** Understand use of personal protective equipment such as ear plug, nose mask, head cap etc., as per protocol
- KU3.** Understand activities in line with approved guidelines and procedures
- KU4.** Safely handle and remove waste
- KU5.** Understand environment management system related procedures

Qualification Pack

- KU6.** Identify and correct (if possible) malfunctions in machinery and equipment
- KU7.** Knowledge on health and safety risks to self and others due to own actions
- KU8.** Understand safety plan to everyone and attach disciplinary rules with the implementation
- KU9.** Understand first aid, fire-fighting and emergency response training
- KU10.** Understand organization procedures for shutdown and evacuation when required

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Read and understand written instructions
- GS2.** Communicate with supervisor appropriately
- GS3.** Write clear and short sentences in simple language for daily reporting
- GS4.** Talk to others to convey information effectively
- GS5.** Identify the real reason for the problem faced

JUTE/TSC/N3005: Jute Spinning Machinery operation and its maintenance requirements

Description

Jute Spinning Machinery operation and its maintenance requirements

Scope

The scope covers the following :

- Jute Spinning Machinery operation and its maintenance requirements

Elements and Performance Criteria

Jute Spinning Machinery operation and its maintenance requirements

To be competent, the user/individual on the job must be able to:

- PC1.** Recognize the work flow of the manufacturing process
- PC2.** Demonstrate the working of each machinery used for flow of the manufacturing process
- PC3.** Identify mechanical components of each machinery parts and their function
- PC4.** Exhibit the purpose and specification of tools used in maintenance activity
- PC5.** Co-ordinate the work process by interacting with supervisor to follow the daily production target
- PC6.** List out the consumables used for maintenance such as oil, lubrication and their purpose and types
- PC7.** Identifications of machine faults at different and its rectification
- PC8.** Speed checking at different stages
- PC9.** Machine lubrication system
- PC10.** Dismantle the electrical system to replace faulty modules and perform soldering, crimping, harnessing to secure cables and components
- PC11.** Dismantle the mechanical equipment for maintenance and assemble them
- PC12.** Clean all the components of the machine by removing any accumulated dust, dirt or foreign particles
- PC13.** Tighten any loose fasteners on the equipment
- PC14.** Lubricate the equipment using the right amount of lubricant suggested in the manual
- PC15.** Spreader Maintenance – assembly of gill bars, causes of bar jam
- PC16.** Carding Maintenance – repining and gauging and pin diameter checking, roll former diameter setting
- PC17.** Drawing Maintenance – repining, carriage setting and pressure adjustment of pressing roller.
- PC18.** Spinning Maintenance – Dial gauge, height gauge
- PC19.** Different components – Compressor, Pressure Gauge, Filter Regulator Lubricator, Valves and Actuators
- PC20.** Replace oil or grease as specified in maintenance procedure

Qualification Pack

- PC21.** Re-assemble the equipment to working condition after completing maintenance
- PC22.** Follow the document procedure replaced component, consumables used, other details of maintenance for any reference
- PC23.** Carry out maintenance activities of all equipment at recommended frequency
- PC24.** Clean the work area after completing the maintenance activity
- PC25.** Remove all the tools, consumables used from the work area and return the excess to the stores
- PC26.** Run the equipment and test its functionality in the presence of the concerned authority
- PC27.** Fill in the job completion form and secure acceptance
- PC28.** Follow work plan and complete procedures within the agreed time schedules
- PC29.** Follow company standards in documentation of maintenance activities
- PC30.** Follow maintenance procedure of equipment and faults that can be prevented by maintenance

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Understand work flow of the manufacturing process
- KU2.** Understand working of each machinery used for flow of the manufacturing process
- KU3.** Identify mechanical components of each machinery parts and their function
- KU4.** Knowledge on purpose and specification of tools used in maintenance activity
- KU5.** Knowledge on work process by interacting with supervisor to follow the daily production target
- KU6.** Knowledge on consumables used for maintenance such as oil, lubrication and their purpose and types
- KU7.** Identifications of machine faults at different and its rectification
- KU8.** Understand Speed checking at different stages
- KU9.** Understand Machine lubrication system
- KU10.** Knowledge on electrical system to replace faulty modules and perform soldering, crimping, harnessing to secure cables and components
- KU11.** Knowledge the mechanical equipment for maintenance and assemble them
- KU12.** Understand Drawing Maintenance repining, carriage setting and pressure adjustment of pressing roller
- KU13.** understand Spinning Maintenance Dial gauge, height gauge
- KU14.** Knowledge different components Compressor, Pressure Gauge, Filter Regulator Lubricator, Valves and Actuators
- KU15.** Understand oil or grease as specified in maintenance procedure
- KU16.** Re-assemble the equipment to working condition after completing maintenance
- KU17.** Knowledge on document procedure replaced component, consumables used, other details of maintenance for any reference
- KU18.** Understand maintenance activities of all equipment at recommended frequency
- KU19.** Understand Cleaning of work area after completing the maintenance activity

Qualification Pack

- KU20.** Knowledge of all the tools, consumables used from the work area and return the excess to the stores
- KU21.** Knowledge of the equipment and test its functionality in the presence of the concerned authority
- KU22.** Understand job completion form and secure acceptance
- KU23.** Understand work plan and complete procedures within the agreed time schedules
- KU24.** Knowledge on standards in documentation of maintenance activities
- KU25.** Understand maintenance procedure of equipment and faults that can be prevented by maintenance

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Read and understand written instructions
- GS2.** Communicate with supervisor appropriately
- GS3.** Write clear and short sentences in simple language for daily reporting
- GS4.** Identify the real reason for the problem faced
- GS5.** Apply problem solving approaches in different situations

JUTE/TSC/N3006: Jute Weaving Machinery operation and its maintenance requirements

Description

Jute Weaving Machinery operation and its maintenance

Scope

The scope covers the following :

- Jute Weaving Machinery operation and its maintenance

Elements and Performance Criteria

Jute Weaving Machinery operation and its maintenance requirements

To be competent, the user/individual on the job must be able to:

- PC1.** Recognize the work flow of the manufacturing process
- PC2.** Demonstrate the working of each machinery used for flow of the manufacturing process
- PC3.** Identify mechanical components of each machinery parts and their function
- PC4.** Exhibit the purpose and specification of tools used in maintenance activity
- PC5.** Co-ordinate the work process by interacting with supervisor to follow the daily production target
- PC6.** List out the consumables used for maintenance such as oil, lubrication and their purpose and types
- PC7.** Identifications of machine faults at different and its rectification
- PC8.** Carry out Speed checking at different stages
- PC9.** Identify Machine-wise lubrication point and application
- PC10.** Dismantle the electrical system to replace faulty modules and perform soldering, crimping, harnessing to secure cables and components
- PC11.** Dismantle the mechanical equipment for maintenance and assemble them
- PC12.** Carry out Cleaning of all the components of the machine by removing any accumulated dust, dirt or foreign particles
- PC13.** Carry out Tighten any loose fasteners on the equipment
- PC14.** Lubricate the equipment using the right amount of lubricant suggested in the manual
- PC15.** Carry out Checking of Spool winding machine - Drum diameter and smoothness etc.
- PC16.** Carry out Checking of Cop winding machine - Cop pond condition etc.
- PC17.** Carry out Drawing Maintenance – repining, carriage setting and pressure adjustment of pressing roller.
- PC18.** Carry out Checking of Beaming machine - Leveling
- PC19.** Carry out Checking of Starch machine - Starch roller condition
- PC20.** Carry out Checking of Loom - Catcher pin setting
- PC21.** Carry out Checking of Damping - Nozzle and water flow

Qualification Pack

- PC22.** Check- Paper bowl condition
- PC23.** Check Cutting blade condition
- PC24.** Check Hemming - Needle and looper setting
- PC25.** Check Hirackle - Needle looper and spreader setting
- PC26.** Check Bale-Press - Ram lifting
- PC27.** Different components - Compressor, Pressure Gauge, Filter Regulator Lubricator, Valves and Actuators
- PC28.** Replace oil or grease as specified in maintenance procedure
- PC29.** Re-assemble the equipment to working condition after completing maintenance
- PC30.** Follow the document procedure replaced component, consumables used, other details of maintenance for any reference
- PC31.** Carry out maintenance activities of all equipment at recommended frequency
- PC32.** Clean the work area after completing the maintenance activity
- PC33.** Remove all the tools, consumables used from the work area and return the excess to the stores
- PC34.** Run the equipment and test its functionality in the presence of the concerned authority
- PC35.** Fill in the job completion form and secure acceptance
- PC36.** Follow work plan and complete procedures within the agreed time schedules
- PC37.** Follow company standards in documentation of maintenance activities
- PC38.** Follow maintenance procedure of equipment and faults that can be prevented by maintenance

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** Understand work flow of the manufacturing process
- KU2.** Knowledge on working of each machinery used for flow of the manufacturing process
- KU3.** Identify mechanical components of each machinery parts and their function
- KU4.** Understand the purpose and specification of tools used in maintenance activity
- KU5.** Understand the work process by interacting with supervisor to follow the daily production target
- KU6.** Understand the consumables used for maintenance such as oil, lubrication and their purpose and types
- KU7.** Identifications of machine faults at different and its rectification
- KU8.** Knowledge to Carry out Speed checking at different stages
- KU9.** Identify Machine-wise lubrication point and application
- KU10.** Understand the electrical system to replace faulty modules and perform soldering, crimping, harnessing to secure cables and components
- KU11.** Knowledge on dismantle the mechanical equipment for maintenance and assemble them
- KU12.** knowledge to carry out Cleaning of all the components of the machine by removing any accumulated dust, dirt or foreign particles

Qualification Pack

- KU13.** Knowledge to Carry out Tighten any loose fasteners on the equipment
- KU14.** knowledge to lubricate the equipment using the right amount of lubricant suggested in the manual
- KU15.** Understand Checking of Spool winding machine - Drum diameter and smoothness
- KU16.** Understand Checking of Cop winding machine - Cop pond condition
- KU17.** Knowledge drawing Maintenance repining, carriage setting and pressure adjustment of pressing roller
- KU18.** Understand Checking of Beaming machine - Levelling
- KU19.** Understand Checking of Starch machine - Starch roller condition
- KU20.** Understand Checking of Loom - Catcher pin setting
- KU21.** Understand Checking of Damping - Nozzle and water flow
- KU22.** Understand Checking of Paper bowl condition
- KU23.** Understand Checking of Cutting blade condition
- KU24.** Knowledge of Hemming - Needle and looper setting
- KU25.** Knowledge on Hirackle - Needle looper and spreader setting
- KU26.** Understand Bale-Press - Ram lifting
- KU27.** Understand working of different components like Compressor, Pressure Gauge, Filter Regulator Lubricator, Valves and Actuators
- KU28.** Understand oil or grease replace as specified in maintenance procedure
- KU29.** Knowledge on re-assemble the equipment to working condition after completing maintenance
- KU30.** Understand document procedure replaced component, consumables used, other details of maintenance for any reference
- KU31.** Understand maintenance activities of all equipment at recommended frequency
- KU32.** Understand Cleaning of the work area after completing the maintenance activity
- KU33.** Understand all the tools, consumables used from the work area and return the excess to the stores
- KU34.** Knowledge of the equipment and test its functionality in the presence of the concerned authority
- KU35.** Understand work plan and complete procedures within the agreed time schedules
- KU36.** Knowledge on company standards in documentation of maintenance activities
- KU37.** Understand maintenance procedure of equipment and faults that can be prevented by maintenance

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** Read and understand written instructions
- GS2.** Communicate with supervisor appropriately
- GS3.** Write clear and short sentences in simple language for daily reporting
- GS4.** Talk to others to convey information effectively

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Assessment System Overview:

- Batches assigned to IJIRA for conducting the assessment online through Portal with two probable dates for Assessment
- IJIRA deploys the ToA certified Assessor for executing the assessment
- IJIRA monitors the assessment process & records

2. Testing Environment:

- Check the Assessment location, date and time
- If the batch size is more than 30, then Assessment will spill over to consecutive days.
- Check that the allotted time to the candidates to complete Theory & Practical Assessment is correct.

3. Assessment Quality Assurance levels/Framework:

Qualification Pack

- Question bank is created by the Subject Matter Experts(SME)are verified by the other SME
- Questions are mapped to the specified assessment criteria
- Assessor must be To Acetified.

4. Types of evidence or evidence-gathering protocol:

- Reporting of the assessor from assessment location
- Centre photographs with signboards and scheme specific branding

5. Method of verification or validation:

- Surprise visit to the assessment location

6. Method for assessment documentation, archiving, and access

- Hard copies of the documents are stored

Minimum Aggregate Passing % at QP Level : 50

(Please note: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Assessment Weightage

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
